3. Article XVIII of the GLA describes the procedures to be followed in amending the technical regulations annexed to the agreement. It provides for the amendment to be effected by an exchange of diplomatic notes between the contracting governments and such amendments shall enter into force on the first day of February of the year following the exchange of notes. We are currently in the process of working out several amendments to the technical regulations with Canada. It is anticipated that these changes will be agreed to by both countries this year and hence February 1, 1979, will be the effective date. In view of the limited time available, this notice of proposed rulemaking is being issued while the GLA amendment process is still active. Is is not anticipated that there will be any significant changes to the proposal contained herein when final agreement on the amendments to the GLA is reached.

4. The general substance of the rule amendments in the appendix is as follows:

a. Add a requirement that all ships over 38 meters (124 feet) in length be equipped with a second VHF installation which fully complies with the rules;

b. The required frequencies are amended to allow the ship to install the necessary ship movement frequencies for its area of operation;

c. Regulation 15 (bis) (c), chapter IV of the Safety Convention establishes a 10-watt FR carrier power minimum power requirement applicable to foreign ships. We believe that this 10-watt minimum requirement is reasonable and propose to make it applicable to U.S. ships; and

d. Amend the definition of the Great Lakes to relect the connecting and tributary waters contained in the new regulation 8.

5. The proposed amendments, as set forth below, are issued pursuant to the authority contained in the Agreement Between the United States of America and Canada for Promotion of Safety on the Great Lakes by Means of Radio, 1973, and in sections 4(i) and 303 (c), (e), and (r) of the Communications Act of 1934, as amended.

6. Pursuant to the applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before October 27, 1978, and reply comments on or before November 6, 1978. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in the proceeding, the commission may also take into account other relevant information before it, in addition to the specific comments invited by this notice.

7. In accordance with the provisions of § 1.419 of the Commission's rules, an original and five copies of all statements, briefs, or comments shall be furnished the Commission. All comments received in response to this notice of proposed rulemaking, will be available for public inspection in the Docket Reference Room in the Commission's offices in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

Part 83 of chapter I of title 47 of the Code of Federal Regulations is amended to read as follows:

1. The introductory portion of § 83.536 which precedes paragraph (a) is amended to define applicable waters of the Great Lakes and paragraphs (a) and (b) are amended to reflect the lengths in meters as follows:

§ 83.536 Applicability to vessels.

The Agreement Between the United States of America and Canada for Promotion of Safety on the Great Lakes by Means of Radio, 1973, applies to vessels of all countries when navigated on the Great Lakes. The Great Lakes agreement defines the Great Lakes as "all waters of Lakes Ontario, Erie, Huron (including Georgian Bay), Michigan, Superior, their connecting and tributary waters and the River St. Lawrence as far east as the lower exit of the St. Lambert Lock at Montreal in the Province of Quebec, Canada, but shall not include such of the connecting and tributary waters as may be specified in the technical regulations." The technical regulations do not include any connecting and tributary waters except the St. Mary's River, the St. Clair River, Lake St. Clair, the Detroit River, and the Welland Canal. A vessel to which the Great Lakes agreement applies and which falls into the specific categories by paragraph (a), (b), or (c) of this section and not excepted by paragraph (d) or (e) of this section shall comply with this subpart while navigated on the Great Lakes.

(a) Every vessel of 20 meters (65 feet) or over in length (measured from end to end over the deck, exclusive of sheer).

(b) Every vessel engaged in towing another towing vessel or floating object, except:

(1) Where the maximum length of the towing vessel, measured from end to end over the deck exclusive of sheer, is less than 8 meters (26 feet), and the length or breadth of the tow, exclusive of the towing line is less than 20 meters (65 feet);

(2) Where the vessel towed complies with this subpart;

(3) Where the towing vessel and tow are located within a booming ground (an area in which logs are confined); or

(4) Where the tow has been undertaken in an emergency and neither the towing vessel nor the tow can comply with this part.

* * * * *

2. Section 83.539 is amended by amending paragraph (a), adding a new paragraph (b), amending existing paragraph (b) and redesignating as (c), and redesignating existing paragraph (c) as (d) to read as follows:

§ 83.539 Radiotelephone installation.

(a) Each vessel of the United States of less than 38 meters (124 feet) registered length while subject to the requirements of the Great Lakes radio agreement shall be fitted with a radiotelephone in effective operating condition meeting the provisions of this subpart in addition to the provisions of such other rules in this part, governing ship stations using telephony, as are applicable.

(b) Each vessel of the United States of 38 meters (124 feet) or more while subject to the requirements of the Great Lakes radio agreement shall be fitted with two VHF radiotelephone installations in effective operating condition meeting the provisions of this subpart in addition to the provisions of such other rules in this part, governing ship stations using telephony, as are applicable. The second VHF installation shall be electrically separate from the first VHF installation, however, both may be connected to the main source of energy provided one installation can be operated from a separate source of energy located as high as practicable on the vessel.

(c) The term "radiotelephone installation," for the purpose of the Great Lakes agreement, means a ship radio station (including the source of power necessary to energize the apparatus) capable of transmitting and receiving speech on at least the following VHF channels:

Channel 16—156.8 MHz—Distress, safety, and calling.

Channel 6—156.3 MHz—Primary intership.

Those of the following vessel traffic service channels appropriate to the vessel area of operation: Channel 11—156.55 MHz, channel 12—156.60 MHz, channel 13—156.65 MHz, or channel 14—156.7 MHz.

One public correspondence frequency appropriate to the area of operation.

One channel for receiving marine navigational warnings for the area of operation.

Such other frequencies as are required for their service. Nothing contained in this paragraph shall be construed to

require or prohibit the availability of other frequencies for use by the same "radiotelephone installation" for com-

the comments received, the Commission has decided not to promulgate specific regulations. Rather, the

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and

require or prohibit the availability of other frequencies for use by the same "radiotelephone installation" for communication authorized by this part on other frequencies.

(d) • • •

3. Section 83.542(b) is amended to reduce the minimum power requirement as follows:

§ 83.542 Radiotelephone transmitter.

• • • • • •

(b) The transmitter shall be of a type which has been demonstrated in the process of type acceptance as being capable of delivering a carrier power of at least 10 watts, but not more than 25 watts, on each of the frequencies 156.8 MHz and 156.3 MHz into 50 ohms effective resistance, when operated with its applied primary supply voltage. The transmitter shall be capable of readily reducing the carrier power to 1 watt or less.

INTERSTATE COMMERCE COMMISSION

[49 CFR Chapter X]

[Ex Parte No. MC-116]

CONSIDERATION OF RATES IN OPERATING RIGHTS APPLICATION PROCEEDINGS (GENERAL POLICY STATEMENT)

Withdrawal of Proposed Rulemaking

AGENCY: Interstate Commerce Commission.

ACTION: Withdrawal of proposed rulemaking.

SUMMARY: The Commission published a notice of proposed rulemaking on February 24, 1978, in this proceeding (43 FR 7675). Upon consideration of the comments received, the Commission has decided not to promulgate specific regulations. Rather, the Commission has issued a proposed general policy statement setting forth guidelines for the consideration of rates in operating rights application proceedings (43 FR 42097, September 19, 1978). The public is invited to comment on the proposed policy statement.

ADDRESSES: Comments should be filed with the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423.

DATES: Comments must be received by October 19, 1978.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak or Harvey Gobetz, 202-275-7693.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc. 78-27061 Filed 9-25-78; 8:45 am]

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food Safety and Quality Service

HUMANELY SLAUGHTERED LIVESTOCK

Identification of Carcasses; List of Establishments

Pursuant to section 4 of the Act of August 27, 1958 (7 U.S.C. 1904), and the statement of policy thereunder in 9 CFR 391.1, the following table lists the establishments operating under Federal inspection pursuant to the Federal Meat Inspection Act, as amended (21 U.S.C. 601 et seq.), which have been officially reported as using humane methods of slaughter and incidental handling of the species of livestock respectively designated for such establishments in the table. Additions to and deletions from this list will be made from time to time as the facts may warrant by notices published in the FEDERAL REGISTER. The establishment number given with the name of the establishment is branded on each carcass of livestock inspected and passed at that establishment. The table should not be understood to indicate that all species of livestock slaughtered at a listed establishment are slaughtered and handled by humane methods unless all such species are listed for that establishment in the table, nor should the table be understood to indicate that the affiliates of any listed establishment use only humane methods.

Forest Service

REFORESTATION AND TIMBER STAND IMPROVEMENT POLICY

Modification

AGENCY: Forest Service, USDA.

ACTION: Proposed policy.

SUMMARY: This is a Forest Service proposed policy modification for reforestation and timber stand improvement (TSI). The National Forest Management Act of 1976, Pub. L. 94-588, states it is the policy of the Congress that National Forest land be maintained in appropriate forest cover, degree of stocking, rate of growth, and condition of stand to secure the maximum benefits for all resource uses. The act authorizes reforestation and TSI funding not only for timber production, but for other resource uses. The act also requires certain reports be submitted to the Congress annually, including the total acreage of needed work and estimated costs of planned work, and certification of completed work. This proposal includes Forest Service Manual (FSM) changes.

Copies of the proposed Manual changes, along with field instructions and report formats, may be reviewed at all Forest Service Regional Headquarters.

DATE: Comments must be received on or before November 13, 1978.

ADDRESS: Submit comments to: John R. McGuire, Chief, Forest Service, Department of Agriculture, P.O. Box 2417, Washington, D.C. 20013.

All written submissions made pursuant to this notice will be available for public inspection in the Timber Management Staff, South Agriculture Building, Room 3207, Washington, D.C., during regular business hours.

FOR FURTHER INFORMATION, CONTACT:

Robert E. Gillespie, Timber Management Staff, Forest Service, Department of Agriculture, P.O. Box 2417, Washington, D.C. 20013, 202-447-7495

2472—REFORESTATION

Reforestation includes tree planting and seeding, and measures to obtain natural regeneration. The work is done on National Forests to produce timber and other forest products, protect watersheds, prevent erosion, and improve other social and economic values of the forests, such as wildlife, recreation and natural beauty.

2472.01—Authority. Basic authority for reforestation is given in the following acts (FSM 1021):

(1) Reforestation on National Forest lands:

(a) Organic Administration Act of June 4, 1897 (30 Stat. 34, as supplemented and amended; 16 U.S.C. 473-478, 479-482, 551).

(b) Knutson-Vandenberg Act of June 9, 1930 (46 Stat. 527, as amended; 16 U.S.C. 576-576b).

(c) Multiple-Use Sustained-Yield Act of June 12, 1960 (74 Stat. 215, as amended; 16 U.S.C. 528-531).

(d) Supplemental National Forest Restoration Fund Act of September 18, 1972 (86 Stat. 678; 16 U.S.C. 576c-576e).

(e) Forest and Rangeland Renewable Resources Planning Act of August 17, 1974 (88 Stat. 476, as amended; 16 U.S.C. 1600-1614).

(f) National Forest Management Act of 1976 (90 Stat. 2949; 16 U.S.C. 1600).

(g) Bankhead-Jones Farm Tenant Act of July 22, 1937 (50 Stat. 525, as amended; 7 U.S.C. 1010-1012).

(2) Reforestation on National Forest lands and other lands under the administration or control of the Forest Service—Anderson-Mansfield Reforestation and Revegetation Act of October 11, 1949 (63 Stat. 762; 16 U.S.C. 581j, 581k).

2472.02—Objectives. As stated in the National Forest Management Act, the objectives on all forested lands in the National Forest System shall be to: (1) Maintain an appropriate forest cover with species of trees, degree of stocking, rate of growth, and conditions of stand designed to secure maximum benefits of multiple use sustained yield management.

Where:

(a) Forest land is land at least 10 percent occupied by forest tree species of any size, or land formerly having had such tree cover and not devoted to nonforest use.

(b) Appropriate forest cover is forested lands composed of a variety of plant communities similar to those existing in an area, distributed in a manner reflecting their natural occurrence. It includes seral and climax stages. Forbs, grasses, and shrubs in their proper ratios are important components of the forest cover.

(c) Trees are woody perennial plants typically large when mature and with a single, well-defined stem carrying a more or less definite crown.

(d) Degree of stocking is the number of trees on a given area in relation to what is considered to be the optimum to meet multiple use management objectives.

(e) Rate of growth is the increase in diameter, basal area, height, or volume of individual trees or stands in a given time period.

(f) Manipulation of stocking is designed to secure maximum benefits of multiple use sustained yield management for individual stands as determined by silvicultural prescriptions which consider all resources.

(2) Improve the quality and yield of new timber stands by controlling the source and genetic quality of seeds and trees used on reforestation projects.

(3) Develop and demonstrate successful reforestation methods and techniques and resulting benefits which will serve as an encouragement to private landowners.

2472.03—Policy. (1) Until such time as a unit of the National Forest System is managed under plans developed in accordance with the National Forest Management Act, the management of such unit may continue under existing land and resource plans as long as the plan is not in conflict with the National Forest Management Act.

(2) Reforestation for all resource uses and/or activities will be based on silvicultural prescriptions to meet specific resource and site requirements.

(3) Areas to be reforested with appropriated or Knutson-Vandenberg (K-V) Act funds shall be separated into two categories of reforestation needs as follows:

Backlog.—Consists of all acres in need of reforestation, as of July 1, 1975, by planting, seeding, and site preparation for natural regeneration for any purpose except planting ornamentals at developed sites. This definition was established to provide a common basis for determination and reporting of backlog to Congress as required by the Accelerated Reforestation Act of 1972.

Current.—Consists of all acreas in need of reforestation which have become understocked due to natural or manmade causes, or regeneration cutting since July 1, 1975.

(4) All reforestation backlog areas will be programed for reforestation (by natural or artificial means) by October 1, 1984. Forest Supervisors will prepare statements explaining why any backlog areas cannot be reforested by that time. Reasons for noncompliance with the 1984 deadline are lack of access to an area, lack of technology to reforest an area, pending classification of wilderness study areas, nonforest use, or lack of funds. All regeneration areas are to be examined for certification as meeting minimum reforestation standards established by the Regional Forester for timber or other resource objectives.

(5) Regeneration examinations will be made, as a minimum, following the first and third growing seasons after

reforestation treatment. If the area fails to meet these standards after either the first (except for natural regeneration) or third year exam, it will be returned to current needs and promptly scheduled for additional corrective treatment as necessary.

(6) Because the current needs created in 1 year normally cannot all be reforested in the following year, the current needs inventory will be greater than the program for any 1 year. After 1984 the inventory of needs should be greater than approximately three times the average annual reforestation program.

(7) As stated in the National Forest Management Act of 1976, regeneration cutting will not be done if reforestation cannot be assured within 5 years. The reforestation method—namely, planting, seeding, or natural regeneration—must be prescribed that will accomplish reforestation objectives within the maximum time constraints. In shelterwood and seed tree systems, the regeneration period shall begin with the seed cut. The 3-year certification will begin with the removal cut.

(8) Take full advantage of the K-V Act as amended (FSM 2477) to reforest timber sale areas.

(9) Reforestation of sale areas which cannot be financed with K-V funds should compete on an equal basis with other forest lands for use of appropriated reforestation funds as long as the 5-year time constraint is met.

(10) Areas to be reforested with appropriated funds should be programed to action plans on an individual resource priority basis. Wherever possible and practicable, values should be assigned for the benefits and returns for all resource purposes and uses, and be included in the economic analysis. If this is not feasible, they must be given full and appropriate consideration as intangible values and benefits. The Regional Forester will develop guidelines for assessing intangible benefits based on Washington Office advice.

(11) Reforestation primarily for purposes other than timber production, such as for unproductive forest land which may need reforestation for watershed purposes, will be financed from the same appropriated funds as timber reforestation needs and activities, but will be identified under appropriate functional codes according to procedures established in 6553.12b.

(12) Regional Foresters will comply with FSM 2496 instructions for reporting reforestation "backlog" and "current" acreage treatment needs, schedules for completion of treatments, and funding requests to implement these treatments. Needs reported shall include funds necessary to prepare sites, plant trees, build fences, or otherwise treat to exclude livestock and adverse wildlife from regeneration areas, and to otherwise improve growing forests to secure planned production of trees and other multiple use values.

(13) Seed and seedlings of exotic tree species or of native species from an offsite source (zone), will not be used to reforest an area or site. Two exceptions to this policy are the use of seed or seedlings of nonindigenous species or seed origins:

(a) Which, as a result of scientifically conducted tests, have proven adaptable to the area and site in question and are capable of producing the kind and quality of trees desired on the area to secure maximum multiple use benefits.

(b) Which have proven adaptable in tests or administrative studies carefully planned and conducted by, or in cooperation with research or knowledgeable scientists outside the Forest Service.

(14) Encourage States and private organizations to produce all the seed and seedlings they need to reforest non-Federal lands. Sell seed and seedlings to political subdivisions of States only through State foresters and when surplus to Forest Service needs.

(15) Utilize contractual services for site preparation, planting, seeding, regeneration release, and seed procurement to the fullest extent practicable where effective and efficient. Planning and administration of these activities should be done by Forest officers. Force account and contract work must be done to the same quality standards.

(16) Provide for advance review by appropriate State and Federal agencies for (a) doing any work such as animal control or (b) using chemical pesticides that are subject to State or Federal regulations (FSM 5203.52). Animal pest control activities must be done in accordance with current instructions on pesticide use in cooperation with the U.S. Fish and Wildlife Service.

(17) Reforestation monies not expended during the fiscal year in which they were appropriated may be carried over to the following fiscal year provided identified targets are attached to the funds. Otherwise they will be transferred to the Washington Office for further allocation.

(18) Inform minorities and women about the opportunities in contracting for reforestation work.

2476—TIMBER STAND IMPROVEMENT

2476.01—Authority. Basic authority for timber stand improvement operations on the National Forests is given in regulations 36 CFR 223.3 and 36 CFR 223.11 and in the following Acts: (FSM 1021)

(1) Organic Administration Act of June 4, 1897 (30 Stat. 34, as supplemented and amended; 16 U.S.C. 473-478, 479-482, 551).

(2) Knutson-Vandenberg Act of June 9, 1930 (46 Stat. 527, as amended; 16 U.S.C. 576-576b).

(3) Multiple-Use Sustained-Yield Act of June 12, 1960 (74 Stat. 215, as amended; 16 U.S.C. 528-531).

(4) Forest and Rangeland Renewable Resources Planning Act of August 17, 1974 (88 Stat. 476, as amended; 16 U.S.C. 1600-1614).

(5) National Forest Management Act of October 22, 1976 (90 Stat. 2949; 16 U.S.C. 1600).

2476.02—Objectives. (1) Design silvicultural treatments to insure that all forested land is maintained in appropriate forest cover with species of trees, degree of stocking, rate of growth, and conditions of stand designed to secure the maximum benefit of Multiple Use Management. Definition in FSM 2472.02.

(2) Increase the growth rate and/or improve the quality of trees by cultural treatments in young timber stands consistent with multiple use sustained yield management objectives.

(3) Prevent damage to trees by insects, diseases, drought, windthrow, and other causes. Prevent the buildup and spread of tree diseases and harmful insects by maintaining a diversity of plant and animal communities similar to that existing in the area. Maintain a high level of tree vigor, proper stand densities, and desirable plant species.

(4) Treat stands to maintain or improve aesthetics, recreation, fish and wildlife habitat, range, timber, soil, watershed, and other National Forest values, to the extent recognized in land management plans for the areas. Treatments must be consistent with multiple use sustained yield management objectives.

(5) Based on existing scientific knowledge, develop and demonstrate the benefit of improved methods and techniques of timber stand improvement for all resource purposes as an encouragement to private landowners.

2476.03—Policy. (1) Until such time as a unit of the National Forest System is managed under plans developed in accordance with the National Forest Management Act, the management of such unit may continue under existing land and resource management plans.

(2) Timber stand improvement can be carried out on all forested land to improve multiple use values. Timber stand improvement for purposes other than timber production will be financed from the same appropriation as TSI for timber production, but will be identified under appropriate functional codes in the program-planning budgeting process.

(3) Timber stand improvement for all resource uses and/or activities will be based on cultural treatments prescribed to meet specific resource objectives. Timber stand improvement prescribing the methods, techniques, and timing of silvicultural activities are some of the most important tasks connected with proper management of

ing public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set

4. In the event no objections are filed to any part of this order, we will consider all further procedural steps relating to such part or parts to have

conclude that the elimination of restrictions on Eastern's operations in the Portland-Tampa market is required by the public convenience and

V 43 / 187 SEP 26 78 V 4

(3) Timber stand improvement for all resource uses and/or activities will be based on cultural treatments prescribed to meet specific resource objectives and site capabilities.

(4) Timber stand improvement objectives for all resource needs and purposes will be accomplished wherever possible by commercial sale of timber and other forest products.

(5) Timber stand improvement will be accomplished by contract to the extent it is the most cost effective method consistent with resource objectives.

(6) Promote utilization of wood and other products that can be salvaged from trees designated to be cut or killed in timber stand improvement operations, unless the dead material has in-place value for other resources.

(7) All silvicultural treatment programs will be based on multiresource needs and priorities.

(8) Follow established procedures for (a) doing any work such as animal control (FSM 2650) or (b) using chemical pesticides that are subject to State or Federal regulations (FSM 5203.52).

(9) Cooperate with private organizations, individuals, and other public agencies whose interests are affected by timber stand improvement operations and associated multiresource management. Appraise them of the nature and purpose of the work and give appropriate recognition to their interests in developing programs and project specifications.

(10) Pruning for quality improvement of timber products on productive forest lands should not be done unless demand-supply analysis demonstrates a need for this type material. Pruning may also need to be carried out to meet other resource objectives.

(11) Forest fertilization should be considered on an operational scale only where soil and hydrologic analysis indicates reasonable assurance of the desired response by the species or forest type concerned, and the treatment is within the multiple use direction for the site.

(12) Take full advantage of the Knutson-Vandenberg Act, as amended by the National Forest Management Act (FSM 1021), to finance needed cultural treatments and multiple use activities on areas cutover by timber sales (FSM 2477.03). TSI of sale areas which cannot be financed with K-V funds will compete on an equal basis with other forest lands for use of appropriated TSI funds.

(13) Inform minorities and women about the opportunities in contracting for timber stand improvement work.

2478—Silvicultural Examinations and Prescriptions

Examining National Forest lands, diagnosing treatment needs, and prescribing the methods, techniques, and timing of silvicultural activities are some of the most important tasks connected with proper management of the National Forests. The examination requires the careful and competent gathering of detailed data on the resources and conditions existing in the area. The prescription requires a high degree of professional skill by a trained silviculturist thoroughly familiar with local climatic and edaphic conditions, the silvics of the species concerned, the land management guidelines pertaining to the area, the management alternatives and resources available, cooperation with other resource specialists, and pertinent Forest Service Manual instructions and policies. It is imperative that these requirements be met in every area in which a silvicultural practice is performed.

2478.01—Authority. Authority to make silvicultural examinations, to diagnose treatment needs and prescribed silvicultural activities is inherently implied in the basic authorizations to harvest timber and carry out reforestation and stand improvement projects on National Forest land (FSM 2401).

2478.02—Objectives. (1) Secure accurate land, vegetation and other resource data on each specific stand area.

(2) Diagnose treatment needs.

(3) Prescribe the specific techniques and timing of the activities necessary to accomplish the silvicultural treatments recommended to meet the land management objective of the area and describe the consequences of feasible alternative treatments.

(4) Develop an orderly program of land treatments.

2478.03—Policy. (1) Silvicultural examinations, diagnosis of treatment needs, and prescription detailing the technique and timing of the silvicultural activity to be used are required procedures prior to initiating any silvicultural treatment on National Forest lands.

(2) Complete, detailed prescriptions with full interdisciplinary input and Environmental Analysis Report (EAR) should only be prepared where stand conditions are not likely to change significantly prior to implementation of the treatment.

(3) Establish regular periodic stand examination and silvicultural diagnosis procedures on a compartment basis in order to maintain orderly program of work.

(4) All silvicultural diagnosis prescriptions will be made or reviewed by trained and certified silviculturists. Regional Foresters are responsible for establishing standards necessary for certification of silviculturists.

[6320-01]

[Docket No. 33406; Order 78-9-57]

BRANIFF AIRWAYS, INC.

Order To Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 9

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 13th day of September 1978.

By Order 78-9-56, issued concurrently with this Order, the Board has proposed to realine the domestic route system of Northwest Airlines in a manner which would, among other things, give Northwest unrestricted authority in one minor market—Portland-Tampa [1]—where Braniff also holds restricted authority: One-stop via Dallas/Fort Worth.[2] As discussed in Orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Braniff as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Braniff's operations in the Portland-Tampa market is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final, with answers due within 10 days thereafter. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly: 1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending certificate for Route 9 so as to remove operating restrictions in the Portland-Tampa market;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than October 19, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-9-56, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 30, 1978;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board; [4]

4. In the event no objections are filed to any part of this order, we will consider all further procedural steps relating to such part or parts to have been waived, and the case will be submitted to the Board for final action; and

5. We shall serve a copy of this order upon all persons listed in Appendix I of Order 78-9-56.

We shall publish this order in the Federal Register.

By the Civil Aeronautics Board.

[6320-01]

[Docket No. 33409; Order 78-9-58]

EASTERN AIR LINES, INC.

Order To Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 10

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 13th day of September 1978.

By Order 78-9-56, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Northwest Airlines in a manner which would, among, other things, give Northwest unrestricted authority in one minor market—Portland-Tampa [1]—where Eastern also holds restricted authority: 3 stops via Omaha, St. Louis, and Huntsville.[2] As discussed in Orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Eastern as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent, with our tentative findings and conclusions set forth in Orders 78-4-109, 77-11-74, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Eastern's operations in the Portland-Tampa market is required by the public convenience and necessity, and is consistent with the Board's policy of removing restricions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final, with answers due within 10 days thereafter. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with opportunity for oral cross-examination is requesed, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly: 1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Eastern's certificate for Route 10 so as to remove operating restrictions in the Portland-Tampa market;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than October 19, 1978, file with the board and serve upon all persons listed in Appendix I of Order 78-9-56, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 30, 1978;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board; [4]

4. In the event no objections are filed to any part of ths order, we will consider all further procedural steps relating to such part or parts have

[Docket Nos. 32770, etc.; Order 78-9-61]

EASTERN AIR LINES, INC., ET AL.

Order Regarding Atlanta-Memphis Service Investigation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 13th day of September 1978.

On May 13, 1978, Eastern Air Lines applied to suspend service at Memphis for a 5-year period, pursuant to section 401(j) of the act. Eastern claims that its Memphis traffic dropped drastically after the termination of its interchange with Braniff,[1] causing it to suffer losses and to cut its service to one daily roundtrip.[2] It anticipates a net savings once its service is suspended and intends to use the Memphis-Atlanta aircraft in more productive ways elsewhere. Eastern also asserts that the suspension will not inconvenience the public since Delta provides 17 nonstop daily flights while Southern offers 17 one- and two-stop flights and may replace Eastern, since it has applied both for an exemption[3] to operate two nonstop round trips and for a certificate amendment.[4]

On May 19, 1978, Southern Airways filed concurrent applications for an exemption *pendente lite* and permanent certificate authority to operate nonstop Atlanta-Memphis service. It also filed a petition to show cause why its certificate should not be so amended. Southern relies on Eastern's imminent withdrawal, points out that it has operated one-stop service for a number of years, and argues that the market is one of the heaviest traveled in the Southeast and is entitled to the continuance of competitive nonstop service, which it can provide as a supplement to or replacement for Eastern. It points to its proposed schedule, which will fill voids in existing departure times, as a further justification for our grant of its applications. Finally, it believes it can provide two round trips profitably, without subsidy, and that its proposed operations will have no adverse impact on either Eastern or Delta.

Piedmont also seeks a certificate amendment by show cause, removing its one-stop restriction between Atlanta and Memphis, and an exemption *pendente lite* to operate two daily nonstop round trips.[6] It asks that we grant both it and Southern the requested exemption and certificate authority, since the two nonstop round trips both propose will completely replace Eastern's previous service. It further supports its exemption request by stating that it intends to offer a 40-percent off-peak fare, as well as other promotional fares, that it will provide first single-plane service to other markets, and that it can operate the route profitably.

Three other carriers, Braniff, Frontier, and Texas International, have applied for authority to serve Atlanta-Memphis.[6] Braniff and Frontier oppose both Piedmont's and Southern's requests for exemptions, on the grounds that granting them would prejudice their certificate amendment applications. As to the latter, Frontier asks that we process them by show cause proceedings and grant all of them, on a permissive basis. Braniff, on the other hand, opposes our use of show cause procedures on the grounds that there will be competing applicants for this route and that a conclusion may be reached by use of hearing procedures almost as quickly as if we use show cause procedures.

Delta, in its answer to Southern, does not oppose Southern's exemption request or certificate amendment application, provided we contemporaneously suspend or delete Eastern at Memphis and do not authorize additional carriers to provide nonstop service. It does, however, oppose the use of show cause procedures.

Southern replied to the answers of Delta, Eastern, Braniff, Frontier, and Piedmont, by pointing out that in our Order on Reconsideration in the *Improved Authority to Wichita Case*,[7] we said we would be prepared to consider the removal of its restriction in the Memphis-Atlanta market. It views its certificate amendment application as a restriction removal request that can be accomplished through the use of show cause procedures without the need to consider other applications. It argues that there is no legal requirement to consolidate the applications of Braniff, Frontier, and Texas International because no finding of a need for Southern's service in this market is required, and therefore "there will be no binding determination that the lifting of Southern's restriction will as a matter of economic fact preclude entry by other applicants at a future date." However, it is also emphasizes that its exemption and certificate amendment applications are predicated on Eastern's reduction of service to a "bare bones" minimum of one daily round trip.

Southern filed a consolidated answer to Piedmont's pleadings, opposing our grant of Piedmont's request. It notes that, while Piedmont holds Atlanta-Memphis one-stop authority, it has never operated there; it also contradicts Piedmont's claim that it would be the first to offer lower fares, in view of Southern's "Fabulous Fifty," which offer a 50-percent discount.

We have decided to institute the *Atlanta-Memphis Service Investigation*, Docket 33411; to suspend Eastern's authority to serve Memphis for a period of 5 years or until the final decision in the investigation; and to grant the concurrent applications of Southern and Piedmont for exemptions *pendente lite*, permitting them to provide two daily nonstop round trips each between Atlanta and Memphis. We are consolidating into the investigation the following dockets: 32770 (Eastern's suspension request); 32719 (Southern's certificate amendment application); 32836 (Piedmont's certificate amendment application); 32753 (Braniff's certificate amendment application); 32813 (Frontier's certificate amendment application); and 33003 (Texas International's certificate amendment application).

The investigation will consider whether the public convenience and necessity require new nonstop authority between Atlanta and Memphis; which carrier or carriers should be granted it; whether Eastern's authority at Memphis should be suspended, deleted or otherwise amended; and whether any new or existing authority should be subject to any restrictions or conditions.[8]

[5] All members concurred.

[1] This interchange provided four daily round trips between Denver and Atlanta via Memphis; it was terminated by Order 77-4-146, effective July 27, 1977.

[2] Eastern reduced its service to one daily round trip on May 1, 1978.

[3] Docket 32721.

[4] Docket 32719.

[6] Docket 32836, Piedmont's certificate amendment application; Docket 32837, Piedmont's application for temporary exemption, filed June 9, 1978. On the same date, Piedmont moved to consolidate its applications with those of Southern.

[6] Braniff's certificate application was filed in Docket 32753 on May 26, 1978, accompanied by a motion to consolidate and an answer to Southern's petition. Frontier's certificate application was filed in Docket 32813 on June 5, 1978, accompanied by an answer by an answer to Southern's application and a motion to consolidate. Texas International's application was filed in Docket 33003 on July 7, 1978; previously, on June 26, 1978, it had filed a consolidated answer to the applications of Piedmont and Southern.

[7] Order 78-5-83, May 15, 1978.

[8] Applications, amendments to applications, motions to consolidate, petitions for reconsideration and environmental submis-

Footnotes continued on next page

As we have made clear in recent decisions (see, *e.g., Service to Oakland Case*, Order 78-4-121), we believe that market forces are most likely to result in optimum service at optimum fares since the market selection process operates continuously and efficiently. We will therefore consider the possible grant of permissive authority to all fit, willing, and able applicants, and the extent to which such awards encourage the efficiency, innovation, and competition deemed to be in the public interest by section 102 of the act. In view of this, we are less inclined than we were when we laid down the policy, in our order instituting the *Chicago - Albany / Syracuse - Boston Competitive Service Investigation*, Order 77-12-50, to give heavy weight in carrier selection to the offer or failure to offer low prices, since open competition will insure these offers more effectively than restrictive carrier selections based on their promise.

We are therefore concerned about the delay and costs of the evidentiary burdens which traditional carrier-selection cases entail for the parties, the Board and the Board's staff, and particularly with the burden of introducing and evaluating evidence that will be unnecessary if the case results in multiple permissive awards. We invite the parties and the administrative law judge to explore ways of reducing the quantity of required exhibit material, eliminating duplication and superfluous detail, standardizing methodology, and focusing on the significant facts and assumptions. Specifically, we are interested in reducing or eliminating the tremendous amount of detail on schedules, traffic, profitability and diversion typically required to adjudicate the issue of comparative carrier selection. The possibility of stipulating facts and eliminating comparative selection evidence should be carefully explored. In particular, carriers interested in being selected for a market only if multiple, permissive authority is awarded generally should be excused from submitting the full panoply of comparative selection evidence for that market.[9] Further, although low fares naturally will continue to be reflected in any revenue estimates submitted, we are not interested in any detailed comparative examination of the price/quality options arrived at by the various applicants. Ultimately, of course, we leave the resolution of all of these matters to the administrative law judge.

We believe Eastern's temporary suspension at Memphis is in the public interest, in view of the losses Eastern has experienced and expects to incur if it continues to provide one daily round trip service; and the net savings it anticipates upon suspension.[10] The public will not be inconvenienced by the termination since Southern and Piedmont stand ready immediately to replace Eastern's four nonstop roundtrip frequencies, and will provide beyond market benefits. Further, Delta is operating numerous round trips in the Atlanta-Memphis market.

Our decision temporarily to exempt Piedmont and Southern from their respective one-stop restrictions is based on our belief that the Atlanta-Memphis market, as one of the largest in the Southeast [11], warrants a number of conveniently timed flights. Further, since Atlanta and Memphis are major hubs on the systems of both Piedmont and Southern, they will be able to provide replacement service at nominal risk. We emphasize that our grant to Piedmont and Southern of exemption authority to operate nonstop frequencies between Atlanta and Memphis will not influence in any way our decision in the *Atlanta-Memphis Service Investigation*. We will not take the exemption operations into account in deciding certification cases; [12] Since both Piedmont and Southern have stations at Atlanta and Memphis, the possible argument that their investments under the exemption will sway the Board to prefer them at the time of decision has little merit.

To require the carriers first to undergo a certificate proceeding in order temporarily to perform their twice daily Memphis-Atlanta round trips would be an undue burden on them, and would have the effect of precluding the proposed operations and depriving the public of needed service. Therefore, we find that the enforcement of section 401 of the act and the terms, conditions, and limitations of the certificates of public convenience and necessity of Piedmont and Southern, to the extent that they would otherwise preclude the carriers from providing nonstop service between Atlanta, Ga., and Memphis, Tenn., would be an undue burden on them by reason of the limited extent of their operations and would not be in the public interest.[13]

Accordingly, 1. We institute the Atlanta-Memphis Service Investigation, Docket 33411, be instituted under section 204 of the act and set it for hearing before an Administrative Law Judge of the Board at a time and place to be determined later;

2. The investigation instituted in paragraph 1, above, shall consider the following issues:

(a) Do the public convenience and necessity require the certification of an air carrier or carriers to engage in nonstop air transportation between Atlanta, Ga., and Memphis, Tenn.;

(b) If the answer to (a), above, is affirmative, which air carrier or carriers should be authorized and should any new or existing authority be subject to any terms, conditions, or limitations;

(c) Should Eastern's authority at Memphis, a point on segments 1, 3, and 5 of its Route 10, be suspended, deleted, or otherwise amended;

3. Any authority awarded here or in the investigation instituted by this order, shall be category II subsidy ineligible;

4. We consolidate the applications of Eastern Air Lines, in Docket 32770, Southern Airways, in Docket 32719, Braniff Airways, in Docket 32753, Frontier Airlines, in Docket 32813, Piedmont Aviation, in Docket 32836, and Texas International Airlines, in Docket 33003, to the extent they conform to the scope of this investigation, into the proceeding instituted in paragraph 1, above, and to the extent not consolidated or granted here, be dismissed;

5. We suspend the authority of Eastern Air Lines to serve Memphis, Tenn., on Route 10 be suspended under section 401(j) for a period of 5 years or until 90 days after final decision in Docket 33411, whichever occurs first;

6. We exempt Piedmont Aviation and Southern Airways from section

Footnotes continued from last page

sions shall be filed 30 days from the date of service of this order, with replies due within 10 days thereafter.

[9] Moreover, for those who wish to pursue a traditional carrier selection theory of the case, detailed cost accounting evidence, *e.g.*, separate estimates for every segment or each type of fare, need not be required to justify the various price and quality proposals. For the Board's purposes, an analysis of profit of any applicant's proposal should be adequate if the expense estimates are calculated in accordance with the methodology described for local service carrier route applicants in the Board's procedural regulations. 14 CFR 302.1101 *et seq.*, Subpart K and PR-172, April 14, 1978. Applicants, including new entrants, whose data are not included in this costing system shall submit costings based on their internal company data, in Subpart K format to the extent feasible. While all applicants are of course free to include estimates of expense computed using a different methodology, we do not believe that it is a fruitful use of the applicants', the staff's or the Board's resources to require an analysis of the cost of an applicant's proposal by a second costing method.

[10] See Eastern's Exhibits I and J for its analysis of the losses it incurred from its operations at Memphis and the benefits it will derive from suspension of its Atlanta-Memphis service.

[11] For C.Y. 1977, the market generated 267,220 O. & D. plus interline connecting passengers.

[12] See *e.g.*, Order 78-6-59, June 8, 1978.

[13] Upon review of the environmental evaluations submitted by Eastern, Piedmont, and Southern in their applications, we find that our decision does not constitute a "major Federal action significantly affecting the quality of the human environment" within the meaning of the National Environmental Act of 1969 or a major regulatory action under the Energy Policy and Conservation Act of 1975.

401 of the act and the terms, conditions, and limitations of their certificates for Routes 87 and 98, respectively, to the extent necessary to permit

FORMER LARGE IRREGULAR AIR SERVICE INVESTIGATION—PHASE 1

Prehearing Conference

Notice is hereby given that a prehearing conference in the above-entitled matter is assigned to be held on October 19, 1978, at 9:30 a.m. (local time), in Room 323, U.S. Court House, 312 North Spring Street, Los Angeles, Calif. 90012.

The parties are encouraged to communicate among themselves in preparation for the conference with a view toward expediting the proceedings. Unrepresented parties are encouraged to obtain procedural assistance from Counsel for the Bureau of Pricing and Domestic Aviation, Legal Analysis Division, Civil Aeronautics Board, Washington, D.C. 20428: Attention: Steven K. McKinney, Esq., telephone 202-673-5273, as previously suggested in the "Notice to All Interested Persons" dated August 16, 1978 (43 FR 36988, August 21, 1978), in this docket formerly denominated docket 32327-1.

Dated at Washington, D.C., September 20, 1978

MARVIN H. MORSE,
Administrative Law Judge.

[6320-01]

[Order 78-9-91; Docket 32049]

HUGHES AIR CORP., d.b.a. HUGHES AIRWEST

Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 20th day of September 1978.

On January 30, 1978, Hughes Airwest applied to amend its certificate of public convenience and necessity for segment 2 of route 76F which now reads: "Between the coterminal points Phoenix and Tucson, Arizona, and the coterminal points Guaymas, La Paz, San Jose del Cabo, Mazatlan, Puerto Vallarta, and Guadalajara, Mexico." The amended certificate would add two new U.S. and five new Mexican coterminals. The new U.S. points are Oakland and San Jose, Calif. The new Mexican points are Loreto, Manzanillo, Mexico City, Zihuatanejo and Acapulco.[1]

Airwest petitioned the Board on May 31, 1978, to process the application by show cause procedures. In support of its request, Airwest states that it has served Mexico on route M of the United States-Mexico Air Transport Agreement for nearly 10 years; that the United States and Mexico signed an amendment to the bilateral agreement on January 20, 1978 adding the two new U.S. and five new Mexican points to route M to make route A.2; that Airwest already serves most of route A.2, which by the terms of the bilateral is an indivisible route; that it was formally designated for route A.2 by the U.S. Government on March 2, 1978; and that the certificate amendment will make segment 2 of Airwest's route 76F conform to the new route A.2.

Airwest currently operates single-plane service over a substantial portion of the expanded route A.2 by virtue of its domestic rights from Oakland and San Jose to the gateways Phoenix and Tucson.[2] If its application were granted it would institute service in the fall of 1978 to one more Mexican point, with two daily nonstop round trips between Phoenix and Mexico City. It forecasts it would carry 84,000 local, through and connecting passengers over the Phoenix-Mexico City segment in 1979. As for service to Acapulco, Manzanillo, and Zihuatanejo, Airwest is analyzing the market and growth potential of these cities to determine the best plan for inaugurating service to them. Service to Loreto is not contemplated for the foreseeable future because of the undeveloped nature of the market and the lack of an airport capable of accommodating jet aircraft.

No answers to the application or the petition for an order to show cause have been received.

We have decided to issue an order directing all interested persons to show cause why Hughes Airwest's certificate should not be amended to add the U.S. points Oakland and San Jose and the Mexican points Loreto, Manzanillo, Mexico City, Zihuatanejo and Acapulco to segment 2 of its route 76F.[3] The new authority shall be placed in category II of the list of subsidy ineligible points appended to order 78-5-16 and the new list that will be attached to the new certificate. We tentatively find and conclude that the public convenience and necessity require such an amendment, and that an oral evidentiary hearing is not required. We also tentatively find that Airwest is a citizen of the United States and is fit, willing, and able properly to perform the air transportation authorized by the proposed certificate amendment

[14] We delegate to the presiding Administrative Law Judge the authority to consolidate by order any applications which conform to the scope of the proceeding.

[15] Eastern, Piedmont, and Southern filed environmental evaluations as part of their applications.

[16] All members concurrent.

[1] The proposed new segment 2 of route 76F would read: 2. Between the coterminal points Oakland and San Jose, Calif.; Phoenix and Tucson, Ariz. and the coterminal points Guaymas, Loreto, La Paz, San Jose del Cabo, Mazatlan, Puerto Vallarta, Guadalajara, Manzanillo, Mexico City, Zihuatanejo and Acapulco, Mexico.

[2] Phoenix and Tucson will continue to be gateway points on route A.2 insofar as a restriction in the amended bilateral agreement states that flights between Oakland and San Jose, on the one hand, and Guadalajara, Mexico City, Acapulco, Mazatlan, and/or Puerto Vallarta, on the other hand, shall serve either Phoenix or Tucson as an intermediate stop. Nonstop operations between Oakland/San Jose and Puerto Vallarta, and between Oakland/San Jose and Mazatlan, will be allowed commencing October 1, 1981, and October 1, 1982, respectively. Airwest requests that these restrictions to route A.2 not be included as conditions in its amended certificate. Since Airwest is subject to these restrictions by virtue of Condition (1) contained in its certificate for route 76F, which requires it to operate "* * * in accordance with all treaties and agreements between the United States and other countries * * *," we will not include the restrictions in its amended certificate.

[3] Upon our review of Airwest's environmental evaluation, we find that the addition of two daily takeoff and landing cycles at Phoenix do not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. Moreover, since Airwest's proposed operations would not result in the near-term consumption of 10 million gallons of fuel, our action here would not constitute a "major regulatory action" under the Energy Policy and Conservation Act of 1975.

and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

Accordingly,

1. We direct interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated in this order and amend the certificate of public convenience and necessity of Hughes Air Corp., d.b.a. Hughes Airwest, for segment 2 of route 76F to read as follows: [4]

Between the coterminal points Oakland and San Jose, Calif.; Phoenix and Tucson, Ariz., and the coterminal points Guaymas, Loreto, La Paz, San Jose del Cabo, Mazatlan, Puerto Vallarta, Guadalajara, Manzanillo, Mexico City, Zihuatanejo, and Acapulco, Mexico.

2. We direct interested persons having objections to the issuance of an order making final the proposed findings and conclusions, or to the proposed certificate amendment set forth in this order within 10 days [5] after service of this order, to file with the Board and serve upon all persons listed in paragraph 6 below, a statement of objections together with a summary of testimony, statistical data, and other evidence expected to be relied upon to support the stated objections. If an oral hearing is requested, the objector should state in detail why such hearing is considered necessary and what relevant or material facts would be expected to be established through such hearing which cannot be established in written pleadings.

3. If timely and properly supported objections are filed, we will give further consideration to the matters and issues raised by the objections before we take further action: *Provided*, That the Board may proceed to enter an order in accordance with its findings and conclusions set forth in this order if it is determined that there are no factual issues present that warrant the holding of an oral evidentiary hearing.[6]

4. In the event no objections are filed, we will deem that all further procedural steps are waived, and we direct the Secretary to enter an order which, subject to the approval of the President, (1) makes final the Board's tentative findings and conclusions set forth in this order, and (2) issues an amended certificate of public convenience and necessity for route 76F to Hughes Air Corp., d.b.a. Hughes Airwest in the form attached;

5. We grant the petition of Hughes Air Corp., d.b.a. Hughes Airwest, for issuance of an order to show cause; and

6. We will serve a copy of this order upon Hughes Air Corp., d.b.a. Hughes Airwest; all certificated air carriers; the Governors of California and Arizona, the Mayor of Mexico, D.F., the Governors of Baja, Calif., Colima and Guerrero, Mexico; and the U.S. Departments of State and Transportation.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board: [7]

PHYLLIS T. KAYLOR,
Secretary.

[SPECIMEN CERTIFICATE]

UNITED STATES OF AMERICA CIVIL AERONAUTICS BOARD WASHINGTON, D.C.

[Certificate of Public Convenience and Necessity (as amended) for Route 76F]

Hughes Air Corp. d.b.a. Hughes Airwest is authorized, subject to the provisions of title IV of the Federal Aviation Act of 1958, and the Board's orders, rules and regulations, to engage in foreign air transportation of persons, property, and mail, as follows:

1. Between the terminal points Spokane, Washington, and the coterminal points Calgary and Edmonton, Alberta, Canada.

2. Between the coterminal points Oakland and San Jose, Calif.; Phoenix and Tucson, Ariz, and the coterminal points Guaymas, Loreto, La Paz, San Jose del Cabo, Mazatlan, Puerto Vallarta, Guadalajara, Manzanillo, Mexico City, Zihuatanejo, and Acapulco, Mexico.

3. Between the terminal point Las Vegas, Nevada and the coterminal points Calgary and Edmonton, Alberta, Canada.

4. Between the coterminal points Los Angeles and San Francisco, Calif., and the coterminal points Calgary and Edmonton, Alberta, Canada.

The service authorized is subject to the following terms, conditions, and limitations:

(1) The holder shall conduct its operations in accordance with all treaties and agreements between the United States and other countries, and the exercise of the privileges granted by this certificate shall be subject to compliance with such treaties and agreements, and to any other orders issued by the Board for the purpose of requiring compliance with such treaties and agreements.

(2) The holder shall render service between the points named except as temporary suspension of service may be authorized by the Board. The authority to serve segments 2 and 4 is permissive.

(3) The holder may continue to serve regularly any point named through the airport last regularly used by the holder to serve such point prior to the effective date of this certificate; and may continue to maintain regularly scheduled nonstop service between any two points not consecutively named if nonstop service was regularly scheduled by the holder between such points prior to the effective date of this certificate. Upon compliance with such procedures as the Board may prescribe, the holder may, in addition, regularly serve the point named through any convenient airport, and may operate nonstop service between any two points not consecutively named.

(4) The exercise of the authority granted shall be subject to the carrier's first obtaining from the appropriate foreign government such operating rights as may be necessary.

(5) The holder's authority to engage in the transportation of mail in the operations listed in appendix A, categories I and II of order ————, is limited to carriage on a nonsubsidy basis, *i.e.*, on a service mail rate to be paid entirely by the Postmaster General; the authority listed in these categories shall, for purposes of profit sharing, be treated separately. The authority to operate over the segments listed in category II is conditioned upon compliance with the interim accounting procedures for profit sharing adopted in docket 28800.

The exercise of the privileges granted by this certificate shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may be prescribed by the Board.

The holder acknowledges and agrees that it is entitled to receive only service mail pay for the mail service rendered or to be rendered solely in connection with operations specified in paragraph (5), and that it is not authorized to request or receive any compensation for mail service rendered or to be rendered for such operations in excess of the amount payable by the Postmaster General.

This certificate shall be effective on ————: *Provided, however*, That prior to the date on which this certificate would otherwise become effective the Board, either on its own initiative or upon the timely filing of a petition or petitions seeking reconsideration of the Board's order of ————, 19—— (Order ————) insofar as such order authorizes the issuance of this certificate, may by order or orders extend such effective date from time to time; *Provided further*, That the continuing authority to operate over segment 4 and to serve Oakland and San Jose, Calif., and Loreto, Manzanillo, Mexico City, Zihuatanejo, and Acapulco, Mexico, shall be conditioned upon the timely payment, by the holder, of such license fees as may be prescribed by the Board. The authority to serve segment 4 will expire July 23, 1983.

The Civil Aeronautics Board has directed its Secretary to execute this certificate and affix the Board's seal on ————.

Secretary.

Issuance of this certificate to the holder approved by the President of the United States on ———— in ————.

[FR Doc. 78-27044 Filed 9-25-78; 8:45 am]

[4] In order to give Airwest maximum flexibility in scheduling its services, we will make the new authority permissive.

[5] In order for Airwest to commence operations by the fall of 1978, and considering the absence of objections to the application and the petition for show cause, we find that the public interest requires the allowance of only 10 days for objections to this order.

[6] Since provision is made for the filing of objections to this order, petitions for reconsideration will not be entertained.

[7] All members concurrent.

[6320-01]

[Order 78-9-56; Docket Nos. 29449 and 30132]

NORTHWEST AIRLINES, INC.

For Realinement of Route 3 and Restriction Removal; Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 13th day of September 1978.

By application and petition filed and supplemented on November 11, 1976, to conform to the June 25, 1976, informational guidelines in order 76-7-101, Northwest Airlines has requested the Board to issue an order directing interested persons to show cause why Northwest's certificate of public convenience and necessity for Route 3 should not be amended and modified to realine the existing segments 1-9 and 11-13 of that route into a single linear segment and to eliminate certain operating restrictions which Northwest claims impede its operating flexibility and are no longer required for competitive reasons.[1]

In support of its application and petition, Northwest alleges that the goals of route realinement for local service carriers—economic efficiency and better service to the public—are equally applicable to the unsubsidized trunk carriers. Further, it contends this proposed realinement is consistent with the Board's guidelines established in order 76-5-101, May 21, 1976.

Answers in opposition were filed by several carriers and two civic parties. The following local service carriers objected to Northwest's proposal in general because they are opposed to trunkline realinements and also objected to removal of restrictions in specific markets: Allegheny Airlines, Frontier Airlines, and North Central Airlines.[2] Objections to specific markets in Northwest's petition were filed by Air California (an intrastate airline) and the following trunk carriers: American Airlines, Continental Air Lines, Delta Air Lines, Trans World Airlines, United Air Lines, and Western Air Lines.[3] Finally, the State of Maryland and the Port of Oakland are concerned about the possible increase in dormant authority at Baltimore/Washington International Airport and Oakland, respectively, and Maryland also opposes the use of show cause procedures in place of oral hearings for realinements.

Northwest filed a reply.

As we stated in the recent Ozark, Delta, and Western route realinements,[4] it is our policy to realine the route systems of the certificated scheduled carriers to maximize the opportunities for scheduling flexibility and equipment utilization, to conform route authority to traffic flows, and to eliminate or modify certificate conditions which serve no useful purpose, impair market development, and inhibit improvement in the carrier's economic performance. These objectives are equally applicable to trunk and local service carriers.[5]

We tentatively conclude that Northwest's proposed realinement, as modified by this order, conforms with the Board's policy and objectives discussed above and that substantial service and carrier benefits will result from the realined route system. Further, the proposed realinement will offer Northwest the potential for significant improvement in operating efficiency and will permit it to provide improved service to the traveling public.

No arguments have been raised that we have not already fully discussed in the Western, Delta, Ozark, and American realinement orders. In our orders in the Western (order 76-5-101) and Delta (order 78-4-109) realinements, we have answered the concern of the local service carriers and the civic parties over the use of show-cause procedures and the increase in dormant authority which occurs when carriers receive improved authority in minor and monopoly markets; the contention that the doctrine of *Ashbacker Radio Corp.* v. *F.C.C.*, 326 U.S. 327 (1945) bars the Board's consideration of requests by Northwest for improved authority in specific markets; and the problem of realinement applicants receiving under the guidelines authority at satellite airports which is superior to what they could obtain at principal metropolitan airports under the same guidelines. As stated more fully in the previous realinement orders: Show-cause procedures protect the rights of all parties; *Ashbacker* is not a bar to our realinement decisions; and authority will not be granted to a realinement applicant at a satellite airport which is superior to that which it could obtain under the realinement guidelines at the principal municipal airport, unless its satellite authority is already superior.

Northwest has requested a waiver of the provisions of part 312 of the Board's procedural regulations, which require, the filing of an environmental evaluation. Northwest supports its request by stating that the realinement will enable it to operate more efficiently and produce greater opportunities for reduction in fuel consumption, air pollution, and ambient noise levels. Further, it states that it is not proposing increased service as a result of its proposals. We tentatively find that the action we propose here will not constitute a major Federal action significantly affecting the quality of the environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, and, under § 312.6, we waive the requirement of filing an environmental evaluation. We also tentatively find under part 313 of our procedural regulations that realinement of Northwest's Route 3 will probably lead to more efficient use of fuel through the greater opportunity to provide nonstop and single-plane service in place of multi-stop service and online connections. Therefore, our action does not constitute a major regulatory action requiring an energy statement under the Energy Policy and Conservation Act (42 U.S.C. 6201 et seq.).[6]

We further tentatively find that Northwest Airlines is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

Interested persons will be given 30 days following the service date of this order to show cause why the tentative findings and conclusions set forth here should not be made final; answers will be due within 10 days thereafter. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic anaylsis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.

Accordingly:

1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Northwest's certificate for Route 3 in the manner set forth in the accompanying proposed certificate (appendix B);

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than October 19, 1978, file with the Board and serve upon all persons listed in appendix I, a statement of objections together with a summary of testimony, statistical data, and evidence expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 30, 1978;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board; [8]

4. In the event no objections are filed to any part of this order, we will consider all further procedural steps relating to such part or parts to have been waived, and the case will be submitted to the Board for final action;

5. We grant the motions of Air California and Trans World Airlines for leave to file otherwise unauthorized documents;

6. We grant Northwest's application for a waiver of part 312;

7. We dismiss as moot Northwest Airlines' application in docket 30132 to amend its certificate of public convenience and necessity for Route 3 to permit one-stop, single-plane service between Milwaukee, Wis., on one hand, and Los Angeles/Long Beach/Ontario and San Francisco/Oakland/San Jose, Calif., on the other hand; and

8. We shall serve a copy of this order upon all persons listed in appendix I.[9]

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[10]
Secretary.

[FR Doc. 78-26925 Filed 9-25-78; 8:45 am]

[1] In light of our tenatative conclusions in this order, we will dismiss as moot Northwest's application in docket 30132 to amend its certificate for Route 3 to authorize it to perform one-stop, single-plane service in the Milwaukee-Los Angeles/Long Beach/Ontario/San Francisco/Oakland/San Jose markets.

[2] Eight local service carriers, including these three, filed a motion requesting a stay of further procedural steps on trunkline realinement applications pending the filing of written and oral argument on certain alleged legal and policy issues concerning trunk realinements. This motion was denied in the Western realinement proceeding by order 77-11-74, Nov. 17, 1977, at 4-13. See also order 78-4-109, Apr. 19, 1978, at 3 n.6, for a fuller history of this motion.

[3] We will grant the motions for leave to file otherwise unauthorized documents filed by Air California and TWA.

[4] Orders 78-6-4, 78-4-109, and order 77-11-74, finalizing order 76-5-101, respectively.

[5] Order 78-6-4, at 2, order 78-4-109, at 4-5.

[6] We also tentatively find that the actions we propose in orders issued simultaneously with this order to amend the certificates of carriers certificated to serve the minor markets in which we are improving Northwest's authority are similarly not major Federal actions affecting the environment or major regulatory actions requiring energy statements.

[8] All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[9] Appendix A-I filed as part of the original document.

[10] All members concurred.

[6320-01]

[Order 78-9-96, Dockets 30699, et al.]

OAKLAND CHAMBER OF COMMERCE, ET AL.

Oakland Service Case; Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 21st day of September 1978.

In the matter of *Oakland Service* case,[1] petition of Oakland Chamber of Commerce and Port of Oakland for a service investigation (docket 30699); applications of Allegheny Airlines, Inc., Braniff Airways, Inc., Frontier Airlines, Inc., Hughes Air Corp., d.b.a. Hughes Airwest, Northwest Airlines, Inc., Texas International Airlines, Inc., Ozark Air Lines, Inc., for authority between Oakland and various points (dockets 30739, 30819, 30862, 30863, 31583, 30981, 30866, and 33127).

By order 78-4-121, served May 30, 1978, we instituted the *Oakland Service* case to consider the need for additional certificated route authority between Oakland, on the one hand, and Albuquerque, Atlanta, Boston, Chicago, Dallas/Fort Worth, Denver, Detroit, Houston, Kansas City, Minneapolis/St. Paul, Philadelphia, Phoenix, Portland, Salt Lake City, and Seattle/Tacoma, on the other. Seven carrier applications were consolidated into this proceeding, as well as the petition of the Oakland Chamber of Commerce and Port of Oakland for a service investigation. We tentatively decided to adopt, for purposes of this proceeding, a policy of awarding permissive, subsidy-ineligible authority in every market at issue in which a need for additional authority is shown, to every fit, willing, and able applicant whose illustrative service proposal indicates that it is prepared to satisfy a part of the demonstrated need. Interested persons were given an opportunity to file written comments, participate in oral argument before the Board, and file reply comments on the question of whether this proposed policy determination should be adopted. Twenty-one parties filed comments on this issue, 15 participated in the oral argument, and 3 filed reply comments. In addition, five petitions for reconsideration and two petitions for leave to intervene were filed. Appendix A to this order provides an extensive summary of all of these written pleadings.

After considering all comments, both written and oral, we have decided to adopt the policy proposed in order 78-4-121. We have also decided to include the Oakland-Los Angeles market in the proceeding, since we have concluded that the findings of that order apply to that market as well. In addition, we have decided to keep the Seattle and Portland markets in this proceeding, but make them coterminals.

Summarized broadly, the arguments in the comments fall into eight categories—legal objections to certificating more applicants than a market can economically support, legal objections to permissive certification at Oakland, economic objections to applying a policy of multiple permissive certification in any situation, economic objections to applying a policy of multiple permissive certification in situations other than Oakland, economic objections to the failure to apply a policy of multiple permissive certification in all situations, objections to the Board's environmental procedures, and complete agreement with the way the Board is handling this case.

LEGAL ARGUMENTS

Since the legal arguments made here apply to multiple permissive certification in all situations, not just Oakland's, they are substantially the same as those filed in the *Improved Authority to Wichita* case, et al., docket 28848, where we invited written comments and oral argument on the general policy and legal implications of multiple permissive certification, delayed-entry awards, and backup awards. In fact, some *Oakland* comments specifically incorporate by reference comments in docket 28848.[b]

The central and crucial legal contention is that the Federal Aviation Act does not, in the circumstances of this case or generally, empower the Board to abandon comparative carrier selection and adopt in its stead a policy that we have characterized as multiple permissive entry. We of course agree with all of the pleadings filed in this and other dockets that this change in policy is fundamental, although, as detailed in order 78-4-121 at page 46, not without some precedent in past Board actions.

In broad outline we have determined that all applicants that are found to be fit, willing, and able to provide service should be authorized to operate in each of the city-pairs at issue upon an evidentiary showing that the market can economically support some service and subject to the submission by each applicant of a fully costed illustrative service proposal assuming the use of aircraft suitable for the route. Incumbent carriers at Oakland are free to submit evidence of diversion, including forecasts based on "worst case" assumptions, in order to persuade us that their ability to perform their certificate responsibilities will be threatened or that essential services would necessarily be terminated and not re-

tificate responsibilities will be threatened or that essential services would necessarily be terminated and not replaced by an applicant or by other carriers.

Certain of the objecting parties argue that the Board cannot lawfully adopt such a policy and that the statute requires the Board to determine how many carriers can profitably operate in each market and then select from among the applicants in accordance with this determination. Hence, if only one carrier can be profitable, the Board assertedly can grant only one application and must deny the others. Absent this determination, it is directly or inferentially alleged that too many carriers would operate, leading to losses which would damage the ability of the individual airline components of the air transportation system to fulfill their service obligations.

We have anticipated and squarely met these arguments in order 78-4-121, and we address ourselves to the comments received in response to that order in detail below. Suffice it to say here that we do not assert that all carriers authorized will in fact operate. On the contrary, we are confident that if a market can support only one carrier, only one will operate. While there may be a competitive struggle, it will be short-lived: carriers will not long sustain losses which cannot be later recovered because of the competitive structure of the industry. In our view, carrier managements, and the capital markets on which they depend, are highly rational and will be adept at exploiting profitable opportunities. While we believe this to be true in general, the current absence of excess capacity in the industry makes it particularly unlikely that any carrier would ignore more profitable opportunities elsewhere in order to maintain an unprofitable operation at Oakland. In the end the market will determine selection and, importantly, it will do so continously. This is because the presence of numerous authorized but nonoperating carriers in each market will force an incumbent, in order to maintain its market share, to maintain an optimum or near-optimum mix of price and service. It will do so in order to prevent another authorized carrier from entering for the purpose of exploiting unmet demand.

A major deficiency in the traditional system of comparative selection in route cases has been the experienced difficulty in holding carriers to their service promises made in those cases, and generally in assuring the provision of adequate service by incumbent licensees. This difficulty has been accentuated, as we discussed in order 78-4-121 and develop further below, by our longstanding customary policy, most clearly exhibited in route-realignment and restriction-removal proceedings, of granting carriers extremely flexible operating authority which renders their service in particular city-pair markets wholly permissive. Although such flexible authority has many advantages, it is difficult, in the absence of a realistic threat that other carriers can immediately enter a market to correct service quality or price deficiencies, to prevent such deficiencies from occurring. By providing such a realistic threat of prompt new entry or reentry, our new policy is designed to assure adequate service and price performance, while retaining the benefits of flexible operating authority.

Particular objections are appraised in greater detail in the comments below. We note in passing here, however, the following:

First, it is unchallenged that the Act grants the Board wide discretion as to the policies and procedures it may employ, subject to due-process considerations and the rule of rational decisionmaking, in achieving the objectives of the Act, which are broadly framed in its declaration of policy and make express reference to both the present and the future needs of the air transportation system.

Second, no one has alleged that our policy, as applied in this particular proceeding, is not reasonable specifically in the light of current and foreseeable economic conditions, or that it has not been rationally and fully explained, or that it is not based on substantial evidence relating to current and foreseeable economic conditions, as well as historic facts. In particular, our findings concerning the improbability of destructive or harmful competition in the Oakland markets at issue have not been rebutted on the basis of economic fact or theory.

Third, none of the objecting parties has asserted that the Act expressly in specific terms proscribes a policy of multiple permissive entry.

Fourth, those sections of the Act from which it is inferentially alleged that such a policy is unlawful (that part of section 401 which speaks of granting applications for the provision of "such transportation," and the abandonment and adequacy-of-service provisions of the Act) cannot be read as requiring mandatory service or strict public-utility-type operating licenses in light of the Board's past administration of the Act as approved by the courts.

Fifth, citations to the legislative history of the Act alleged to show the impermissibility of our proposed new policy are to some extent contradictory and ambiguous as detailed guides. On the one hand, this results from the fact that a large number of the components of the legislative history are retrospective, that is, they relate to the special conditions of the airline industry in and before 1938, particularly the method of subsidy payment under various airmail contract systems. On the other hand, the part of the legislative history that looks toward future developments suggests that Congress' very purpose in establishing the Board was to have it adapt licensing and other policies to changing conditions within both the economy as a whole and the airline industry in particular. We conclude, therefore, that read as a whole, the legislative history confirms that the Board's discretion was intended to be very broad, and specifically broad enough to permit policies to be adapted to future conditions.

Sixth, the court decisions cited against our proposal were all decided in contexts where the Board was engaging in comparative selection; they were based on the undisputed premise that the Act permits a policy of comparative selection (which for the most part the courts found to have been erroneously or improperly applied in the particular situation at hand), but not that the Act requires such a policy—i.e., they do not hold that a policy of multiple permissive authority is prohibited.

Turning to the specific grounds urged for the proposition that the Act requires us to predict the exact number and identity of the carriers that a market will support and certificate only those, Braniff argues that "the statute was designed to correct the abuses of unrestrained competition among carriers" and cites the following statement of Senator McCarran, who sponsored several of the original bills on airline regulation:

> If it could be established to the satisfaction of the Authority which is about to be set up that another line could be operated from Chicago to Salt Lake City, although that same territory is now served by United Air Lines, and the demand for service was so great as to support another line, then the Authority could • • • say "• • • there is sufficient commercial life to sustain the other lines. Therefore we can grant a franchise to another line." • • • (A)nd if the circumstances do not justify another line, say, "No, you cannot go in; you cannot set up another line, because if you do both lines will fail; both lines will go out of business, and the public that we are looking to primarily will not be served." That is the object and purpose of this entire bill. 83 Cong. Rec. 6852 (1938).

Similarly, National, in its comments in docket 28848 to which it refers in its *Oakland* comments, cites the recommendation of the 1935 Federal Aviation Commission that "there should be a certain measure of control by the Government of the right of entry into the business in order that proper standards may be enforced and irresponsible campaigns of mutual destruction on the part of operators averted." (Report of the Federal Aviation Commission, submitted January 22, 1935, page 52.) Another recommendation in that report was that "there should be a check on development of any irresponsible, unfair, or excessive competition such as has sometimes hampered the progress of other forms of transport." (Report, page 54.)

Thus, Congress enactment of the Federal Aviation Act in 1938 resulted from concern over destructive competition. And yet, rather than suggesting that multiple permissive entry at Oakland will actually produce this result, Braniff, while adducing this legislative history in opposition to the action we propose here, argues that Oakland will get very little service under a free-entry policy. We can only interpret its arguments, then, to mean that Congress intended the Board to regulate restrictively out of a fear of destructive competition *even* in situations where it is clear that nonrestrictive licensing adequately serves the public interest and will not result in destructive competition. Braniff cites no legislative history in support of such a proposition, nor can we agree that Congress intended this absurd result. As thoroughly detailed in Order 78-4-121 (pp. 24-32), we have a completely different view of how Oakland will fare in a more competitive environment, but our ultimate conclusion that there will be no destructive competition is the same as Braniff's and we continue to believe that our statutory mandate to promote healthy competition, rather than suppress it, is clear.[3]

Braniff and TWA argue that Congress contemplated a public-utility type of regulation of aviation, but both recognize that Congress did not want the Civil Aeronautics Authority to adopt the "natural monopoly" principles of conventional public-utility regulation. Our disagreement with these carriers is over how Congress intended us to effectuate the policies described in § 102 of the Act. Braniff says we have to regulate competition; but, consistently with the Supreme Court's warning in *FPC* v. *Texaco*, 417 U.S. 380 (1974), we have not abdicated our regulatory responsibilities. Here we have reviewed Oakland's need for service, we have analyzed the ability of certain Oakland markets to support service, and we have determined that multiple permissive authority is likely to be the best practical solution to Oakland's problems. No one argues that the type of destructive competition Congress feared in 1938 will occur at Oakland. Moreover, as National recognizes, we are indeed "stack[ing] the deck" in Oakland's favor for the time being since we are not simultaneously opening entry to San Francisco, and we have assured Oakland that, if multiple permissive authority does not result in improved service, we will review the situation and consider further action. Although we do not think it will be necessary to invoke these provisions of the Act, we still have the tools of §§ 401(g) and 404 at our disposal.[3]

In 1937 Senator McCarran said:

> The certificating procedure does nothing except to prevent someone with inadequate facilities, or without responsibility, from entering the public service, and to prevent the inauguration of service when it would be unjustified. The principle of convenience and necessity • • • is not the principle of monopoly. It is the principle of order, economy, and adequacy of service.[4]

We believe we are being faithful to that principle.

The opponents of our *Oakland* policy also argue that the language of the Act precludes us from awarding authority to all fit and able applicants whose illustrative service proposals demonstrate their willingness to meet some of the service needs of a particular Oakland market.[5] National and TWA argue that § 401(d)(1) allows the Board to certificate a carrier in a market only if "such transportation" *by that particular carrier* is required by the public convenience and necessity, citing *Capital Airlines* v. *CAB*, 281 F.2d 48 (D.C. Cir. 1960).

We cannot agree with such a restrictive interpretation of our authority, particularly since it is inconsistent with past Board and court decisions. Thus, for example, in the *Detroit-California Nonstop Service Investigation*, 43 CAB 557 (1966), we granted unrestricted authority to three carriers (through removal of restrictions) in the Detroit-Los Angeles/San Francisco markets without finding that these markets could support all three carriers or that *service* by all three, as opposed to authority, was required by the public convenience and necessity. The Seventh Circuit affirmed in *United Air Lines* v. *CAB*, 371 F.2d. 221 (7th Circuit 1967), stating:

> It is evident from these broadly-phrased objectives [in section 102] that a "public convenience and necessity" determination may be made without strict adherence to rigid or definitive criteria, and that the Board may exercise a broad discretion in effectuating the congressional policy. (371 F.2d 224.)

The court went on to say:

> Although we think that an indiscriminate application of the "operational flexibility" factor and an overreliance upon the marketplace in providing economic answers are not without some hazards, the Board's resolution in this case was sufficiently attuned to section 102 of the Act to require our approval. (371 F.2d 224.)

While our extensive analysis of the causes of and solutions for Oakland's needs fully comports with this admonition, we also observe that the air transportation system has undergone major changes over the years and we have been able to observe that competitive behavior in relatively unregulated areas of the system does not have undesirable results (see pp. 28-31 of Order 78-4-121). The courts have frequently held that administrative agencies have a duty to adapt their policies and opinions to changing circumstances, and to the lessons of experience.

Moreover, if, as National argues, we must interpret section 401(d)(1) restrictively and always find transportation by a particular applicant to be required, the conclusion follows that mandatory service obligations would also always be required—if service by carrier A is required by the public convenience and necessity, carrier A must provide the service. Such an interpretation, of course, is at odds with the way most route authority has historically been and is certificated today (see pp. 48-50, Order 78-4-121).

It is quite evident that National, and the other parties who have proposed similarly restrictive interpretations of the phrase "such transportation" in section 401(d)(1), have not fully thought through the ultimate logical implications of their arguments. If the Board can grant an application for a certificate only where it finds that "such transportation is required by the public convenience and necessity," and if "such transportation is required" is interpreted to mean nothing less than an imperative public requirement for actual, immediate, and continuing service by a specific applicant, then mandatory authority would appear to be the only kind the Board could properly award—authority mandatory not merely in the rather trivial sense of requiring some modicum of service at each named point, but in the sense of mandatory service of specified extent in each specific city-pair market where the Board has found such service to be "required by the public convenience and necessity." (As we develop more fully below, public need for service exists in specific markets, not merely "at" points.)

Indeed, in a route case where (for example) an applicant promises four daily nonstop round trips in one of the principal markets at issue, and is then selected to serve the market in reliance on this promise and the Board's determination that this is the specific

---

[2] National persistently refused to offer its views on the outcome of applying a multiple permissive entry policy at Oakland, assuming access to San Francisco was not simultaneously eased (see particularly Oral Argument Transcript, pp. 20-27 and 46-49), stating that, since it was not a party to the case, it could not comment on the economic issues. We note that Order 78-4-121, p. 57, specifically invited "interested parties [to] address the proposed policy from the standpoint of law; fact, *economics*, and public policy" and that National filed its comments in response to this invitation. We frankly fail to see how national can offer a legal analysis criticizing the policy the Board is applying to *Oakland*, on the grounds that it does not take into account Congress concern over destructive competition, when National has not even analyzed the economic question of whether there will, in fact, be destructive competition at Oakland.

[3] See pp. 27-28 below.

[4] Proposed amendments to the Interstate Commerce Act and proposed bill to promote the safety of scheduled air transportation: Hearings on S. 2 and S. 1760 before the Subcommittee of the Committee on Interstate Commerce, 75th Cong., 1st sess., 410 (1937) (statement of Senator McCarran).

S E 2 6 7 8

minimum quantum of service required by the public convenience and necessity, it is hard to see under National's theory how the Board could properly award a certificate which failed to require at least four round trips a day in this market.[6] Clearly the Board could not (as it has in fact done since the early years of the statute) award a certificate which failed to require any single-plane service at all in the market. Nor could it (as again it has habitually done), having found a need for additional service in one market or group of markets, award new authority in a form which allows the awardee, by tacking or by absence of restriction, to serve numerous additional markets where no such finding has been made. And most certainly it could not, as it has done since the earliest years of the Act in route consolidation and route realinement cases, award authority (frequently unrestricted nonstop authority) in large numbers of city-pair markets where no specific pattern of actual service has been proposed or shown to be needed, and where indeed the existing traffic statistics indicate that single-plane service will probably be uneconomic under most circumstances, simply on the grounds that the grant of such authority will give the carrier "operating flexibility," which flexibility is itself the basis for the Board's public convenience and necessity finding.[7] Thus, the adoption of National's restrictive construction of section 401(d)(1) would retroactively invalidate large portions of virtually all of the currently outstanding air carrier certficates, including the authority under which much of today's city-pair nonstop service is now being provided.

Moreover, such a determinedly restrictive reading of sections 401 (d) and (e) would make it impossible for the Board to carry out its responsibilities under section 102 of the Act. Read literally, these provisions appear to contemplate that each certificate application filed with the Board will be separately and individually processed; yet as soon as the Board in 1938-39 had finished with the original "grandfather" applications, it began consolidating for hearing applications by different carriers for the same or similar authority, and not long thereafter it began the practice of instituting route proceedings on its own initiative or in response to civic petitions and scoping these proceedings in accordance with its own judgment of the public interest, rather than any particular carrier's application. Thus, the great bulk of route cases have focused on the service needs of a particular city, market, group of markets, or geographical area, rather than any individual carrier's application. In such proceedings the Board has traditionally (and with the full approval of the courts) considered first the public need for new service or authority in particular markets or over particular routes, and only thereafter has considered which applicant or applicants should be awarded the requisite authority. In this context, the phrase "such transportation is required" in section 401(d)(1) has been treated as calling first for a determination of whether the public will best be served by a grant or grants of authority in the markets at issue, and only subsequently for a consideration of the identity of the carrier or carriers who will provide the needed service.

As the *State Airlines* case[8] illustrates, the courts have refused to interpret the language of section 401(d) with an inflexible restrictiveness which would impair the Board's ability to further the objectives of the statute. Here the Board will first determine the public need for air service in the Oakland markets at issue;[9] then, having in the present order concluded (subject to any showing of particular circumstances making such action inadvisable in a particular market) that this need will best be met by permissive awards to all qualified applicants, the Board will make such awards. We conclude that such awards will most reliably insure the actual, continued performance of "such transportation" (i.e., convenient, low-priced service in the Oakland markets at issue), even though the identity of the specific carriers who will actually provide "such transportation" at any particular time will remain ambiguous until determined by competitive market forces. We are convinced that this action will best fulfill our statutory responsibilities to the traveling public, and involves no violation of the true intent of section 401.

National recognizes that "[t]he record developed in a well-run route case always involves predictive uncertainty about market conditions in the forecast year. In part, these uncertainties relate to general economic variables (general economic conditions, disposalbe income, propensity to travel) outside carrier control." (Comments in Docket 28848, p. 17.) Difficult as they always are, precise forecasts of the traffic particular carriers could generate and determinations as to which carriers would provide the best service would be particularly difficult for Oakland markets.[10] Indeed, if we were

[6] Section 401(e)(4) would not preclude the Board from thus pursuing National's interpretation of the Act to its logical conclusion. That section provides that "No term, condition, or limitation of a certificate shall restrict the right of an air carrier *to add to or change schedules* * * * for performing the authorized transportation and service * * *" (emphasis added), but this language would not preclude the Board from fixing minimum standards of adequate service required by the public convenience and necessity, since "add to or change" does not as a matter of logical necessity include "reduce," particularly in view of section 404's requirement of "adequate service." See *Capital Airlines* v. *C.A.B.*, 281 F. 2d 48 (C.A.D.C. 1960); *National Airlines* v. *C.A.B.*, 300 F. 2d 711 (C.A.D.C. 1962).

On the other hand, section 401(e)(4) does appear to preclude the Board from imposing a maximum level of service on a new carrier in a market. This seems to us to undercut National's argument that the framers of the Act feared excessive competition above all else. Destructive competition, if likely to occur at all (which we have concluded it is not, under present-day conditions) would appear to be just as likely to result from excessive scheduling by a limited number of carriers in a market, as from the competitive struggles of a larger number of carriers. Why then would Congress have deprived the Board of a convenient tool to present scheduling in excess of the requirements of the public convenience and necessity, if excessive competition was its all-encompassing fear?

[7] In one of the early route consolidation cases, the Board consolidated separate grandfather routes end-to-end in a manner which eliminated required stops at former route junction points, and thus granted unrestricted authority (subject to the Board's then existing nonstop regulation, see Order 78-4-121 at p. 48, fn. 58) in numerous transcontinental markets, at a time when neither the existing traffic volumes nor the aircraft the carriers then possessed justified or permitted actual nonstop operations. *American Air. et al., Route Consolidations*, 7 CAB 337, 345 (1946). ("Granting the applications would result in single-route transcontinental service by American, TWA, and United between east coast and west coast cities of greatest population *with the likelihood* that such service *would eventually be provided* on a nonstop basis.") (Emphasis added.)

[8] *C.A.B.* v. *State Airlines*, 338 U.S. 572 (1950); see Order 78-4-121 at p. 45, fn. 51.

[9] Few if any of the respondents, incidentally, appear to question the existence of that need.

[10] National's argument, using the traffic figures in Order 78-4-121, Attachment D, to show that three Oakland markets already receive more service than they can support, has no validity. As we stated in that order, the figures we used in Attachment D were not designed or intended to indicate the probable total amount of traffic which would be carried over each segment (we assumed *no* connecting or flow traffic), or the actual costs of serving each market; they only show that even under very *conservative* assumptions, a given market could support service.

National also argues that, once we certificate new carriers in this proceeding, subsequent applicants cannot be certificated because Oakland's need for service will have been filled, and that we will therefore not be simulating true free-market conditions. What this argument ignores is our basic conclusion here that Oakland's needs are most likely to be met if the greatest possible number of qualified carriers hold authority in the markets at issue. This conclusion will continue to apply even after the present proceeding is completed, and future applicants will be able to rely on it in seeking au-

Footnotes continued on next page

to follow National's advice and certificate only the carriers we could be certain the markets would support, we could very easily shortchange the traveling public, since forecasting Oakland's response to innovative service and fare proposals would involve more than the usual amount of guesswork. This stems from its history of underutilization and the incumbents' past failure to test fully its demand potential.[11] In view of our belief that Oakland needs the maximum service possible in order to revive its airport, it would not be consistent with the public interest artificially to restrict access to it.[12]

Several Board and court decisions are cited as holding that the Board must engage in the carrier-selection process. In our opinion, however, these opinions must be interpreted in light of Board policy at the time they were decided, and not be used to draw inferences about questions which were not before the Board or the courts for decision.

TWA, the Houston parties, the Texas Aeronautics Commission, and National, for example, refer to statements in the Supreme Court's opinion in *CAB* v. *Delta Air Lines, Inc.*, 367 U.S. 316 (1961) that the Act was designed to assure security of route in order to protect the carriers' investment in operation. Rather than holding that the Board should always be guided by a fear of destructive competition, even when that would cause us to fail in our obligation to promote competition to the fullest extent required in the public interest, the Supreme Court's decision in *CAB* v. *Delta* tells the Board that it cannot, without a hearing, take away a license after it has gone into effect. The Court's stress on "security of route" is logical in that context, but the interpretation of this concept urged by the opponents of the *Oakland* policy simply does not fit today's air transportation system, the way regulation is administered by the Board, or the specific actions we contemplate here. We are not proposing to modify, let alone take away, any authority granted under existing licenses.[12a] Other than to support the abstract statement that the Board is supposed to promote "regulated competition," we fail to see, therefore, why the opponents of the *Oakland* policy cite this language. Can they mean that the Board is supposed to protect them completely from competiton? Surely not, for even they admit that the Board is supposed to assure the benefits of competition. The danger, they argue, lies in *destructive* competition. As we discussed above, however, no one argues that there will be destructive competition at Oakland if a policy of multiple permissive entry is applied there.

The danger in citing court statements out of context is shown by Delta's, Houston's, Texas', and National's reference to *Delta Air Lines* v. *CAB*, 275 F. 2d 632 (D.C. Cir. 1959), as support for the contention that the Board must decide how many carriers a market can support and certificate only that man. Houston argues that the court made the following statements as a comment "on whether the Board is empowered to award more authority than the market [can] absorb":

> The public interest * * * requires that, if there be only enough business to support operation by one licensee, there must be only one licensee (275 F. 2d 638).

In fact, however, there was no issue before the court as to the number of carriers the Board could certificate if it wished, and the court did not hold in *Delta* that the Board could select only one carrier to serve the market in question. It merely recognized that, given the policies the Board was then applying (i.e., in most instances awarding authority to only one new carrier at a time), there was a good chance that the applications involved in the Board's decisions would prove to be mutually exclusive. The court held that the Board had misled the applicants on this point and, in violation of *Ashbacker* principles, had denied them a fair opportunity to show that the applications were mutually exclusive under the Board's own standards.[12] The court's citation of its own decision in *Carroll Broadcasting Co.* v. *FCC*, 258 F. 2d 440 (D.C. Cir. 1958) provides further insight into its thinking. There it said:

> Competitors may severely injure each other to the great benefit of the public. The broadcast industry is a competitive one, but competitive effects may under some sets of circumstances produce detriment to the public interest. When that happens the public interest controls." * * * [w]e think it is not incumbent upon the Commission to evaluate the probable economic results of every license grant. Of course the public is not concerned with whether it gets service from A or B or from both combined. The public interest is not disturbed if A is destroyed by B, so long as B renders the required service. The public interest is affected when the service is affected. (258 F. 2d 443.)

We have already discussed the unlikelihood of destructive competition at Oakland and in order 78-4-121 we indicated in detail why the public interest will be better served by a policy of multiple permissive entry at Oakland. Nothing the court says in *Carroll* compels us to take a different approach; rather, the court's approval of healthy competition reinforces our opinion.

Delta, Texas, and National cite another court decision which they argue compels the Board to engage in carrier selection. The language in *Delta Air Lines* v. *CAB*, 442 F. 2d 730 (D.C. Cir. 1970), to which they refer is as follows:

> * * * [w]here there are new routes involved, the first inquiry is logically whether

Footnotes continued from last page

thority to serve these markets, unless and until the time arrives when we conclude on the basis of persuasive new evidence that the continued authorization of additional new carriers is no longer required by the public convenience and necessity.

[11] See Order 78-4-121, pp. 4-13.

[12] We found, in support of certificating all fit, willing, and able applicants in the *Chicago-Midway Low-Fare Route Proceeding*, Order 78-7-40, July 14, 1978, that permitting service by many carriers in the markets will maximize traffic stimulation at Midway. We found that "the overall impact of a nonrestrictive approach is to maximize the traffic available to both the new entrants and incumbent carriers. Equally important, carrier competition will permit the public to select the service it wants." (at p. 3)

[12a] In *American Airlines* v. *C.A.B.*, 359 F. 2d 624, 631 (C.A.D.C. 1966), *cert. denied*, 385 U.S. 843, the D. C. Circuit sitting *en banc* cistinguished the Supreme Court's holding in *C.A.B.* v. *Delta* as follows (emphasis added): "The 'security of route' principle thus gives protection to an individual carrier that has made an investment in order to carry on the certificated service, assuring it that the CAB will not worsen its position *by action addressed against it individually, by prescribing inferior routes.* Since the supreme Court gave no indication in *Delta* that it intended to depart from the *Storer* doctrine [*U.S.* v. *Storer Broadcasting Co.*, 351 U.S. 192 (1956)], we see no basis for reading *Delta* as implying that the mere fact that licensees will be affected renders general rulemaking an impermissible means of agency action governing all carriers, or an appropriate general class of carriers."

[12] National argues that continuous application by the Board, with judicial enforcement, of the *Ashbacker* doctrine (*Ashbacker Radio Corp.* v. *FCC*, 326 U.S. 327 (1945)) proves that need-for-service findings must be related to a particular applicant, since by applying *Ashbacker* principles, the Board admits that it is harder for a subsequent applicant to receive authority in the same market. This is the same as saying that because the Board has applied a particular policy in the past, it is forever bound to it. This, however, is at odds with the flexibility the Congress and the courts have accorded to administrative agencies (see footnotes 18-19 below and accompanying text). Nothing in our policy here would prevent an award to a later applicant in any of these Oakland markets. (See footnote 10 above.) In fact, the policy employed here would undoubtedly make it easier for subsequent fit applicants to receive authority there. To repeat our discussion in order 78-4-121 on this same point, "all *Ashbacker* holds is that *if* applications are mutually exclusive *then* they must be heard and decided contemporaneously. The syllogism's minor premise, mutual exclusivity, is established not by anything in the Act but by the Board's longstanding policy of treating applications for the same authority as mutually exclusive in most situations, and its specific findings of mutual exclusivity 'as a matter of economic fact' in numerous cases." (Footnote 49a, p. 44.)

the markets to be served actually need new or additional air service. This is not a perfunctory *pro forma* inquiry; the findings of a public need for the air service, with specif-

V 43/187 SE 26 78 V 4

the markets to be served actually need new or additional air service. This is not a perfunctory *pro forma* inquiry; the findings of a public need for the air service, with specific details as to the quantity, quality, frequency, type, equipment required, facilities available, etc., is a fundamental starting point.[10] (442 F. 2d 733.)

Viewed in the abstract, we can see why the opponents of our *Oakland* policy use this language to bolster their argument,[14] but the footnote to the court's statement brings out clearly the assumptions under which it was working:

The court then went on:

An unsound decision on route allocation, awarding a route to a carrier when neither the need justifies it nor does the carrier have the ability to service it, hurts all concerned: The public interest by saddling the country with an inefficient and distorted air transport system, and perhaps an augmented subsidy; the carrier which would most efficiently service the route but which is barred from doing so; the "successful" carrier which may have a liability on its hands rather than what it optimistically envisioned as a financial asset. (442 F. 2d 733.)

It is evident from these passages that the court was taking the Board's own carrier-selection policy as given and discussing the possible ramifications of Board decisions made under such a policy which do not fairly and as accurately as possible determine which carrier can best meet the needs of the market. The problems the court envisioned are inherent in carrier selection by the Board, and indeed they are persuasive reasons for avoiding carrier selection to the extent we are able to do so (see order 78-4-121, pp. 35-42). The court did not hold that the Board cannot decide that carrier selection is not in the public interest in a particular situation—an issue which was in no sense before it—but only that, when the Board engages in carrier selection, it must do so on a fair, impartial basis. In the situation before the court for review, the Board had updated the economic forecast for one carrier (the winning applicant) but not those of the other applicants with which it was being compared. Not only was the Board's forecast extremely suspect, but the examiner's decision showed a loss and subsidy-need increase for the carrier chosen by the Board.[15] Interestingly, on remand, the Board decided to certificate two carriers in the market in question, even though it could not find that both carriers would be profitable.[16]

Similarly, Braniff, Delta, TWA, Houston, Texas, and National misconstrue the court's decision in *Continental Air Lines* v. *CAB*, 519 F. 2d 944 (D.C. Cir. 1975). It was in response to the Board's argument that

competition is not *per se* favored where it endangers other policy goals in the public interest, such as achievement of efficient, economical service or the fostering of sound economy of operations. (519 F. 2d 952.)

that the court stated:

The legislative history and the early CAB decisions indicate that there is no presumption of competition *per se* because competition *may* prove uneconomical and destructive of the healthy development of the industry if the relevant market is too small to support competing carriers. But when sufficient traffic exists to support competition, certification of competing carriers is mandated by the Act as providing the best means of effectuating the other public interest goals contained in § 102. (519 F. 2d 954.) (Emphasis supplied.)

The court's statement must be interpreted in that context. The Board was then arguing that it could take a restrictive view of the necessity for competition under its general policy of comparative selection, and the court told the Board that it must favor competition unless it would be destructive. The court was not passing on a multiple permissive entry policy and clearly was not indicating to the Board what situations required a finding of a likelihood of destructive competition. We have found in this case that multiple permissive awards will not lead to "uneconomical and destructive" competition at Oakland and that finding has not been rebutted. Nor was the court saying that competition effectuates the public-interest goals of section 102 only when there is sufficient traffic to support the precise number of carriers authorized to serve the market. To have so found would have been to define competition in an impermissibly restrictive sense. A market is "supporting competition," in our view, whenever the Board, through regulatory action, is successfully encouraging competitive behavior in the market. Under such conditions those carriers actually serving at any given time perceive that if they fail to meet the public's needs there are potential competitors ready and able to enter the market and attempt to do so.[17] This is "competition" even if only one carrier happens to be serving the market at the time, so long as that carrier is responding to a perceived threat of new entry.

In support of their restrictive interpretations of our statutory authority, the opponents of our *Oakland* policy refer us to court decisions likening the Board's regulatory responsibilities to those of an agency regulating a public utility. There are many features of the air transportation system, however, that make the application of traditional public-utility type regulation unrealistic, undesirable, and unnecessary. Apart from the obvious differences in mobility of the major capital asset, in most situations an air carrier with unused authority can beneficially influence the behavior of the carrier or carriers serving the market because of the ease of inaugurating competitive service. The tracks, pipes, or wires of the public utility take time and much capital investment to construct and, once in place, are typically immobile. While most of the parties citing these court decisions pay lip service to these differences by stating that Congress and the courts do not want the Board to treat air transportation as a natural monopoly, but to promote "regulated competition," the meaning they give to the latter resembles the exclusive-franchise theory of public-utility regulation and fails totally to recognize and take into account the similarities between the air transportation system and many businesses in which exclusive or nearly exclusive franchises are not awarded. It would be incongruous were we, as National urges, required to follow the interpretations of administrative agencies which regulate true public utilities.

We also note that our observation about the judicial decisions cited in opposition to our show-cause order in the *Piedmont Boston-Entry Application* (see order 78-8-97, p. 16) is relevant here. All the decisions offered in support of the argument that the Board cannot use multiple entry to advance the public-interest goals of the Act arose in the context of a relatively restrictive entry policy adopted by the Board itself in the early days of the 1938 Act, the conceptual framework of which policy continued to be employed by the Board in virtually all of its later decisions until fairly recently, even though the Board's actual entry policy during those years varied from extremely restrictive to quite liberal and back. Court decisions applying the Act quite naturally assumed the conceptual framework and underlying assumptions adopted and proclaimed by the Board itself, the more so since no party to the court appeals was contending for a contrary set of assumptions. In those circumstances, the courts' concern was to see that the Board followed procedures which ensured fairness to all parties in the context of the Board's own conceptual framework and announced entry policy. We do not think it follows from these court decisions that the Act precludes the Board from adopting a fundamentally different set of assumptions.

Braniff, TWA, and National cite a few past Board decisions and claim, in Braniff's words (Braniff comments, p. 9), that the Board has "since its inception interpreted § 102 to permit competitive awards only where the traffic would support the additional carriers." This simply is not true, as shown by the cases we cited in order 78-4-121 (p. 46), and have discussed above (p. 10). Moreover, as we recently stated in order 78-8-97, August 17, 1978, on Piedmont's entry into Boston, "numerous trunkline routes have been awarded in past cases without any express finding of profitability, and a considerable number have been awarded in the face of clear indications that they would undoubtedly *not* be profitable at the outset or for some years to come." (See fn. 26, p. 13 of that order for case cites.) Despite these cases, we recognize that the policy we are adopting here "represents a far-reaching departure from the Board's customary practice in route certification cases during the nearly forty years of its history" (order 78-4-121, p. 21). We must also keep in mind, however, that the policies of administrative agencies change; indeed, the Board's have changed, sometimes substantially, over the years, primarily as a result of prevailing economic and social circumstances.[18] The fundamental requirements are that whatever policy we adopt must be consistent with the statutory mandate, and that, when the Board alters that policy, it must articulate clearly the reasons for doing so.[19] As we demonstrate here and in order 78-4-121, our adoption of a policy of multiple permissive entry for certain Oakland markets meets these requirements.

In sum, we conclude that nothing in the legislative history of the Act, the Act itself, or court interpretations of both precludes us from granting authority in the Oakland markets at issue to more carriers than we believe the markets will be able to sustain at any one time. Indeed, awards to more carriers than the market can simultaneously sustain have been specifically upheld by the courts.

Interestingly, several parties who argue that the Board legally cannot at the outset, let market forces decide which carrier or carriers can provide the best service, argue that awards of backup authority are legal as long as they are awarded on a one-for-one basis and the authority of the first carrier terminates at the same time as the second one's becomes effective.[20] In other words, they apparently view the Act as allowing the traveling public rather than the Board ultimately to determine through the marketplace which carrier shall serve a route, so long as this is done through a long-drawn-out, administratively inefficient process of consecutive backup awards, rather than through the relatively simple and straight forward process we have proposed in our multiple permissive entry policy. We cannot believe that Congress has mandated such indirection. The opponents' concession that the Board may, by making backup awards, admit and make provision for the possibility that its choice of carrier may not be the best choice or the marketplace's choice, thus seems to us to undermine the argument that the Board must always engage in the process of carrier selection in the first place.

Permissive Awards

The second general legal argument against the policy we proposed in order 78-4-121 is that the Board has no power to made a carrier's authority at a point or over a two-point segment completely permissive. Delta, National, TWA, and Texas take this position. Although we have dealt with this argument before (see e.g., *Las Vegas-Dallas/Ft. Worth Nonstop Service Investigation*, order 78-7-116, July 21, 1978), we will discuss some of the specific contentions made here and the concept of permissive authority in the context of this case.

All four parties cite the abandonment and adequacy-of-service provisions of the Act (§§ 401(j) and 404(a)(1)) to argue that, once the Board has found that particular authority is required under § 401, the carrier awarded that authority has an obligation to provide it and cannot abandon the market without Board approval. Thus, they argue, Congress clearly has made permissive authority at a point illegal.

We see no inconsistency between awards of permissive authority in this or any other case and the statutory requirements that carriers provide adequate service (section 404) and obtain Board permission before suspending service or abandoning "any route or part thereof" (section 401 (j)). The fact that certificate authority per se is permissive does not vitiate what Congress in section 404 clearly intended to be a carrier's continuing obligation to furnish "safe and adequate service, equipment, and facilities" in accordance with its certificate. In the first place, an airline's freedom to choose whether or not to provide service does not negate its responsibility, once it determines to exercise its authority, to make sure that its service, equipment, and facilities are "safe and adequate." Moreover, we recognize that in some circumstances the adequacy standard may require single-plane or nonstop service to a permissive point, or over a permissive segment, just as in the past it has been held to authorize the Board to order a carrier to schedule flights in on-segment city-pair markets that it had no mandatory certificate obligation to serve. *Baltimore Adequacy of Service Investigation*, 30 CAB 1215 (1960), *aff'd, National Airlines* v. *CAB* 300 F. 2d 711 (D.C. Cir. 1962).

The Board has held that adequacy of service under section 404 must be evaluated on the individual facts of each case; on the basis of a market-by-market appraisal rather than the general level of service at a city; and on an analysis of the size and economic characteristics of each market, the aggregate of service being provided by all carriers, and the purpose for which each was certificated. *Fort Worth Investigation*, 27 CAB 260 (1958); *Toledo Adequacy of Service Investigation*, 30 C.A.B. 169 (1960), *aff'd. Capital Airlines* v. *CAB*, 281 F. 2d 48 (D.C. Cir. 1960); *Flint-Grand Rapids Adequacy of Service Investiagation*, 30 CAB 1120 (1960); and *Baltimore Adequacy Investigation*, above.[21]

Since the test of "adequacy" looks to the traffic and economic characteristics of markets and the overall quantum of service they receive, we see no reason why we cannot conclude, as we do here, that the best way to insure continued adequate service at Oakland is through multiple competitive authority, for the same reasons we have

[10] In the Bureau Counsel's Request for Evidence issued after the prehearing conference on 19 October 1967 detailed information was requested regarding carrier schedules and fares, air traffic, carrier financial forecasts, carrier operating statistics, present and proposed equipment, airport facilities, and economic characteristics and population trends of the cities involved. These criteria reflect the true nature of the initial inquiry *in a comparative hearing*. (Emphasis supplied.)

[14] The cited language is of course pure dictum, since the issue before the court was whether the Board had selected the right carrier to serve the routes at issue, not whether there was a need for service. The restrictive implications of this language were in any event inferentially repudiated by the same court in the *Continental* case discussed below.

[15] Order 73-2-90, Feb. 23, 1973. See order 78-8-97, p. 14, fn. 28, for a fuller discussion of this case.

[16] The Board's action in granting Southern permissive nonstop authority in the Memphis-Miami market, notwithstanding its finding that Southern would probably be unable to compete with Delta, was expressly approved by the same court in *Southern Airways* v. *CAB*, 498 F. 2d 66 (C.A.D.C. 1974).

[17] Moreover, it is noteworthy that in *Continental*, the court was in effect holding that the Board had exceeded its discretion to restrict competition for protectionist reasons.

[20] Delta, TWA, and Houston.

[21] While each carrier has an individual obligation to provide adequate service, that obligation is tested by looking at the market's overall level of service. This follows from the need to take all facts and circumstances into account. However, not all aspects of adequate service are to be judged on an aggregate basis: "If the apparent inadequacy * * * were to be of a positive or affirmative sort—e.g., undependability, bad food, discourteous treatment, etc.—the fact that another carrier in the market provided service free of such defects would have little, if any, compensating effect * * *." *Fort Worth Investigation*, 27 CAB at 267.

already given in finding multiple entry to be conducive to the fullest and most rapid development of the Oakland markets. There is nothing new in this

is a distinction of small practical or legal significance. The Board grants new authority on the basis of the need for service in city-pair markets and not

marginal markets than they otherwise would have. The net result we are seeking is to bring more price-competitive and more market-responsive air

ing a point being compelled to continue doing so for any prolonged period.[29] Moreover, we believe that by authorizing all qualified applicants to serve

V 43/187 SEP 26 78 V 4

already given in finding multiple entry to be conducive to the fullest and most rapid development of the Oakland markets. There is nothing new in this approach, since competition has always been the Board's primary tool for insuring adequacy of service. In the 1960 *Baltimore* case, cited earlier, the Board acknowledged its principal reliance on competition to maintain adequate service during the previous 20 years; and in another adequacy case of that period (*Fort Worth*), it expressly recognized the value of even unused competitive authority:

> [T]he presence of a competitor free to act if established carriers lag is in itself of value to the public, and will normally tend to insure that adequate service to the public will be provided in the market in question. (27 CAB at 266.)[22]

In fact, except for a brief spate of formal adequacy proceedings between 1958 and 1961, cited above, the Board has relied on competition to insure adequacy to the virtually exclusion of formal adequacy investigations. Since we are now placing even greater emphasis on competition than in the past, there is no reason to expect a change in that approach; however, we do not foreclose the possibility that in some unforeseen future circumstances the Board may decise to investigate the adequacy of service in Oakland markets if competition alone fails to maintain it.

As for a carrier's obligation under section 401(j) to seek Board approval before suspending service or abandoning "any route or part thereof," we have already shown that it does not prohibit the Board from granting discretionary certificate authority. Otherwise, the great flexibility that carriers have long enjoyed operating between and among points on the same segment would be impossible. We see no reason "to assume that the Act permits that kind of operating flexibility and yet prevents the Board from making a point or segment wholly permissive if the public convenience and necessary so require." *Las Vegas-Dallas/Fort Worth, supra*, p. 12.

The suspension, deletion, and abandonment provisions of section 401 (g) and (j) are designed to prohibit a carrier from eliminating all service over a route or portion thereof purely at will without Board authorization, and to provide communities and other interested parties with an opportunity to argue that service should be maintained. But nothing in the Act prevents the Board from authorizing a carrier to suspend service at or abandon a new market or point at the same time as it grants it the right to serve that market or point in the first, place—in other words, from making a permissive award—as long as the proper public convenience and necessity/public interest findings are made, the procedural prerequisites of notice and hearing are met,[23] and those opposed to a grant of permission to suspend or abandon service (and who therefore favor mandatory rather than permissive authority) have an opportunity to present their opposing views. Since these procedural and substantive requirements have been met here, we find that permissive awards are entirely proper.

In view of all this, section 401(j) requires a carrier to obtain separate Board approval of a discontinuance of service only if that service is required (not merely authorized) by its certificate. There is accordingly no need for further Board approval where the carrier fails to provide service the authority for which is permissive. This is obviously true where a carrier, for example, fails to provide nonstop service in the typical city-pair market where its nonstop authority is permissive.

The opponents' arguments on the supported unlawfulness of permissive authority, moreover, completely ignore the massive practical fact that, after 40 years of route regulation, almost the entire certificated domestic route system is built up of authority which, for all practical purposes, is wholly permissive in nature.[24]

The strained interpretation these four parties give to the Act, if valid at all, would logically apply to any type of newly-awarded authority, not just that at new points, or over new two-point segments. Thus, § 401(j) refers to the abandonment of "any route, or part thereof," not just those parts awarded in the form of two-point segments.

The Board has for many years favored the award of permissive, rather than mandatory, authority where the market at issue is already on-system or on-segment for the successful applicant; this is true even where the Board finds an affirmative need for additional service in the specific market at issue.[25] Of course, the objecting carriers have been granted such permissive authority in many discrete city-pair markets. Yet they do not argue that such a finding carries with it an obligation to serve those markets. The only difference between the permissive authority these carriers have and the permissive authority they object to is that the former requires some scintilla of service at each point on a linear route segment.[26] That, however,

[22] As previously noted, this "competitive stimulus" rationale was later expressly approved in *Southern Airways* v. *C.A.B.*, 498 F. 2d 66 (C.A.D.C. 1974).

[23] We have already explained that the statutory hearing provision does not mandate an evidentiary hearing on the general policy question of whether multiple permissive awards are required by the public convenience and necessity. See order 78-4-121, p. 57. No party has suggested or attempted to demonstrate that the argument-type procedures we have provided are inadequate for determining this policy issue, or that an evidentiary hearing on it it required.

[24] Indeed, National and Texas do not seem to recognize the existence of any permissive authority at all. National states "When the agency has found such services were required by the public convenience and necessity, as that term is construed under the relevant statute, then the agency issues a certificate which not only authorizes, but requires, the applicant to provide the service." Similarly, Texas argues, that ". . . the courts are of the uniform opinion that the Board cannot satisfy its statutory duties by the grant of permissive authority." As we show in the text, these contentions are wholly untenable.

[25] See, e.g., *Allegheny Airlines Route 97 Investigation*, 50 CAB 94, 104 (1968); *St. Louis-Dayton/Columbia/Pittsburgh – Subpart M Proceeding*, 53 CAB 624 (1970); *North Central Madison-Chicago Nonstop Service Case*, 44 CAB 315 (1966); *Eastern Air Lines-Piedmont Aviation Route Exchange*, Order 77-12-76, December 14, 1977. See also *Southern Airways Route Realignment Investigation*, Order 73-2-90, February 23, 1973, at 18, affirmed, *Southern Airways* v. *CAB*, 162 U.S. App. D.C. 115, 498 F.2d 66 (1974), where the court (in fn. 21 to its opinion) specifically approved the Board's grant of permissive authority to Southern on a "competitive stimulus" rationale, notwithstanding the Board's finding that Southern would be unable to compete in the market in question unless Delta (the principal awardee) defaulted on its service promises. (The same footnote noted the existence of Eastern's unused permissive authority in the market.)

[26] With few exceptions, route authority has been conferred in the form of long linear segments describing a terminal point, one to several dozen intermediate points, and a terminal point (see section 401(e) of the statute). Unless specifically conditioned, the license permits the carrier to operate between any two points named at any of the qualitative levels of service, i.e., nonstop, one-stop, multi-stop, or connecting. Even a connection involving a backhaul is considered to be the "provision of service" for purposes of discharging the certificate obligation, and the Board is specifically proscribed from regulating schedules or specific aircraft types. On the other hand, it has been customary for the Board to include in most domestic certificates a clause providing that "the holder shall render service to and from each of the points named herein," and this clause (rather than the statute per se) has made it necessary for the carrier to obtain Board permission under sections 401 (g) or (j) of the Act before discontinuing all service at the point. However, this is not, as a practical matter, a meaningful service requirement since the carrier is free to provide token operations to whatever point on the segment it chooses to serve, and virtually any city-pair service it chooses.

Under these circumstances, it is important to recognize that incumbent carriers in general and large incumbent carriers in particular have enjoyed an advantage over new entrants (and to a lesser extent large carriers have had an advantage over smaller). This is because new route extensions in the past have tended to involve mandatory authority at a new point for new entrants and some-

Footnotes continued on next page

is a distinction of small practical or legal significance. The Board grants new authority on the basis of the need for service in city-pair markets and not on the basis of need at a single point. There is no such thing as a public need for service "at" a point. Every airline passenger wants to fly to some specific destination; all public need for service is therefore in specific city-pair markets. A need for service—particularly for single-plane or nonstop service—between A and B is not satisfied by service between A and C.

As long as a carrier can enter and leave a particular city-pair market at will (as is the case in nearly all markets), it is effectively under no legal obligation (except possibly under section 404, see above) to provide the services permitted by the Board's grant of authority and to which its original route-case proposals and evidence were directed, "Market need" is not reasonably satisfied because a carrier is obligated to serve the individual points. In short, the objectors cannot be seriously heard to contend that permissive awards are inconsistent with the requirement of section 401(d)(1) that the authorized transportation be "required by the public convenience and necessity." If true, the argument would bring into question permissive city-pair authority repeatedly found lawful, authority which exists in over 90 percent of the domestic city-pair markets, and the only kind of authority which exists in many of the largest of them.

Moreover, even where a carrier's authority to serve a particular market is mandatory in form, the service obligation is of little value to the community (see Order 78-4-121, p. 50), particularly when both the Board and the carriers have considered one weekly round trip sufficient to fulfill whatever service obligations the certificate imposes.[27] Thus, the permissive nature of the Oakland awards we will make will not give the public less of a guarantee of genuine service than it would have under so-called "mandatory" authority, In fact, the reduced procedural burdens and permissive authority we contemplate for Oakland may encourage carriers to attempt service in more marginal markets than they otherwise would have. The net result we are seeking is to bring more price-competitive and more market-responsive air transportation to a maximum number of people, an aim which is fully consistent with the public convenience and necessity. The position of the opponents of this policy, taken to its logical conclusion, might well require the elimination of all existing permissive authority, the establishment of mandatory minimum standards of service, and the undoing of all past and current route realignments. It could require depriving carriers of a large part of their operating flexibility and the substitution of Board judgment for carrier management discretion as to levels of service and schedules on routes all over the country.[28]

Delta maintains that a carrier's obligation to serve a point (as distinct from a market) can be significant. It argues,

> If carriers may withdraw from the city at will, where is the protection for airport revenue bonds? What protection do travelers to or from that city have that some service will be provided over routes and in markets for which a public need was found?

On the second question, as our remarks above demonstrate, the requirement to provide some service in reality imposes no meaningful obligation. Moreover, we believe that, if there is in fact a public need for service, the award of multiple permissive authority will better insure its provision than will the imprecise and restrictive practice of carrier selection with all its attendant rigidities in matching the right carrier and services with changing public desires.

As for the first question, it is our view that the issuance of wholly permissive authority will not, to any significant extent, be the cause of carriers withdrawing from cities in circumstances where they would not find it easy to withdraw today or would not have found it easy in the past. The Board's past policy on permitting suspensions and deletions of service has almost without exception been extremely liberal; there are few examples of carriers desiring to cease serving a point being compelled to continue doing so for any prolonged period.[29] Moreover, we believe that by authorizing all qualified applicants to serve markets here at issue on a permissive basis, we will be maximizing the likelihood that, should any particular one withdraw from Oakland, its services will be replaced by those of a qualified carrier, quite possibly one that is more efficient or better situated to satisfy Oakland's service needs on a profitable basis.

Applying Delta's argument to the facts here, no one has suggested that Oakland's revenue bonds will be placed in jeopardy by our porposed grants of permissive authority, as they clearly have not been heretofore by the almost completely permissive nature of the nine incumbent carriers' authority at Oakland, which has not prevented the city from developing an excellent airport facility. While Houston does appear to argue that something of the sort will occur at Houston, those comments are directed to the application of multiple permissive entry policy on a large scale, and we do not understand Houston to argue that permissive Oakland-Houston authority will jeopardize its airport financing arrangements. More to the point, the issuance by the Board of permissive authority will not release any carriers from any contractual or leasehold obligations to airport authorities they have heretofore undertaken, nor we believe will it necessarily keep carriers from entering into such obligations in the future. After all, unregulated businesses routinely enter into long-term leasehold commitments to property developers (including governmental authorities), notwithstanding their lack of protection against new competitors and their complete legal freedom to leave markets at will. Finally, we are not persuaded that long-term leases of the existing kind, however desirable, are essential to the creation and maintenance of adequate airport facilities.

Having concluded that nothing in the Act precludes the policy we proposed in Order 78-4-121 as a matter of law, we now turn to an analysis of the

Footnotes continued from last page

times for smaller carriers, whereas improved authority was often conferred on larger carriers by merely removing a restriction to serve markets already named on one or more segments or routes, thereby almost always creating permissive city-pair authority.

[27] Both Delta and National have "mandatory" segments (Miami-San Francisco and Atlanta-San Francisco, respectively) on which they provide as little as one or two round trips per week. We note, incidentally, National's recent application to make its Atlanta-San Francisco segment permissive, in which it argues that the public convenience and necessity require such action.

[28] Delta and Texas cite *City of Lawrence* v. *CAB*, 343 F.2d 778 (D.C. Cir. 1965) in support of their position. That case, however, involved the deletion of a point from a carrier's certificate on the grounds that another carrier held authority there and could adequately meet the public's needs, when in fact the services of the two carriers were not the same. Despite the Board's findings that its action would benefit the public in the long run, it appeared that a significant number of travelers would lose service. The court's main concern was with the inadequacy of the Board's explanation of its action, and in particular its unexplained departures from previous policies. We see no relation between that case and the situation here.

[29] In the "area" cases of the 1940's and 1950's the Board permitted the trunklines to withdraw from several hundred small and medium-sized communities, most but not all of which were transferred to local service carriers. In the late 1960's and early 1970's the process was repeated as the local service carriers were permitted to terminate service at several hundred points (many the same ones previously dropped by the trunks), in most but not all cases in favor of reliance on commuter carriers, either exempted or (in a few cases) newly certificated. Notwithstanding this general policy of providing replacement service by a smaller carrier, a considerable number of once certificated communities have lost air service altogether, usually because of a paucity of traffic.

objections posed on economic and policy grounds.

ECONOMIC AND POLICY OBJECTIONS

able to show the presence or likelihood of such deterrent effects, we will retain our power to take corrective

convinced that such deterrence is a common phenomenon, or more specifically that it is likely at Oakland.

The plain fact is that there have been literally dozens, perhaps hundreds, of cases in which smaller carri-

very frequently go on to achieve a substantial, often, dominant, market position. Being big is not always an advan-

whole point of our developing policy of multiple permissive entry, and this is precisely the advantage the civic

objections posed on economic and policy grounds.

ECONOMIC AND POLICY OBJECTIONS

A number of parties (mostly civic parties and State aeronautical agencies) continue to argue that the existence of dormant authority in the Oakland markets here at issue, and in other markets elsewhere, will discourage new carriers from entering them. They accordingly urge us to adopt a policy of eliminating existing dormant authority in each market where we grant new authority. They further urge us to make the new authority mandatory, or at least to condition it so that it will lapse if service is not provided.[30]

We are not prepared to say that there never was or will be a situation in which a potential new carrier was deterred from entering a market by the existence of dormant authority in the hands of another carrier. If in any future case the interested parties are able to show the presence or likelihood of such deterrent effects, we will retain our power to take corrective measures, including the deletion or restriction of the dormant authority in question.[31] But we remain wholly unconvinced that such deterrence is a common phenomenon, or more specifically that it is likely at Oakland. Moreover, the solutions offered by the civic parties would throw away many of the prospective benefits of multiple permissive authority, and would entail serious dangers of uneconomic behavior by carriers. Accordingly, we do not find in this argument about the asserted effects of dormant authority a valid reason for not adopting a policy of multiple permissive entry, either in general or at Oakland in particular.

Thus, although there may be future occasions when we will find that the public convenience and necessity will require us to delete outstanding dormant authority to achieve the optimum level and quality of service, we expect such occasions to be the exception, and believe that in most cases the continued existence of dormant authority will be conducive to the public good. We believe events will justify the continuation of our past policy of deleting or suspending dormant authority in only a small minority of the cases brought before us.

In view of the persistence of the argument that dormant authority deters new entrants, it is remarkable how few actual cases are cited in support. We discussed in Order 78-4-121 (pp. 11-12, 20) in some detail why we do not believe that the existence of extensive dormant authority at Oakland has been one of the causes of that community's deficient service, and what we considered the true causes to be. We pointed out that in several instances small carriers have shown no hesitation in entering Oakland markets notwithstanding the dormant (or indeed, in the case of PSA in the Oakland-Los Angeles market, the active) authority of much larger carriers. We discussed in particular Hughes Airwest's successful entry into the Oakland-Las Vegas market notwithstanding the dormant authority of Western, Delta, National, and TWA, and indeed in face of Western's apparent attempt to preempt the market while Airwest's application was pending. This clearcut example of Airwest's willingness and ability to challenge one much larger carrier and to ignore the dormant authority of several others leaves us skeptical about the asserted unwillingness of Airwest, as reported by the Utah parties, to enter the Salt Lake City-Portland market simply because a larger carrier has dormant authority there. No one has offered any plausible explanation of why the same carrier's behavior should supposedly be so different in markets having as little obvious difference as Salt Lake City-Portland and Oakland-Las Vegas (or Oakland-Phoenix, also discussed in Order 78-4-121).[32]

[30] The California parties describe this as a "use-it-or-lose-it" condition. We hesitate to adopt this graphic term in the present context for fear of confusion with the Board's old "use-it-or-lose-it" policy of the 1950's and 1960's, enunciated in the *Seven States Area Investigation*, 28 CAB 680, 755 (1958), which had to do with the minimum level of enplanements newly certificated communities were expected to produce in order to continue receiving subsidized air service.

Birmingham takes a slightly different approach; it urges that each applicant be required to file a statement of commitment to initiate service and detailed descriptions of the service proposed. Since we fully expect that not all carriers awarded authority under a multiple permissive entry policy would institute service, indeed, that it would not be economic for all carriers to do so, such a requirement would be inconsistent with the way we are conducting this case. Alternatively, Birmingham requests that each applicant be required to file a statement of its plans for initiation of service on the routes applied for; similarly, Oakland requests, in its petition for reconsideration, that the evidence requests in Attachments H and I of Order 78-4-121 be expanded to include the following:

"1. How soon after certification does the applicant expect to initiate service in each market; what type equipment will be operated and at what frequency?

"2. In light of the above schedule, what are the applicants' requirements for counter and gate space, and other airport facilities or services, at the Oakland International Airport?" We think these are reasonable requests (they appear to cover Birmingham's alternate request as well) and we will therefore add them to the information requested in Attachment H (there is no need for duplication in Attachment I). The communities must understand, however, that it may be impossible for some carriers to decide whether to enter a market or how much service to provide until they know what their competition will be. As a result, the answer of some applicants to these questions may be that their plans are too indefinite to describe. Such an answer will be considered sufficient.

[31] A distinction might be drawn between (a) situations in which authority currently not being used was awarded in specific contemplation that it would not or might not be used, and where the parties have had an opportunity to address themselves to the possible future consequences of such nonuse, and (b) situations where the unused authority either is a product of pure historical accident, or was awarded in the expectation that it would be used, so that the possible future consequences of nonuse have not been considered. Into the first category would fall, for example, the permissive Memphis-Miami nonstop authority awarded Southern on remand in the *Southern Airways Route Realignment Investigation*, Order 73-2-90, February 23, 1973, discussed with approval in *Southern Airways* v. *CAB*, 498 F. 2d 66 (C.A.D.C. 1974) (see footnote 21), where the Board awarded nonstop authority to Southern as well as Delta although it fully expected that only Delta would provide nonstop service. The authority we will award here to all qualified applicants also falls into this category, since we do not expect all awardees to provide service, even though we are confident service will be provided. We would also assign to the first category the improved authority awarded in route realignment proceedings on grounds of operating flexibility without any showing of specific service plans, since the carrier's freedom to use or not use the flexible authority granted is the whole point of the award. On the other hand, the "historical accident" subdivision of the second category would appear to cover those on-segment markets in grandfather certificates where unrestricted nonstop authority flowed from the Board's repeal of its early "nonstop" regulation (see Order 78-4-121, pp. 48-49, fn. 56). The second category also covers those situations under the Board's past limited-entry policy in which a carrier promised service in a market and was granted authority on the strength of that promise, but subsequently discontinued service (or never inaugurated it) either because the authority was permissive in form or because the carrier sought and was granted suspension authority. (We note that in a number of cases during the past decade where it has suspended an incumbent carrier's authority in favor of a replacement service by a smaller carrier, the Board has imposed conditions restricting the incumbent's right to reenter the market at will.)

We suggest this possible distinction between these two categories of situations because we believe that there is no reason whatever for us to concern ourselves with the possible effects of dormant authority in the first category, having already once had the issue before us. Even as regards the second category, however, we see no present justification for (and many drawbacks in) the adoption of a general policy of deleting dormant authority in the latter category of cases. We feel certain that in most instances the existence of dormant authority in these markets will prove to have no ill effects, and that its deletion would be contrary to the true interests of the communities themselves.

[32] The other alleged incidents of deterrence by dormant authority likewise fail to

Footnotes continued on next page

The plain fact is that there have been literally dozens, perhaps hundreds, of cases in which smaller carriers have unhesitatingly sought and been awarded authority to enter markets in which larger carriers held outstanding dormant authority. In many, perhaps most, of these cases they have not even bothered to ask the Board to delete or suspend this dormant authority; where they have asked, the Board has only in a minority of cases done so, yet the applicants have pressed on and entered the markets anyway. We are not aware of a single instance, nor has any been called to our attention, in which an applicant has withdrawn from a route case because the Board has refused to delete dormant authority, or in which a successful applicant has declined to inaugurate service on that ground. If dormant authority had the deterrent effect attributed to it by the civic objectors, surely some such incident would have occurred by now.

Moreover, the deterrence theory ignores the fact that a large portion (quite probably a majority) of the route applications filed with the Board are by smaller carriers seeking permission to enter markets in which larger carriers not only hold authority but are actively engaged in service. The former are obviously in no way deterred; when awarded authority they very frequently go on to achieve a substantial, often, dominant, market position. Being big is not always an advantage; very often a small or medium-sized market will be far more important to a smaller carrier than to a larger rival, and will receive more top management attention, more innovation, service more carefully tailored to local market needs, the support of beyond-market traffic flows to which the larger carrier lacks access. (The list could be extended considerably.) Of course, the smaller carrier does not always beat out the larger, but it does so often enough to refute utterly any theory that the latter have such weighty natural advantages that the smaller ones will be driven out of the market unless the Board extends its protecting arms around them.

We suspect that the persistent desire for exclusive authority—for that is what the request to delete dormant authority comes down to—is the atavistic residue of a regulatory system which continues to bear a tantalizing albeit anachronistic resemblance to the systems appropriate for regulating the typical "naturally monopolistic" public utility. As long as carriers continue to perceive the pieces of paper issued to them by the Board under this system, called "certificates," as having a market value separate and apart from the value of their airplanes, facilities, and of the going concern, a value based on their conveying some degree of exclusiveness, carriers are behaving rationally (within the context of an irrational system) when they seek such exclusive rights wherever possible, whether or not they really need them in order to operate. Carriers considering new service to a community have every incentive to seek the support of civic parties for a grant of exclusive authority; it does not follow, however, that if they do not get it they will not serve. We believe that under a more rational regulatory system, as the mythos of the exclusive franchise fades, the demand for such franchises will diminish, and it will be more widely realized that good air service not only does not require them but will indeed be best assured by their absence.

The point that we believe has been missed by the parties asking for the deletion of dormant authority, and the grant of mandatory authority or authority conditioned on use, is that such measures are quite likely to lead to sluggish and unresponsive service. As we have said, there is little evidence that dormant authority deters new carriers from entering, except in unusual circumstances; but there is plenty of evidence that the realistic threat of prompt new entry is the best guarantee of attentive, responsive service by an incumbent. This is the whole point of our developing policy of multiple permissive entry, and this is precisely the advantage the civic parties asking for deletion of dormant authority and denial of new permissive authority would throw away.

Moreover, we believe that the policies the civic parties would have us follow would be far more likely to lead to uneconomic behavior and destructive competition than would a policy of multiple permissive entry, without at the same time producing better service. If authority were made conditional on use, a carrier finding service in a market unprofitable at present, but not wishing to give up its authority for all time to come, would have an incentive to continue the unprofitable operations. It is unlikely that such service would be genuinely responsive to community needs, since the carrier's incentive would be to minimize its losses by providing no more than the bare minimum needed to avoid forfeiting its authority. In a small market, however, such grudging and unresponsive service might well destroy the ability of another carrier to serve the market profitably. In such a holding action, the "deep pockets" of a large carrier might well give it an advantage over a smaller one with fewer resources but quite possibly greater ability to serve the market well. Feeling forced to stay in the market, the large carrier might be impelled to behave in a predatory manner, seeking to drive the others from the market and thus automatically to deprive them of their authority.[32a] If a number of carriers attempted to hold on to authority in a market which currently could be served profitably by only one or a few of them, this could produce the very conditions of destructive competition which Congress feared in 1938. Yet if a carrier whose service is currently unprofitable knows it can reenter the market at a later date without going through an elaborate and costly certification proceeding, it will be less likely to maintain a money-losing service which may prevent another from operating profitably.[33] We remind the civic parties once again that there is no free lunch or free air service, and that service rendered at a loss, unless

[32a] See Tr. 137.

[33] National argues generally (without attempting to connect its argument with the specific situation at Oakland) that multiple permissive authority will lead to predatory or destructive competition if carriers see a potential for preempting certain markets or if they think the authority they get now will be taken away from them—possibly by legislative action—if they do not use it. We responded to this argument in Order 78-7-116 (p. 4) where we observed that it simply depends upon too many unreasonable assumptions. We cannot predicate our policies on an assumption of future irrational legislative action.

directly subsidized, is rarely if ever either plentiful or convenient.[34]

In concluding that our proposed policy of awarding permissive authori-

takes this position because it expects we will apply the same policy at all Bay Area airports, and consequently expects the incentive to concentrate

writing on a clean slate, will not in itself produce any economic waste, and will, we are confident, produce services for which there is a genuine economic

which the public interest may be better served by a more restrictive approach, requiring the Board to make authority 'mandatory' and to select only one or less than

nomically irrational or predatory behavior at Oakland. We are well aware of the systemic factors which render the results of introducing changed

and will on balance be environmentally beneficial.

While the increased activity at Oakland will have a negative impact on its

directly subsidized, is rarely if ever either plentiful or convenient.[34]

In concluding that our proposed policy of awarding permissive authority to all qualified applicants is the one most likely to insure improved service to the traveling public at Oakland (or elsewhere), we do not ignore the constraints on carrier behavior imposed by temporary externalities outside regulatory control. Thus, at the rate traffic has been growing this year in response to lower fares, there may soon be a shortage of capacity which will make it difficult for carriers to inaugurate extensive new services until additional capacity can be ordered and brought on line. We have recently seen carriers reconfiguring their aircraft to add seats and rescheduling their system operations to add daily aircraft utilization, but the additional capacity that can be produced by these expedients, desirable as they are, is limited, and a temporary shortage of aircraft capacity is a real possibility. That such a shortage may temporarily limit the ability of carriers to add new services, however, in no way impairs the long-run validity of our conclusions about the merits of a policy of multiple permissive entry. Any alternative policy would have to deal with the same external constraints, and would not have the long-term merits of our proposed policy.

Braniff and National argue that multiple permissive entry will not solve Oakland's problems.[35] National takes this position because it expects we will apply the same policy at all Bay Area airports, and consequently expects the incentive to concentrate service at San Francisco to win out. On the other hand, if we are going to apply the policy at Oakland only, National calls on us to acknowledge that we are stacking the deck in Oakland's favor and that this regulatory action, not rational economic incentives, will be the driving force behind new Oakland service.

Since "rational economic incentives" have not had free play at the Bay Area airports in the past, we cannot predict with certainty how they may operate there in the future. We do not plan, for the time being, to throw open access to SFO, but we believe that our policy for Oakland is a necessary response to 30 years of regulation which helped produce concentration at SFO. Braniff's argument that we may have overestimated Oakland's traffic potential and carrier desires to tap it, and National's that carriers will not serve Oakland when they have access to SFO, assume that, given complete freedom, no one would have a rational incentive to serve Oakland. This ignores the fact that Oakland is the base of operations for two large supplemental carriers that may be applicants in this proceeding. If certificated, they will no longer be precluded from offering scheduled service there, which might well make economic sense for them even if they later acquired scheduled authority at SFO. Moreover, some new entrants to the Bay Area may well consider it easier to operate successfully at Oakland rather than try to take on the established San Francisco carriers.

There is simply no way of telling. The way to overcome the situation we have inherited as a result of restrictions imposed by the Board in the past is to open the Oakland markets to all who wish to serve them. There will be time enough at some later point, when and if we decide to open SFO as well, to ascertain whether, in those genuinely free-market circumstances, all the traffic tends to congregate there. If it does, it is at least conceivable that that is the best way of serving the public. Meanwhile, no carrier need serve Oakland under the policy we are adopting here if it feels that such service will be uneconomic. So while, if we were writing on a clean slate, the most economic pattern of service would be one that would arise if we opened both Oakland and San Francisco to all applicants, the fact that we have decided at this time to move only partially, in recognition of the fact that we are not writing on a clean slate, will not in itself produce any economic waste, and will, we are confident, produce services for which there is a genuine economic need, and which have been discouraged by our heretofore restrictive entry policies.

Finally, several comments, although not directed at Oakland specifically, discuss the systemwide implications of a multiple permissive entry policy. On the one hand, PSA apparently has no problem with the application of this policy at Oakland, but it argues that systemwide application would favor the stronger carriers; it urges that smaller carriers be given priority in route expansion opportunities. Airwest feels that the Board is now applying the multiple permissive entry policy only in small markets, which will exacerbate the problem of large-carrier dominance.[36]

On the other hand, Houston, United, and the Department of Justice argue that piecemeal application of a multiple permissive entry policy will cause irrational behavior. United reasons that carriers will not discontinue inefficient operations in markets at issue if they have nowhere else to use their equipment—"the necessary access by United and the other carriers to make the multiple and permissive policy effective does not exist." DOJ argues that, if the Board treats *Oakland* as an experiment, opposing carriers will dump excess capacity there to sabotage it.[37] Houston argues that carriers, apparently for uneconomic motives, will shift capacity from smaller markets to the ones that are "decontrolled." DOJ and United both argue that the Board's rationale in Order 78-4-121 for applying a multiple permissive entry policy at Oakland is equally relevant to the rest of the system.

We appreciate the importance of the questions raised by these parties about the comparative effects of introducing multiple permissive entry systemwide or in selected markets but this is not the forum for considering that general issue in our recent *Las Vegas-Dallas/Ft. Worth Nonstop Service Investigation* opinion, Order 78-7-116, we said:

• • • despite our general views on this subject, there may be some circumstances in

[34] Braniff also argues that the answer to Oakland's problems is exclusive, mandatory authority "with a serious policing mechanism." Aside from the question of how we could practically "police" carrier schedules, such an approach obviously would discourage carriers from testing the traffic potential of markets which would be considered marginal under traditional forecasting methods.

[35] We note Delta's argument that the Board's analysis in Order 78-4-121 ignored the existence, through August 23, 1976, of SFO Helicopters, a certificated helicopter carrier which provided service between the Oakland and San Francisco airports. Delta asserts that this service provided convenient air transportation to SFO for the Oakland area at no cost. We do not understand Delta to make this point for the purpose of influencing our decision, but merely to explain why Bay Area carriers have so largely ignored Oakland. We recognized in Order 78-4-121 that the current concentration of service at SFO is economically rational, given the Board's past certification policies (see p. 12). Moreover, if we assume the validity of Delta's argument, it strengthens our findings that Oakland passengers are now suffering serious inconvenience since they no longer have helicopter service to connect them to SFO. In any event, we disagree with Delta's implication that because the service was free (through joint-fare arrangements) and frequent, it necessarily was convenient. Short as they were, those flights added a significant amount of time to the total trip (including the wait at Oakland for the helicopter departure and the second wait at SFO for the main flight departure), plus an increased risk of lost or delayed baggage.

[36] Airwest includes *Oakland* in this category, using the Oakland-Phoenix market as an example. On the whole, however, the large carriers provide most of the Oakland service, and this case represents a greater opportunity for small carriers to expand than for large carriers to increase their dominance. For our policy to be effective, we cannot exclude one market simply because a local service carrier happens to serve it.

[37] Its counsel also stated at the oral argument, that • • • carriers might also in good conscience and indeed in their best interests shift excess capacity to those markets like Oakland that have already been freed up prior to the systemwide implementation of an eased entry policy."

which the public interest may be better served by a more restrictive approach, requiring the Board to make authority 'mandatory' and to select only one or less than all of the qualified applicants. But as we see it now, if and when we do adopt a general policy of multiple entry, it should not be limited to a few routes or areas; whatever its final form, to be effective it should be extended to the core of the system and be broad enough (and carried out rapidly enough) to create substantial new competitive opportunities for all segments of the industry, including small trunklines and local service carriers.

The general arguments on the subject should have been, and in fact were, made in the context of Docket 28848, where we are considering whether to adopt multiple permissive entry as a general policy. *Oakland*, although consistent with the Board's evolving policies, also involves special circumstances (as we pointed out in Order 78-4-121), and we believe that a multiple permissive entry policy is justified to remedy Oakland's general lack-of-service problems, regardless of whether we decide to apply the policy more broadly. Just as there may be circumstances requiring a more traditional approach even if we give the policy broad applicability, there are and will be situations calling for application of the policy if we decide not to apply it on a large scale. *Oakland* is one of these. We do not believe that the limited steps we have taken in this direction (i.e., *Oakland* and *Midway*, Order 78-7-40) will cause perverse economic behavior sufficient to cause us prematurely to decide on what scale to certificate carriers on a multiple permissive basis.

There are at least three reasons for doubting the likelihood that this experiment will be distorted by the kind of perverse behavior predicted by DOJ and Houston. First of all, capacity in the industry is already tight and promises to become tighter (see above p. 44), both because of the rate at which traffic has been growing this year, and because the carriers ordered relatively few new aircraft during the early 1970's, when a much lower level of traffic growth prevailed. In these circumstances, we believe that the carriers will have better things to do with their available capacity than to throw it deliberately into uneconomic operations.

Second, it would be irrational of them to use that capacity for this kind of purpose at Oakland, where the value of the certificates is being driven to zero, and where as a result there is no likelihood of being able in the future to recover gains through any monopoly that they might hope to achieve by predatory behavior today.

Finally, they cannot hope to sabotage the evolving policy of multiple permissive entry by engaging in economically irrational or predatory behavior at Oakland. We are well aware of the systemic factors which render the results of introducing changed concepts of regulation in isolated markets an unreliable guide to the prospective results of introducing these same concepts systemwide or on a broad scale. In this respect, DOJ has misinterpreted our use of the term "experimental" in Order 78-4-121. We are interested in seeing what effect a policy of multiple permissive entry adopted at the outset of a case will have on the time, complexity, and cost of route proceedings, and we are also interested in confirming our belief that this policy will ameliorate Oakland's longstanding service problems. But we are not relying on the results of the *Oakland* experiment to validate or invalidate the general policy of multiple permissive entry, because of the very factors DOJ cites; and, indeed, we do not expect to await the results of the *Oakland* experiment before deciding whether or not to go forward with the general policy of multiple permissive entry on a broad scale.

As we made clear in Order 78-7-116, quoted above, if we adopt the general policy we intend to apply it in many markets and rapidly enough to allow substantial new competitive opportunities for all segments of the industry. Thus no carrier can hope to derail the developing policy of mulitple permissive entry by engaging in irrationally excessive scheduling at Oakland; and if and when the Board decides to apply the policy broadly, any such strategic behavior will become exceedingly expensive, while reducing the possible future gains to zero over a wider and wider area. Under these circumstances we cannot believe that carrier managements would willfully throw large sums of money down the drain, and simultaneously forego profitable employment of their available aircraft capacity elsewhere, merely in an attempt to sabotage our policy an attempt that which would obviously be doomed to failure in any event.

Environment and Energy

For similar reasons, we are not required to look at the environmental and energy significance of a widespread application of the policy in the context of this case; rather, we will do so in the proceeding designed to focus on that issue.

As to *Oakland*, our Bureau of Pricing and Domestic Aviation has issued a draft environmental and energy impact statement. Its preliminary conclusion here is that, among the numerous alternative courses of action discussed in the EIS, the proposed action is the best on environmental grounds, and will on balance be environmentally beneficial.

While the increased activity at Oakland will have a negative impact on its environment, that impact should be more than offset by the environmental benefits to the Bay Area as a whole and by the public policy considerations favoring multiple awards. When these two benefits are combined, they far outweigh the adverse impact on Oakland Airport's environment.

Although there are some alternative actions that might lessen the effect of our action on Oakland's environment, each would reduce the positive benefits accruing to the rest of the Bay Area to an extent that would more than offset its advantages. We therefore believe that unrestricted multiple authority is the most desirable alternative.

The award of multiple permissive authority in the markets at issue should have several favorable impacts on energy efficiency and conservation. By encouraging a more desirable distribution of Bay Area air traffic, the awards will save gasoline that would otherwise have been consumed by passengers driving out of their way to take advantage of the more frequent schedules at San Francisco International. The greater utilization of Oakland will also save aviation fuel by reducing delay times at the more congested airport, SFO.

Multiple permissive authority will also encourage increased competition, with the probable result being an increased level of operations in the Bay Area. We have estimated that these increased operations will result in the use of between 1 and 24 million additional gallons of aviation fuel, the exact amount depending on how much the level of operations actually increases. However, this increased fuel usage will be offset, at least in part, by two favorable effects of the increased competition.

Increased competition will promote energy efficiency by providing an incentive to carriers to increase load factors on Bay Area flights. As carriers cut prices in their effort to increase their market shares, they will be forced to operate at higher load factors to make their operations profitable. We have estimated that increased competition would raise load factors to 65 percent on an annual basis, which is far more energy-efficient than present operations.

A second favorable energy impact of increased competition is that lower fares will divert some passengers from other modes of transportation, primarily the passenger car. Thus, the increased consumption of aviation fuel caused by the higher level of operations will be at least partially offset by the fuel savings in other modes of

transportation. Since planes operating at 65 percent load factors are relatively fuel-efficient, this diversion will also have a favorable effect on energy effi-

sion in this case.[40] In view of the substantial reduction in evidentiary requirements and the speed with which we are conducting this case, we do not

in Docket 33127 and the amended applications in Dockets 30739 and 30981 of Allegheny Airlines and Northwest Airlines, respectively, and we consoli-

reserved my position insofar as the proposed policy of multiple permissive awards is concerned, and expressed the view that, after reviewing the comments submitted in

derstanding of the Act, and that the adopted interpretation is not one that is greatly in need of being defended. In addition, I believe it is desirable for the Board's record

consequences of that policy warrant a modification. But in light of the other pronouncements in this order, I wonder whether we have not already determined this

transportation. Since planes operating at 65 percent load factors are relatively fuel-efficient, this diversion will also have a favorable effect on energy efficiency.

Finally, while this analysis, and consequently our decision, are subject to change in the final statement, proceeding with this case in the meantime does not commit us to multiple permissive licensing at Oakland if we should become convinced that the environmental consequences of such a policy warrant a modification of it.

SCOPING

Turning to the quetion of the city-pair authority at issue, we will grant Continental's and Oakland's petitions for reconsideration asking us to include the Oakland-Los Angeles market in this case. While it receives extensive low-fare service from PSA, as we pointed out in Order 78-4-121, it currently is a monopoly market (in terms of service, not authority) and undoubtedly the traveling public would benefit from competition. We will not, however, include the Oakland-New York/Washington/Baltimore markets as TIA requests. The fact that these are at issue in another case does not necessarily preclude us from considering them here, if positive reasons for doing so are put forward, but we are not persuaded that there are such reasons in this case;[38] in the interest of expedition, therefore, we will exclude these markets. However, this does not foreclose their consideration in the future. We also will not grant Airwest's request to sever the Oakland-Portland/Seattle markets from this case. It was reasonable for other potential applicants to assume that these markets would be included in Oakland's case, and it would be unfair to exclude applicants because they did not seek instead to enter the Subpart M case. Therefore, the question is whether we include the markets in *Oakland* or give everyone an opportunity to enter the Subpart M case; we think the former will be faster and more efficient. We will modify the issues slightly, however, to allow Oakland applicants to seek coterminal status for Portland and Seattle in their certificates (with local traffic rights between the two points). We often do this to afford carriers more operational flexibility.[39]

Finally, Oakland seeks exemptions for all applicants pending final decision in this case.[40] In view of the substantial reduction in evidentiary requirements and the speed with which we are conducting this case, we do not view certification as an undue burden. Therefore, we will deny this request.[41]

Accordingly:

1. We make final the policy proposed in Order 78-4-121 to award permissive authority to all qualified applicants in each of the Oakland markets in issue in which a need for additional authority is found in this proceeding;

2. We amend the issues in this proceeding to include whether the public convenience and necessity require the grant of additional certificated route authority between Oakland and Los Angeles, Calif., and to permit applicants to seek coterminal status for Portland and Seattle;

3. To the extent indicated in paragraph 2, we grant the petitions for reconsideration of Continental Air Lines and the Oakland Chamber of Commerce and Port of Oakland; otherwise we deny these petitions;

4. We deny the petitions for reconsideration of Delta Air Lines, Trans International Airlines, and Hughes Airwest;

5. We grant the petitions for leave to intervene of the Department of Transportation, the City and County of San Francisco, and the City of Kansas City and Chamber of Commerce of Greater Kansas City, and we make them parties to this proceeding;

6. We deny the exemption request of the Oakland Chamber of Commerce and Port of Oakland;

7. We grant the motions to consolidate the application of Ozark Airlines in Docket 33127 and the amended applications in Dockets 30739 and 30981 of Allegheny Airlines and Northwest Airlines, respectively, and we consolidate these appliations in this proceeding;

8. We amend Attachment H to Order 78-4-121 in accordance with our discussion in fn. 30, p. 37 of this order; and

9. We grant the motion of DHL Airways for leave to file it comments late.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board:[42]

PHYLLIS T. KAYLOR,
Secretary.

O'MELIA, MEMBER, INTERIM STATEMENT[43]

As the majority opinion clearly states, the Board is adopting in this order a change in policy that is fundamental. The Board is deciding that one of the major Board functions under the existing statue as a Federal regulator—that of selecting a carrier or carriers to perform transportation that the public convenience and necessity may require—is now to be turned over to the random workings of the marketplace. We are assured that we need not worry about this relegation of our statutory responsibilities in the sixteen markets in issue because "the market" will determine carrier selection, will do so continuously, and will force an incumbent carrier to maintain an optimum or near-optimum mix of price and service. I can't get over the feeling that we are imparting near-human attributes of insight, rationality, and purposefulness to the market, and I can't accept the proposition that such an impersonal agent will do the job with the same dedication to the public interest, with the same accountability, and with the same respect for due process that we as appointed officials have been called upon to demonstrate for nearly 40 years.

I am also concerned at how we are going about taking this fundamental step. We are taking this action without a full Board on hand which might have a greater balance of regulatory philosophy, and without the sense of unanimity that would have endorsed this decision under other circumstances with at least a statutory quorum. However, it may serve no purpose to delay this decision. The careful selection process that goes into the appointment mechanism would probably preclude the appearance of other discordant or deviant voices in our collegial quintet (presently, of course, sadly depleted to a trio). Another qualm that I must express is that the actual decision to delegate the function of carrier selection appears almost ministerial or perfunctory. After we met in early July to hold oral argument in this case, the Board did not need to deliberate on its decision nor to instruct its staff on the opinion that it should write. The staff on its own prepared the order to adopt the multiple permissive award policy, and the Board gave its blessing to it at its "Sunshine" meeting of September 7. This makes it all too evident that the policy decision to use multiple permissive awards was made elsewhere and at an earlier time.

On May 30, 1978 in my concerning statement to the instituting order in this case, I reserved my position insofar as the proposed policy of multiple permissive awards is concerned, and expressed the view that, after reviewing the comments submitted in this Phase I of *Oakland*, I might want to press for a different or for a modified solution for this case. The briefs and exhibits submitted by the numerous interested parties, and the oral argument held on this issue, left me far from satisfied that it is in the public interest for the Board to determine now to adopt a blanket ruling awarding multiple permissive authority in the sixteen Oakland markets in issue without first examining the needs and characteristics of those markets in a public record developed in evidentiary hearings. I have proposed to my colleagues a modified approach, which, in my opinion, would avoid the controversy and the dangers of this blanket determination, a determination which already in at least one other case had demonstrated the hazards of the multiple permissive venture. However, that modification—which was simply to defer the blanket ruling on multiple permissive awards and instead to make a decision on whether to grant such awards or to select a carrier or carriers on the basis of the evidentiary examination of each market—was not acceptable to my colleagues. For the reasons set forth in the asterisked footnote to this statement, I am agreeing to have the Board's decision issue now, with my dissent to follow at a later date.

However, I would like at this time to outline briefly the issues in this case that compel me to withhold my concurrence. First of all, I believe that we are riding rough-shod over *legal questions* that have been raised about the statutory validity, the due process aspects, and the lawfulness of a blanket determination granting multiple permissive awards without regard to specific market needs and carrier proposals. Second, I do not believe that the multiple permissive award proposition adopted without an evidentiary proceeding relating such awards to specific markets is a sound *regulatory policy*. Third, I have great uneasiness with how we are dealing with *environmental and energy conservation issues* in the Oakland proceeding. As I indicated, I plan to develop these points briefly in my dissent which is to follow, and would here only indicate why these trouble me.

The legal issue. The majority opinion does an excellent job of advocacy in examining the legislative history and case precedents bearing on the question of whether the Board is constrained to select a carrier or carriers for particular route authority on the basis of public convenience and necessity or whether it can decide to get out of that business and give awards to all who want them with only a perfunctory genuflection to public convenience and necessity. The attorneys and analysts who put this order together to support the multiple permissive award thesis are to be commended for the extensive research, the professional skill, and the scholarly approach that went into this exposition. However, I am left with the sense that all that this order has told me is that, if the Board wants to go in this direction, it can probably get away with it.

I am not interested in knowing only whether we can successful withstand judicial challenge. I would prefer to have the assurance of knowing that our reading of the Act represents the less-strained interpretation, that it is the more widely-accepted understanding of the Act, and that the adopted interpretation is not one that is greatly in need of being defended. In addition, I believe it is desirable for the Board's record that we set forth with a greater degree of balance the arguments questioning the validity and lawfulness of multiple permissive awards, just as here the Board has given prominence to the arguments supporting the lawfulness of multiple permissive awards. I think it is desirable that we set forth both sides of the issue. My dissent will attempt to a more modest extent to fill the need for that counterpoint of ideas.

The policy issue. The issue of multiple permissive awards as a regulatory policy is perhaps even more to be questioned and even more in need of discussion. Multiple permissive, is, of course, the antithesis of carrier selection. However, the majority opinion does not say that there will be no carrier selection. Instead it says that we will turn over this statutory assignment to "the market" which is far more able than the Board to pick the right carrier. In Order 78-4-121, instituting this proceeding, it was pointed out that "the Board's judgment, like all human judgments, is fallible" whereas the marketplace is a more "finely tuned mechanism" and "operates on more complete and up-to-date facts." (see page 35). I find this deference to market forces somewhat frightening. It is we who are responsible by statute for carrier selection, not some metaphysical potter tirelessly working to mold our transportation vessels. What if he turns out a real clinker? Who is responsible? The free market doesn't work like an instructed and fully subservient genie. The factors in the market are myriad and the results not all that predictable. It is very unlikely that the market—if it had cognitive intelligence—would share our views, or indeed the views of Congress, as to what constitutes the public interest.

The point to all this is that we cannot abdicate our statutory responsibilities. Congress and the President have placed in our hands the task of regulating this industry, and we have no authority to delegate that assignment to some marketplace genie. I don't think that that genie exists. If he did, and Congress had known about it, it would not have been necessary to create this Board. If we say that we are turning the carrier selection duty over to the marketplace, we are really deciding that determinations of whether the public convenience and necessity require the provision of particular air transportation are no longer to be made. I don't believe we have the right under the present Act to decide that, and I hope to touch upon this policy issue in my dissent.

The environmental and energy issue. Finally, I am concerned with the Board's treatment in this case of environmental and energy concerns. The Board has indicated in a number of cases that the exact results of multiple permissive awards are unpredictable. The Board has suggested that, with the marketplace regulating the system, the services will not be excessive, or at least not for long, but neither will they be inadequate. But the spectrum between those two extremes is broad. How can we know that we are acting consistently with our statutory responsibilities under the environmental directive (NEPA) or the energy conservation mandate (EPCA)? I recognize that the majority view states that we are not committed to multiple permissive awards if we should become convinced that the environmental consequences of that policy warrant a modification. But in light of the other pronouncements in this order, I wonder whether we have not already determined this issue. I hope that the marketplace genie that is to handle our carrier selections will also keep in mind environmental and energy considerations. In any case, in my dissent, I hope to offer some observations on this issue as well.

I concurred in April of this year with the institution of the *Oakland* case because I felt that it was manifestly true that Oakland was clearly in need of improved air service. For the same reason, I now participate in the decision that will permit this proceeding to go forward. However, it is my motive in doing this to be responsive to Oakland's air service needs, rather than to test out any proposition that will move us in the direction of nonregulation.

RICHARD J. O'MELIA.

---

[38] We are not convinced that the lack of answers to TIA's petition indicates a lack of opposition to the substance of it. TIA's certificate of service states only that it served *Oakland* parties with the petition, not parties to the *Transcontinental Low-Fare Route Proceeding*, where these markets are at issue.

[39] See, *e. g., Pacific Northwest-Southwest Service Investigation*, 46 CAB 652 (1967).

[40] Oakland also wants the Board to make tentative profitability findings for the Oakland-Atlanta/Albuquerque/Kansas City markets, as we did in Order 78-4-121 for the other markets in issue. In attempting to demonstrate profitability potential, Oakland cites the high volume of connecting traffic between the Bay Area and Atlanta, and for Albuquerque and Kansas City it uses an elasticity coefficient of −2.5, as well as the costs of other carriers. It may be that these assumptions are reasonable, but, as we said in Order 78-4-121, there is enough room for doubt to require exploration of these matters at the economic hearing.

[41] Delta filed a petition for reconsideration, arguing that we cannot "split" the need and carrier selection issues, that we cannot make environmental and energy determinations without reviewing competitive schedules, and that we cannot base our diversion policy here on another order which is not final yet, referring to Order 78-4-69. Delta's first point is the same as its legal argument, which we have rejected above. It is clear from the draft environmental impact statement why we reject the second point. As to the third point, our discussion of diversion evidence in Order 78-4-121 may have incorporated the analysis in Order 78-4-69, but it did not rely on that order as the basis for our policy regarding diversion exhibits here. In any event, Order 78-4-69 has now been made final by Order 78-8-97.

[42] Chairman Kahn and Member Bailey concurred. Member O'Melia dissented and filed the attched interim statement.

[6320-01]

[Order 78-9-59; Docket 33410]

UNITED AIR LINES, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 1; Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 13th day of September 1978.

By order 78-9-56, issued concurrently with this order, the Board has proposed to realine the domestic route system of Northwest Airlines in a manner which would, among other things, give Northwest unrestricted authority in eight minor markets[1] where United also holds restricted authority.[2] As discussed in orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unresricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on United as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in orders 78-4-109, 77-11-74, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on United's operations in the eight markets listed in appendix A[2] is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasetful and undesirable.

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final, with answers due within 10 days thereafter. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly: 1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending United's certificate for Route 1 so as to remove operating restrictions in the markets listed in appendix A;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than October 19, 1978, file with the Board and serve upon all persons listed in appendix I of order 78-9-56, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 30, 1978;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;[4]

4. In the event no objections are filed to any part of this order, we will consider all further procedural steps relating to such part or parts to have been waived, and the case will be submitted to the Board for final action and

5. We shall serve a copy of this order upon all persons listed in appendix I of order 78-9-56.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[5]
Secretary.

APPENDIX A.—*Minor Markets Where United Will Receive Unrestricted Authority*

Market	Year ending Sept. 30, 1975, traffic[1]	Present authority
Spokane to:		
Atlanta	5,370	2-stop via Cleveland and Denver.
Baltimore	2,040	1-stop via Denver.
Boston	4,360	Do.
Fort Lauderdale	750	2-stop via Cleveland and Denver.
Miami	2,410	Do.
Philadelphia	5,700	1-stop via Denver.
Tampa	1,650	2-stop via Cleveland and Denver.
Portland to Tampa	5,360	1-stop via Cleveland.

[1]True O. & D. plus interline connecting passengers.

[FR Doc. 78-26926 Filed 9-25-78; 8:45 am]

[1] A minor market is one with fewer than 20 true O. & D. plus interline connecting passengers a day, or 7,300 per year.

[2] The minor markets where both United and Northwest currently hold restricted authority are set forth in appendix A to this order.

[2] Appendix A filed as part of the original document.

[3] We further conclude that United is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[4] All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[5] All members concurred.

[6335-01]

COMMISSION ON CIVIL RIGHTS

MARYLAND ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Maryland Advisory Committee (SAC) of the Commission will convene at 10 a.m. and will end at 4 p.m. on October 21, 1978, in the International Hotel at Baltimore-Washington International Airport, Baltimore, Md.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Mid-Atlantic Regional Office of the Commission, 2120 L Street NW., Washington, D.C. 20037.

The purpose of this meeting is to discuss plans for fiscal year 1979 project.

This meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., September 20, 1978.

FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

Termination of Health Alliance Health Plan

AGENCY: Civil Service Commission.

ACTION: Notice of termination of Health Alliance Health Plan under the Federal Employees Health Benefits Program.

EFFECTIVE DATE: September 23, 1978.

SUMMARY: Pursuant to the authority contained in section 8902 of title 5, chapter 89 of the United States Code and § 890.301(k) of 5 CFR Part 890, the U.S. Civil Service Commission hereby announces that the participation of the Health Alliance Health Plan, Santa Clara, Calif., in the Federal Employees Health Benefits Program will be terminated effective September 23, 1978.

Each Federal employee or annuitant enrolled in the Health Alliance Health Plan must change to another health plan offered in their area under the Federal Employees Health Benefits Program immediately. The effective date of the change will be the first day of the first pay period beginning on or after September 23, 1978. Federal employees and annuitants must submit a completed form 2809 to their personnel offices to effect this change in health plans.

TELECOMMUNICATIONS EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that a meeting of Telecommunications Equipment Technical Advisory Committee will be held on Tuesday, October 17, 1978, at 10 a.m. in room 3817, Main Commerce Building, 14th and Constitution Avenue, NW, Washington, D.C.

The Telecommunications Equipment Technical Advisory Committee was initially established on April 5, 1973. On March 12, 1975, March 16, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee pursuant to section 5(c)(1) of the Export Adminstration Act of 1969, as amended, 50 U.S.C. App. Sec.

2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to

room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Oper-

portions thereof may be closed to the public in accordance with 5 U.S.C. 552b(c).

5 U.S.C. 552b(c)(1) provides that agency meetings or portions thereof may be closed

Dated: September 5, 1978.

DANIEL GARBERN,
Acting Assistant General Counsel.

Patent application 844 336 Differential Action Extractor Comb; filed October 21, 1977.

Patent application 844 418: Furrow Opener

[3510-04]

GOVERNMENT-OWNED INVENTIONS

V 43 / 187 SE 26 78

2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to telecommunications equipment, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee meeting agenda has four parts:

GENERAL SESSION

1. Opening remarks by the Chairman.
2. Presentation of papers or comments by the public.
3. Nomination and election of a new Chairman.

EXECUTIVE SESSION

4. Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statement may be submitted at any time before or after the meeting.

With respect to agenda item (4), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by Executive Order 11652 to be kept secret in the interest of national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under the Executive Order. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Industry and Trade Administration, room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Industry and Trade Administration, room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 202-377-4196.

The complete Notice of Determination to close meetings or portions thereof of the series of meetings of the Telecommunications Equipment Technical Advisory Committee and of any subcommittees thereof is hereby published.

Dated: September 21, 1978.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

U.S. DEPARTMENT OF COMMERCE

OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

TELECOMMUNICATIONS EQUIPMENT TECHNICAL ADVISORY COMMITTEE

DETERMINATION

In response to written requests of representatives of a substantial segment of the telecommunications equipment industry, the Telecommunications Equipment Technical Advisory Committee was established by the Secretary of Commerce pursuant to section 5(c)(1) of the Export Administration Act of 1969, 50 U.S.C. App. 2404(c)(1) (1976), to advise the Department of Commerce with respect to questions involving (A) technical matters, (B) worldwide availability, and actual utilization of production technology, (C) licensing procedures which may affect the level of export controls applicable to telecommunications equipment, including technical data or other information related thereto, and (D) exports of the aformentioned commodities and technical data subject to multilateral controls in which the United States participates, including proposed revisions of any such multilateral controls.

The Committee, which currently has seven members representing industry and five members representing government agencies, will terminate no later than August 29, 1980, unless extended by the Secretary of Commerce or her designee. All members of the Committee have the appropriate security clearances.

The Committee's activities are conducted pursuant to 50 U.S.C. App. 2404(c)(1); the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976); and the Office of Management and Budget Circular A-63 (Revised), Advisory Committee Management, effective May 1, 1974. Section 10 of the Federal Advisory Committee Act as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, provides that advisory committee meetings or portions thereof may be exempt from the open meeting and public participation requirements of the Federal Advisory Committee Act if the President, or the head of the agency to which the advisory committee reports, determines that such meetings or portions thereof may be closed to the public in accordance with 5 U.S.C. 552b(c).

5 U.S.C. 552b(c)(1) provides that agency meetings or portions thereof may be closed to the public where they are likely to disclose matters that are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of national defense or foreign policy and are in fact properly classified pursuant to such Executive Order.

Eight Notices of Determination authorizing the closing of meetings, or portions thereof, of the Telecommunications Equipment Technical Advisory Committee and its formal subcommittees, dealing with security classified matters, have been approved in the past.

In order to provide advice to the Department under the terms of its charter, the Committee and formal subcommittees thereof will continue to hold a series of meetings dealing with the matters set forth in the first paragraph of this Determination. These meetings will include discussions of the COCOM control list as it relates to the commodities and technical data under its purview, and with the foreign availability of these commodities and technical data. In addition, the Committee and its formal subcommittees will be preparing recommendations for the Department's consideration relating to the U.S. Government's negotiating position on COCOM-related matters. Much of the information relating to the COCOM control list, as well as proposed changes, is now or will be security classified for national defense or foreign policy reasons, pursuant to Executive Order No. 11652, 3 C.F.R. Part 339 (1974) or Executive Order No 12065, 43 FR 28949 (1978). In order for the Committee and its formal subcommittees to provide required advice to the U.S. Government, it will be necessary to provide the Committee and its formal subcommittees with such classified material. Therefore, the series of meetings or portions of meetings of the committee and of subcommittees thereof that will involve discussions of matters specifically authorized under criteria established by an Executive Order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive Order, must be closed to the public. The remaining series of meetings or portions thereof will be open to the public.

Accordingly, I hereby determine, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the series of meetings or portions of meetings of the Committee and of any subcommittees thereof, dealing with the aforementioned classified materials shall be exempt, for the period from the date of the signing of this Determination, to August 29, 1980, from the provisions of section 10(a)(1) and (a)(3), relating to open meetings and public participation therein, because the Committee and subcommittee discussions will be concerned with matters listed in 5 U.S.C. 552b(c)(1). The remaining series of meetings of portions thereof will be open to the public.

Dated: September 6, 1978.

ELSA A. PORTER,
Assistant Secretary for Administration.

Dated: September 5, 1978.

DANIEL GARBERN,
Acting Assistant General Counsel.

GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for $0.50 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Va. 22161 for $4 ($8 outside North American continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator, National Technical Information Service.

Office of the Secretary

[Department Organization Order 35-1A, Amdt. 3; Transmitted 413]

BUREAU OF ECONOMIC ANALYSIS

Delegation of Authority

This order effective August 23, 1978, further amends the materials appearing at 40 FR 42766 of September 16, 1975, 41 FR 8520, of February 27, 1976, and 42 FR 23676 of May 10, 1977.

Department Organization Order 35-1A of August 4, 1975, is hereby further amended as shown below. The purpose of this amendment is to update a previous delegation of the Secretary's authority under the International Investment Survey Act of 1976.

Section 3. *Delegation of Authority.* Subparagraph .01e. is revised to read as follows:

"e. Executive Order 11961 of January 19, 1977, as amended by E.O. 12013 of October 7, 1977, which delegates to the Secretary of Commerce the authority of the President under sections 4(a) (1), (2), and (4), and 4(b) of the International Investment Survey Act of 1976 (Pub. L. 94-472, 90 Stat. 2059, 22 U.S.C. 3101-3108). The functions thereunder shall be carried out in coordination with the Assistant Secretary for Industry and Trade (Department Organization Order 10-3), including, to the extent feasible, the division or assignment of responsibilities. All regulations established to carry out functions under the Act, and reports to be submitted to the Congress, shall be issued by the Secretary;"

JUANITA M. KREPS,
Secretary of Commerce.
GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary for Administration.

[3510-17]

[Department Organization Order 30-2B, Amdt. 1; Transmittal 411]

NATIONAL BUREAU OF STANDARDS

Organization and Function

This order effective August 15, 1978, amends the material appearing at 43 FR 15473 of April 13, 1978.

Department Organization Order 30-2B dated March 8, 1978, is hereby amended as shown below. The purpose of this amendment is to (1) revise the functional statements for the Management and Organization Division, the Center for Information Systems, and the National Measurement Laboratory, and (2) abolish the Information Technology Division.

1. Section 6. *Director of Administrative and Information Systems.* Paragraphs c. and d. are revised to read as follows:

"c. The *Management and Organization Division* shall provide consultative services to line management in organization, procedures, and management practices; maintain the directives system; perform reports management and committee management functions; and provide liaison with the Departmental Office of ADP Management.

"d. The *Center for Information Systems* shall provide computing and information processing services including operation of the central computing facility; design and maintain the automated administrative information systems; manage the publications program of NBS; provide library services; manage a network of administrative service centers and word processing centers for all Administrative and Information Systems Centers, and other organizational units in the Bureau as requested; manage support services for small purchase procurements, grants administration, and contract liaison with the Department of Commerce; manage office support services including visual arts, duplication, and forms and records management; provide consultative and advisory services on computer networking and related telecommunications requirements; coordinate the overall management and utilization of computing resources within the Bureau; and establish mechanisms to assure compliance with applicable Federal ADP Standards."

"2. Section 7. *National Measurement Laboratory.* The paragraph entitled *National Measurement Laboratory* is revised to read as follows:

"The *National Measurement Laboratory* shall provide the national system of physical and chemical and materials measurement; coordinate the system with measurement systems of other nations and furnish essential services leading to accurate and uniform physical and chemical measurement throughout the nation's scientific community, industry, and commerce; conduct materials research leading to improved methods of measurement, standards, and data on the properties of materials needed by industry, commerce, educational institutions, and government; provide advisory and research services to other Government agencies; conduct physical and chemical research; develop, produce, and distribute Standard Reference Materials; provide standard reference data; provide calibration services; and collaborate with the National Engineering Laboratory and the Institute for Computer Sciences and Technology in carrying out the responsibilities of the National Measurement Laboratory."

3. Section 10. *Institute for Computer Sciences and Technology.* In the last sentence of section 10. the *Information Technology Division is deleted. The sentence is revised to read as follows:*

"The organizational units in the Institute shall be as follows:

"Systems and Software Division; and
"Computer Systems Engineering Division."

4. The organization chart attached to this amendment supersedes the chart dated March 8, 1978. A copy of the organization chart is on file with the original of this document in the Office of the Federal Register.

GUY W. CHAMBERLIN,
Acting Secretary for Administration.

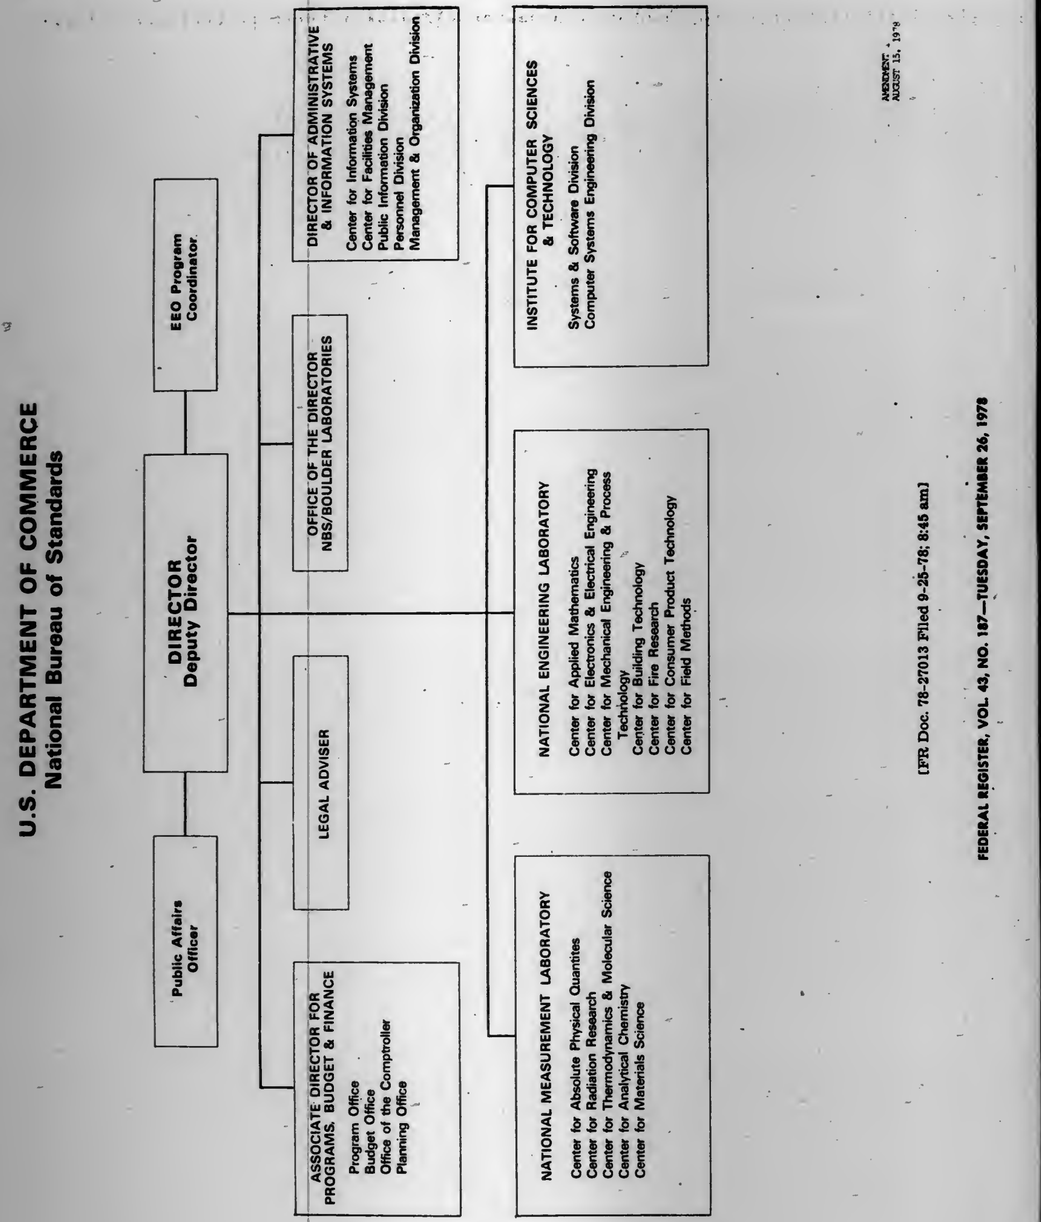
sponsible to the Under Secretary, who is chairperson of the IAC.

b. In pen and ink renumber the existing sections 4., 5., and 6. as sections

mobilize and generate Federal agency support and resources on behalf of minority business development. In carrying out this function, the Staff shall:



AMENDMENT
AUGUST 15, 1978

[FR Doc. 78-27013 Filed 9-25-78; 8:45 am]

[3510-17]

[Departmental Organization Order 25-4B, Amdt. 1; Transmittal 412]

OFFICE OF MINORITY BUSINESS ENTERPRISE

Organization and Function

This order effective August 22, 1978, further amends the materials appearing at 41 FR 21209 of May 24, 1976, and 41 FR 22291 of June 2, 1976.

Department Organization Order 25-4B of May 9, 1976, is hereby amended as shown below. The purpose of this amendment is to: establish the position of Executive Director of the Interagency Council for Minority Business Enterprise (IAC) (section 4.); establish the IAC Support Staff (section 9.); transfer certain functions from the Program Resources Division to the IAC Support Staff (section 8.); and revise the functions of the Regional Offices (section 10.).

1.a. A new section 4. is added to read as follows:

"Section 4. *Executive Director of the Interagency Council for Minority Business Enterprise.*

"The Executive Director of the Interagency Council for Minority Business Enterprise (IAC) shall direct the activities of the IAC Support Staff and otherwise support the Secretary and the Under Secretary in fulfilling their responsibilities for Federal government coordination under Executive Order 11625, as amended. The Executive Director shall report and be responsible to the Under Secretary, who is chairperson of the IAC.

b. In pen and ink renumber the existing sections 4., 5., and 6. as sections 5., 6., and 7.

2.a. In pen and ink renumber the existing section 7. as section 8.

b. Delete the word "and" after the semicolon at the end of paragraph 8.f.

c. Paragraph 8.g. is revised and new paragraphs 8.h. and 8.i. are added to read as follows:

"g. Plan, develop, and manage programs to generate and coordinate public and private sector support for the growth of minority business opportunities involving the commercialization of new and adaptive technology;

"h. Develop working relationships and agreements with other Federal departments and agencies in support of particular minority business activities; and

"i. Provide added support to the Secretary, Under Secretary, and the IAC in their Federal coordination responsibilities."

3. A new section 9. is added to read as follows:

"Section 9. *Interagency Council Support Staff.*

"The IAC Support Staff, under the direction of the IAC Executive Director, shall provide staff support for the activities of the IAC, its Chairperson, and committees, and local, interagency Minority Business Opportunity Committees (MBOC), in their efforts to mobilize and generate Federal agency support and resources on behalf of minority business development. In carrying out this function, the Staff shall:

"a. Develop and implement plans, and policy and program initiatives and studies, for IAC interagency and individual agency consideration and action, in keeping with the mission of the IAC;

"b. Assist in the development and coordination of government-wide minority business programs among Federal departments and agencies, and monitor and evaluate those programs;

"c. Provide necessary advice and counsel to IAC member agencies and committees; and

"d. Support the local Federal interagency MBOC, in carrying out their programs, as local counterparts of the IAC in many cities, to assist minority-owned businesses."

4. In pen and ink, renumber the existing section 8. as section 10. and in paragraph 10.01 delete the words "by coordinating specific Federal support regionally" that appear on lines five and six from the top of the paragraph.

5. In pen and ink, renumber the existing section 9. as section 11.

6. The attached organization chart Exhibit 1 supersedes the chart attached to the order dated May 9, 1976. A copy of the organization chart is on file with the original of this document in the Office of the Federal Register.

GUY W. CHAMBERLIN,
Acting Assistant Secretary for Administration.

[3510-25]

CERTAIN COTTON, WOOL, AND MAN-MADE FIBER TEXTILE PRODUCTS FROM INDIA

Adjusting Import Levels

SEPTEMBER 21, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Deducting 10.5 million square yards equivalent charged to the level of restraint established for Group II (Categories 330-369, 431-469 and 630-669) and charging the equivalent amount in dozens to the level covering mill-made apparel made from handloomed fabric (visaed with the elephant).

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773) and September 5, 1978 (43 FR 39408)).

SUMMARY: Under the terms of paragraph 10 of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 30, 1977, as amended, between the Governments of the United States and India, agreement was reached by the two governments, in consultations held the week of September 5, 1978, to reduce charges to the ceiling established for Group II during the twelve-month period which began on January 1, 1978, by 10.5 million square yards equivalent and charge the equivalent amount in dozens to the level established for mill-made apparel made from handloomed fabric. This change will affect only the Group II charges. Individual category charges within the group will not be affected.

EFFECTIVE DATE: September 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5423.

SUPPLEMENTARY INFORMATION: On February 2, 1978, there was published in the FEDERAL REGISTER (43 FR 4451) a letter of January 27, 1978, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established levels of restraint for certain specified categories of cotton, wool, and man-made fiber textile products, including those in Group II (Categories 330-369, 431-469, and 630-669), produced or manufactured in India, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1978 and extends through December 31, 1978. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to deduct 10.5 million square yards equivalent from the amount charged to the level for Group II and charge the equivalent amount to the level established for mill-made apparel made from handloomed fabric.

EDWARD GOTTFRIED,
Acting Chairman, Committee for the Implementation of Textile Agreements.

SEPTEMBER 21, 1978.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: To facilitate implementation of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of December 30, 1977, as amended, between the Governments of the United States and India, you are requested, effective on September 27, 1978, to reduce the charges to Group II (Categories 330-369, 431-469 and 630-669) for goods exported after December 31, 1977 during the current agreement period by 10.5 million square yards equivalent. A charge of 650,000 dozen should be made to the level of restraint established for the same period for mill-made apparel made from handloomed fabric, visaed with the elephant. This change is to affect only the Group II charges. Individual category charges within the group will not be affected.

This letter will be published in the FEDERAL REGISTER.

Sincerely,

EDWARD GOTTFRIED,
Acting Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

Department of the Army

PRIVACY ACT OF 1974

New System of Records

AGENCY: Department of the Army.

ACTION: Notification of a new system of records.

SUMMARY: The Department of the Army proposes a new system of records identified as A0714.06c, entitled: "AMEDD Personnel Management System". The record system notice is published in its entirety below.

DATES: This system shall become effective as proposed without further notice on October 26, 1978, unless comments are received on or before October 26, 1978, which would result in a contrary determination requiring republication for further comments.

ADDRESS: Send comments to the system manager identified in the record system notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Guy B. Oldaker, Administrative Management Directorate, The Adjutant General Center, Department of the Army, Room GA-084, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20314, telephone 202-693-0973.

SUPPLEMENTARY INFORMATION: The Department of the Army systems of records notices, as prescribed by the Privacy Act have been published in the FEDERAL REGISTER as follows:

FR Doc. 77-28255 (42 FR 50396), September 28, 1977.
FR Doc. 77-32975 (42 FR 50999), November 15, 1977.
FR Doc. 78-1855 (43 FR 3151), January 23, 1978.
FR Doc. 78-9239 (43 FR 14713), April 7, 1978.
FR Doc. 78-9713 (43 FR 15353), April 12, 1978.
FR Doc. 78-17146 (43 FR 26606), June 21, 1978.
FR Doc. 78-17737 (43 FR 27882), June 27, 1978.
FR Doc. 78-18880 (43 FR 29600), July 10, 1978.
FR Doc. 78-19614 (43 FR 30594), July 17, 1978.
FR Doc. 78-21772 (43 FR 34520), August 4, 1978.
FR Doc. 78-23953 (43 FR 38070), August 25, 1978.
FR Doc. 78-25562 (43 FR 40272), September 11, 1978.

The Department of the Army has submitted a new system report on August 21, 1978, pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a(o)).

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

SEPTEMBER 20, 1978.

A0714.06cDASG

System name:

AMEDD Personnel Management System

System location:

United States Army Medical Department Personnel Support Agency (USAMEDDPERSA), 1900 Half Street SW., Washington, D.C. 20324.

Categories of individuals covered by the system:

Individuals either applying for com-

site location both updated and maintained in an operational condition.

[3810-70]

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the

tervene in accordance with the Commission's rules.

KENNETH F. PLUMB,

tion 305(b) of the Federal Power Act to hold the following positions:

Controller, Kentucky Utilities Co., Public Utility.

Categories of individuals covered by the system:

Individuals either applying for commissions in, on active duty as an officer in, or recently released from active duty in one of the six Army Medical Department Corps.

Categories of records in the system:

The categories of information stored include name, social security number (SSN), sex, race, date and place of birth, home of record, dependent data, physcial profile data, religious preference, ethnic group, citizenship, marital status, personal mailing address, professional qualification data, assignment data, promotion data, education and training data, awards and badges, and incentive pay data.

Authority for maintenance of the system:

Title 5 U.S.C. Section 301; Title 10 U.S.C.; Title 37 U.S.C.; and Executive Order 9397.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Department of Army—Used for strength accounting, manpower and budgetary management, recruitment, military service career management of officers to include assigments, promotion, professional development and training, and in the administration of Variable Incentive Pay Program.

Department of Defense—Used for interdepartmental management regarding medical assets, and development of policies and statistical accounting.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are stored on computer magnetic tape and disk.

Retrievability:

Normal access is by name, the first data element in the file, with SSN or other individual or group discriminators for positive identification. Computerized indices are utilized in record retrievals.

Safeguards:

Physical security devices, limited access via building guard and personnel clearances will limit computer access be only autorized personnel. Each on-line terminal access or update to the system will be protected through a system of passwords that will restrict each user to specific data elements. Password changes will be made incrementally at the rate of 20 percent per month. System reconstruction procedures provide for two copies of files, programs, and procedures in-house and one copy at an offsite location both updated and maintained in an operational condition.

Retention and disposal:

Records are retained on an active file for three months after separation, and accumulated on an inactive file for five years after separation.

System manager(s) and address:

Commander, United States Army Medical Department Personnel Support Agency, 1900 Half Street SW., Washington, D.C. 20324.

Notification procedure:

Information may be obtained form: Commander, USAMEDDPERSA, 1900 Half Street SW., Washington, D.C. 20324.

Record access procedures:

Requests from individuals should be addressed to: Commander, USAMEDDPERSA, 1900 Half Street SW., Washington, D.C. 20324.

Written requests for information should contain the full name of the individual, SSN, current or former military status, and appropriate return address.

Vists may be made to USAMEDDPERSA. Individual should be able to provide some acceptable identification, and give some verbal information that could be verfied with his/her record.

Contesting record procedures:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in 32 CFR Part 505 (Army Regulation 340-21).

Record source categories:

Data contained in this system of records is obtained in document and computer readable form from the following systems of records: (1) AMEDD Officer Variable Incentive Pay, (2) Army Medical Procurement Applicant Files, (3) Officer Master File, (4) Career Management Individual Files, (5) AMEDD Training Application Status Record, (6) Long Term Civilian Training Student Contract Files, (7) Residency, Subspecialty and Fellowship Training, and (8) US Army Graduate Medical Education Trainee Card File.

Systems exempt from certain provisions of the act:

None.

Office of the Secretary

MEDICAL REIMBURSEMENT RATES FOR FISCAL YEAR 1979

Inpatient and Outpatient Medical Care

Notice is hereby given that the Assistant Secretary of Defense (Comptroller), on September 13, 1978, has issued the following memorandum to the Assistant Secretaries of the Army (IL&FM), Navy (FM), and Air Force (FM):

Reimbursement rates for inpatient and outpatient medical care are hereby established for fiscal year 1979 as follows:

For general patients:	
Per inpatient day:	
General medical and dental care	$242.00
Burn Center, Brooke Army Hospital	634.00
Per outpatient visit:	
General medical and dental care	23.00
For International Military Education Training (IMET) students:	
Per inpatient day:	
General medical and dental care	102.00
Burn Center, Brooke Army Hospital	328.00
Per outpatient visit	10.00
For dependents of military personnel:	
Per inpatient day	4.65
For FAA Air Traffic Controllers:	
Per examination	51.00

MAURICE W. ROCHE,

Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP72-110]

ALGONQUIN GAS TRANSMISSION CO.

Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

SEPTEMBER 15, 1978.

Take notice that Algonquin Gas Transmission Co. (Algonquin Gas) on September 5, 1978, tendered for filing Revised 42d Revised Sheet No. 10 to its FERC Gas Tariff, First Revised Volume No. 1.

Algonquin states that this sheet is being filed pursuant to Algonquin Gas' Purchased Gas Cost Adjustment Provision to reflect a change in purchased gas costs filed by its pipeline supplier, Texas Eastern Transmission Corp. and that the proposed effective date is August 1, 1978.

A copy of this filing is being served upon all affected parties and interested State commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 26, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RI78-85]

AN-SON CORP.

Petition for Special Relief

SEPTEMBER 15, 1978.

Take notice that on August 4, 1978, An-Son Corp. (Petitioner), 3814 North Santa Fe, Oklahoma City, Okla. 73118, filed a petition for special relief in docket No. RI78-85, pursuant to § 2.76(d)(1) of the Commission's General Policy and Interpretations (18 CFR 2.76(d)(1)).

Petitioner requests authorization to charge 49.9¢ per Mcf for the sale of gas from its Barby-Featherstone No. 1 Well, section 30; T4N, R24E, Beaver County, Okla., to Northern Natural Gas Co. The increased rate is sought in order to enable Petitioner to install compression facilities to correct pressure problems in the well.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, or 1.10). All such petitions or protests should be filed on or before October 10, 1978. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RI78-87]

CHARLES B. WILSON, JR., LTD.

Petition for Special Relief

SEPTEMBER 15, 1978.

Take notice that on August 17, 1978, Charles B. Wilson, Jr., Ltd. (Petitioner), 1616 West Loop South, Suite 310, Houston, Tex. 77027, filed a petition for special relief in Docket No. RI78-87 pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR Part 276).

Petitioner requests authorization to charge $1.35 per Mcf at 14.73 psia for the sale of gas from its Rosa B. Neff Gas Unit No. 1 Well, Keyes Field, Cimarron County, Okla., to Colorado Interstate Gas Co. Petitioner asserts that it is not economically feasible at the present rate of 65¢ per Mcf at 14.73 psia to continue the compression and saltwater disposal operations required to produce known reserves.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before October 10, 1978. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ID-1768]

CLAUD FREDERICK DAVIS

Application

SEPTEMBER 15, 1978.

Take notice than on August 25, 1978, Claud Frederick Davis, (Applicant) filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Controller, Kentucky Utilities Co., Public Utility.
Controller, Old Dominion Power Co., Public Utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 29, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-609]

CLIFFS ELECTRIC SERVICE CO.

Filing

SEPTEMBER 18, 1978.

Take notice that on September 12, 1978, Cliffs Electric Service Co. (CESCO) tendered for filing pursuant to Section 205 of the Federal Power Act and Part 35 of the Commission's regulations a letter agreement dated June 30, 1978 for the sale of short-term firm power by CESCO to the Upper Peninsula Power Co. (UPPCO).

CESCO states that under the proposed agreement, CESCO will sell to UPPCO 4000 Kw of firm electric generating capacity from September 3, 1978 through December 30, 1978, and continuing weekly thereafter until April 28, 1978 at the mutual agreement of the parties. CESCO requests that the effective date of this letter agreement be September 3, 1978, and requests waiver of the notice provisions of § 35.3 of the Commission's regulations.

Copies of the filing were served on UPPCO, according to CESCO.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or

before October 2, 1978. Protests will be considered by the Commission in determining the appropriate action to be

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Com-

(18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 25, 1978. Protests will be considered by the Commission in de-

with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before

erated thereby) at or shortly prior to its being loaded in the Project reactor, with the purchase price being related to the Trust's investment in the nuclear

cant in nuclear fuel is required, the Trust may invest the proceeds in commercial paper of the Applicant, notes of its subsidiaries and of Big Bend Re-

before October 2, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. [6740-02]

[Docket No. CP77-8]

COLUMBIA GULF TRANSMISSION CO.

Petition to Amend Pipeline Certificate

SEPTEMBER 18, 1978.

Take notice that on September 5, 1978, Columbia Gulf Transmission Co. (Columbia Gulf), P.O. Box 683, Houston, Tex. 77001, filed in Docket No. CP77-8 a petition to amend the certificate issued May 6, 1977, to allow the transportation of gas from two (2) additional Northern Natural Gas Co. (Northern) delivery points, as a result of the unitization of the several wells into the Eugene Island 330 Field, Offshore Louisiana, all as more fully set forth in the petition on file with the Commission and open to public inspection.

Columbia Gulf states that said certificate authorized a transportation arrangement for such quantity of gas which Northern purchased from Exxon Co. U.S.A.'s interest in Block 332, Eugene Island Area. The petitioner now proposes that in addition such gas be deliverable from the aforementioned two (2) additional delivery points. The addition of gas from the two (2) additional delivery points will not cause the total volume of gas from all four (4) delivery points to exceed 14,000 Mcf of gas per day.

Any person desiring to be heard or to make any protest with reference to said application, on or before October 10, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-26786 Filed 9-25-78; 8:45 am]

[6740-02]

[Docket No. ER78-612]

DETROIT EDISON CO.

Proposed Tariff Change

SEPTEMBER 18, 1978.

Take notice that The Detroit Edison Co. (Detroit Edison) on September 1, 1978, tendered for filing a new Interconnection Agreement between the City of Detroit and The Detroit Edison Company. Detroit Edison indicates that this new agreement will replace in its entirety an interconnection agreement now in effect between the parties since October 1, 1971. Detroit Edison further indicates that the new interconnection agreement does not increase current rates and charges but does expand the services available to the parties. Detroit Edison states that the new agreement provides for new Displacement Power, Diversity Power, and Wheeling services while removing obligations for specified installed reserve responsibilities.

Detroit Edison further states that the proposed changes are desirable by the parties to assure adequate and fair compensation for services rendered and to encourage the availability of the full range of services. Detroit Edison proposes an effective date of October 1, 1978.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 25, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this Agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-26787 Filed 9-25-78; 8:45 am]

[6740-02]

[Docket Nos. RP78-65 and RP75-114]

EAST TENNESSEE NATURAL GAS CO.

Report of Flow Through of Refunds

SEPTEMBER 18, 1978.

Take notice that on September 12, 1978, East Tennessee Natural Gas Co. (East Tennessee) tendered for filing a Report of Flow Through of Refunds made pursuant to the Commission's order dated August 2, 1978, in Docket No. RP78-65 and the Settlement Agreement dated June 28, 1976, in Docket Nos. RP75-114, et al., approved by the Commission's order dated October 13, 1976.

East Tennessee states that on October 24, 1977, it received a refund from Tennessee Gas Pipeline Co., a Division of Tenneco Inc., (Tennessee) representing the refund payable to East Tennessee resulting from the Commission's Opinion Nos. 769 and 769-A in Docket No. RP73-113. East Tennessee also states that in flowing through the jurisdictional portion of the refund to its jurisdictional customers on December 8, 1977, it retained a portion of the Tennessee refund pursuant to a currently effective tariff provision because such portion was not final and nonappealable. East Tennessee further states that pursuant to its tariff filing in response to a show cause proceeding as to why East Tennessee's tariff should not be revised, it is flowing through the jurisdictional portion of the retained refund with interest for the period such refund was retained. Furthermore, East Tennessee states that the refund report shows the distribution of the refund to each of its jurisdictional customers.

East Tennessee states that copies of the filing have been mailed to all its jurisdictional customers and affected State regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance

with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 27, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-26788 Filed 9-25-78; 8:45 am]

[6740-02]

[Docket No. ES78-56]

EL PASO ELECTRIC CO.

Application

SEPTEMBER 18, 1978.

Take notice that on September 1, 1978, El Paso Electric Company (Applicant) filed a petition with the Federal Energy Regulatory Commission seeking approval of Applicant's proposed assumption of liability for the notes to be issued by an independent trust to be established for the principal purpose of providing long-term financing of the cost of nuclear fuel to be used in the Arizona Nuclear Power Project (the Project), also known as the Palo Verde Nuclear Generating Station, in Maricopa County, Ariz., in which Applicant is a participant. Applicant estimates its total cost for such nuclear fuel will be $30 million by the time Unit 1 of the Project comes on line in 1982.

An independent trust (the Trust) will be established with authority to borrow funds necessary (i) to reimburse the Applicant for all past and future expenditures made with respect to its nuclear fuel requirements, and (ii) to permit the investment by the Trust in notes and commercial paper of Applicant, its wholly-owned subsidiaries and Big Bend Resources Trust (a trust financing arrangement for fuel oil consumed by Applicant).

Applicant will enter into a contract with the Trust providing (i) for the agreement by Applicant to assign to the Trust Applicant's interest in the nuclear fuel agreements relating to the Project, (ii) for the agreement by the Trust to borrow such sums as shall be necessary for the Trust to honor its obligations under the nuclear fuel agreements assigned to it, (iii) for the agreement by Applicant to purchase the enriched nuclear fuel (or heat generated thereby) at or shortly prior to its being loaded in the Project reactor, with the purchase price being related to the Trust's investment in the nuclear fuel and payable in accordance with various options the Applicant may elect at such time, (iv) for the agreement by Applicant at termination of the Trust to pay the Trust such amounts as shall be necessary for the Trust to honor all of its obligations, and (v) the agreement by the Trust to reimburse Applicant for all previous expenditures made with respect to the nuclear fuel covered by the nuclear fuel agreements assigned to the Trust and all subsequent expenditures by Applicant in connection therewith.

The Trust will enter into a loan arrangement with a lender (the Lender) providing for a $30 million loan commitment (the Commitment) to the Trust involving (i) the issuance by the Lender of an irrevocable letter of credit in the amount of the Commitment to back up the issuance by the Trust of commercial paper notes (the Commercial Paper Notes) not in the aggregate to exceed the amount of the Commitment less the aggregate amount of the funded notes (the Funded Notes) hereinafter described, (ii) a revolving line of credit in the amount of the Commitment the borrowings against which are to be evidenced by the Funded Notes of the Trust, (iii) the right of the Lender to terminate the Loan Agreement five (5) years after its date, provided that the Lender has given notice of its desire to terminate at least three (3) years prior to the effective date, otherwise the loan arrangement to continue for additional one (1) year periods until the necessary three (3) year notice of termination is given, (iv) the ability of the Trust to prepay the principal of the Funded Notes in whole or in part at any time without penalty and to reduce the amount of the Commitment from time to time, (v) the payment by the Trust of certain commitment fees and letter of credit fees to the Lender, (vi) the granting by the Trust to the Lender of a security interest in the Trust's interests in the nuclear fuel agreements assigned to it by Applicant and the contract in which Applicant agrees to purchase the enriched nuclear fuel, (vii) a limitation upon the investment the Trust may make in notes and commercial paper of Applicant's wholly-owned subsidiaries and Big Bend Resources Trust, and (viii) the execution by the Trust of a depository agreement governing the terms of issuance of the Commericial Paper Notes.

The Trust financing arrangement is designed to provide financing for $30 million of Applicant's nuclear fuel requirements. In the interim until the full $30 million investment by Applicant in nuclear fuel is required, the Trust may invest the proceeds in commercial paper of the Applicant, notes of its subsidiaries and of Big Bend Resources Trust (which provides Applicant's fuel oil requirements—see Docket No. ES77-9), as well as other investments.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 29, 1978. Protests will be considered by the commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP78-90]

EL PASO NATURAL GAS CO.

Proposed Changes in FERC Gas Tariff

SEPTEMBER 18, 1978.

Take notice that El Paso Natural Gas Co. ("El Paso"), on August 31, 1978, tendered for filing proposed changes in special Rate Schedule F-2 to its FERC Gas Tariff, Third Revised Volume No.2. The proposed changes would decrease revenues from a field sale in Dewey County, Okla., to Michigan Wisconsin Pipe Line Co. under El Paso's Rate Schedule F-2 by $33,463, based on an estimated sales volume for the twelve-month period succeeding the proposed effective date of October 1, 1978.

El Paso states that the instant filing is being made pursuant to Section 2.56a of the Commission's Statement of General Policy and Interpretations and in accordance with Article XI of said Rate Schedule F-2. Such filing reflects a 1.0 cent increase in the base rate attributable to the quarterly escalation provisions allowed by the Commission's Opinion No. 770-A issued November 5, 1976, at Docket No. RM75-14, for 1975-76 biennium gas. El Paso further states, however, that due to certain Btu adjustments utilized in the calculation of the subject rate, the proposed change in rate is a net decrease of 6.8891 cents per Mcf.

In connection with the instant notice of change, El Paso also ten-

dered for filing and acceptance Eleventh Revised Sheet No. 1-D.1 to its

with the Commission will be considered by it in determining the appropriate action to be taken, but will not

applications in which no petition to intervene is filed within the time required herein if the Commission on its

[Docket No. ID-1566]

dered for filing and acceptance Eleventh Revised Sheet No. 1-D.1 to its FERC Gas Tariff, Third Revised Volume No. 2. El Paso states that said tariff sheet reflects the decreased rate proposed to be collected by El Paso under Rate Schedule F-2, commencing on October 1, 1978.

Any person desiring to be heard or to make any protest with reference to said tariff filing should, on or before September 25, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C., 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Copies of this filing are on file with the Commission and are available for public inspections.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. CS78-673, etc.]

KAMLOK, INC., ET AL.

Applications for "Small Producer" Certificates [1]

SEPTEMBER 18, 1978.

Take notice that each of the applicants listed herein has filed an application pursuant to section 7(c) of the Natural Gas Act and § 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

MICHAEL R. WHITLEY

Application

SEPTEMBER 15, 1978.

Take notice that on August 25, 1978, Michael R. Whitley (Applicant) filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Vice president, secretary, Kentucky Utilities Co., public utility.
Vice president, secretary, Old Dominion Power Co., public utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 29, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP78-515]

UNITED GAS PIPE LINE CO. AND MICHIGAN WISCONSIN PIPE LINE CO.

Pipeline Application

SEPTEMBER 15, 1978.

Take notice that on September 11, 1978, United Gas Pipe Line Co. (United), P.O. Box 1478, Houston, Tex. 77001, and Michigan Wisconsin Pipe Line Co. (Mich-Wis), One Woodard Avenue, Detroit, Mich. 48226, filed in Docket No. CP 78-515, a joint application pursuant to Section 7(c) of the Natural Gas Act, as amended, requesting authorization to particpate in the construction and operation of offshore facilities which are now under construction by Texas Gas Transmission Corp. (Texas Gas), all as more fully set forth in the application on file with the Commission and open to public inspection.

United and Mich-Wis state that pursuant to an ownership agreement dated July 31, 1978, between United and Mich-Wis will each hold a 16.665 percent undivided interest in approximately 1.19 miles of 12-inch pipeline and related facilities extending from the producer's platform in High Island Area, Block A-302 to a subsea tap on the HIOS 30-inch pipeline in Block A-303 High Island Area.

Any person desiring to be heard or to make any protest with reference to said application, on or before October 10, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP74-85 (PGA78-2)]

WESTERN GAS INTERSTATE CO.

PGA Rate Increase

SEPTEMBER 15, 1978.

Take notice that on August 31, 1978, Western Gas Interstate Co. ("Western") filed herein Tenth Revised Sheet No. 3A to its FERC Gas Tariff, Original Volume No. 1. Said tariff sheet is proposed to become effective on October 1, 1978.

Western states the proposed increase in rates is being filed in accordance with its Tariff's PGA clause which permits the recovery of increases in the cost of gas and unrecovered purchased gas costs. Western further states the proposed Purchase Gas Cost Adjustment for the Northern Division is 0.68 cents per Mcf; for the Southern Division it is 17.02 cents per Mcf. The proposed surcharge adjustment is 9.52 cents per Mcf for the Northern Division and of 18.58 cents per Mcf for the Southern Division; the surcharge adjustments will only be effective over the 6-month period October 1, 1978, through March 30, 1979.

Western has also filed herein Alternate Tenth Revised Sheet No. 3A to its FERC Gas Tariff, Original Volume No. 1. The proposed effective date is October 1, 1978, and Western states that it prefers the acceptance of this alternate tariff sheet since it provides for the recovery of certain purchased gas costs which were not included in prior deferrals due to certain clerical errors made at the time of the filing settlement tariff sheets in Western's last general rate proceeding, Docket No. RP77-94.

Any person desiring to be heard and to make any protest with reference to said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Western's filing is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-565]

WESTERN GAS INTERSTATE CO.

Amendment to Application

SEPTEMBER 15, 1978.

Take notice that on August 31, 1978, Western Gas Interstate Co. (Applicant), 1800 First International Building, Dallas, Tex. 75270, filed in Docket No. CP77-565 an amendment to its pending application in said docket pursuant to section 7(c) of the Natural Gas Act so as to provide for an exchange of natural gas with Cities Service Gas Co. (Cities Service), the continued use of certain facilities to be used in connection with this exchange, and the sale of such gas to Southern Union Gas Co. (Southern Union), all as more fully set forth in the amendment on file with the Commission and open to public inspection.[1]

It is indicated that pursuant to an exchange agreement dated July 11, 1951, a substantial deficit exchange balance is due to Applicant from Cities Service. In order to correct this deficit

[1]This proceeding was commenced before the FPC. By joint regulation of Oct. 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

balance and to provide additional gas volumes to Applicant, Applicant entered into an agreement with Cities Service dated June 8, 1977, providing for the exchange of gas between Cities Service and Applicant at various points in Texas County, Okla., and filed an application for certificate authorization on August 12, 1977, in this docket, it is said. Applicant states that its amendment, pursuant to an agreement between Cities Service and Applicant dated August 28, 1978, modifies its original application be deleting the request to abandon Cities Service's sale to Applicant of production from the Jones A No. 1 and B No. 1 wells, by continuing under a different rate schedule the sale of gas by Cities Service to Applicant which had been proposed to be abandoned, and by establishing an additional point of delivery under the exchange, the West Guymon delivery point.

Applicant states that the total deliveries of Cities Service to Applicant would not exceed 1,500 Mcf per day under the exchange. This arrangement would reduce the deficit balance due Applicant by Cities Service, it is said.

On December 6, 1977, the Commission issued an order consolidating the proceedings in Docket Nos. CP77-565 and G-18545 with the proceedings in Docket No. CP76-462, et al., which relate generally to the ability of Applicant, and Southern Union (which is the parent company of Applicant, a wholly owned subsidiary) to meet the requirements of Southern Union's customers on or near Applicant's East Line, it is stated. Applicant indicates that a hearing was held on March 14, 1978, in which a settlement proposal between Applicant and Cities Service was presented. Applicant states that its amendment basically formalizes the settlement proposal submitted on March 14, 1978, the principal difference being the establishment of the West Guymon Delivery Point.

Applicant states that it has requested a hearing date of September 11, 1978, for the reception of evidence in support of its amendment.

Any person desiring to be heard or to make any protest with reference to said amendment should, on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons who have heretofore filed need not file again.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-598]

WISCONSIN PUBLIC SERVICE CORP.

Filing of Proposed Initial Rate Schedule

SEPTEMBER 14, 1978.

Take notice that Wisconsin Public Service Corp. (Company) on September 5, 1978, tendered for filing a proposed initial Primary Resale Service Agreement, dated August 23, 1978, with the city of Wisconsin Rapids, Wood County, Wis. The Company states that the Agreement provides for wholesale electric service to be furnished by it to the city of Wisconsin Rapids under the Company's standard W-1 form of tariff for Primary Resale Service.

An estimate of quantities of service and revenues during the 12 months immediately following the month in which this service is expected to commence, was submitted with the filing.

The Company states that there are no customers receiving service under a similar schedule except those now being served under the Company's standard W-1 form of tariff.

The Company proposes an effective date of September 1, 1978, and therefore requests waiver of the Commission's notice requirements.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[3128-01]

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. SEPA 78-1, Supplement No. 2]

LAUREL PROJECT, SOUTHEASTERN POWER ADMINISTRATION

Order Extending Confirmation and Approval of Short-Term Power Rates

Notice is hereby given that the Assistant Administrator for Utility Systems, Economic Regulatory Administration, has issued the order published below extending through September 30, 1978, confirmation and approval of short-term power rates for the Laurel project, Southeastern Power Administration.

Pursuant to section 301(b) of the Department of Energy Organization Act (the Act), 42 U.S.C. § 7101 et seq., the function to confirm and approve rates in accordance with section 5 of the Flood Control Act of 1944, 16 U.S.C. § 825s, for power marketed by the Southeastern Power Administration was transferred to and vested in the Secretary of Energy. By delegation order No. 0204-4, effective October 1, 1977, 42 FR 60725-7 (Nov. 29, 1977), the Secretary of Energy delegated confirmation and approval authority to the Administrator of the Economic Regulatory Administration (ERA or Administrator). The Administrator has delegated this authority to the Assistant Administrator for Utility Systems, Economic Regulatory Administration.

BACKGROUND

The Laurel project began commercial operation as a hydroelectric generating facility on October 25, 1977.

It was Southeastern Power Administration's (SEPA) original intention to sell one-half of the project output to East Kentucky Power Cooperative, Inc. (East Kentucky) and to sell the other half to eight municipal customers in Kentucky. The power sold to these municipal customers was to be transmitted through the facilities of East Kentucky and Kentucky Utilities Co. (Kentucky Utilities). However, SEPA and Kentucky Utilities were unable to complete a contract for the transmission of this power to the eight municipal customers. Therefore, SEPA entered into a contract (contract No. 89-00-1501-564) for the sale of the entire output from the Laurel project to East Kentucky for the period beginning November 1, 1977, and ending January 31, 1978, at the following rate:

$56,000 per calender month for capacity, plus 10.0 mills per kilowatt hour for energy declared and made available.

The schedule of rates and charges in the SEPA contract were to apply to the period during which negotiations had been theirs, but for the failure of SEPA to negotiate satisfactory transmission services and the unwillingness to the East Kentucky Power Cooperative, Inc., as conditionally extended by the Economic Regulatory Administra-

L. 92-463, 86 Stat. 770), notice is hereby given that the Fuel Oil Marketing Advisory Committee and Ad

Issued at Washington, D.C., on September 21, 1978.

WILLIAM P. DAVIS,

originally certificated, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

V 43 / 187 SEP 26 78 V 43

The schedule of rates and charges in the SEPA contract were to apply to the period during which negotiations between SEPA and Kentucky Utilities for the transmission of power to the municipal customers were to be concluded. The contract was extended on January 26, 1978, for an additional 3-month period through April 30, 1978.

The Assistant Secretary for Resource Applications (RA or Assistant Secretary), on behalf of SEPA, requested the Administrator of ERA to confirm and approve the short-term rates of the Laurel project through April 30, 1978. On April 21, 1978, the Administrator of ERA, after notice and comment, issued an order confirming and approving the short-time rates contained in the contract through April 30, 1978, 43 FR 17857 (Apr. 26, 1978).

On May 9, 1978, the Assistant Secretary, on behalf of SEPA, requested the Administrator of ERA to extend confirmation and approval of the existing short-term rates of the Laurel project through September 30, 1978, since the transmission arrangements with Kentucky Utilities had not been completed.

DISCUSSION

On June 9, 1978, ERA issued a notice conditionally extending confirmation and approval of the Laurel project rates through September 30, 1978, and announced the Administrator's intention to exercise final confirmation and approval authority with respect to the requested extension. 43 FR 25856 (June 15, 1978). Interested persons were afforded the opportunity to file written comments on the proposal and to request a public hearing. No requests for a public hearing were filed. The cities of Barbourville, Corbin, and Falmouth, Ky. and the Frankfort Electric and Water Plant Board (Kentucky Municipals), four of the eight potential municipal customers, filed joint written comments on July 18, 1978, in response to the notice. On August 21, 1978, East Kentucky filed written comments in response to the written comments of the Kentucky Municipals. No other interested persons filed written comments.

The Kentucky Municipals request that ERA's approval of the short-term rates be conditioned upon the establishment of a banking or payback provision that would permit the Kentucky Municipals to withdraw, at a mutually agreeable time upon completion of transmission arrangements with Kentucky Utilities, up to one-half of the 70 MW of Laurel project power that is currently being sold to East Kentucky. The Kentucky Municipals maintain that the public interest requires that they be allowed "to take back the energy which would have been theirs, but for the failure of SEPA to negotiate satisfactory transmission services and the unwillingness of (Kentucky Utilities) to conclude a satisfactory transmission agreement." East Kentucky states, in response to the request of the Kentucky Municipals, that such a banking arrangement would place "unreasonable and unconscionable burdens" on its power system and it requests that ERA not condition the approval of the short-term rates on the establishment of a banking arrangement.

Section 5 of the Flood Control Act of 1944, 16 U.S.C. § 825s requires that preference in the sale of power and energy from certain federally owned generating projects be given to public bodies and cooperatives. Under this provision, public bodies and cooperatives are entitled to be given a preference over private entities. The Flood Control Act does not specifically address the issue of allocation between all potential preference customers. It is the responsibility of SEPA and the Assistant Secretary to make the necessary arrangements for the marketing of power and energy generated at the Laurel project in accordance with the Flood Control Act.

As stated above, SEPA and the Assistant Secretary have not completed making arrangements for the marketing of Laurel project power and have not proposed long-term power rates for review by ERA. The Assistant Secretary has requested only that ERA approve an extension of short-term contract rates. SEPA's marketing policies for the Laurel project are not an issue in this proceeding. Such policies, assuming they are relevant to a determination of an appropriate schedule of rates and charges for power sold by the Laurel project, would only be ripe for review by ERA at such time as SEPA and the Assistant Secretary propose long-term power rates. Therefore, ERA has not conditioned confirmation and approval of the existing short-term rates on the establishment of a banking or payback provision as requested by the Kentucky Municipals.

ERA concludes that it is appropriate to exercise final confirmation and approval authority with respect to the requested extension of the short-term rates for power sold to East Kentucky from the Laurel project through September 30, 1978.

ORDER

Pursuant to the delegation of authority set forth above, the Assistant Administrator for Utility Systems, Economic Regulatory Administration, orders:

1. Confirmation of the short-term rates for the sale of power and energy generated at the Laurel project, Southeastern Power Administration, to the East Kentucky Power Cooperative, Inc., as conditionally extended by the Economic Regulatory Administration on May 9, 1978, is hereby approved for a period ending September 30, 1978; and

2. The Assistant Secretary for Resource Applications shall cause a copy of this order to be distributed to all appropriate parties on the service list.

Issued in Washington, D.C., this 20th day of September 1978.

DOUGLAS C. BAUER,
Assistant Administrator for Utility Systems, Economic Regulatory Administration, Department of Energy.

Office of Intergovernmental and Institutional Relations

ENVIRONMENTAL ADVISORY COMMITTEE

Renewal

This notice is published in accordance with the provisions of section 7 of the Office of Management and Budget Circular A-63, as amended. Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act and following consultation with the Committee Management Secretariat, General Services Administration, notice is hereby given that the Environmental Advisory Committee has been renewed for a 24-month period ending on September 30, 1980.

The renewal of this Committee has been determined necessary and in the public interest. The Committee will operate in accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), the Department of Energy Organization Act (Pub. L. 95-91) OMB Circular No. A-63 (revised), and other directives and instructions issued in implementation of those Acts.

Further information regarding this Committee may be obtained from the Department of Energy Advisory Committee Management Office, 202-252-5877.

Issued at Washington, D.C., on September 21, 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

[3128-01]

FUEL OIL MARKETING ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Fuel Oil Marketing Advisory Committee and Ad Hoc Subcommittee will meet Monday, October 23, and Tuesday, October 24, 1978, in the California Room of the Sheraton Palace Hotel, 639 Market Street, San Francisco, Calif.

The Committee was established to provide the Secretary of Energy with expert and technical advice concerning the marketing of fuel oil as it relates to the development and implementation of policies and programs by the Department of Energy.

The agenda for the meetings is as follows:

MONDAY, OCTOBER 23, 1978

Ad Hoc Subcommittee—California Room
9:00-1:00 Preparation of Recommendations for Full Committee
Full Committee—California Room
2:00-5:00
Agenda:
Old Business
Report of the Ad Hoc Subcommittee

TUESDAY, OCTOBER 24, 1978

Full Committee—California Room
9:00-5:00
Agenda:
Report on the Middle Distillate Evidentiary Hearing
Responsibility of the Committee Concerning Residual Fuel Oil
Status of Residential Conservation Program Regulations
New Business
Remarks from Floor (10 Minute Rule)

The meetings are open to the public. The Chairman of the Committee or subcommittee is empowered to conduct the meetings in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee or subcommittee will be permitted to do so, either before or after the meetings. Members of the public who wish to make oral statements should inform Georgia Hildreth, Director, Advisory Committee Management, 202-252-5877, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Transcripts of the meetings will be available for public review at the Freedom of Information Public Reading Room, Room 2107, DOE, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4.30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcripts from the reporter.

Issued at Washington, D.C., on September 21, 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

[6740-02]

[Docket No. RP77-117]

CARNEGIE NATURAL GAS CO.

Certification of Proposed Settlement Agreement

SEPTEMBER 19, 1978.

Take notice that on September 5, 1978, Administrative Law Judge Grossman certified to the Commission a stipulation and agreement proposed in settlement of the issues in the above-captioned rate proceeding. The certification states that the proposed stipulation and agreement, which was filed by joint motion on August 30, 1978, is not opposed by any party. The certification also included the official stenographers report of the settlement conference held on December 1, 1977, and the proposed stipulation and settlement agreement, dated August 30, 1978, which had been filed in the subject docket and admitted into evidence. If approved, the proposed stipulation and agreement would resolve all of the issues in this proceeding.

Any person desiring to be heard or to protest said stipulation and agreement should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before October 24, 1978. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-67]

COLUMBIA GAS TRANSMISSION CORP.

Petition To Amend

SEPTEMBER 18, 1978.

Take notice that on September 5, 1978, Columbia Gas Transmission Corp. (Columbia), 1700 MacCorkle Avenue SE., Charleston, W. Va. 25314, filed on docket No. CP78-67, a petition to amend the Commission's order of May 3, 1978, pursuant to section 7 of the Natural Gas Act so as to authorize the construction and operation of certain pipeline facilities varying in length, size, and location from those originally certificated, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection. The order of May 3, 1978, authorized Columbia to construct and operate certain proposed facilities and to abandon other facilities.

Specifically, Columbia has determined that due to a peak day deliverability problem project No. 10, authorized in the subject docket, should be revised and designated as project No. 10R which is described as follows:

10R The construction and operation of approximately 0.4 mile of 3-inch and 2.1 miles of 4-inch transmission pipeline replacing 2.3 miles of 4- and 8-inch pipeline located in Wayne County, Ohio.

Columbia asserts that the change from the original project No. 10 proposal is needed for the following reasons:

(1) The 3- and 4-inch pipe, rather than the 2- and 3-inch pipe of the original proposal, is required to meet the unexpectedly high demand of the communities of Reedsburg and Jefferson, Ohio, experienced by Columbia in the winter of 1977-78;

(2) Route surveys show that the length of the pipeline in the western section of the project had been underestimated by approximately 0.5 mile;

(3) That a relocation of the pipeline on the eastern section of the project was desirable and would require an additional 0.2 mile of 3-inch pipeline.

Columbia further asserts that in order to provide greater assurance of uninterrupted supply for the communities of Rowlesburg and Manheim, W. Va., project No. 30, authorized in the subject docket should be revised and designated project No. 30R which is described as follows:

30R The construction and operation of approximately 2.6 miles of 2-inch and 0.4 mile of 4-inch transmission pipeline and appurtenant measuring and regulating facilities, and the abandonment of approximately 3 miles of 6-inch pipeline located in Preston County, W. Va.

Columbia asserts that the change from the original project No. 30 proposal is required since it has determined that the location of the connection proposed in the project created a potential for supply problems during the winter period in that the area is subject to heavy snow falls and could become inaccessible and in that there is a potential for storage line freezes.

The estimated cost of project No. 10R is $100,000, and of project No. 30R is $283,000, including the Commission's filing fees and would be financed through funds generated internally, it is asserted.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 10, 1978, file with the Federal

[Docket No. ER76-887]

DAYTON POWER & LIGHT CO.

Refund Report

SEPTEMBER 19, 1978.

Take notice that Dayton Power & Light Co. on September 11, 1978, tendered for filing in compliance with the Commission's letter of August 11, 1978, a report of refunds to its 14 municipal wholesale customers on Septerber 7, 1978. The refund report consists of four schedules: Schedule A—summary of refunds made, schedule B—billing determinants and revenues for prior rates, schedule C—billing determinants and revenues on present and settlement rates, schedule D—determination of refund and interest applicable for each customer.

The company indicates that each appropriate official of the 14 municipals affected, in addition to a refund check, has been provided a copy of their particular refund report.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such protests should be filed on or before October 16, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

INTER-CITY MINNESOTA PIPELINES LTD., INC.

Proposed Rate Change Pursuant to Purchased Gas Cost Adjustment Provisions

SEPTEMBER 18, 1978.

Take notice that Inter-City Minnesota Pipelines Ltd., Inc. on September 1, 1978, tendered for filing Tenth Revised Sheet No. 4 to its FERC gas tariff, Original Volume No. 1, proposed to be effective November 1, 1978.

Minnesota Pipelines states that this filing is the annual filing for the contract year ending October 31, 1978, and reflects the rates which Minnesota Pipelines is required to pay its supplier ICG Transmission Ltd.

Minnesota Pipelines also states that copies of this filing have been served upon all its customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before September 29, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants party to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. ER78-467]

IOWA POWER & LIGHT CO.

Order Accepting for Filing and Suspending Proposed Rate Schedules, Waiving Notice Requirements, Providing for Hearing, Establishing Procedures, and Allowing Interventions

SEPTEMBER 14, 1978.

On August 9, 1978,[1] Iowa Power & Light Co. (I.P. & L.) submitted for filing a proposed rate increase for wholesale service to the cities of Carlisle and Neola, Iowa (Cities). Such increase would result in increased revenues of $102,701[2] based on a 12-month period ending December 31, 1979. I.P. & L. proposes an effective date of September 15, 1978, but requests that the rate schedule be suspended until January 1, 1979. I.P. & L. requests waiver of that portion of section 35.13 of the regulations which requires that period II (calendar year 1979) data be submitted for a period beginning no later than the date the rates are proposed to become effective.

Notice of the filing was issued on July 6, 1978, with comments, protests, or petitions to intervene due on or before July 14, 1978.

On July 14, 1978, petitions for leave to intervene were timely filed by the cities of Carlisle and Neola, Iowa. In its petition, the city of Carlisle requests an opportunity to supplement

[1] I.P. & L. initially submitted the filing on June 30, 1978, but was informed by Commission letter of July 25, 1978, that its submittal was deficient with respect to certain cost of service data.

[2] See attachment A for rate schedule designations.

their pleading due to lack of notice. While notice was issued on July 6, 1978, petitioner indicates that its counsel did not receive actual notice until the afternoon of July 13, 1978, the day before the end of the comment period. Under section 35.1(a) and 35.2(d) of our regulations I.P. & L. is required to mail a copy of a proposed rate schedule to each affected purchaser on the day the filing is tendered here. Thus Carlisle should have had actual notice shortly after the filing was first tendered. However, we note that section 1.11(a) of our regulations permits Carlisle to amend its pleadings, and no special permission is required in this order. The city of Carlisle also moved to reject the tendered filing in part. This motion pertains to the working capital allowance submitteed by I.P. & L. with respect to rate for demand charges. In support of this motion, Carlisle cites the initial decisions in *Carolina Power & Light Company*[3] and *Southern California Edison Co.*[4] for the proposition that the 45-day rule has been disallowed. In opinion No. 19,[5] this Commission, while recognizing the need for reexamination of the 45-day rule, allowed the rule to stand pending further review. Therefore, the city of Carlisle's motion to reject shall be denied.

The remaining issues raised by Carlisle are matters that should be raised at hearing and will not be dealt with here.

In its petition, the city of Neola also claims lack of notice, indicating that they were not apprised of I.P. & L.'s tendered filing until the last day of the comment period, July 14, 1978. In view of this, the city of Neola requests the Commission to expressly recognize the city's reservation of its right to raise issues or move to reject following completion of its analysis of the company's rate increase application. Like Carlisle, Neola is free to avail itself of the sections of our regulations permitting amendment of pleadings subsequent to the issuance of a suspension order. We shall not, however, reach the question of the city's request to reserve the right to move for rejection of the filing at a later date. We would merely note that the city as a party in this docket is free to file any motion it deems appropriate during the pendency of the proceeding.

I.P. & L.'s request for waiver of our regulations requiring that the first day of period II be no later than the first day on which the rates are proposed to be effective is denied.

I.P. & L.'s period I data does not support the proposed increase. In fact, the primary cost support for the proposed increase, as reflected in the period II data, is the addition of a new generating plant as of January 1, 1979. In effect, I.P. & L.'s request would deny the Commission the exercise of its suspension powers during the period (after January 1, 1979) that I.P. & L. claims the proposed rate would be cost-justified. Instead, we will grant I.P. & L. a waiver of our 90-day notice requirements, so that I.P. & L. need not refile its cost support and accept the proposed rate schedule for filing as of January 1, 1979.

Our review of the filing indicates that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential or otherwise unlawful. We therefore will suspend the proposed rates and charges for 1 month and permit them to become effective subject to refund on February 1, 1979, pursuant to section 205(e) of the Federal Power Act.

The Commission finds that participation of the intervenors in this proceeding may be in the public interest.

The Commission orders:

(A) The city of Carlisle's motion to reject is hereby denied.

(B) The requirements of section 35.3(a) of the Commission's regulations with respect to instant filing are hereby waived and the proposed increased rates and charges are accepted for filing as of January 1, 1979, suspended, and the use thereof deferred until February 1, 1979, when they shall become effective subject to refund.

(C) The petitioners, the cities of Carlisle and Neola, Iowa, are hereby permitted to intervene in this proceeding subject to the rules and regulations of the Commission; *Provided, however,* That participation by such intervenors shall be limited to the matters set forth in their petitions to intervene; *Provided further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the DOE Act and by the Federal Power Act and pursuant to the Commission's rules of practice and procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of the rates proposed by Iowa Power & Light Co.

(E) The staff shall serve top sheets in this proceeding on or before January 15, 1979.

(F) A presiding administrative law judge to be designated by the Chief Administrative Law Judge for that purpose, shall convene a conference in this proceeding to be held within ten (10) days of the serving of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. Said law judge is authorized to establish procedural dates and to rule upon all motions (except motions to consolidate and sever and motions to dismiss), as provided for in the Commission's rules of practice and procedure.

(H) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

MOUNTAIN FUEL RESOURCES, INC.

Granting Extension of Time and Postponement of Settlement Conference

SEPTEMBER 19, 1978.

On September 7, 1978, Commission staff counsel filed a motion to extend the time for filing top sheets in the above-captioned proceeding pursuant to the Commission's order of June 15, 1978. The motion states that staff counsel has contacted Mountain Fuel Resources, Inc. (MFR), and that MFR does not object to the extension. The motion further stated a joint request by staff counsel and MFR that the settlement conference in this proceeding be postponed.

Upon consideration, notice is hereby given that a limited extension of time is granted to and including October 2, 1978, for filing top sheets. Postponement of the settlement conference also is granted until October 26, 1978.

NANTAHALA POWER & LIGHT CO.

Notice of Filing

SEPTEMBER 19, 1978

Take notice that Nantahala Power & Light Co. on August 21, 1978, pursuant to ordering paragraph (B) of the Commission's order granting rehearing, modifying prior order determining refunds and terminating proceeding, issued July 20, 1978, tendered for filing documentation in support of the amounts which would have been collected by Nantahala under a fuel clause during the period that the rates in docket E-9181 were in effect.

Nantahala indicates that the calculations submitted herein utilize the actual TVA fuel related charges for January 1975 as a base.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with section 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such protests should be filed on or before October 4, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection

[Docket No. E-9181]

Granting Extension of Time

SEPTEMBER 20, 1978.

On September 13, 1978, Counsel for Nantahala Power & Light Co. filed a motion for extension of time until September 29, 1978 to respond to the Town of Highlands, North Carolina's (Highlands) "Protest of Alleged Documentation of Nantahala Fuel Adjustment revenues, Motion to Reject and Strike, Motion for Reconsideration Regarding Reopening of the Record, and Motion to Require Adequate Refunds," filed August 31, 1978. The motion states that Highland's protest was not received by Nantahala's counsel until September 8, 1978, and that the technical questions raised by Highlands will require extensive research prior to response. Nantahala states that the other parties do not oppose this request.

Upon consideration, notice is hereby given that an extension of time is granted to and including September 29, 1978, during which Nantahala may respond to Highland's August 31, 1978 protest.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-36 (PGA78-3) (DCA78-2)]

PANHANDLE EASTERN PIPE LINE CO.

Granting Extending of Time

SEPTEMBER 20, 1978.

On September 11, 1978, Commission Staff Counsel filed a motion for extension of time to file staff's statement of position in the above captioned proceeding until November 2, 1978, to comply with the Commission order issued July 31, 1978. The motion states that the extension is required to allow Panhandle to reply to Staff interrogatories and for Staff to review said reply.

Upon consideration, notice is hereby given that an extension of time is granted to and including November 2, 1978 for filing the statement of position in this proceeding.

KENNETH F. PLUMB,
Secretary.

[6740–02]

[Docket No. RP78-62]

PANHANDLE EASTERN PIPE LINE CO.

Granting Extension of Service Date

SEPTEMBER 19, 1978.

On September 8, 1978, Commission Staff Counsel filed a motion requesting an extension of time for providing service of top sheets in the above captioned proceeding pursuant to the Commission's order issued May 31, 1978. The motion states that Staff Counsel has contacted counsel for Panhandle who stated that Panhandle will not oppose this request.

Upon consideration, notice is hereby given that an extension of time is granted to and including November 1, 1978, for filing top sheets in compliance with the May 31, 1978 order.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. CP68-146, CP67-22, CI68-621]

TENNESSEE GAS PIPELINE CO., A DIVISION OF TENNECO, INC. AND TENNECO OIL CO.

Granting Extension of Time

SEPTEMBER 19, 1978.

On July 24, 1978, Tennessee Gas Pipeline Co., a Division of Tenneco, Inc. (Tennessee) and Tenneco Oil Co. (Tenneco) filed a joint motion for extension of time for filing a production cost report as prescribed in Commission order dated July 30, 1969, (42 FPC 292) and amended by Commission order dated November 26, 1974 (52 FPC 1457). The motion states that because of modifications and complexities of recent FERC forms and heavy workload demands on Tenneco personnel it will be impossible for Tennessee and Tenneco to meet the ordered deadline for filing their annual production cost report (PCR) for the year 1977.

Upon consideration, notice is hereby given that the date by which Tennessee and Tenneco shall file their production cost report for the year 1977 is extended to and including October 1, 1978.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. RP75-30, RP74-20, and RP74-83]

UNITED GAS PIPELINE CO.

Granting Extension of Time

SEPTEMBER 19, 1978.

On September 1, 1978, United Gas Pipeline Co. (United) filed a request for clarification or, in the alternative, for a delay in the effectiveness of ordering paragraphs (B) and (C) of Commission opinion No. 16, issued June 3, 1978, in the above captioned proceeding. The request stated that since the Commission granted rehearing for purposes of further consideration on August 29, 1978, United should not be required to file revised tariff sheets reflecting modifications in its rates nor to make refunds to its ratepayers as prescribed by ordering paragraphs (B) and (C) of opinion No. 16 until the Commission issues its order on the merits of the rehearing application.

Upon consideration, notice is hereby given that an extension is granted to and including October 30, 1978, for United to comply with ordering paragraphs (B) and (C) of opinion No. 16.

KENNETH F. PLUMB,
Secretary.

GENERAL SERVICES ADMINISTRATION

[Intervention Notice 73; Docket No. ER-78-252]

MISSOURI PUBLIC SERVICE COMMISSION AND KANSAS CITY POWER & LIGHT CO.

General Rate Increase Proceeding

The Administrator of General Services seeks to intervene in a proceeding before the Missouri Public Service Commission ER-78-252 involving an application of Kansas City Power & Light Co. for an increase in rates changed for electric service. The Administrator of General Services represents the interests of the executive agencies of the U.S. Government as users of utility services.

Persons desiring to make inquiries of GSA concerning this case should submit them, in writing, to Mr. Spence W. Perry, Assistant General Counsel, Regulatory Law Division, General Services Administration, 18th and F Streets NW., Washington, D.C. 20405, telephone 202-566-0726, on or before October 26, 1978, and refer to this notice number.

Persons making inquiries are put on notice that the making of an inquiry shall not serve to make any persons parties of record in the proceeding.

(Section 201(a)(4), Federal Property and Administrative Services Act, 40 U.S.C. 481(a)(4).)

Dated: September 6, 1978.

JAY SOLOMON,
Administrator of General Services.

[Federal Property Management Regs., Temporary Reg. F-470]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent the interests of the executive agencies of the Federal Government in an electric rate proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the New Mexico Public Service Commission involving the application of the El Paso Electric Co. for a general increase in rate charges for electric service.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

JAY SOLOMON,
Administrator of General Services.

CALBIOCHEM-BEHRING CORP.

Petition for Reclassification

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice invites interested persons to submit information,

an investigational device exemption under section 520(g) of the act (21

SUMMARY: The Food and Drug Administration (FDA) announces the

Dated: September 18, 1978.

JOSEPH P. HILE,
Associate Commissioner for

mercial distribution since that date and subsequently reclassified. Therefore, the device is classified automati-

device the name "glycosylated (fast fraction) hemoglobin" and described this type of device as a device used to

V 43 / 187 SE 26 78

SUMMARY: This notice invites interested persons to submit information, data, and views on a petition for reclassification of a medical device from class III (premarket approval) to class II (performance standards). The petition was submitted by Calbiochem-Behring Corp. for a serum alcohol control. Material submitted will be forwarded to members of the Clinical Toxicology Device Classification Panel, who will make a recommendation on the petition to the Food and Drug Administration (FDA).

DATE: Information, data, and views should be submitted by October 26, 1978.

ADDRESSES: Copies of the petition are available at the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857. Information, data, and views should be submitted (preferably five copies) to S. K. Vadlamudi, Executive Secretary, Clinical Toxicology Device Classification Panel (address given below).

FOR FURTHER INFORMATION CONTACT:

S. K. Vadlamudi, Bureau of Medical Devices (HFK-440), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, Md. 20910, 301-427-7234.

SUPPLEMENTARY INFORMATION: On August 18, 1977, Calbiochem-Behring Corp., San Diego, Calif. 92112, submitted under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), a premarket notification of its intent to market an ethanol control used to determine whether an instrument designed to measure the ethanol content in serum is properly performing. The device utilizes the enzyme trypsin to separate the ethyl ester form the *N*-α-benzoyl-L-arginine ethyl ester to produce ethanol in the serum. The manufacturer calls the device "Serum Alcohol Control." This device was determined by the agency to be not substantially equivalent to any device that was in commercial distribution before May 28, 1976, and is therefore classified into class III (premarket approval) under section 513(f) of the act (21 U.S.C. 360c(f)). On May 4, 1978, Calbiochem-Behring Corp. submitted, under section 513(f)(2) of the act, a reclassification petition for the device.

Under section 515(a)(2) of the act (21 U.S.C. 360e(a)(2)), before a device that is in class III under section 513(f)(1) of the act can be marketed, it must either be reclassified under section 513(f)(2) of the act or have an approval of an application for premarket approval under section 515 of the act, unless there is in effect for the device an investigational device exemption under section 520(g) of the act (21 U.S.C. 360j(g)).

The agency reviewed the petition and determined that it was deficient. On July 10, 1978, the manufacturer submitted additional information to complete the petition.

Section 513(f) of the act requires the Commissioner of Food and Drugs to submit the petition to a device classification panel for a recommendation concerning classification. The Panel is required to make its recommendation to the Commissioner within 90 days after the petition is referred to the Panel. Ordinarily, the petition would be discussed at an open panel meeting before the Panel makes its recommendation. However, a meeting of the Clinical Toxicology Device Classification Panel could not be scheduled so as to enable the Panel to make its recommendation within the required 90-day period. Therefore, this petition has been mailed to the voting members of the Panel for their review and recommendation to FDA. The Panel will make its recommendation to FDA by mail.

Section 513(f) of the act also requires the Commissioner to provide an opportunity for interested persons to provide information, data, and views to the Panel before it makes its recommendation. Information, data, and views will be mailed to the Panel members for their consideration before they make their recommendation. Then each voting member will send the Executive Secretary of the Panel a completed supplemental data sheet and a complete classification questionnaire applicable to the device for which a recommendation is sought. The Panel recommendation will be published in the FEDERAL REGISTER. A period for public comment will follow, and then the Commissioner will issue a final regulation approving or denying the petition no more than 210 days after the submission of an adequate petition.

Dated: September 20, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 78-26944 Filed 9-25-78; 8:45 am]

[4110-03]

Food and Drug Administration

[Docket No. 78D-0241]

CANNED PINEAPPLE AND PINEAPPLE JUICE

Availability of Guideline

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces the availability of a revised administrative guideline establishing a new defect action level for pineapple juice and revising the defect action level for canned pineapple.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Howard N. Pippin, Bureau of Foods (HFF-312), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-245-3092.

SUPPLEMENTARY INFORMATION: Administrative guidelines developed by the FDA set forth regulatory policies which are used as a basis for legal actions. The food defect action levels established in administrative guidelines by FDA represent the levels of natural or unavoidable defects permitted in foods produced under good manufacturing practices. These action levels may be revised as necessary to reflect technological advances or changes in problems related to specific commodities.

An updated administrative guideline has been issued establishing the following revised action levels for mold in pineapple products:

1. Pineapple, canned—actionable if the average Howard mold count for six or more subsamples exceeds 20 percent or if the Howard mold count for any one subsample exceeds 60 percent.

2. Pineapple juice—actionable if the average Howard mold count for 6 or more subsamples exceeds 15 percent or if the Howard mold count for any one subsample exceeds 40 percent.

A copy of this guideline is available for public examination between 9 a.m. and 4 p.m., Monday through Friday, in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857. Requests for single copies of the guideline may be made in writing to that office.

Interested persons may submit written comments on the guideline to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857. (Preferably four copies and identified with the Hearing Clerk docket number found in brackets in the heading of this document). Received comments will be incorporated into the public file on the guideline and may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday, except holidays.

Dated: September 18, 1978.

JOSEPH P. HILE,
Associate Commissioner for Regulatory Affairs.

[FR Doc. 78-26721 Filed 9-25-78; 8:45 am]

[4110-03]

[Docket No. 78P-0155]

HELENA LABORATORIES

Panel Recommendation on Petition for Reclassification

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The agency is publishing for public comment the recommendation of the Clinical Chemistry and Hematology Device Classification Panel that the Glycosylated (Fast Fraction) Hemoglobin Quick Column Methodology be reclassified from class III (premarket approval) into class II (performance standards). This recommendation was made after review of a reclassification petition filed by Helena Laboratories, Beaumont, Tex. 77704. After reviewing the Panel recommendation and any public comments received, the agency will approve or deny the reclassification by order in the form of a letter to the petitioner. The agency's decision on this reclassification petition will be announced in the FEDERAL REGISTER.

DATE: Comments by October 26, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Kaiser Aziz, Bureau of Medical Devices (HFK-440), Food and Drug Administration, 8757 Georgia Avenue, Silver Spring, Md. 20910, 301-427-7550.

SUPPLEMENTARY INFORMATION: On February 21, 1978, Helena Laboratories, Beaumont, Tex. 77704, submitted to the Food and Drug Administration (FDA) a petition for reclassification under section 513(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360c(f)), for a device that it intended to market for the quantitation of glycosylated or fast fraction hemoglobins. The manufacturer calls this device "The Helena Glycosylated (Fast Fraction) Hemoglobin Quick Column Methodology." The reclassification petition stated that the device is not substantially equivalent to a device that was in commercial distribution before May 28, 1976, nor is the device substantially equivalent to a device that has been placed in commercial distribution since that date and subsequently reclassified. Therefore, the device is classified automatically into class III under section 513(f)(1) of the act.

Under section 515(a)(2) of the act (21 U.S.C. 360e(a)(2)), before a device that is in class III under section 513(f)(1) of the act can be marketed, it must either be reclassified under section 513(f)(2) or have an approval of an application for premarket approval under section 515 of the act, unless there is in effect for the device an investigational device exemption under section 520(g) of the act (21 U.S.C 360j(g)).

The agency reviewed the petition and determined that there was no deficiency that would prevent FDA from making a decision on the petition. However, the agency's review did raise certain questions concerning the scientific data submitted in support of the petition. On May 24, 1978, the manufacturer supplemented the petition by voluntarily submitting additional information in answer to these questions.

Section 513(f)(2) of the act requires FDA to refer a reclassification petition to the appropriate classification panel and to receive a recommendation on whether to approve or deny the petition within 90 days after referral. The act also requires FDA to provide an opportunity for interested persons to submit data and views to the panel. The Food and Drug Administration ordinarily meets the latter requirement by scheduling an open panel meeting on the petition but could not do so in this case, because a meeting of the Clinical Chemistry and Hematology Device Classification Panel could not be scheduled so as to enable the Panel to make its recommendation within the required 90-day period. As a result, FDA obtained the Panel's recommendation by mailing it to voting Panel members. The agency also published in the FEDERAL REGISTER of July 25, 1978 (43 FR 32189), a notice to interested persons to submit data, information, and views for consideration by the Panel. The notice stated that any data, information, and views submitted by August 24, 1978, would be mailed to the Panel members for their consideration before recommendations were made. Certain data, information, and views were submitted and were mailed to the Panel members. The recommendations of the Panel members were received by the agency by August 31, 1978. The Panel recommended that the device be reclassified into class II.

To determine the proper classification of the device, the Panel considered the criteria in section 513(f)(1) of the act.

For the purpose of classification, the Panel assigned to this generic type of device the name "glycosylated (fast fraction) hemoglobin" and described this type of device as a device used to quantitate the sum of the glycosylated (fast fraction) hemoglobins (A_{1a}, A_{1b}, A_{1c}) as part of the assessment of diabetic control. The device is used to determine the proper dosage of insulin for diabetic patients. Inappropriate insulin dosage could result in hyperglycemia or hypoglycemia.

SUMMARY OF REASONS FOR THE RECOMMENDATION

The Panel made the following determinations in support of its recommendation:

1. The device is not an implant, is neither life-sustaining nor life-supporting, and does not present a potential unreasonable risk of illness or injury. The device is of substantial importance in preventing impairment of human health. General controls are not sufficient to provide reasonable assurance of the safety and effectiveness of the device, but sufficient scientific and medical data exist to establish a performance standard to provide such assurance.

2. The safe and effective performance of the device depends upon the user's awareness of limitations on the value of information from the device, as discussed in the "Risks to Health" section of this notice.

SUMMARY OF DATA ON WHICH THE RECOMMENDATION IS BASED

The safety and effectiveness of the device was determined on the basis of data presented on the performance characteristics of the product.

The accuracy of the device was evaluated using fresh whole blood samples from 70 normal adult subjects and 9 diabetic patients known to be insulin-dependent. The glycosylated hemoglobin values for the 70 normal subjects showed a high correlation with the normal ranges cited in the literature. The values for the diabetic subjects were elevated over the normal ranges cited in the literature.

The precision of the methodology was established by studies of within-run reproducibility, run-to-run reproducibility, and lot-to-lot column variability. For the Helena study of within-run reproducibility, samples from 10 normal adults and 10 insulin dependent patients with diabetes mellitus were tested using 10 columns per sample per run. Coefficients of variation ranged from 2.98 to 8.39 percent for the normal samples and 1.66 to 6.06 percent for the samples from the insulin dependent diabetic patients. A clinical laboratory study of within-run reproducibility for 8 normal samples, using 20 columns per sample produced coefficients of variation of 3.9 to 7.7 percent for the normal samples and

from 3.9 to 8.6 percent for the abnormal samples.

The Helena study of run-to-run re-

RISKS TO HEALTH

The Panel noted that the device is of

mental Protection Agency (EPA) that glandless cottonseed kernels are different from glanded cottonseed and therefore require different pesticide

mitting the use of roasted or cooked glandless cottonseed kernels in baked goods, candy, and as a snack food.

and evaluated at that time. Representative data submitted by the petitioner indicated that whole raw glandless cottonseed kernels contained, on the

utilizing two strains of rats. The rat, a mammalian species, is the animal of choice (as opposed to the fish) for toxicological testing of CPFA to obtain

from 3.9 to 8.6 percent for the abnormal samples.

The Helena study of run-to-run reproducibility consisted of 10 normal samples and 10 abnormal samples tested at the rate of one sample per column per run for 20 different runs over a 5-day period. All the columns were from a single lot. The coefficients of variation ranged from 9.2 to 14.3 percent for the normal samples and from 4.2 to 6.7 percent for the abnormal samples. A clinical laboratory study of run-to-run reproducibility consisted of 4 normal samples and 7 samples from insulin-dependent diabetic patients run at the rate of one sample per column per run for 20 runs over a 5-day period. The coefficients of variation ranged from 5.7 to 8.6 percent for the normal samples and 4.6 to 9.2 percent for the abnormal samples.

A Helena study of lot-to-lot variability consisted of 10 normal samples and 10 samples from insulin-dependent diabetic patients. Each sample was tested with one column from each of five lots. The coefficients of variation ranged from 2.2 to 12.3 percent for the normal samples and from 1.8 to 8.6 percent for the samples from the diabetic patients.

The specificity of the methodology was evaluated by comparing values achieved with the Helena Quik column to those achieved with individual large columns prepared according to the method described by Trivelli, Ranney, and Lai, in "Hemoglobin Components in Patients With Diabetes Mellitus," New England Journal of Medicine, 284(7):353, 1971. The data showed correlation between the values obtained by the two methodologies.

The sensitivity of the methodology was established in a study in which varying amounts of hemoglobin A_{1c} were tested using Helena Quik columns. The results were linear over the range 1.68 to 31.8 percent, the observed range for glycosylated hemoglobin.

The effects of possible interference factors such as anticoagulants, other hemoglobin types, and sample age were also evaluated. Studies indicated that collection of blood in the presence of the anticoagulant EDTA (ethylenediaminotetraacetate) or in potassium oxalate sodium fluoride tubes produced no significant difference in the values obtained. Studies also indicated that abnormal amounts of hemoglobin F cause erroneous results for determination of glycosylated hemoglobins. Samples of blood held at 5° C for 1 to 5 days gave the same values as freshly collected blood.

Studies of the stability of the final reaction material indicated that the final reactants were stable for 24 hours.

Risks to Health

The Panel noted that the device is of substantial importance in preventing impairment of human health. There is a risk that inaccurate results obtained by the use of the device may lead to misdiagnosis or the improper classification of diabetes. Inaccurate results may occur because of lack of accuracy and precision of the device, the interference of substances such as hemoglobin F, or failure to prepare the column properly or control the conditions of use. Inappropriate insulin dosage given to a diabetic patient on the basis of inaccurate results could lead to hypoglycemia or hyperglycemia.

Additional Findings

The Panel recommended that the device be classified into class II and that a standard be developed directed toward components of the kit such as the pH and characterization of the column resin and the pH of the elution buffers. The Panel recommended that development of this standard be a medium priority. Priority was established in accordance with the relative medical significance of this device in relation to other devices.

The Panel noted that the following warnings and precautions should be specified in the product labeling:

1. The use of this test should be restricted to qualified laboratory personnel.

2. A known normal hemoglobin control should be run with every batch of patient samples.

3. Erroneous high test values can occur for nondiabetic conditions in the presence of increased levels of hemoglobin F.

4. Test results may be affected by variations in the age of the patient's red blood cells.

The petition is on file in the office of the hearing clerk, address noted above.

Dated: September 20, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[4110-03]

[Docket No. 76G-0095]

MODIFIED COTTONSEED PRODUCTS INTENDED FOR HUMAN CONSUMPTION

Response to Objections

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice responds to objections raised to a regulation permitting the use of roasted or cooked glandless cottonseed kernels in baked goods, candy, and as a snack food. After a comprehensive review of the data submitted in support of the objections, the Commissioner of Food and Drugs concludes that no action is warranted to amend or rescind the regulation.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of May 14, 1976 (41 FR 19933), a regulation was published which amended 21 CFR 121.1019 (21 CFR 172.894 after recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)) to permit the use of roasted or cooked glandless cottonseed kernels in baked goods, candy, and as a snack food. The modified cottonseed products listed in § 172.894(a)(1) and (2) have been used for human food for a number of years. There glanded cottonseed products are derived from decorticated, partially defatted, cooked, ground cottonseed kernels, or from decorticated, ground cottonseed kernels extracted with *n*-hexane and have been permitted for human food use as refined cottonseed flour. The extracted refined oil from glanded cottonseeds has also been commonly used as an edible vegetable oil. Because glanded cottonseeds contain the toxic constituent gossypol, the whole kernel of the glanded cottonseed has not previously been used as food in the human diet. However, the recent genetic development of glandless cottonseed varieties containing significantly less pigment and gossypol than previously attainable has resulted in the production of glandless cottonseed that may be used directly for human food. The regulation of May 14, 1976 prescribed safe conditions of use for human consumption of roasted or cooked glandless cottonseeds.

Two objections to this regulation were received. These objections were not accompanied by requests for a hearing or for a stay of the regulation. The objections as well as the Commissioner's responses to them are summarized below.

1. The National Cottonseed Products Association, Inc., objected to both paragraph (d) of the regulation (21 CFR 172.894(d)) and to that portion of the preamble (see 41 FR 19934) that discussed pesticide tolerance requirements for glandless cottonseed. The Association contended that the determination by FDA and the Environmental Protection Agency (EPA) that glandless cottonseed kernels are different from glanded cottonseed and therefore require different pesticide restrictions would adversely affect the production of glandless cottonseed. It was argued that glandless cottonseed for direct human consumption as roasted or baked kernels represents only a small fraction of the glandless cottonseed that is produced, and that this limited direct food use does not justify the costs of re-registering and relabeling pesticides used on the entire commodity. The association stated that it would not object to the regulation if the pesticide restrictions applied only to glandless cottonseed intended for direct human consumption and not to those grown for other uses.

The Commissioner appreciates the concern stated in this objection regarding costs of re-registering and relabeling cottonseed pesticides which are used on the glandless commodity. It is noteworthy, however, that FDA and EPA have shared concern only over the presence of possible unsafe pesticide residues on the glandless commodity grown solely for direct human consumption. Any pesticide registered for use on conventional glanded cotton strains may be used on plantings of the glandless variety which are used solely for fiber and oil processing. On the other hand, only those pesticides specifically cleared on a case-by-case basis by the Registration Division, Office of Pesticides Programs, Environmental Protection Agency, 410 M Street SW., Washington D.C. 20460, may be used on glandless cottonseed grown for direct human consumption. In this regard, EPA has reevaluated the original residue data and toxicology on methyl parathion, trifluralin, Prowl [*n*-(1-ethylpropyl)-3,4-dimethyl-2-6 dinitrobenzenamine], and fluometuron (see 40 CFR Part 180 for tolerances) and has concluded that these four pesticides can be used in accordance with current registered use patterns without hazard to consumers of glandless cottonseed kernels intended for direct human consumption. The basis for selection of these four chemicals was information from the petitioner that adequate pest control could be achieved with these products in the limited areas where the glandless variety is grown for direct food use.

2. The second objection expressed concern that levels of cyclopropenoid fatty acids (CPFA) which may occur naturally in whole glandless cottonseed have not been considered.

The Commissioner was aware of the toxic potential of CPFA when reviewing this petition. Furthermore, analytical data demonstrating the levels of CPFA in whole raw and cooked glandless cottonseed kernels were received and evaluated at that time. Representative data submitted by the petitioner indicated that whole raw glandless cottonseed kernels contained, on the average, 0.36 percent CPFA in the extracted oil. This value decreased, on the average, to 0.13 percent CPFA upon roasting. Reports in the literature reveal that these levels in the raw kernels are approximately the same as levels of CPFA in edible cottonseed oil (0.2 to 0.45 percent). Because roasting significantly reduces the CPFA content of whole glandless cottonseed kernels, the increased intake of CPFA due to the use of the roasted or cooked commodity will be small in comparison to present intakes obtained from consumption of edible cottonseed oil. Therefore, the Commissioner concludes that the restricted uses of glandless cottonseed kernels permitted by the present regulation will not result in the introduction of deleterious quantities of CPFA into the human diet.

3. The second objection contained data reporting that the cyclopropenoid fatty acids, which occur naturally in cottonseed and other seed oils, produce liver cancer in rainbow trout when fed with and without aflatoxin B_1 and M_1. A similar increased incidence was also reported in rats fed both CPFA and aflatoxin B_1.

The Commissioner has reviewed the suitability of trout feeding studies in assessing the safety of glandless cottonseed kernels and has concluded that such tests are not appropriate for the evaluation of food additives for human consumption. The trout is a cold-blooded animal and has many features in its metabolism and physiology that differ significantly from mammalian species. It is, therefore, not unusual that test chemicals administered to fish would elicit a response different from that observed in mammals. Fish are known to be quite sensitive to some test chemicals, and a positive response in this species does not provide definitive evidence that a particular chemical is unsafe for man. The study cited by this objection as evidence for the cocarcinogenicity of CPFA in rats (Nixon et al., *Journal of the National Cancer Institute*, 53: 453, 1974) indicated that a diet of 10 percent cottonseed oil (containing 0.35 percent CPFA) and 0.04 percent *Sterculia foetida* oil (containing 50 percent CPFA) failed to induce hepatomas when fed to the Fischer and Wistar strains of rats. Furthermore, the authors concluded that, although a small increase in tumor incidence was observed, a statistically significant cocarcinogenic effect of CPFA could not be found from these studies. In summary, the positive response obtained from studies of CPFA conducted with rainbow trout could not be substantiated in feeding studies utilizing two strains of rats. The rat, a mammalian species, is the animal of choice (as opposed to the fish) for toxicological testing of CPFA to obtain data concerning the safety of glandless cottonseed kernels for human consumption. Therefore, the Commissioner concludes that this objection contains insufficient justification for rescinding this regulation.

4. As further evidence of the potential toxicity of CPFA in man, the second objection cited a 5-week feeding study on rabbits which resulted in the development of atherosclerotic plaques and elevated serum cholesterol levels.

The Commissioner has thoroughly reviewed the metabolic response of the rabbit to CPFA. The rabbit is not a useful animal species for the testing of hypercholesterolemic and atherosclerotic potential in man. The rabbit differs significantly from the human in lipid metabolism and is particularly susceptible to hypercholesterolemia because of its unusual metabolism. Such responses can be obtained in the rabbit with many common food lipids, and this animal often has been used in experiments for screening cholesterolemia because a positive response is almost assured. The rabbit, therefore, is not an appropriate species to utilize in investigating the safety of a lipid for human consumption. A more complete discussion on this subject may be found in publications in the scientific literature by (1) Lee, K. T., J. Karmolych, D. N. Kim, C. Grant, J. A. Krasney, and W. A. Thomas, *Journal of Experimental and Molecular Pathology*, 15: 170-190, 1971; (2) Wissler, R. W. and W. D. Vesselinovitch, *Annals of the New York Academy of Sciences*, 149: Article 2, p. 107, 1968; and (3) Fuller, G., E. Miller, T. M. Farber, and E. Van Loon, *Journal of Connective Tissue Research*, 1: 217-220, 1972. The Commissioner concludes from the above information that no role has been established for CPFA as a potential cause of atherosclerotic plaques and elevated serum cholesterol in humans. Therefore, this issue of the second objection raises no valid questions of human safety resulting from food use of glandless cottonseed.

5. Finally, the second objection cited reported studies in which CPFA produced toxic manifestations in rats including retardation in growth, increased liver size, alteration in tissue lipids, and impaired reproduction.

The Commissioner's review of the literature on these issues shows that the referenced studies used *S. foetida* seed oil containing approximately 30 to 50 percent CPFA at dietary levels ranging from 1 to 3 percent. Consequently, the test animals received a level of CPFA exposure many times greater than that expected from pres-

ent use levels of cooked or roasted glandless cottonseed.

In final reference to these issues, the

Limits was previously updated according to an inflation factor for total hospital inpatient costs, computed by the SSA Actuary. However, recent evi-

One comment stated that it was unreasonable to arrive at the 11.5-percent inflation factor by projecting a further decline in the ratio of per

ent use levels of cooked or roasted glandless cottonseed.

In final reference to these issues, the Commissioner has already discussed with the petitioner the desirability of obtaining data that could be used in establishing a "no-effect" level for CPFA in animals. The petitioner was requested to complete such studies in rats before any additional uses, besides the limited ones permitted in the present regulation, could be considered. The studies, utilizing test group exposure of up to 20 percent roasted glandless cottonseed, have been completed. However, 6 percent cottonseed oil was added to the usual feed of the control group. As a result, the control group could not be cited as having true "zero exposure." Although this makes the validity of the studies questionable for the purpose of establishing an accurate "no-effect" level for acute and reproductive effects, it is pertinent that no obvious toxic effects were observed in either the test or the control groups. Therefore, on the basis of the studies currently available and in light of existing use levels, the Commissioner is convinced that the present regulated use of roasted or cooked glandless cottonseed kernels in baked goods, candy, and as a snack food is safe.

In view of all of these facts, the Commissioner concludes that no action should be taken to amend or rescind the regulation. However, notice is given that any petitions proposing expanded uses of glandless cottonseed for human consumption will require additional studies supporting safety commensurate with the levels of usage requested.

Dated: September 18, 1978.

JOSEPH P. HILE,
Associate Commissioner for Regulatory Affairs.

[Docket No. 76P-0364]

TEXAS CITRUS EXCHANGE

Tomato Juice Deviating from Identity Standard; Extension of a Temporary Permit for Market Testing

AGENCY: Food and Drug Administration

ACTION: Notice.

SUMMARY: This document announces the extension of a temporary permit issued to the Texas Citrus Exchange to market test tomato juice from concentrate prepared from concentrated tomato liquid and water. The finished product deviates from the standard of identity for tomato juice.

DATES: This extension is effective on September 26, 1978, and shall terminate either on the effective date of an affirmative order ruling on the Food and Drug Administration's proposal to amend the identity standard for tomato juice or 30 days after a negative order ruling on the proposal, whichever the case may be.

FOR FURTHER INFORMATION CONTACT:

F. Leo Kauffman, Bureau of Foods (HFF-414), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-245-1164.

SUPPLEMENTARY INFORMATION: The original permit was issued to the Texas Citrus Exchange under § 130.17 (21 CFR 130.17) concerning temporary permits to facilitate market testing of foods deviating from the requirements of the standards of identity promulgated under section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341). Notice of the issuance of the permit was published in the FEDERAL REGISTER of December 7, 1976 (41 FR 53545). The permit covered limited interstate marketing tests of tomato juice from concentrate that deviates from the standard of identity prescribed for tomato juice under § 156.145 (21 CFR 156.145); the test product is prepared by adding water to concentrated tomato liquid complying with the tomato puree requirements of § 155.191(a)(1) (21 CFR 155.191 (a)(1)). The finished product is to be equivalent to a single-strength tomato juice normally found in the marketplace. All ingredients are to be declared on the label by their commmon or usual name.

The Texas Citrus Exchange has submitted a request that its temporary permit be extended during the pendency of the administrative proceedings for the proposed amendment of the standared of identity for tomato juice published in the FEDERAL REGISTER of May 9, 1978 (43 FR 19864). The proposed amendment would, among other things: (1) Permit the use of concentrated tomato juice to prepare a single-strength tomato juice product; (2) require the name "tomato juice from concentrate" when concentrated tomato juice is used in the preparation of the canned juice; (3) establish in the identity standards a minimum tomato soluble solids requirement of 5.5 percent, by weight, for the product made from concentrate; (4) require label declaration of all optional ingredients.

The Commissioner of Food and Drugs concludes that it will be in the interest of consumers to extend the time period of the temporary permit and to permit further market testing of the product, 4,200 cases of forty-eight 6-ounce cans of tomato juice from concentrate per month, as requested. Under § 130.17, all interested persons may participate in the market test under the conditions that apply to the Texas Citrus Exchange, including the labeling requirements and the amounts to be distributed.

Any interested person who elects to participate in the extended market test shall notify the Commissioner in writing of that fact, the amount to be distributed, and the area of distribution, and shall submit the labeling under which the food will be distributed.

This permit extension, as issued to the Texas Citrus Exchange and such others who participate in accordance with the provisions set out above, is effective on September 26, 1978, and expires either on the effective date of an affirmative order ruling on the Food and Drug Administration's proposal of May 9, 1978, or 30 days after a negative order ruling on the proposal, whichever the case may be.

Dated: September 18, 1978.

JOSEPH P. HILE,
Associate Commissioner Regulatory Affairs.

MEDICARE PROGRAM

Schedule of Limits on Hospital Costs for Cost Reporting Periods Beginning on or After October 1, 1978

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Final notice of schedule of limits on hospital inpatient general routine service costs.

SUMMARY: This notice sets forth a schedule of limits on hospital inpatient general routine service costs that may be reimbursed under Medicare for cost reporting periods beginning on or after October 1, 1978.

This revised schedule replaces the schedule published in the FEDERAL REGISTER on October 3, 1977 (42 FR 53675). It covers total inpatient general routine service costs, and applies to the entire cost reporting period of a hospital whose cost reporting period begins on or after October 1, 1978.

It does not apply to the cost of special care units or ancillary services. These limits will be revised to conform with any cost containment legislation enacted after the effective date of the schedule.

EFFECTIVE DATE: October 1, 1978.

FOR FURTHER INFORMATION, CONTACT:

Bill Goeller, Branch Chief, Provider Reimbursement Policy Branch, Division of Provider Reimbursement and Accounting Policy, Medicare Bureau, Health Care Financing Administration, U.S. Department of Health, Education, and Welfare, Room 405, East Highrise Building, 6401 Security Boulevard, Baltimore, Md. 21235, 301-594-9820.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 1861(v)(1) of the Social Security Act (42 U.S.C. 1395x(v)(1)) authorizes the Secretary to set propsective limits on the costs that are reimbursed under Medicare (Regulation § 405.460). Such limits may be applied to the direct or indirect overall costs or to costs incurred for specific items or services furnished by a Medicare provider, and may be based on estimates of the cost necessary in the efficient delivery of needed health services. Under this authority, limits on hospital inpatient general routine service costs have been published annually since 1974. The schedule of limits set forth below was published for public comment in the FEDERAL REGISTER on June 15, 1978 (43 FR 25869). It includes several changes from previous practice.

SUMMARY OF CHANGES

The new schedule of limits provides for:

1. An inflation factor based on actual program experience for hospital inpatient general routine service costs rather than an inflation factor based on total hospital inpatient costs which was used in previous schedules.

2. As explained in the proposed notice of June 15, 1978 (43 FR 25873) an additional 1-year grace period for those hospitals that received the 1-year grace period for reclassified hospitals in their cost reporting period beginning on or after July 1, 1977, but before July 1, 1978.

3. A revised schedule of dollar limits, by geographic area and hospital size.

DISCUSSION OF MAJOR COMMENTS

Approximately 70 comments were received in response to the June 15th notice, from representatives of national, State and individual provider organizations. All of the comments or inquiries have been reviewed, evaluated and, to the extent noted below, incorporated in the development of the revised Schedule of Limits.

The most significant comments and our responses are summarized below:

1. Use of the Inflation Factor Based on Actual Program Experience for Hospital Inpatient General Routine Service Costs—As explained in the proposed notice, the Schedule of Limits was previously updated according to an inflation factor for total hospital inpatient costs, computed by the SSA Actuary. However, recent evidence demonstrates that the actual inflation rate for per diem inpatient general routine service costs is considerably lower than that for per diem total hospital inpatient costs. Since the schedule of limits only applies to general inpatient routine service costs we no longer believe it appropriate to use a projected inflation rate for per diem total hospital inpatient costs in developing the schedule.

Several commenters questioned our use of an inflation factor based on the growth of per diem inpatient routine service costs in the period 1974-1976, contending that these costs may have grown at an uncharacteristically slow pace during that period. In our view, there is no evidence to support this contention. As discussed in the proposed notice, if anything, it appears likely that there has been a further decline in the rate at which these costs have risen. For example, our data show that the portion of gross interim rates attributable to routine service costs rose by only 10.3 from August, 1976 to August, 1977. Moreover, the 11.5 percent figure is given further credence by the fact that an 11.6 percent increase is projected for per diem hospital payroll costs for 1978 and 1979 (See 1978 Annual Report of the Board of Trustees of the Federal Hospital Insurance Trust Fund); it is generally acknowledged that payroll costs are the major component of routine service costs.

We have an important responsibility under the act to assure that Medicare reimbursement for services rendered to beneficiaries is not excessive. In light of the evidence we now have that the inflation rate for per diem inpatient routine service costs has been much lower than for per diem total inpatient hospital costs, we would not be meeting this responsibility if we continued to use an inflation factor projected for per diem total inpatient hospital costs in developing the schedule of limits for per diem inpatient routine service costs. Accordingly, we have shifted to an inflation factor based on actual experience for inpatient routine service costs in developing this schedule.

Commenters also criticized our use of the 1974-1976 data on the grounds that those data are now outdated. While we do not dispute the desirability of using current data, we had to rely on the most recent data available in making our projections. Congress expressly recognized that the Department may have to rely on cost reports for much earlier accounting periods in establishing limits. See S. Rep. No. 92-1230, 92d Cong., 2d Sess. 189 (1972).

One comment stated that it was unreasonable to arrive at the 11.5-percent inflation factor by projecting a further decline in the ratio of per diem inpatient routine service costs to per diem total inpatient hospital costs. This comment was based on a misreading of our proposed notice. As explained there, we did not project a continuing decline in this ratio to reach the 11.5-percent figure. Had we projected such a continuing decline, the result would have been an inflation factor of 10 percent, rather than 11.5 percent. However, we were unwilling to make such a projection based on data from only a 3-year period.

Several commenters noted that the limit set in this schedule do not equal an 11.5-percent increase over the limits set for cost reporting periods beginning on or after October 1, 1977. The reason for this is that the inflation factor is applied not to the limits in the previous schedule, but to an adjusted figure based on inpatient routine service costs as of a particular date of data collection. Because there appears to be considerable misunderstanding on this point, we will briefly review the methodology used to reach the limits in this schedule.

The methodology for calculating the limits is set forth at section I below. The first step under this methodology is data collection from the intermediaries. For purposes of developing this schedule, the relevant date of data collection was August 1; 1977. We requested the intermediaries to provide certain data for all general acute short-term hospitals participating in medicare, from which we were able to tabulate two figures: First, the per diem inpatient routine service cost from the most recently filed cost report and second, the portion of each such hospital's gross interim rate (as of August 1, 1977) that was attributable to inpatient routine service costs.

The following example illustrates how we made the computations from the data supplied by the intermediaries. Data for the first four factors listed below were obtained from each hospital's most recently filed cost report.

ASSUMPTIONS FOR HOSPITAL A

1. Part A inpatient days—general routine services, 10,000.
2. Part A inpatient days—special care units, 2,000.
3. Total part A inpatient general routine service costs, $1,200,000.
4. Total part A inpatient service costs, $2,400,000.
5. Gross interim rate for part A inpatient costs as of August 1, 1977, $250.

COMPUTATIONS

A. Per diem inpatient routine service costs based on most recently filed cost report:

1,200,000/10,000=$120

B. Portion of gross interim rate (as of August 1, 1977) attributable to per diem in-

capita income as an indicator of economic environment. Specific comments about per capita income are dis-

requested that the per capita income data used in the classification criterion be published in the FEDERAL REGISTER

from the cost limits applicable to its classification grouping because of the provision of atypical costs and its bud-

group in which it was classified in the second preceding cost reporting period.

example A under section II in determining the applicable limit.

Hospitals that are not located in

V 43/187 SEP 26 78 V 4

1,200,000/10,000=$120

B. Portion of gross interim rate (as of August 1, 1977) attributable to per diem inpatient routine service costs:

1. Per diem total inpatient hospital cost:

2,400,00/12,000=$200

2. Ratio of per diem inpatient routine service costs to per diem total inpatient hospital costs:

$120/$200=60 percent

3. 60 percent × $250=$150.

The second step in calculating the limits is to array the per diem inpatient routine services costs for all hospitals in a particular classification in descending order. In arraying the inpatient routine service cost for a particular hospital, we chose the higher of the inpatient routine service cost calculated from the August 1, 1977, gross interim rate or of the inpatient routine service cost obtained from the most recently filed cost report. Thus, in arraying the inpatient routine service cost for hospital A in the example above, we would have used the $150 interim rate figure, rather than the $120 cost report figure.

Steps 3 and 4 of the methodology (the selection of the 80th percentile and the addition of 10 percent of the median) are followed to arrive at the base limit for a particular classification of hospitals. The inflation factor is then applied to this base figure (step 5). The updating for the present schedule was done for a 20-month period—August 1, 1977 (the date of data collection) to April 1, 1979 (the midpoint of a cost accounting year beginning October 1, 1978). Accordingly, a 19.9-percent inflation factor was applied, which is the equivalent on a 20-month basis to 11.5 percent on a 12-month basis. As discussed in section V below, additional updating for inflation is done for hospitals whose cost reporting periods begin after October 1, 1978.

Several commenters recommended that we base the cost limits solely on cost report data, without taking into consideration interim rates. The problem with this suggestion is the necessary lag in obtaining cost report information. For instance, as of the date of our data collection (August 1, 1977), many of the most recently filed cost reports were for cost reporting periods that ended in calender year 1976 and thus did not reflect increases in cost that had occurred after that time. We believe that the use of the higher routine per diem interim rate in formulating the arrays makes allowance for these cost increases and, therefore, is more equitable to the providers.

2. Adequacy of the classification system—As in previous years some comments were critical of the classification system. A number of respondents questioned the validity of per capita income as an indicator of economic environment. Specific comments about per capita income are discussed below but, as a general thought, it is important to state that per capita income was used in the classification system because it is uniformly available for all parts of the country and is heavily influenced by area wage levels. However, we do believe the per capita income classifier is a matter of legitimate concern. We have examined alternative variables in the past and have found the potential alternatives to be extremely limited and not acceptable for use in the system. Nevertheless, we continue to be concerned about the matter and have placed a very high priority on examining alternative indicators of economic environment. However, given the data that are presently available, we continue to believe that per capita income remains the most reliable basis for classification.

Many comments indicated that the use of per capita income does not recognize the higher salary cost incurred in certain parts of the country. The Health Care Financing Administration's regulations (42 CFR § 405.460(f)) provide for exceptions to the limits under certain criteria; pursuant to that regulation, we will consider exceptions based on reasonable and necessary wage costs. However, for such an exception to be granted, it will be necessary for a hospital to show that its wages are higher than the wages paid by other hospitals in its group and that such a higher wage level is necessary because of extraordinary circumstances it cannot control and not, for example, because of staffing levels which exceed reasonable norms.

The comments frequently expressed the opinion that the classification system does not use a sufficient number of variables to achieve comparability among the hospitals in each group. Those commenting faulted the classification system for failing to include such variables as length of stay, case mix and scope of service. The Department has analyzed these variables in the past and concluded that their inclusion in a classification system is not feasible at this time. The commenters did not provide any evidence that would change this conclusion.

3. Source of per capita income data—Comments were received concerning the source of per capita income data used to group SMSA/SCSA's and non-SMSA/SCSA's and the use of 1975 data. The data utilized are from Local Area Personnel Income 1970-75, August 1977, Volume 1, Summary, published by the U.S. Department of Commerce, Bureau of Economic Analysis. These were the latest per capita income data available at the time of our data collection. Many comments requested that the per capita income data used in the classification criterion be published in the FEDERAL REGISTER so that providers would have access to this information. The ranges of per capita income used in the classification system are published in the final notice of the schedule of limits.

4. Teaching activity—A major comment concerned the classification of medium-sized major teaching hospitals. The commenter stated that the 101-404 bed-size category would be made up of predominantly community hospitals with limited teaching programs and the limits for this bed-size category would not adequately reflect the costs of extensive teaching programs. Although the classification system does not contain a variable for educational activities, an exception to the cost limits is available for hospitals whose costs of educational activities exceed the norm for the group in which they are classified.

5. Depreciation and interest cost of new construction—Many comments criticized the current classification system because it does not recognize the higher depreciation and interest cost associated with the construction of new facilities. Although the classification system does not separately take account of costs associated with new construction, exceptions to the limits may be granted for extraordinary depreciation, interest, insurance, or taxes incurred on newly constructed (or remodeled) facilities under certain circumstances. If the provider believes an exception to the limits is warranted for these reasons, it should file such a request with its fiscal intermediary.

6. Exceptions process—Some comments criticized the lack of general instructions disclosing the methodology to be used to determine whether an exception will be granted.

We agree that more general instructions concerning the filing of exception requests should be issued. We are presently in the process of updating the provider reimbursement manual to provide instructions to all providers concerning the filing of exception requests and the methodologies used in the exception procedures. However, intermediaries have available extensive material on methodologies and, until the revision to the provider reimbursement manual is issued, we suggest that any hospital requiring assistance in the filing of an exception should contact its servicing intermediary for guidance.

Another comment requested that procedures be adopted that would allow hospitals to determine prospectively whether budgeted costs in excess of published limits would qualify for an exception. Those procedures are available now. If a provider believes it is entitled to an exception

from the cost limits applicable to its classification grouping because of the provision of atypical costs and its budgeted costs are in excess of the established cost limit, then the provider should request an exception through its intermediary.

7. Further background—For further discussion of the schedule, and a discussion of prior comments received on it, see: FEDERAL REGISTER (42 FR 53675) published October 3, 1977, the FEDERAL REGISTER (41 FR 26992) published June 30, 1976, the FEDERAL REGISTER (40 FR 23622) published May 30, 1975, and the FEDERAL REGISTER (39 FR 20168) published June 6, 1974.

EFFECTIVE DATE

We find that there is good cause for making this schedule effective October 1, 1978. Many hospitals have cost reporting periods beginning on that date. It is in the public interest that these hospitals should be subject to the limits in this schedule since these limits are based on more current data than the limits published in the previous schedule.

SCHEDULE AND METHODOLOGY

I. *Methodology for calculating limits.* The limits were developed in the following manner:

1. Inpatient general routine service cost data for each participating hospital were obtained from the fiscal intermediaries.

2. The data for hospitals in each class were arrayed in descending order of inpatient general routine service cost.

3. The 80th percentile and the median were computed for each class.

4. For each class, an amount equal to 10 percent of the median was added to the 80th percentile amount.

5. This sum was adjusted to reflect that 11.5-percent annual rate of estimated cost increases in per diem inpatient general routine service costs following the date of data collection.

6. The amounts calculated in step 5 are rounded to the next highest dollar which establishes the limit for each class, subject to adjustment for hospitals whose reporting period begins after October 1, 1978.

II. *Extension of grace period for reclassified hospitals.* We have extended the grace period for an additional year for those hospitals that received the grace period for cost reporting years beginning on or after July 1, 1977 but before July 1, 1978. We reflect this extension in this schedule of limits by making a hospital subject to the highest of (a) the current limit of the group in which it is currently classified; or (b) the current limit of the group in which it was classified in the immediately preceding cost reporting period; or (c) the current limit of the group in which it was classified in the second preceding cost reporting period.

The following examples illustrate how this would work.

Example A. Hospital A's cost reporting period begins on October 1. On October 1, 1976 and again on October 1, 1977, it was classified in Group II. On October 1, 1978, it was classified in Group III. For its cost reporting year beginning October 1, 1978, it will be subject to the higher of the current Group II or the current Group III limit.

Example B. Hospital B's cost reporting period begins on October 1. On October 1, 1976, it was classified in Group I; on October 1, 1977, it was classified in Group II; and on October 1, 1978, it was classified in Group III. For its cost reporting period beginning October 1, 1978, it will be subject to the highest of the current Group I or the current Group II or the current Group III limits.

This does not constitute a permanent 2 year grace period for reclassified hospitals. We are providing this 1 year extension on an interim basis pending further review of the problem and consideration of other alternatives.

III. *Classification of geographical areas.* The Standard Metropolitan Statistical Area/Standard Consolidated Statistical Area (SMSA/SCSA) groupings were developed by:

1. Arraying the SMSA/SCSAs by size of per capita income; and

2. Combining those with similar economic environment as reflected in per capita income.

The same procedure was followed for grouping the non-SMSA/SCSA areas to arrive at State groups. There are five groups for each of these two categories. Counties, rather than SMSA/SCSA areas, are listed for New England States in the first category.

Hospitals located within SMSA/SCSA areas identified by figure (1) are reclassified in this schedule and will receive the 1-year grace period for reclassified hospitals. They will follow example A under section II in determining the applicable limit.

Hospitals located within SMSA/SCSA areas identified by figure (2) have a classification in this schedule different from their classification for the schedule of limits for cost reporting periods beginning on or after July 1, 1976 (published on June 30, 1976 at 41 FR 26992). They will follow example B under section II in determining the applicable limit.

Hospitals that are not located in SMSA/SCSA areas but that are located in States identified by a figure (3) are reclassified in this schedule and will receive the 1-year grace period for reclassified hospitals. They will follow example A under section II in determining the applicable limit.

Hospitals that are not located in SMSA/SCSA areas but that are located in States identified by a figure (4) have a classification in this schedule different from their classification for the schedule of limits for cost reporting periods beginning on or after July 1, 1976. They will follow example B under section II in determining the applicable limit.

IV. *Classification by bed size.* The following bed-size categories are used to classify hospitals:

STANDARD METROPOLITAN STATISTICAL AREAS

GROUPS I AND II

Less than 100, 100-404, 405-684, 685 and above.

GROUPS III, IV, AND V

Less than 100, 100-404, 405 and above.

NONSTANDARD METROPOLITAN STATISTICAL AREAS

Less than 100, 100-169, 170 and above.

V. *Schedule of limits.* The schedule of limits set forth below is applicable to 12-month cost reporting periods. Intermediaries for providers with shorter (or longer) cost-reporting periods must contact the Health Care Financing Administration for adjustement factors.

The limits are applicable to any hospital with a cost reporting period beginning on or after October 1, 1978. For a hospital that has a cost reporting period beginning after October 1, 1978, the published limit will be adjusted upward by a factor of 0.96 percent for each elapsed month between October 1, 1978, and the month in which the hospital's reporting period begins. The result of this calculation is not rounded and is to be given in dollars and cents.

Example. Hospital A's cost reporting period begins January 1, 1979, and ends December 31, 1979. Assume that the published cost limit for hospital A's group is $100.

Computation of adjusted cost limit

Published cost limit	$100.00
Plus: Adjustment for 3-mo period (Oct. 1, 1978, to Dec. 31, 1978), 3 mo×0.96=2.88 pct; 2.88 pct×cost limit.	2.88
Adjusted cost limit applicable to hospital A for the Jan. 1, 1979, to Dec. 31, 1979, reporting period	102.88

Limits for hospitals located within SMSA's by bed capacity

SMSA group	Less than 100	100 to 404	405 to 684	685 and above
I [1]	$157	$154	$172	$214
II	128	137	148	161
III	121	119	120	120
IV	113	113	111	111
V	101	101	126	126

[1] Limits apply to all SMSA's except Anchorage, Alaska, and Honolulu, Hawaii, where cost-of-living adjustment (25 percent Anchorage, Alaska; 17.5 percent Honolulu, Hawaii) was made. The limits for these areas are as follows:

	Less than 100	100 to 404	405 to 684	685 and above

Summary. A bioassay of technical-grade 1,2-dichloroethane for possible

[4110-92]

delivery capabilities in the applicant State.

APPLICATION SUBMISSION

One signed original and two copies of the grant application, including all

3. The project is designed to demonstrate innovative techniques which result in measurable progress toward

	Less than 100	100 to 404	405 to 684	685 and above
Anchorage	$196	$192	$214	$268
Honolulu...	184	180	201	252

Limits for hospitals located outside SMSA's by bed capacity

State group	Less than 100	100–169	170 and above

[4110-08]

REPORT ON BIOASSAY OF 1,2-DICHLOROETHANE FOR POSSIBLE CARCINOGENICITY

Availability

1,2-Dichloroethane (CAS 107-06-2) has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Testing Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary. A bioassay of technical-grade 1,2-dichloroethane for possible carcinogenicity was conducted using Osborne-Mendel rats and B6C3F1 mice. 1,2-Dichloroethane in corn oil was administered by gavage, at either of two dosages, to groups of 50 male and 50 female animals of each species. The 78-week period of chemical administration was followed by an observation period of 32 weeks for the low dose rats of both sexes. The last high dose male rat died after 23 weeks of observation, and the last high dose female rat died after 15 weeks of observation. All treated groups of mice were observed for an additional 12 or 13 weeks following chemical administration.

Initial dosage levels for the chronic bioassay were selected on the basis of a preliminary subchronic toxicity test. Subsequent dosage adjustments were made during the course of the chronic bioassay. The time-weighted average high and low doses of 1,2-dichloroethane in the chronic study were 95 and 47 mg/kg/day, respectively, for rats of both sexes. The high and low time-weighted average doses for the male mice were 195 and 97 mg/kg/day, respectively, and 299 and 149 mg/kg/day, respectively, for the female mice.

For each species, 20 animals of each sex were placed on test as vehicle controls. These animals were gavaged with corn oil at the same times that dosed animals were gavaged with the 1,2-dichloroethane mixtures. Twenty animals of each sex were placed on test as untreated controls for each species. These animals were not intubated.

Under the conditions of this study, 1,2-dichloroethane was carcinogenic to Osborne-Mendel rats, causing squamous-cell carcinomas of the forestomach, hemangiosarcomas, and subcutaneous fibromas in male rats and causing mammary adenocarcinomas in female rats. This compound was also found to be carcinogenic to B6C3F1 mice, causing mammary adenocarcinomas and endometrial tumors in female mice, and causing alveolar/bronchiolar adenomas in mice of both sexes.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014.

Office of Human Development Services

[Program Announcement No. 13608-791]

STATE CAPACITY BUILDING DEMONSTRATION PROGRAM

Availability of Grant Funds

AGENCY: Office of Human Development Services, HEW.

SUBJECT: Announcement of Availability of Grant Funds for the State Capacity Building Demonstration Program.

SUMMARY: The Administration for Children, Youth, and Families (ACYF) announces that applications are being accepted for grants under section 426 of the Social Security Act for Research and Demonstration Projects. Regulations governing this program published in the Code of Federal Regulations in 42 CFR Part 205.

DATES: The closing date for receipt of applications is November 15, 1978.

PROGRAM PURPOSE

The purpose of the State Capacity Building Demonstration Program is to demonstrate innovative methods and techniques for coordinating the delivery of services to children and their families at the State and local levels.

PROGRAM GOAL AND OBJECTIVES

The goal of the State Capacity Building Demonstration Program is to assist States in their efforts to plan, manage, and deliver services to children and their families in a coordinated manner. The grants are aimed at developing capabilities at the State and local levels to assess children's needs, plan programs, coordinate and allocate resources, monitor and evaluate programs, regulate and enforce requirements related to children's programs, develop outreach to consumers and consumer groups, and provide technical assistance to personnel and organizations involved in administering programs for children and their families. They are primarily designed to help States which have demonstrated their ability and interest in improving the overall quality of their management planning and service delivery systems for children and their families. The grants to be awarded generally will build upon existing statewide efforts rather than initiate new capacity building efforts. The grants, which are to be used to complement and supplement existing efforts, will stress the need for continuity of development efforts in applicant States and for engaging in activities demonstrating innovative techniques which result in measurable progess toward improving management planning and service delivery capabilities in the applicant State.

ELIGIBLE APPLICANTS

State Capacity Building Demonstration grants are made available to one State in each Federal Region per year. Eligibility for this program is limited to public or other nonprofit institutions of higher learning and to public or other nonprofit agencies and organizations engaged in research or child welfare activities. Only one organization in each State may apply and the application should be coordinated through the Governor's office. Continuation funding will be provided to projects in five of the Federal Regions and States which received funding through this program in fiscal year 1976 or before may not reapply; therefore, only the following States shown by Federal Region will be eligible to compete for fiscal year 1979 funding under this program announcement.

Region I—Maine, New Hampshire, Vermont and Massachusetts.
Region III—Maryland, Pennsylvania, West Virginia and District of Columbia.
Region IV—South Carolina, Georgia, Florids, Tennessee, Kentucky, Mississippi and Alabama.
Region IX—Hawaii, Nevada and Trust Territories.
Region X—Washington, Idaho and Alaska.

AVAILABLE FUNDS

The Administration for Children, Youth, and Families expects to award one new grant of up to $70,000 in each of the five Federal Regions shown above for a total funding level during fiscal year 1979 of up to $350,000. The total grant period shall not exceed 3 years and subsequent year funding after the initial grant will be based on satisfactory completion of prior year grant goals and objectives.

GRANTEE SHARE OF THE PROJECT

Grantees are expected to provide a matching share of the cost of the proposed demonstration project. Each State project must supply a letter from the Governor indicating a commitment to support the effort after Federal funds are no longer available to support it.

THE APPLICATION PROCESS

AVAILABILITY OF FORMS

Application for a grant under the State capacity building program must be submitted on standard forms provided for this purpose. Application kits which include the forms and other information may be obtained from appropriate HEW Regional Offices listed in appendix A to this program announcement. Please request Program Announcement No. 13608-791.

APPLICATION SUBMISSION

One signed original and two copies of the grant application, including all attachments, must be submitted to the address indicated in the application instructions.

A-95 NOTIFICATION PROCESS

The State capacity building program is covered under the provisions of OMB Circular A-95. Applicants for grants must, prior to the submission of an application, notify the State A-95 clearinghouse of their intent to apply for Federal assistance for this program. Applicants should contact the appropriate State clearinghouse (listed in 42 FR 2210, January 10, 1977) for information on how they can meet the A-95 requirements.

APPLICATION CONSIDERATION

The acting heads of the children, youth, and family units in each of the five HEW regional offices listed above shall determine final action to be taken with respect to each grant application for this program. Applications which are complete and conform to the requirements of this program announcement are subject to a competitive review and evaluation by qualified persons independent of the Administration for Children, Youth, and Families.

The results of the review assist the acting heads in considering competing applications. The acting heads also take into account comments of the A-95 clearinghouses and regional office and headquarters staffs. Comments may also be requested from appropriate specialists and consultants both inside and outside of the Federal Government.

The successful applicant in each region is notifed through the issuance of a notice of grant awarded which sets forth the amount of funds granted, the terms and conditions of the grant, the budget period for which support is given and the total period for which project support is contemplated. Unsuccessful applicants are notified in writing of this decision.

CRITERIA FOR REVIEW AND EVALUATION OF APPLICATIONS

Competing grant applications will be reviewed and evaluated against the following criteria:

1. The project objectives are specifically designed to assist the applicant State in its efforts to plan, manage, and deliver services to children and their families in a coordinated manner—(15 points).

2. The project is clearly designed to complement and supplement existing State efforts and stresses the need for continuity of development efforts—(10 points).

3. The project is designed to demonstrate innovative techniques which result in measurable progress toward improving management planning and service delivery capabilities in the applicant State—(10 points).

4. The activities to be undertaken, if well executed, will achieve the project objectives and information developed will be disseminated as appropriate—(10 points).

5. The proposed project personnel are or will be well qualified and the applicant organization has or will have adequate facilities and resources—(20 points).

6. The estimated cost to the Government is reasonable considering the anticipated results—(10 points).

7. The applicant has obtained the commitment and support from the agencies, groups, organizations, and individuals within the State whose cooperation would be necessary to accomplish proposed project goals and objectives—(25 points).

CLOSING DATE FOR RECEIPT OF APPLICATIONS

The closing date for receipt of applications under this program announcement is November 15, 1978. Applications may be mailed or hand delivered. Hand delivered applications will be accepted during the regular working hours of the appropriate Regional Office. Mailed applications must be postmarked on or before November 15, 1978. Applications received after November 15, 1978, will not be accepted and such applicants will be notified accordingly.

Office of the Secretary

ADVISORY COUNCIL ON EDUCATION STATISTICS

Meeting

Notice is hereby given, pursuant to section 10, Pub. L. 92-463, that a meeting of the Advisory Council on Education Statistics will be held on October 26, 1978, from 9 a.m. to 4:30 p.m., in Room 3000, FOB No. 6, 400 Maryland Avenue SW., Washington, D.C. 20202. The meeting will be continued on October 27, 1978, from 9 a.m. to 4:30 p.m., at the same location.

The Advisory Council on Education Statistics is mandated by section 406(c) of the General Education Provisions Act as added by section 501(a) of the Education Amendments of 1974, Pub. L. 93-380 (20 U.S.C. 1221a-1(c)), to advise the Secretary of the Department of Health, Education, and Welfare and the Assistant Secretary for Education, and the National Center for Education Statistics (NCES); and "shall review general policies for the operation of the Center and shall be responsible for establishing standards to ensure that statistics and analyses disseminated by the Center are of high quality and are not subject to political influence."

The meeting agenda will include an Administrator's report summarizing recent developments regarding budget, staff, and major projects of the National Center for Education Statistics. Other major topics will include a discussion of the Center's program on statistical standards, the content of future agendas, and the Council's next annual report.

The meeting is open to the public; however, because of limited accommodations, those members of the public wishing to attend should make reservations by writing, no later than October 13, 1978, to:

Executive Director, Advisory Council on Education Statistics, Room 3153-E, FOB-6, 400 Maryland Avenue SW., Washington, D.C. 20202.

Records shall be kept of all Council proceedings and shall be available for public inspection in the Office of the Administrator, National Center for Education Statistics, located at 400 Maryland Avenue SW., Washington, D.C. 20202.

Signed at Washington, D.C., on September 20, 1978.

MARIE D. ELDRIDGE,
Administrator, National Center for Education Statistics.

DAVIE B. ORR,
Executive Director, Advisory Council on Education Statistics.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-78-894]

SPRAY APPLIED CELLULOSIC THERMAL INSULATION

Proposed Use of Materials Bulletin No. 80

AGENCY: Department of Housing and Urban Development, Office of Assistant Secretary for Housing—Federal Housing Commissioner.

ACTION: Notice.

SUMMARY: This notice makes available for public comment a proposed new HUD Use of Materials Bulletin No. 80 for the subject product under the technical suitability of products program, section 521 of the National Housing Act. Under this section the Secretary of HUD shall determine the technical suitability of materials and products to be used in structures approved for mortgages or loans insured under this Act. Since no Federal specification or other nationally recognized standard has to date been published for spray applied cellulosic thermal insulation, this proposed bulletin responds to that need.

DATE: Comments must be received by October 26, 1978.

ADDRESS: Comments should be addressed to the Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410. Copies of any comments received will be available for examination during business hours at this address.

FOR FURTHER INFORMATION CONTACT:

Donald K. Baxter, Chief, Architecture and Engineering Division, Office of Technical Support, Department of Housing and Urban Development, Washington, D.C. 20410, telephone 202-755-5929.

SUPPLEMENTARY INFORMATION: This proposed bulletin outlines the physical properties, test methods, limitations of use, guidelines for application and onsite quality control and labeling requirements for sprayed cellulosic insulations.

The current shortage of conventional insulating materials and the national need for conserving energy has placed a strain on production of conventional materials. Dry loose cellulosic insulation made of newsprint and other paper or paperboard scrap and waste has long been accepted by HUD. However, only recently have manufacturers developed a method for wet spray application with adhesives, using conventional cellulosic insulation. Since no Federal specification or other nationally recognized standard has to date been published, HUD has developed Use of Materials Bulletin No. 80 as a temporary acceptance standard. This standard is based on criteria now in process of development under the American Society for Testing and Materials (ASTM), but will not be available for publication for another 2 years. When a suitable national standard has been published, HUD's standard will be withdrawn.

The amount of pressure from the industry for the standard plus public sentiment for more protection in this area has created a need to publish this acceptance standard immediately. There is no conflict with the ASTM organization, since HUD's normal procedure is to adopt ASTM standards when they become available. In the meantime, this proposed HUD bulletin will help relieve a critical insulation resource problem as well as to protect consumer and other HUD interests.

The public is invited to comment on the proposed HUD use of materials bulletin. Copies of the bulletin are available for public inspection in the Architecture and Engineering Division (Room 6178), and Office of General Counsel, Rules Docket Clerk (Room 5218), Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410. Copies are also available in each HUD Field Office. Comments should be filed (using the above docket number and title) with the Rules Docket Clerk at the address stated above. All relevant written comments received will be considered. Copies of comments submitted will be available for examination by interested persons during

business hours in the Office of the Rules Docket Clerk.

A finding of inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this finding of inapplicability will be available for public inspection during regular business hours in the Office of the Rules Docket Clerk, at the above address.

(Sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d); sec. 6(b) of U.S. Housing Act of 1937, 42 U.S.C. 1437(d).)

Issued at Washington, D.C., on September 19, 1978.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing—Federal Housing Commissioner.

DEPARTMENT OF THE INTERIOR

CLOSURE OF CENTENNIAL MOUNTAINS TO MOTORIZED VEHICLE USE

SEPTEMBER 15, 1978.

Notice is hereby given that pursuant to an agreement between the Science and Education Administration (SEA) and the Bureau of Land Management and in accordance with the provisions of 43 CFR 6010.4 and 6290 and Executive Order No. 11644 the below described lands are closed to motorized vehicle use, excepting emergency and law enforcement vehicles and Federal or other government vehicles while being used for emergency purposes, and as otherwise listed in this notice.

UNITED STATES DUBOIS SHEEP EXPERIMENT STATION

Motorized vehicle use in the following described areas is limited to SEA for administrative purposes:

PRINCIPAL MERIDIAN, MONTANA.

BLAIR LAKE TRAIL

T. 15 S., R. 1 E.,
Sec. 3, Lots 3, 4, and 5; and
Sec. 4, Lots 1 and 2.

ODELL CREEK ACCESS

T. 15 S., R. 1 W.,
Sec. 18, Lots 2, 3, 4, 5, and 8.
T. 15 S., R. 2 W.,
Sec. 13, Lot 4 and E½NE¼.

All motorized vehicle use is prohibited in the following described lands:

T. 14 S., R. 1 E.,
Sec. 25, SW¼SW¼;
Sec. 26, S½S½;
Sec. 27, S½S½;
Sec. 28, SE¼SE¼;
Sec. 32, Lots 3 and 4;
Sec. 33, Lots 1, 2, 3, and 4, NE¼, SE¼NW¼, and N½S½; and
Secs. 34 and 35.
T. 15 S., R. 1 E.,
Secs. 1 and 2;
Sec. 3, Lots 1 and 2;
Sec. 4, Lots 3 and 4, N½, and N½SW¼;
Sec. 5, Lots 1, 2, 3, and 4, NE¼, NE¼NW¼, S½NW¼, and NE¼SE¼; and
Sec. 6, Lot 3.
T. 14 S., R. 1 W.,
Sec. 31, NE¼SE¼ and S½SE¼;
Sec. 32, S½NE¼ and S½; and
Sec. 33, S½SW¼ and SW¼SE¼.
T. 15 S., R. 1 W.,
Sec. 3, Lots 6 and 7, N½SW¼, and SW¼SW¼;
Sec. 4, Lots 2, 3, and 4, SW¼NE¼, S½NW¼, and S½S½;
Sec. 5, Lots 1, 2, 3, and 4, S½N½, NW¼SW¼, and S½S½;
Secs. 6 to 10 inclusive;
Sec. 17; and
Sec. 18, Lots 1, 6, and 7, and NW¼NE¼.
T. 15 S., R. 2 W.,
Secs. 1 to 4, inclusive;
Sec. 5, Lots 1, 4, and 5;
Secs. 9 to 12, inclusive;
Sec. 13, Lots 1, 2, and 3, W½NE¼, and N½NW¼; and
Sec. 14, 15, 22, and 23.

CENTENNIAL PRIMITIVE AREA

The following lands designated July 28, 1975, remain closed to motorized vehicle use:

T. 14 S., R. 1 E.,
Sec. 25, N½, N½SW¼, SE¼SW¼, and SE¼;
Sec. 26, N½ and N½S½;
Sec. 27, N½ andN½S½;
Sec. 28, N½, SW¼, N½SE¼, and SW¼SE¼;
Sec. 29, SE¼SW¼ and SE¼;
Sec. 31 Lots 1 to 7 inclusive, S½NE¼, E½NW¼, NE¼SW¼, and N½SE¼;
Sec. 32, Lots 1 and 2, N½, and N½S½; and
Sec. 33, N½NW¼ and SW¼NW¼.
T. 15 S., R. 1 E.,
Sec. 5, NW¼NW¼; and
Sec. 6, Lots 1, 2, 4, 5, and 6, NE¼ and E½NW¼.
T. 14 S., R. 1 W.,
Sec. 31, Lot 1, S½NE¼, SE¼NW¼, E½SW¼, and NW¼SE¼;
Sec. 32, N½NE¼ and NW¼;
Sec. 33, N½NE¼;
Sec. 34, N½, and SE¼;
Sec. 35; and
Sec. 36, SW¼SW¼.
T. 15 S., R. 1 W.,
Secs. 1 and 2; and
Sec. 3; Lots 1 and 2.
T. 14 S., R. 2 W.,
Sec. 19, Lots 13 and 14, E½SW¼, and SE¼;
Sec. 26, Lots 4 and 7, SW¼NW¼, W½SW¼, SE¼SW¼, and SW¼SE¼;
Secs. 27 to 35, inclusive; and
Sec. 36, S½SE¼.
T. 15 S., R. 2 W.,
Sec. 5, Lots 2 and 3; and
Sec. 6, Lots 1 to 4, inclusive.
T. 14 S., R. 3 W.,
Sec. 25;
Sec. 28, Lots 3 and 4, and NW¼SW¼;
Sec. 29, Lots 1 to 4, inclusive, and N½S½;
Secs. 32 and 33;
Sec. 34, S½NE¼, NW¼NW¼, and S½; and
Sec. 35, S½NW¼ and S½.
T. 15 S., R. 3 W.,
Secs. 1 to 5, inclusive; and
Secs. 7, 8, 9, 10, and 17.
T. 15 S., R. 4 W.,
Sec. 10, Lot 2, and NE¼SE¼;
Sec. 11, Lots 1 and 2, NE¼, N½SW¼, SW¼SW¼, N½SE¼, and SE¼SE¼;
Secs. 12, 13, and 14; and
Sec. 15, Lot 1.

Motorized vehicle use for the following described lands is restricted to the authorized licensee and permittee in accordance with the terms of a lease and permit previously issued.

UNITED STATES DUBOIS SHEEP EXPERIMENT STATION

T. 14 S., R. 1 W.,
Sec. 31, Lots 6 and 7;
Sec. 33, SW¼NE¼, S½NW¼, N½SW¼, N½SE¼, and SE¼SE¼; and
Sec. 34, W½SW¼.
T. 15 S., R. 1 W.,
Sec. 3, Lots 3, 4, and 5, and S½NW¼;
Sec. 4, Lot 1, SE¼NE¼, and N½S½; and
Sec. 5, NE¼SW¼ and N½SE¼.

CENTENNIAL PRIMITIVE AREA

T. 14 S., R. 1 W.,
Sec. 33, SE¼NE¼ and N½NW¼; and
Sec. 34, E½SW¼.

The area affected by this closure is located in Beaverhead County in southwestern Montana, north of the Continental Divide, which is the boundary between Montana and Idaho. The closure to vehicular use will better protect and preserve the unique natural values of the area. The area is presently being studied for its wilderness characteristics. Upon completion of the study, public comment will be solicited.

This closure will be effective October 1, 1978, and will remain in effect until further notice. The area will be patrolled to assure compliance. Any person who knowingly and willfully violates this closure shall be fined not more than $1,000 or imprisoned not more than 12 months, or both.

BILL D. NOBLE,
Acting State Director.

CHESAPEAKE AND OHIO CANAL NATIONAL HISTORICAL PARK COMMISSION

Meeting

Notice is hereby given in accordance with Federal Advisory Committee Act that a meeting of the Chesapeake and Ohio Canal National Historical Park Commission will be held Saturday, October 21, 1978, at 1 p.m., at the Algonquin Regional Park, Loudoun County, Va.

The Commission was established by Pub. L. 91-664 to meet and consult with the Secretary of the Interior on general policies and specific matters related to the administration and development of the Chesapeake and Ohio Canal National Historical Park.

The members of the Commission are as follows:

Mr. Donald R. Frush (chairman), Hagerstown, Md.
Mrs. Bonnie Troxell, Cumberland, Md.
Miss Nancy Long, Glen Echo, Md.
Mrs. Constance Morella, Bethesda, Md.
Mr. Kenneth S. Rollins, Brookmont, Md.
Mr. Vladimir A. Whabe, Baltimore, Md.
Mr. Edwin F. Wesely, Jr., Brookmont, Md.
Mr. John D. Millar, Cumberland, Md.
Mr. James B. Coulter, Annapolis, Md.
Mrs. Dorothy Grotos, Arlington, Va.
Miss Margaret Dietz, Lovettsville, Va.
Dr. James H. Gilford, Frederick, Md.
Mr. Lorenzo W. Jacobs, Jr., Washington, D.C.
Mr. Silas F. Starry, Shepherdstown, W. Va.
Mr. Rockwood H. Foster, Washington, D.C.
Mr. R. Lee Downey, Williamsport, Md.
Mr. John C. Frye, Gapland, Md.

Matters to be discussed at this meeting include:

1. Access to the town of Brunswick campground.
2. Harpers Ferry road improvements.
3. Georgetown planning activities.
4. Naming of special areas of the park.
5. Cumberland terminus.
6. Williamsport basin status.
7. Reorganization of the Heritage Conservation and Recreation Service.
8. Palisades wayside interpretive exhibit plan.
9. Great Falls development concept plan status.
10. Washington County Sanitary Commission request.
11. Notice of final action, WSSC and Fairfax County Water Authority, COE notice July 21, 1978.
12. Proposed deck replacement and median closure, I-495, Potomac River and C. & O. Canal.
13. Joint report: Pennyfield Level No. 22 project.
14. Future status of Commission (terms).

The meeting will be open to the public. Any member of the public may file with the committee a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact William R. Failor, Superintendent, C. & O. Canal National Historical Park, P.O. Box 4, Sharpsburg, Md. 21782, telephone 301-948-5641 or 301-432-2231. Minutes of the meeting will be available for public inspection 4 weeks after the meeting at Park Headquarters, Sharpsburg, Md.

Dated: September 15, 1978.

MANUS J. FISH, JR.,
Regional Director, National Capital Region.

DESERT NATIONAL SCENIC TRAIL FEASIBILITY STUDY

Notice of Intent

Notice is hereby given that the National Park Service will hold a series of 11 public meetings in 5 western States in late October and November to brief interested individuals, organizations, and other government agencies on the progress of the Desert National Scenic Trail feasibility study and to receive public comments. The meeting dates, locations, and times are as follows:

Oct. 31, 1978, Phoenix, Ariz., 7:30 p.m., State Capitol, Room 800, 1700 West Washington.
Nov. 1, 1978, Lake Havasu City, Ariz., 7:30 p.m., Lake Havasu City High School, 2675 Palo Verde.
Nov. 2, 1978, Yuma, Ariz., 7:30 p.m., Yuma Civic and Convention Center, 1440 Desert Hills Drive.
Nov. 7, 1978, Reno, Nev., 7:30 p.m., Holiday Inn Downtown, 1000 East 6th Street.
Nov. 9, 1978, Las Vegas, Nev., 7:30 p.m., Environmental Protection Agency Building, 944 East Harmon.
Nov. 13, 1978, Idaho Falls, Idaho, 7:30 p.m., Intermountain Science Experience Center, 1776 Science Center Drive.
Nov. 14, 1978, Twin Falls, Idaho, 7:30 p.m., Blue Lakes Inn, 1357 Blue Lakes Boulevard.
Nov. 15, 1978, Boise, Idaho, 7:30 p.m., Boise State University, Student Union Building, University Drive.
Nov. 17, 1978, Burns, Oreg., 7:30 p.m., Harney County Historical Society, 18 West D Street.
Nov. 21, 1978, Riverside, Calif., 7:30 p.m., Raincross Square, 3443 Orange Street.
Nov. 28, 1978, Portland, Oreg., 7:30 p.m., Travelodge at the Coliseum, 1441 North East 20th Avenue.

Persons attending the meetings will be provided with an information booklet containing a response section in which they may summarize their views on the Desert Trail.

Those unable to attend one of the public meetings may participate in the planning process by obtaining a copy of the information booklet from the Regional Director, Western Regional Office, Attention: Desert Trail Study, National Park Service, P.O. Box 36063, San Francisco, Calif. 94102. Response sections should be returned to the above address by December 30, 1978.

Dated: September 14, 1978.

JOHN H. DAVIS,
Acting Regional Director, Western Region, National Park Service.

PROPOSED GENERAL MANAGEMENT PLAN YOSEMITE NATIONAL PARK, CALIF.

Availability of Draft Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act, the Department of the Interior has prepared a draft environmetal statement for the proposed general management plan, Yosemite National Park, Calif.

The statement considers a proposed general management plan for Yosemite National Park that will guide overall park management and development for approximately 15 years, including specific plans for all developed areas within the park. Additions to the recommended wilderness plan are also proposed.

Written comments on the environmental statement are invited and will be accepted for a period of ninety (90) days following publication of this notice. Comments should be addressed to the Superintendent, Yosemite National Park.

Copies of the draft environmental statement are available from or for inspection at the following locations:

Western Regional Office, National Park Service, 450 Golden Gate Ave., San Francisco, Calif. 94102.
Los Angeles Field Office, National Park Service, Room 1013, New Federal Bldg., Los Angeles, Calif. 90012.
Yosemite National Park, P.O. Box 577, Yosemite, Calif. 95389.

Dated: September 21, 1978.

INDIANA DUNES NATIONAL LAKESHORE ADVISORY COMMISSION

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Indiana Dunes National Lakeshore Advisory Commission will be held at 10 a.m., c.d.t., on Friday, October 20, 1978, at the Indiana Dunes National Lakeshore Tremont/Furnessville Visitor Center, Intersection of State Park Road and U.S. Highway 12, Chesterton, Ind.

The Commission was established by Pub. L. 89-761 to meet and consult with the Secretary of the Interior on matters related to the administration and development of the Indiana Dunes National Lakeshore.

The members of the Commission are as follows:

Mr. Harry W. Frey (Chairman)
Dr. Lynton K. Caldwell
Mrs. Anna P. Carlson
Mr. Neil P. Frankel
Mr. John A. Hillenbrand II
Mrs. Barbara R. Johnson
Mr. William L. Lieber
Mr. Lawrence Miller
Mr. John R. Schnurlein
Mr. Norman E. Tufford
Mr. George H. Williams

Matters to be discussed at this meeting include:

1. Report on 1978 legislation.
2. Status of land acquisition.
3. General management plan progress report.
4. Overview of 1978 operations and projection of 1979 programs.
5. Report of poll on expansion legislation.
6. Periphery zoning for the Lakeshore.

The meeting will be open to the public. Any member of the public may

and with respect to all respondents (see motion to terminate filed June 26, 1978). The Presiding Officer, acting in

this investigation, Shilba-Shoji Trading Co. (hereinafter "Shilba-Shoji"). However, inasmuch as Tomy is be-

ing and intent of 21 U.S.C. 824(a)(2). Simultaneously, pursuant to 21 U.S.C. 824(d), the Administrator ordered that

The meeting will be open to the public. Any member of the public may file with the Commission prior to the meeting a written statement concerning the matters to be discussed. Persons wishing further information concerning the meeting or who wish to submit written statements, may contact James R. Whitehouse, Superintendent, Indiana Dunes National Lakeshore, Route 2, Box 139-A, Chesterton, Ind. 46304, telephone 219-926-7561.

Minutes of the meeting will be available for public inspection 4 weeks after the meeting at the office of the Indiana Dunes National Lakeshore located at the intersection of State Park Road and U.S. Highway 12, Chesterton, Ind.

Dated: September 13, 1978.

RANDALL R. POPE,
Acting Regional Director,
Midwest Region.

[7020-02]

[Investigation 337-TA-46]

CERTAIN TELESCOPIC SIGHT MOUNTS

Commission Determination, Order and Memorandum Opinion

Procedural history. On June 26, 1978, Complainant Clear View Manufacturing Co. and the Commission investigative attorney jointly filed, pursuant to § 210.51 of the Commission's rules of practice and procedure [1] (hereinafter "Rules"), a motion to terminate this investigation as to all issues and with respect to all respondents (see motion to terminate filed June 26, 1978). The Presiding Officer, acting in conformity with §§ 210.51(c) and 210.53 of the rules,[2] concluded that no present violation of section 337 of the Tariff Act of 1930 [3] (hereinafter "section 337") exists with respect to the importation of the telescopic sight mounts which are the subject of the Commission's investigation, and recommended, by Order of August 21, 1978 (see Order Recommending Termination of Investigation, filed Aug. 21, 1978), that the Commission (1) determine that there is no violation of section 337 in the importation or sale in the United States of certain telescopic sight mounts, and (2) grant the joint motion to terminate the investigation. It is the purpose of this Determination, Order and Memorandum Opinion to consider the Presiding Officer's Recommendation and to rule on the joint motion to terminate.

Determination and Order. Having considered (1) the joint motion to terminate (motion docket No. 46-2), and (2) the Presiding Officer's recommendation of August 21, 1978, in the context of the record in the instant investigation, the Commission determines that no violation of section 337 presently exists by reason of the importation or sale in the United States of the telescopic sight mounts which are the subject of the Commission's investigation.

Therefore, the Commission grants the joint motion to terminate and orders that the instant investigation be and hereby is terminated with respect to all issues and all respondents.

Opinion. This is a patent-based case. The amended complaint filed with the Commission alleged that unfair methods of competition and unfair acts existed in the importation of certain telescopic sight mounts into the United States by reason of the alleged coverage of such articles by claims of two United States patents licensed to complainant. [4]

The joint motion to terminate the investigation was accompanied by affidavits executed by officers of respondents Tomy Enterprises Co., Ltd. (hereinafter "Tomy"), and Ednar, Inc. These affidavits, which are identical in form, state that the respondents in question (1) have discontinued exporting telescopic sight mounts to the United States covered by claims of the '565 and '633 patents, and (2) intend to export no more such sight mounts to the United States without the written permission of the complainant.

No similar affidavit has been received from the third respondent in this investigation, Shilba-Shoji Trading Co. (hereinafter "Shilba-Shoji"). However, inasmuch as Tomy is believed to be Shilba-Shoji's only source of supply for sight mounts of the type produced by complainant, and in view of the fact that Shilba-Shoji's United States importer, former respondent L.E.S., has given assurances that it will no longer import allegedly infringing sight mounts into the United States (see Commission Order and Opinion issued May 25, 1978, terminating L.E.S. as a respondent in this investigation), the Commission is of the view that this investigation should be terminated. The Commission therefore has determined to order the termination of the instant investigation as to all issues and all respondents.

Issued: September 21, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

U.S. CIRCUIT JUDGE NOMINATING COMMISSION, SIXTH CIRCUIT PANEL

Meeting

Chairman: Wilson W. Wyatt.

The Sixth Circuit Panel of the U.S. Circuit Judge Nominating Commission has been activated to nominate candidates to fill one vacancy on the Sixth Circuit Court of Appeals. The Panel's schedule of meetings is as follows:

(1) The first meeting will be held on October 17, 1978, at 11 a.m., on the 28th floor of Citizens Plaza, Fifth and Jefferson Streets, Louisville, Ky. The morning session will be open to the public. The afternoon session will be devoted to discussion of candidates and will be closed to the public pursuant to Pub. L. 92-463, section 10(D) as amended. (Cf. 5 U.S.C. 552b (c)(6).)

(2) The second meeting will be held on November 1, 1978, at 9 a.m., in room 501 of the U.S. Post Office and Federal Building, Cincinnati, Ohio. The purpose of this meeting is to consider nominations and the meeting will be closed to the public pursuant to Pub. L. 92-463, section 10(D) as amended. (Cf. 5 U.S.C. 552b (c)(6).) If necessary, the meeting will be continued through November 2, 1978.

[4410-09]

[Docket No. 78-10]

THOMAS EDWARD BENNETT, D.O.

Revocation of Registration

On May 25, 1978, the Administrator of the Drug Enforcement Administration (DEA) issued an Order to Show Cause to Thomas Edward Bennett, D.O. (Respondent), of Houston, Tex. The Order to Show Cause proposed to revoke the Respondent's DEA Certificate of Registration, AB7288283, and to deny his then pending application for registration, for reason that on May 25, 1978, following his plea of nolo contendere in the U.S. District Court for the Southern District of Texas, the Respondent was convicted of unlawfully distributing and dispensing Schedule II controlled substances and of a related conspiracy charge in violation of 21 U.S.C. 841(a)(1) and 846, felony offenses within the meaning and intent of 21 U.S.C. 824(a)(2). Simultaneously, pursuant to 21 U.S.C. 824(d), the Administrator ordered that the Respondent's registration be suspended pending the final outcome of these proceedings.

The Respondent requested a hearing on the issues raised by the Order to Show Cause and this matter was placed on the docket of Administrative Law Judge Francis L. Young. Subsequent to the filing of written prehearing statements, but before an evidentiary hearing in this matter could be held, counsel for the Respondent and for DEA entered into a stipulation pursuant to which this matter might be disposed of without necessitating further proceedings. On August 24, 1978, the Administrative Law Judge accepted the stipulation and recommended that the Administrator issue a final order not inconsistent with the terms agreed upon by counsel.

The Administrator has reviewed the record of these proceedings and, pursuant to the provisions of 21 CFR 1316.66, hereby publishes his final order in this matter.

The Respondent has stipulated to the fact of his conviction of felony offenses relating to controlled substances and has consented to the revocation of his DEA registration as well as to the denial of his pending application for registration. The Administrator concludes that there is a lawful or statutory basis for such revocation and denial. Therefore, pursuant to the authority granted to the Attorney General by sections 303 and 304 of the Controlled Substances Act (21 U.S.C. 823 and 824), and redelegated to the Administrator of the Drug Enforcement Administration, the Administrator hereby orders that the Respondent's pending application for registration be denied and that DEA Certificate of Registration AB7288283 be revoked, effective immediately.

The U.S. District Court for the Southern District of Texas has placed the Respondent on supervised probation for a period of 5 years. The successful completion of this term of probation may indicate that the Respondent can once more be entrusted with the handling and prescribing of controlled substances. Therefore, on May 25, 1983, or as soon thereafter as the Respondent may make application for such registration, provided that he has successfully completed his period of probation, and further provided that he is appropriately licensed and authorized to handle controlled substances under the laws of the State in which he is then practicing, the Drug Enforcement Administration will give favorable consideration to the Respondent's application for registration in Schedules IV and V of the Controlled Substances Act.

On May 25, 1984, or as soon thereafter as the Respondent may make ap-

all requests for preaward clearances under E.O. 11246 must be directed to

V 4 3 / 1 8 7 SEP 26 78 V 43 S

On May 25, 1984, or as soon thereafter as the Respondent may make application for such registration, again predicated upon his being appropriately licensed and authorized to handle such controlled substances under State law, DEA will give favorable consideration to the Respondent's application for registration in Schedule III as well as Schedules IV and V.

On May 25, 1985, again provided that the Respondent is properly licensed and authorized to apply therefor, the Drug Enforcement Administration will consider Respondent's application for registration in Schedule II. In determining whether or not such registration would be in the public interest, the Respondent has stipulated that DEA may consider such factors as the Respondent's experience in handling controlled substances in Schedules III through V; his success, or lack thereof, in rehabilitation; the nature of his practice; and his ability to cope with the pressures which a registration to prescribe Schedule II controlled substances may bring.

Dated: September 19, 1978.

DEPARTMENT OF LABOR

Office of Federal Contract Compliance Programs

EQUAL EMPLOYMENT OPPORTUNITY

Changes in Preaward Clearance Requests under Executive Order 11246

Pursuant to President Carter's decision to consolidate programs implementing Executive Order 1246, as amended, in the Office of Federal Contract Compliance Programs (OFCCP), Order No. 1 (Revised), October 1, 1977, which assigned compliance responsibilities to compliance agencies based on standard Industrial Classifications, is being rescinded effective October 1, 1978. The Heads of Agencies Memorandum which follows authorizes compliance agencies to continue exercising authority over reviews and investigations already under way until October 8, 1978. Effective October 2, 1978, however, requests by procurement officials for preaward clearances shall be made to OFCCP. The Memorandum also informs procuring agencies of the Federal Government regarding proper contact points for preaward clearances beginning October 2, 1978. The Memorandum provides that beginning October 2, 1978, all requests for preaward clearances under E.O. 11246 must be directed to the OFCCP Regional Office for the region in which the contractor facility is located, and lists the addresses of the various OFCCP Regional Offices.

Dated: September 20, 1978.

RICHARD DEVINE,
Deputy Director, Office of Federal Contract Compliance Programs.

To: Heads of all agencies.
From: Richard Devine, Deputy Director, Office of Federal Contract Compliance Programs.
Subject: Fiscal year 1979 preaward clearance requests.

SEPTEMBER 20, 1978.

President Carter has announced his intent to issue an Executive Order consolidating compliance agency responsibilities under Executive Order 11246, as amended, into the Office of Federal Contract Compliance Programs (OFCCP), Employment Standards Administration (ESA), Department of Labor. The effective date for the new issuance will be October 8, 1978, a change from the originally announced date of October 1, 1978, designed to match the full consolidation with the payroll periods of most compliance agencies.

Effective October 1, 1978, Order No. 1 (revised) of October 1, 1977 is rescinded. Compliance agencies are authorized to continue exercising authority over reviews or investigations already underway until October 8, 1978.

Beginning October 2, 1978, the first business day of the new fiscal year, all requests for preaward clearances under Executive Order 11246 must be directed to the OFCCP Regional Office for the region in which the contractor facility is located, as indicated below.

[4510-28]

Office of the Secretary

[TA-W-2397]

AMERICAN BILTRITE, INC., BOSTON INDUSTRIAL PRODUCTS DIVISION

Negative Determination Regarding Application for Reconsideration

On August 16, 1978, the president of the local union of United Rubber, Cork, Linoleum & Plastic Workers of America requested administrative reconsideration of the Department of Labor's negative determination regarding eligibility to apply for worker adjustment assistance. This determination was published in the FEDERAL REGISTER on July 18, 1978 (43 FR 30922).

Pursuant to 29 CFR 90.18(c), reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered, that the determination complained of was erroneous;

(2) If it appears that the determination complained was based on a mistake in the determination of facts previously considered; or

(3) If, in the opinion of the certifying officer, a misinterpretation of facts or of the law justifies reconsideration of the decision.

In his application, the president of the local union states his belief that workers at the Cambridge plant have been effected by imports. He specifically mentions the product, steel belts, as having been all but completely eliminated at American Biltrite due to import competition. This statement by the President provides no new information, which would suggest that the Department's original determination was in error. Production of steel belts was taken into consideration in the investigation of the Cambridge plant. It was found that steel belts accounted for only 1.1 percent of company sales in 1976 and 1.2 percent of company sales in 1977. If, as it is claimed in the application, this product accounted for a higher percentage of sales prior to 1976, it would have been of no relevance to a certification of this case given the fact that the petition was dated September 19, 1977, and that the law would have allowed us to, in case of a certification, set an impact date of no more than 1 year prior to that date.

CONCLUSION

After review of the application and the investigative file, I conclude that there has been no error or misinterpretation of fact or misinterpretation of the law which would justify reconsideration of the Department of Labor's prior decision. The application is, therefore, denied.

Signed at Washington, D.C., this 11th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3484]

ASARCO, INC.

Certification Regarding Eligibility To Apply for Worker Ajustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3484: Investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 11, 1978, in response to a worker petition received on March 31, 1978, which was filed by the United Steelworkers of America on behalf of workers and former workers producing copper, lead, zinc, antimony, and cadmium at the El Paso Smelting Works of ASARCO, Inc., El Paso, Tex. During the course of the investigation it was established that antimony is not produced and that the cadmium produced is insignificant.

The notice of investigation was published in the FEDERAL REGISTER on May 2, 1978 (43 FR 18790). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of ASARCO, Inc., the Department of Commerce, the United States International Trade Commission, the U.S. Department of the Interior, the American Metals Market, Metal Bulletin, Metals Week, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of refined copper increased from 147 thousand short tons in 1975 to 384 thousand short tons in 1976 and then to 391 thousand short tons in 1977. Imports increased from 66 thousand short tons in the first quarter of 1977 to 150 thousand short tons in the first quarter of 1978. The imports to domestic production ratio increased from 8.6 percent in 1975 to 21.0 percent in 1976 and then to 22.2 percent in 1977. The imports to domestic production ratio increased from 13.1 percent in the first quarter of 1977 to 34.1 percent for the same period in 1978.

Imports of copper are affected by the differential between the domestic producers price of copper and the price established by the LME (London Metal Exchange). When the LME price drops more than the estimated transportation cost of 5-8 cents per pound below the domestic producers price, the demand for imported copper increases. During May and June 1977, the price was almost 11 cents per pound below the domestic producers price and in July and August 1977, the LME price was almost 12 cents per pound below the domestic producers price. At the same time, the abundant supply of copper stocks in the foreseeable future provides no reason for domestic consumers of copper to maintain ties with domestic producers for purposes of a guarantee against copper shortages. Consequently, imports of refined copper increased in 1977 when compared to 1976 and increased 127.3 percent in the first quarter of 1978 when compared to the same period in 1977, when many domestic copper producers curtailed production because of the depressed market price of copper.

Price pressure from imported copper has reduced the ability to profitably mine domestic ore and convert it to copper concentrates and then to refined copper. The current domestic market price of copper is 64 cents per pound. Industry sources indicate that the production costs of domestic copper mines are equal to or higher than the market price. Consequently, domestic producers have been either breaking even or operating at a loss.

U.S. imports of refined and recovered lead increased from 101 thousand short tons in 1975 to 147 thousand short tons in 1976 and then increased to 264 thousand short tons in 1977. Imports increased from 47 thousand short tons in the first quarter of 1977 to 66 thousand short tons for the same period in 1978. The imports to domestic production ratio increased from 7.8 percent in 1975 to 10.7 percent in 1976 and then to 19.7 percent in 1977. The imports to domestic production ratio increased from 14.1 percent in the first quarter of 1977 to 19.5 percent for the same period in 1978.

Imports of lead are affected by the differential between the domestic producers price and the price of lead on the London Metal Exchange (LME). Generally prices charged by domestic

producers range from 2 to 4 cents above LME prices. When the LME price drops more than 2 to 4 cents per

tantly to the decline in sales and production and to the total or partial separation of workers at the facility.

thousand dozen in the first quarter of 1977 to 878 thousand dozen in the first quarter of 1978. The ratio of imports

customers in the same period increased their contracts with foreign sources and increased their purchases of imported women's sportswear.

V 43/187 SEP 26 78 V4

producers range from 2 to 4 cents above LME prices. When the LME price drops more than 2 to 4 cents per pound below the domestic producers' price, there is increased demand for imported lead. In August 1977 there was a 6-cent difference in lead prices (31 cents U.S. versus 25 cents LME), which may have prompted some U.S. customers to purchase abroad. Also from February–April 1978 lead prices on the LME have ranged from 6.5–7.0 cents per pound lower than those charged by U.S. producers. Consequently while domestic production of lead has remained fairly constant in 1977 and in the first quarter of 1978, imports of refined and recovered lead increased 79.6 percent from 1976 to 1977 and 40.4 percent in the first quarter of 1978 when compared to the same period in 1977.

U.S. imports of slab zinc increased from 380,437 short tons in 1976 to 714,489 short tons in 1977 before declining to 555,147 short tons in 1977. Imports increased from 121,120 short tons in the first quarter of 1977 to 155,998 short tons for the same period in 1978. The imports to domestic production ratio increased from 76.7 percent in 1975 to 127.0 percent in 1976 and to 127.9 percent in 1977. The imports to domestic production ratio increased from 94.0 percent in the first quarter of 1977 to 152.1 percent for the same period in 1978.

Imports of zinc are affected by the differential between the domestic price of zinc established by U.S. producers and the price established by the LME (London Metal Exchange). When the LME price drops more than the estimated transportation cost of 5 cents per pound below the producers' price, the demand for imported zinc increases. Except for brief periods in the spring of 1976 and March 1977, the price differential between U.S. producers and the LME has exceeded 5 cents per pound. The average U.S. producer price for zinc was 7.6 cents higher than the average LME zinc price in 1977 and 7.1 cents higher in the first quarter of 1978. This is well above the 5-cent limit at which domestic suppliers can remain competitive. Consequently, in the first quarter of 1978 when many domestic zinc producers curtailed production because of the depressed market price of zinc, imports of slab zinc increased 28.8 percent when compared to the same period in 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the copper, lead, and zinc produced at the El Paso Smelting Works of ASARCO, Inc., El Paso, Tex., contributed importantly to the decline in sales and production and to the total or partial separation of workers at the facility.

In accordance with the provisions of the Act, I make the following certification:

All workers at the El Paso Smelting Works of ASARCO, Inc., El Paso, Tex., who became totally or partially separated from employment on or after January 1, 1978, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Adminstration and Planning.

[TA-W-3505]

BENTLEY KNITWEAR CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3505: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 13, 1978, in response to a worker petition received on March 27, 1978, which was filed by International Ladies Garment Workers Union on behalf of workers and former workers producing women's sportswear at Bentley Knitwear Corp., Brooklyn, N.Y.

The notice of investigation was published in the FEDERAL REGISTER on April 25, 1978 (43 FR 17552). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Bentley Knitwear Corp., its customers, the U.S. Department of Commerce, the United States International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that U.S. imports of women's, misses', and children's sweaters increased from 8,965 thousand dozen in 1975 to 9,613 thousand dozen in 1976 and decreased to 9,520 thousand dozen in 1977. Imports increased from 816 thousand dozen in the first quarter of 1977 to 878 thousand dozen in the first quarter of 1978. The ratio of imports to domestic production increased from 115.1 percent in 1975 to 141.9 percent in 1976 and decreased to 140.8 percent in 1977.

U.S. imports of women's, misses' and children's slacks and shorts increased from 10,067 thousand dozen in 1975 to 11,040 thousand dozen in 1976 to 11,662 thousand dozen in 1977. Imports increased to 4,545 thousand dozen in the first quarter of 1978 compared to 3,374 thousand dozen in the first quarter of 1977. The ratio of imports to domestic production increased from 35.2 percent in 1975 to 36.8 percent in 1976 to 38.0 percent in 1977.

U.S. imports of women's, misses' and children's blouses and shirts increased from 26,113 thousand dozen in 1975 to 30,273 thousand dozen in 1976 to 30,849 thousand dozen in 1977. Imports increased to 10,186 thousand dozen in the first quarter of 1978 compared to 8,280 thousand dozen in the first quarter of 1977. The ratio of imports to domestic production decreased from 70.4 percent in 1975 to 70.3 percent in 1976 to 69.7 percent in 1977.

U.S. imports of women's, misses' and children's skirts increased from 517 thousand dozen in 1975 to 791 thousand dozen in 1976 and decreased to 654 thousand dozen in 1977. Imports increased to 296 thousand dozen in the first quarter of 1978 compared to 103 thousand dozen in the first quarter of 1977. The ratio of imports to domestic production increased from 10.8 percent in 1975 to 14.2 percent in 1976 and decreased to 10.5 percent in 1977.

U.S. imports of women's, misses' and children's suits decreased from 412 thousand dozen in 1975 to 408 thousand dozen in 1976 to 384 thousand dozen in 1977. Imports increased to 104 thousand dozen in the first quarter of 1978 compared to 62 thousand dozen in the first quarter of 1977. The ratio of imports to domestic production decreased from 12.2 percent in 1975 to 11.4 percent in 1976 to 10.5 percent in 1977.

U.S. imports of women's, misses' and children's dresses decreased from 1,655 thousand dozen in 1975 to 1,614 thousand dozen in 1976 to 1,420 thousand dozen in 1977. Imports increased to 403 thousand dozen in the first quarter of 1978 compared to 371 thousand dozen in the first quarter of 1977. The ratio of imports to domestic production remained at 8.0 percent from 1975 to 1976 and deceased to 6.7 percent in 1977.

Customers surveyed representing a significant proportion of the subject firm's sales in 1976 decreased their purchases from Bentley Knitwear Corp. in 1977 compared to 1976. These customers in the same period increased their contracts with foreign sources and increased their purchases of imported women's sportswear.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the women's sportswear produced at Bentley Knitwear Corp., Brooklyn, N.Y., contributed importantly to the decline in sales or production and to the total or partial separations or workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers at Bentley Knitwear Corp., Brooklyn, N.Y., who became totally or partially separated from employment on or after March 17, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-3886]

BIRK TRANSFER, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3886: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 22, 1978, in response to a worker petition received on April 25, 1978, which was filed on behalf of workers and former workers of Birk Transfer, Inc., Conomaugh, Pa., engaged in transporting materials at the Johnstown, Pa., plant of Bethlehem Steel Corp.

The notice of investigation was published in the FEDERAL REGISTER on July 7, 1978 (43 FR 29365). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Birk Transfer, Inc., and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The Department has determined that services are not "articles" within the meaning of section 222 of the Act and that independent firms for which the subject firm provides services cannot be considered to be the "workers firm."

Birk Transfer Co., Inc., was founded in 1966 and incorporated in Pennsylvania. The company has no parent firm. Birk Transfer provides transportation services within the Johnstown, Pa., plant of Bethlehem Steel Corp. The subject firm transports materials from point to point within the steel plant.

Workers at Birk Transfer are engaged in providing transportation services and do not produce an article within the meaning of section 222 (3) of the Act.

Birk Transfer and Bethlehem Steel Corp. have no controlling interest in each other.

All workers engaged in providing transportation services at Birk Transfer, Inc., are employed by that firm. All personnel actions and payroll transactions are controlled by Birk Transfer Co., Inc. All employment benefits are provided and maintained by Birk Transfer. Workers are not at any time under employment or supervision by Bethlehem Steel Corp. Thus, Birk Transfer must be considered the "workers firm."

CONCLUSION

After careful review, I determine that all workers of Birk Transfer Co., Inc., Conomaugh, Pa., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-3855]

BRIDON AMERICAN CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3855: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 19, 1978 in response to a worker petition received on June 12, 1978 which was filed by the Bridon American Corp. on behalf of all workers of the Folcroft, Pa. service center of the Bridon American Corp.

The notice of investigation was published in the FEDERAL REGISTER on June 30, 1978 (43 FR 28581). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Bridon American Corp., its customers, the U.S. Department of Commerce, the United States International Trade Commission, Industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. It is concluded that all of the group eligibility criteria have been met.

Average facility employment declined in the first half of 1978 compared to the like 1977 period. The facility was permanently closed on June 2, 1978. There weren't any layoffs at the facility in 1977 or in the first quarter of 1978. Layoffs began at the Folcroft facility in April, 1978.

The Folcroft facility is a service and distribution center for wire rope which is produced by the Bridon American Corp. All of the wire rope produced by the company is shipped to the distribution centers where the wire rope is cut to the individual customers' requirements. The wire rope is then

shipped from the center to the customers. The functions performed at the centers are integral to the company's production of wire rope. Workers

hearing was requested and none was held.

The information upon which the determination was made was obtained

powdered metals and process equipment at the Lakehurst, N.J. plant, Chemical Metallurgical Division of

HARRY J. GILMAN,
Acting Director, Office of

worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 4, 1978, in response to a

CONCLUSION

After careful review I determine that all workers of Chloride Pyrotector, Inc., Hingham, Mass., are denied

shipped from the center to the customers. The functions performed at the centers are integral to the company's production of wire rope. Workers engaged in employment related to the production of a significant percentage of the company's total 1977 production of wire rope who became totally or partially separated from employment on or after October 31, 1976, were certified eligible to apply for adjustment assistance benefits on April 14, 1978. This determination will expire Aprl 14, 1980 unless terminated earlier by the Secretary of Labor. See Department determination TA-W-2609.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the wire rope produced by the Bridon American Corp. have contributed importantly to the total or partial separation of workers at the Folcroft, Pa. service center of the Bridon American Corp. as required for certification under section 222 of the Trade Act of 1974. In accordance with the provisions of the Act, I make the following certification:

All employees of the Folcroft, Pa. service center of the Bridon, American Corp. who became totally or partially separated from employment on or after April 1, 1978 are eligible to apply for adjustment assistance benefits under title, II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of September 1978.

[TA-W-3506]

CATH-GAR TEXTILE CO., INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3506: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 13, 1978 in response to a worker petition received on April 6, 1978 which was filed on behalf of workers and former workers producing fabrics for the home sewing trade and the apparel industry at Cath-Gar Textile Co., Inc., Clifton, N.J.

The notice of investigation was published in the FEDERAL REGISTER on April 25, 1978 (43 FR 17552). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Cath-Gar Textile Co., Inc., its customers, the American Textile Manufacturers Institute, the U.S. Department of Commerce, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Imports of finished fabric (bleached, dyed, and printed) decreased from 464 million square yards in 1976 to 453 million square yards in 1977. The ratio of imports to domestic production has been below 2.0 percent each year from 1974 through 1976.

Customers who were surveyed did not increase purchases of imported finished fabric while decreasing purchases from Cath-Gar Textile Co.

CONCLUSION

After careful review I determine that all workers of Cath-Gar Textile Co., Inc., Clifton, N.J. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[4510-28]

[TA-W-3706]

CHEMICAL METALLURGICAL DIVISION SCM CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3706: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 15, 1978 in response to a worker petition received on May 2, 1978 which was filed on behalf of workers and former workers producing chemicals, powdered metals and process equipment at the Lakehurst, N.J. plant, Chemical Metallurgical Division of SCM Corp. The investigation revealed that ilmenite ore (used in the production of titanium dioxide) was mined at the Lakehurst, N.J. facility.

The notice of investigation was published in the FEDERAL REGISTER on June 27, 1978 (43 FR 27923). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of SCM Corp., the U.S. Department of Commerce, the United States International Trade Commission, the U.S. Bureau of Mines, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations or threat thereof, and to the absolute decline in sales or production.

The Lakehurst, N.J. facility of SCM Corp. was a mine for ilmenite ore. Ilmenite ore is used by SCM in the manufacture of titanium dioxide, which is a pigment used by the paint, paper, plastic and rubber industries.

The mine was acquired in 1960. At that time, its life expectancy was 15 years—i.e., the ore supply of the mine was expected to be exhausted by 1975. In 1978, 18 years after SCM began mining ilmenite ore at the Lakehurst site, the mine was effectively exhausted of its supply of ore. All ore that was economically justified to mine ha' been taken from this site. The mine was closed at the end of March 1978.

The closure of the Lakehurst mine is attibuted to the depeletion of ore reserves. Changing technology has resulted in a move toward a newer, more modern and efficient process by which titanium dioxide is produced. This newer process utilizes rutile ore either natural or synthesized from ilmenite ore.

CONCLUSION

After careful review, I determine that all workers of the Lakehurst, N.J., mine in the Chemical Metallurgical Division of SCM Corp. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3401]

CHINO MINES DIVISION OF KENNECOTT COPPER CORP.

Revised Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor issued a certification of eligibility to apply for adjustment assistance on August 18, 1978, applicable to all workers of the Chino Mines Division of Kennecott Copper Corp., Hurley, N. Mex., including the Silver City, N. Mex., mine who became totally or partially separated from employment on or after March 1, 1978. The notice of certification was published in the FEDERAL REGISTER on August 25, 1978 (43 FR 38125).

A review of the case revealed that a significant number of the workers were separated from employment in September 1977. These workers were not covered by the original impact date of March 1, 1978.

The intent of the certification is to cover those workers separated in September 1977 importantly because of import competition. The certification, therefore, is revised providing a new impact date of September 1, 1977.

The revised certificated applicable to TA-W-3401 is hereby issued as follows:

All workers at the Chino Mines Division of Kennecott Copper Corp., Hurley, N. Mex., including the Silver City, N. Mex., mine who became totally or partially separated from employment on or after September 1, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 14th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[4510-28]

[TA-W-2841]

CHLORIDE PYROTECTOR, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2841: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 4, 1978, in response to a worker petition received on December 16, 1977, which was filed on behalf of workers and former workers producing smoke and heat detectors at the Pyrotector Division of Chloride, Inc., Hingham, Mass.

The investigation revealed that, in addition to smoke and heat detectors, a small quantity of flame detectors for specialized uses are produced. The correct company name is Chloride Pyrotector, Inc.

The notice of investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3777). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Chloride Pyrotector, Inc., its customers, the Center for Fire Research of the National Bureau of Standards, the U.S. Department of Commerce, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met.

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Imports of smoke detectors (residential units) increased absolutely in 1976 compared to 1975, and increased both absolutely and relative to domestic production in 1977 compared to 1976.

Imports of commercial smoke detectors decreased absolutely and relatively both in 1976 and in 1977 compared to the previous year.

A sample of customers of Chloride Pyrotector was selected and surveyed. Of those customers who responded, who purchase residential smoke detectors from Pyrotector, all but one purchased no imports. The import purchases of that one customer decreased in value in 1977 compared to 1976.

Of those customers responding to the survey who purchase commercial units from Pyrotector, one reported purchasing imports. These import purchases were made in 1977, and amounted to less that 1 percent of total purchases from all sources by that customer in that year. At the same time, that customer's purchases from Pyrotector increased in 1977 compared to 1976.

CONCLUSION

After careful review I determine that all workers of Chloride Pyrotector, Inc., Hingham, Mass., are denied eligibility to apply for adustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-3556]

EVA FISHER DRESS CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3556: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 27, 1978 in response to a worker petition received on April 10, 1978 which was filed by the International Ladies' Garment Workers Union on behalf of former workers producing ladies' designer or couture ready-to-wear clothing at Eva Fisher Dress Co., Los Angeles, Calif.

The notice of investigation was published in the FEDERAL REGISTER on May 16, 1978 (43 FR 21769). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Eva Fisher Dress Co., its customers, the U.S. Department of Commerce, the United States International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

U.S. imports of women's, misses', and children's dresses decreased from 1,655 thousand dozen in 1975 to 1,614 thousand dozen in 1976 to 1,420 thou-

sand dozen in 1977. The import to domestic production ratio decreased from 8.0 percent in 1976 to 6.7 percent

hearing was requested and none was held.

The information upon which the de-

[4510-28]

[TA-W-3027]

The drop in production and employment at Fort Pitt Steel Casting can therefore be attributed to cutbacks in

U.S. imports of women's misses and children's slacks and shorts increased in 1975 to 10,067 thousand dozen, in-

hearing was requested and none was held.

The information upon which the de-

sand dozen in 1977. The import to domestic production ratio decreased from 8.0 percent in 1976 to 6.7 percent in 1977. Domestic production information was not available for 1978.

U.S. imports of women's, misses', and children's suits decreased from 412 thousand dozen in 1975 to 408 thousand dozen in 1976 to 384 thousand dozen in 1977. The import to domestic production ratio decreased from 11.4 percent in 1976 to 10.5 percent in 1977.

Eva Fisher Dress Co. contracted almost exclusively for one manufacturer. Industry sources and customers of the manufacturer who were surveyed indicated that price competition is not an important factor in the market of ladies' designer apparel. Relatively few stores carry European designer clothing, particularly on a large scale, which adds to its exclusivity, and makes it less of a substitute for mainstream American designer clothing. Customers base a decision to buy from a particular domestic manufacturer almost entirely upon exclusivity and style.

CONCLUSION

After careful review, I determine that workers of Eva Fisher Dress Co., Los Angeles, Calif., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 18th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

F. E. OLDS & SON, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3174: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 21, 1978, in response to a worker petition received on February 2, 1970, which was filed by the United Steelworkers of America on behalf of workers and former workers producing brass wind instruments at F. E. Olds & Son, Inc. (a division of Norlin Music Corp.), Fullerton, Calif.

The notice of investigation was published in the FEDERAL REGISTER on March 3, 1978 (43 FR 8864). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from F. E. & Son, Inc., Norlin Music Corp., its customers, the U.S. Department of Commerce, the United States International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of brass wind musical instruments increased from 38,781 units in 1976 to 46,710 units in 1977.

The import to domestic production ratio for brass wind musical instruments increased from 18.2 percent in 1976 to 25.7 percent in 1977.

Over 95 percent of F. E. Old's production is sold by its parent firm, Norlin Music Corp. A Department survey was conducted with customers of Norlin Music Corp. Some of the surveyed customers indicated that they had increased their purchases of imported brass wind musical instruments, while decreasing purchases from Norlin from 1976 to 1977 and during the first quarter of 1978 as compared to the first quarter of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with brass wind musical instruments produced by F. E. Olds & Son, Inc., Fullerton, Calif. (a division of Norlin Music Corp.) contributed importantly to the decline in sales and production and to the total or partial separation of workers at the plant.

In accordance with the provisions of the Act, I make the following certification:

All workers at F. E. Olds & Son, Inc., Fullerton, Calif., who became totally or partially separated from employment on or after April 29, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 8th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3027]

FORT PITT STEEL CASTING DIVISION—CONVAL PENN, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3027: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 6, 1978, in response to a worker petition received on January 30, 1978, which was filed by the United Steelworkers of America on behalf of workers and former workers producing steel castings at Fort Pitt Steel Casting Division—Conval Penn, Inc., McKeesport, Pa.

The notice of investigation was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 7064). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Fort Pitt Steel Casting Division—Conval Penn, Inc., its customers, the U.S. Department of Commerce, the United States International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

U.S. imports of steel castings increased from $27.1 million in 1976 to $33.9 million in 1977. The imports to domestic production ratio increased from 1.1 percent in 1976 to 1.3 percent in 1977. This ratio has not exceeded 1.3 percent for the past 4 years.

Fort Pitt Steel Casting Division—Conval Penn, Inc., specializes in the casting of industrial valve parts, and is a wholly-owned subsidiary of Conval Corp. Over 50 percent of Fort Pitt's production is sold to two other Conval Corp. divisions for assembly and finishing into valves. Fort Pitt's sales of cast steel valve parts to the two Conval Corp. divisions, which are captive customers of the Fort Pitt Division, increased in 1977 compared to 1976.

The drop in production and employment at Fort Pitt Steel Casting can therefore be attributed to cutbacks in purchases by outside customers. A survey of outside customers revealed that none of these customers decreased purchases from Fort Pitt and increased purchases from foreign sources in 1977 as compared to 1976.

CONCLUSION

After careful review, I determine that all workers of Fort Pitt Steel Casting Division—Conval Penn, Inc., McKeesport, Pa., are denied eligibility to apply for trade adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-2689]

GAMS

Certification Regarding Eligibility To Apply For Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2689: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 1, 1977, in response to a worker petition received on November 14, 1977, which was filed by the International Ladies Garment Workers Union on behalf of workers and former workers producing ladies' slacks and jackets at GAMS, Elizabeth, N.J. The investigation revealed that ladies' slacks accounted for over 90 percent of production at GAMS.

The notice of investigation was published in the FEDERAL REGISTER on December 16, 1977 (42 FR 63484). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of GAMS, its customers, the National Cotton Council of America, the U.S. Department of Commerce, the United States International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of women's misses and children's slacks and shorts increased in 1975 to 10,067 thousand dozen, increased in 1976 to 11,040 thousand dozen, and increased in 1977 to 11,622 thousand dozen.

The imports to domestic production ratio for women's misses' and children's slacks and shorts increased to 35.2 percent in 1975 and further increased to 36.4 percent in 1976.

A survey of the manufacturers for whom GAMS performed contract work and one of the customers of one of those manufacturers indicated significant import penetration. One manufacturer reduced purchases from GAMS and increased purchases of imported ladies' slacks. The customers of another manufacturer indicated increases in purchases of imported ladies' slacks of 185 percent in 1976 and 158 percent in 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies' slacks produced by GAMS, Elizabeth, N.J. contributed importantly to the declines in production and to the total or partial separation of workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers at GAMS, Elizabeth, N.J. who became totally or partially separated from employment on or after June 18, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and PLanning.

[4510-28]

[TA-W-3827]

GENERAL CABLE CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3827: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 12, 1978, in response to a worker petition received on June 9, 1978, which was filed on behalf of all workers at the Warrenton, Mo. plant of General Cable Corp.

The notice of investigation was published in the FEDERAL REGISTER on June 27, 1978 (43 FR 27925). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of General Cable Corp., the U.S. Department of Commerce, the United States International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility, each of the group eligibility requirements of section 222 of the Act must be met. Regardless of whether any of the other criteria have been met, the following criterion has not been met:

That sales or production, or both of such firm or subdivision have decreased absolutely.

Annual sales and production of copper wire bar increased in quantity from 1976 to 1977 and increased in the first half of 1978 compared to the same 1977 period.

CONCLUSION

After careful review, I determine that all workers of the Warrenton, Mo. plant of General Cable Corp. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 18th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-3619]

GRACE COAT CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3619: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of Act.

The investigation was initiated on May 8, 1978, in response to a worker petition received on April 28, 1978, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Grace Coat Co., Hoboken, N.J.

The notice of investigation was published in the FEDERAL REGISTER on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Grace

Coat Co., its customers (manufacturers), the U.S. Department of Commerce, the United States International

adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on

All workers at Handi-Bag Co., Inc., Bags by Trudy, Bags by Scobe, Nancy Bag Corp and Bags by Gail, Inc., New York, N.Y. who

from 8 percent in 1976 to 6.7 percent in 1977.

U.S. imports of women's, misses' and

principally from officials of International Telephone & Telegraph Co., the U.S. Department of Commerce, the

which was filed on the International Ladies' Garment Workers' Union on behalf of workers and former workers

Coat Co., its customers (manufacturers), the U.S. Department of Commerce, the United States International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. The Department's investigation revealed that all of the requirements have been met.

U.S. imports of women's, misses', and children's coats and jackets increased from 2,252 thousand dozen in 1976 to 2,723 thousand dozen in 1977. Imports declined from 590 thousand dozen in the first quarter of 1977 to 572 thousand dozen in the first quarter of 1978. The ratio of imports to domestic production increased from 48.3 percent in 1976 to 54.9 percent in 1977.

The Department conducted a survey of the principal manufacturer for which Grace Coat Co. worked in 1976 and 1977. This manufacturer reported that it reduced purchases from Grace Coat Co. and increased purchases of imported ladies' coats in 1977 compared to 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the ladies' coats produced at Grace Coat Co., Hoboken, N.J., contributed importantly to the decline in sales and to the separation of workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of Grace Coat Co., Hoboken, N.J., who become totally or partially separated from employment on or after March 23, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 18th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-3538, 3538A, 3538B, 3538C, 3538D]

HANDI-BAG CO., INC. ET AL.

Certifications Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3538, 3538A, 3538B, 3538C, 3538D: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 25, 1978, in response to a worker petition received on April 4, 1978, which was filed on behalf of workers and former workers producing ladies' vinyl handbags, at Handi-Bag Co., Inc. and Bags by Trudy, Inc., The investigation was expanded to include Bags by Scobe, Inc., Nancy Bag Corp. and Bags by Gail, Inc., all affiliates of Handi-Bag Co., Inc.

The notice of investigation was published in the FEDERAL REGISTER on May 5, 1978 (43 FR 19478-79). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Handi-Bag Co., Inc., its customers, the U.S. Department of Commerce, the United States International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of handbags increased from 57.9 million units in 1975 to 90.2 million units in 1976 to 92.8 million units in 1977. U.S. imports increased 53.8 percent from 22.1 million units in the first quarter of 1977 to 34.0 million units in the first quarter of 1978.

The ratio of imports to domestic production increased from 73.5 percent in 1975 to 111.1 percent in 1976 to 116.6 percent in 1977.

U.S. imports of plastic handbags increased from 31.9 million units in 1975 to 53.9 million units in 1976 and decreased to 48.5 million units in 1977. Imports increased 11.0 percent from 11.8 million units in the first quarter of 1977 to 13.1 million units in the first quarter of 1978.

Customers representing a significant proportion of Handi-Bag Co., Inc.'s sales in 1976 and 1977 decreased their purchases from the subject firm and increased their import purchases in 1977 compared to 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies' vinyl handbags produced by Handi-Bag Co., Inc., Bags by Trudy, Bags by Scobe, Inc., Nancy Bag Corp., and Bags by Gail Inc., New York, N.Y., contributed importantly to the total or partial separation of workers at these plants. In accordance with the provisions of the Act, I make the following certification:

All workers at Handi-Bag Co., Inc., Bags by Trudy, Bags by Scobe, Nancy Bag Corp and Bags by Gail, Inc., New York, N.Y. who became totally or partially separated from employment on or after March 28, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3523]

HELGA, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3523: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 18, 1978, in response to a worker petition received on April 10, 1978, which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing ladies' designer or couture ready-to-wear clothing at Helga, Inc., Los Angeles, Calif.

The notice of investigation was published in the FEDERAL REGISTER on May 2, 1978 (43 FR 18789). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Helga, Inc., its customers, the U.S. Department of Commerce, the United States International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

U.S. imports of women's, misses' and children's dresses decreased from 1,655 thousand dozen in 1975 to 1,614 thousand dozen in 1977. The import to domestic production ratio decreased

from 8 percent in 1976 to 6.7 percent in 1977.

U.S. imports of women's, misses' and children's suits decreased from 412 thousand dozen in 1975 to 408 thousand dozen in 1976 and to 384 thousand dozen in 1977. The import to domestic production ratio decreased from 11.4 percent in 1976 to 10.5 percent in 1977.

Helga, Inc., is a manufacturer of ladies' designer of couture ready-to-wear clothing. Sales and production increased in value in the first quarter of 1978 compared to the same period of 1977.

Industry sources and customers of Helga who were surveyed indicated that price competition is not an important factor in the market of ladies' designer apparel. Customers base a decision to buy from a particular manufacturer—domestic or foreign—almost entirely upon exclusivity and style.

CONCLUSION

After careful review, I determine that workers of Helga, Inc., Los Angeles, Calif., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28]

[TA-W-3697]

INTERNATIONAL TELEPHONE & TELEGRAPH CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3697: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 11, 1978, in response to a worker petition received on April 27, 1978, on behalf of all workers producing undersea telecommunications cable at the Cable-Hydrospace Division of International Telephone & Telegraph Co., National City, Calif.

The notice of investigation was published in the FEDERAL REGISTER on May 30, 1978 (43 FR 23036). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of International Telephone & Telegraph Co., the U.S. Department of Commerce, the United States International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that increases of imports of articles like or directly competitive with the articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

The cable produced at the Cable-Hydrospace Division of ITT is primarily used as linkage between communications systems in the United States and those in the rest of the world. A Federal Communications Commission decision of November 1977 not to build a seventh transatlantic cable was a major factor in ITT's decision to close the National City, Calif., plant.

The Department's investigation revealed that U.S. imports of undersea telecommunications cable have been negligible from 1975 through the first half of 1978.

CONCLUSION

After careful review I determine that all workers of the Cable-Hydrospace Division of International Telephone & Telegraph Co., National City, Calif., are denied eligibility to apply for trade adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28]

[TA-W-3649]

JZ COAT CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3649: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 8, 1978, in response to a worker petition received on April 28, 1978, which was filed on the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at JZ Coat Co., Jersey City, N.J.

The notice of investigation was published in the FEDERAL REGISTER on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of JZ Coat Co., its manufacturers, the U.S. Department of Commerce, the United States International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or subdivision have contributed importantly to the total or partial separation, or threat thereof, and to the absolute decline in sales or production.

The Department's investigation indicated that employment declines at JZ Coat Co. in the first half of 1977 and again in the first half of 1978 were the result of normal seasonal fluctuations in production. Employment and production at JZ Coat increased in the first 5 months of 1978 compared to the same period in 1977. The layoffs in the first half of 1978 ended earlier in 1978 than in 1977.

CONCLUSION

After careful review, I determine that all workers of JZ Coat Co., Jersey City, N.J. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 18th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-2691, 2692]

KADIMAH KNITS PLANT NO. 1 AND PLANT NO. 2

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of

TA-W-2691, 2692: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 25, 1978, in response to a worker petition received on April 4, 1978, which was filed on behalf of workers and former workers producing ladies' vinyl handbags, at Handi-Bag Co., Inc. and Bags by Trudy, Inc., The investigation was expanded to include Bags by Scobe, Inc., Nancy Bag Corp. and Bags by Gail, Inc., all affiliates of Handi-Bag Co., Inc.

The notice of investigation was published in the FEDERAL REGISTER on May 5, 1978 (43 FR 19478-79). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Handi-Bag Co., Inc., its customers, the U.S. Department of Commerce, the United States International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of handbags increased from 57.9 million units in 1975 to 90.2 million units in 1976 to 92.8 million units in 1977. U.S. imports increased 53.8 percent from 22.1 million units in the first quarter of 1977 to 34.0 million units in the first quarter of 1978.

The ratio of imports to domestic production increased from 73.5 percent in 1975 to 111.1 percent in 1976 to 116.6 percent in 1977.

U.S. imports of plastic handbags increased from 31.9 million units in 1975 to 53.9 million units in 1976 and decreased to 48.5 million units in 1977. Imports increased 11.0 percent from 11.8 million units in the first quarter of 1977 to 13.1 million units in the first quarter of 1978.

Customers representing a significant proportion of Handi-Bag Co., Inc.'s sales in 1976 and 1977 decreased their purchases from the subject firm and increased their import purchases in 1977 compared to 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies' vinyl handbags produced by Handi-Bag Co., Inc., Bags by Trudy, Bags by Scobe, Inc., Nancy Bag Corp., and Bags by Gail Inc., New York, N.Y., contributed importantly to the total or partial separation of workers at these plants. In accordance with the provisions of the Act, I make the following certification:

All workers at Handi-Bag Co., Inc., Bags by Trudy, Bags by Scobe, Nancy Bag Corp and Bags by Gail, Inc., New York, N.Y. who became totally or partially separated from employment on or after March 28, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of September 1978.

V 43 / 187 SEP 26 78 V 4

TA-W-2691, 2692: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 1, 1977 in response to a worker petition received on November 14, 1977, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' slacks and jackets at plant No. 1 and plant No. 2 of Kadimah Knits, Inc., Elizabeth, N.J. The investigation revealed that ladies' slacks accounted for over 90 percent of production of both plants.

The notice of investigation was published in the FEDERAL REGISTER on December 16, 1977 (42 FR 63484). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Kadimah Knits, its manufacturers and, their customers, the National Cotton Council of America, the U.S. Department of Commerce, the United States International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustments assistance, each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

United States imports of women's, misses' and children's slacks and shorts increased in 1975 to 10,067 thousand dozen, increased in 1976 to 11,040 thousand dozen, and increased in 1977 to 11,622 thousand dozen.

The imports to domestic production ratio for women's misses' and children's slacks and shorts increased to 35.2 percent in 1975 and further increased to 36.4 percent in 1976.

A survey of the manufacturers for whom Kadimah Knits performed contract work and of the customers of one of those manufacturers indicated significant import penetration. One manufacturer reduced purchases from Kadimah Knits and increased purchases of imported ladies' slacks. The customers of another manufacturer indicated increases in purchases of imported ladies' slacks of 185 percent in 1976 and 158 percent in 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies' slacks produced by plants No. 1 and No. 2 of Kadimah Knits, both of Elizabeth, N.J., contributed importantly to the decline in production and to the total or partial separations of workers of those plants. In accordance with the provisions of the Act, I make the following certification:

All workers of Kadimah Knits, Inc., plant No. 1 at 1144 Elizabeth Avenue, Elizabeth, N.J.; and all workers of Kadimah Knits, Inc., plant No. 2 at 107 Trumbull Street, Elizabeth, N.J. who became totally or partially separated from employment on or after November 11, 1976, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 11th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-2955]

KAISER STEEL CORP.

Negative Determination Regarding Application for Reconsideration

By application dated August 14, 1978, counsel for workers at the Napa, Calif., plant of Kaiser Steel Corp. requested administrative reconsideration of the Department of Labor's impact date in its certification regarding eligibility to apply for worker adjustment assistance. This determination was published in the FEDERAL REGISTER on July 18, 1978 (43 FR 30930).

Pursuant to 29 CFR 90.18(c), reconsideration may be granted under the following circumstances:

(1) If it appears, on the basis of facts not previously considered, that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts previously considered; or

(3) If, in the opinion of the certifying officer, a misinterpretation of facts or of the law justifies reconsideration of the decision.

In his application, counsel makes a basic claim that based upon a certification covering workers at the Fontana, Calif., mill of Kaiser Steel Corp. (TA-W-1266), the impact date established for TA-W-2955, Napa, Calif. plant of Kaiser Steel Corp., should be changed from January 5, 1977, to October 10, 1975.

In defense of his claim, counsel raises two basic issues:

(1) That workers engaged in the production of steelplate at the Fontana plant were, and could only have been, certified as eligible for trade adjustment assistance because of the reduction of shipments of steelplate to the Napa plant where it was further processed into pipe. Counsel refers to data in the notice of determination for TA-W-1266 showing that employment of steelplate workers decreased 10 percent in the fourth quarter of 1975 compared to the same quarter in 1974. He further points out that production of plate at Fontana, to be shipped to the Napa plant, decreased 20 percent in 1975 compared to 1974 whereas production of plate for sale to all other customers declined only 11 percent during the same period. Thus, counsel concludes that over half of the above-mentioned decrease in employment was due to the decrease in shipments to Napa. Since counsel interprets the regulations as to what constitutes a significant proportion of the workforce as being a total of 5-percent unemployment, where more than 50 workers are involved, he concludes that Fontana workers engaged in the production of plate could only have been certified due to the decreased shipments to the Napa plant, and assumes that this was due to import influence upon Napa's production of pipe.

Although it may be true that decreases of shipments to the Napa plant contributed to the layoffs at the Fontana mill, the Department's decision was not based on shipments to the Napa plant. The notice of determination shows that production of plate at the Fontana mill for sale to customers (excluding Napa), declined 30 percent in 1976 compared to 1975. Shipments of plate to those customers decreased 26 percent in 1976 compared to 1975. Employment of workers engaged in the production of steelplate not only declined 10 percent in the fourth quarter of 1975 compared to the same quarter in 1974, but also decreased 24 percent in 1976 compared to 1975. The important element is that increased imports of like or directly competitive articles were found to have contributed importantly to such declines in production, shipments, and employment at Fontana, not through shipments to Napa—because Napa switched to buying foreign plate or because Napa's customers switched to imported pipe—but because other customers of Fontana decreased purchases of Fontana's plate while increasing purchases of imported plate.

(2) The second basic issue raised by counsel is that just as in TA-W-2955 where the investigation was expanded to cover not only the Napa plant, but also the Vallejo and Oakland assembly yards, so in TA-W-1266 the investigation should have covered the Napa plant without a need for a new petition. According to counsel, this is so because production of plate as the Fontana mill was integrated into Napa's production of pipe (between 35 to 40 percent of Fontana's production of plate was shipped to Napa to be transformed into pipe). Furthermore, counsel claims that: "But for the adverse impact of imports upon Napa's Kaiser Steel workers, Kaiser Steel workers at Fontana an integrated part of the production of steel pipe at Napa would never have been certified under TA-W-1266."

It was not because of the adverse impact of imports upon Napa's pipe, however, that the Department certified plateworkers at Fontana. The certification was based on the impact of imports of competitive plate upon the production and sale of plate at Fontana, and upon the workers engaged in such production. TA-W-1266 did not deal with the impact of pipe imports on the pipes produced at Napa. The Department had not received a petition for the Napa plant at that time, and the investigation dealt with entirely different products produced at the Fontana mill. The Department knew that 35 to 40 percent of Fontana's plate production was shipped to Napa to be transformed into, and sold as, pipe. It would not have been appropriate for the Department to have gone into the issue of import influence upon Napa's pipe, in order to determine import influence upon Fontana's plate. The Trade Act of 1974 requires that increased imports of like or directly competitive articles have contributed importantly to worker separations in order to issue a certification. Pipe is not like or directly competitive with plate within the meaning of the Act.

Secondly: The comparison of the relationship that exists between the Vallejo and Oakland, Calif., assembly yards and the Napa plant on one hand, and the Napa plant and Fontana mill on the other, is not relevant. While Napa used Fontana's plate to produce pipe, a different product, the Vallejo and Oakland yards were an integral part of Napa's production of fabricated steel structures, since their function was to assemble large steel subassemblies fabricated at Napa.

CONCLUSION

After review of the application and the investigative file, I conclude that there has been no error or misinterpretation of fact or misinterpretation of the law which would justify reconsideration of the Department of Labor's prior decision. The application is, therefore, denied.

Signed at Washington, D.C., this 15th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3597]

LIDO FASHIONS, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3597: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the act.

The investigation was initiated on May 8, 1978, in response to a worker petition received on April 28, 1978, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Lido Fashions, Inc., Paterson, N.J.

The notice of investigation was published in the FEDERAL REGISTER on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Lido Fashions, Inc., its customers (manufacturers), the U.S. Department of Commerce, the United States International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. The Department's investigation revealed that all of the requirements have been met.

U.S. imports of women's, misses', and children's coats and jackets increased from 2,252 thousand dozen in 1976 to 2,723 thousand dozen in 1977. Imports declined from 590 thousand dozen in the first quarter of 1977 to 572 thousand dozen in the first quarter of 1978. The ratio of imports to domestic production increased from 48.3 percent in 1976 to 54.9 percent in 1977.

The Department conducted a survey of the principal manufacturers for which Lido Fashions, Inc., worked in 1976 and 1977. Manufacturers that accounted for a majority of sales in 1976 reduced purchases from Lido Fashions, Inc., and increased purchases of imported ladies' coats in 1977 compared to 1976. Manufacturers that accounted for a majority of sales in 1977 reduced purchases from Lido Fashions, Inc., and increased purchases of imports in the first quarter of 1978 compared to the first quarter of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the ladies' coats produced at Lido Fashions, Inc., Paterson, N.J., contributed importantly to the decline in sales and to the separation of workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of Lido Fashions, Inc., Paterson, N.J., who became totally or partially separated from employment on or after November 1, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3598]

N & R FASHIONS, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3598: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 8, 1978, in response to a worker petition received on April 28, 1978, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats and raincoats at N & R Fashions, Inc., Paterson, N.J.

The notice of investigation was published in the FEDERAL REGISTER on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of N & R Fashions, Inc., its customers (manufacturers), the U.S. Department of Commerce, the United States International Trade Commission, the National Cotton Coucil of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. The Department's investigation revealed that all of the requirements have been met.

U.S. imports of women's, misses', and children's coats and jackets increased from 2,252 thousand dozen in 1976 to 2,723 thousand dozen in 1977. Imports declined from 590 thousand dozen in the first quarter of 1977 to 572 thousand dozen in the first quarter of 1978. The ratio of imports to domestic production increased from 48.3 percent in 1976 to 54.9 percent in 1977.

The Department conducted a survey of the principal manufacturers for which N & R Fashion, Inc., worked in 1976 and 1977. Manufacturers that accounted for 100 percent of sales in 1976 reduced purchases from N & R Fashion, Inc., and increased purchases of imported ladies' coats in 1977 compared to 1976. Manufacturers that accounted for 100 percent of sales in

1977 increased purchases of imports in the first quarter of 1978 compared to the first quarter of 1977. N & R Fash-

requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have

Manufacturing Co. also produces ladies' raincoats.

The notice of investigation was pub-

garding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

[4510-28]

[TA-W-3511]

PHELPS DODGE REFINING CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3511: Investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 13, 1978, in response to a worker petition received on April 3, 1978, which was filed by the United Steelworkers of America on behalf of workers and former workers producing electrolitically refined copper at the El Paso, Tex., refinery of the Phelps Dodge Refining Corp.

The notice of investigation was published in the FEDERAL REGISTER on April 25, 1978 (43 FR 17552). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Phelps Dodge Refining Corp., the Department of Commerce, the United States International Trade Commission, U.S. Department of the Interior, the American Metals Market, Metal Bulletin, Metals Week, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

United States imports of refined copper increased from 147 thousand short tons in 1975 to 384 thousand short tons in 1976. Imports then increased to 391 thousand short tons in 1977. Imports increased from 66 thousand short tons in the first quarter of 1977 to 150 thousand short tons for the same period in 1978.

The imports to domestic production ratio increased from 8.6 percent in 1975 to 21.0 percent in 1976 and then increased to 22.2 percent in 1977. The imports to domestic production ratio increased from 13.1 percent in the first quarter of 1977 to 34.1 percent for the same period in 1978.

Company imports of refined, blister, and concentrated copper increased 134.6 percent from 1976 to 1977. Imports increased 1,099.3 percent in the first quarter of 1978 compared to the same period in 1977. Imports as a percentage of sales increased from 0.7 percent in 1976 to 1.6 percent in 1977 and to 6.6 percent in the first quarter of 1978.

Imports of copper are affected by the differential between the domestic producers price for copper and the price established by the LME (London Metal Exchange). When the LME price drops more than the estimated transportation cost of 5-8 cents per pound below the domestic producers price, the demand of imported copper increases. During May and June 1977, the LME price was almost 11 cents per pound below the domestic producers price and in July and August 1977 the LME price was almost 12 cents per pound below the domestic producers price. At the same time, the abundant supply of copper stocks in the foreseeable future provides no reason for domestic consumers of copper to maintain ties with domestic producers for purposes of a guarantee against copper shortages. Consequently, in 1977 and in the first quarter of 1978, when many domestic producers curtailed production because of the depressed market price of copper, imports of refined copper increased in 1977 compared to 1976 and increased 127.3 percent in the first quarter of 1978 compared to the same period in 1977.

Price pressure from imported copper has reduced the ability to profitably mine domestic ore and convert it to copper concentrate and refined copper. The current domestic market price of copper is 64 cents per pound. Industry sources indicate that the production costs of domestic copper mines per pound is equal to or higher than the market price. Consequently, domestic producers have been breaking even or operating at a loss.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the electrolitically refined copper produced by the El Paso, Tex., refinery of the Phelps Dodge Refining Corp. contributed importantly to the decline in sales and production and to the total or partial separation of workers at the facility. In accordance with the provisions of the Act, I make the following certification:

All workers at the Phelps Dodge Refining Corp., El Paso, Tex., who became totally or partially separated from employment on or after August 10, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 18th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc. 78-26895 Filed 9-25-78; 8:45 am]

[4510-28]

[TA-W-2982]

PRATT MANUFACTURING CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2982: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 30, 1978 in response to a worker petition received on January 11, 1978, which was filed on behalf of workers and former workers producing large diameter turntable bearings at Pratt Manufacturing Co., Salineville, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 7069). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Pratt Manufacturing Co., its customers, the U.S. Department of Commerce, the United States International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met.

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

U.S. imports of lightweight turntable bearings 12 to 60 inches in diameter declined in value terms in 1976 compared to 1975 then increased in 1977 compared to 1976. The ratio of imports to domestic production declined from 24.8 percent in 1977 to 22.0 percent in 1977.

None of the customers of Pratt Manufacturing Co. that were surveyed reported any direct purchases of imports. One customer reported indirect imports. A survey of firms with which Pratt had lost bids for contract work revealed that all firms had awarded their contracts to the competition of Pratt Manufacturing Co. While this competition does import bearings, imports have declined in recent years while the value of domestic production has increased.

CONCLUSION

After careful review I determine that all workers of Pratt Manufacturing Co., Salineville, Ohio, are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 8th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3605]

RIVERPARK MANUFACTURING CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3605: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 8, 1978, in response to a worker petition received on April 28, 1978, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Riverpark Manufacturing Co., Paterson, N.J. The investigation revealed that Riverpark Manufacturing Co. also produces ladies' raincoats.

The notice of investigation was published in the FEDERAL REGISTER on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Riverpark Manufacturing Co., its customers (manufacturers), the U.S. Department of Commerce, the United States International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or subdivision have contributed importantly to the total or partial separation, or threat thereof, and to the absolute decline in sales or production.

The Department conducted a survey of the principal manufacturer for which Riverpark Manufacturing Co. worked in 1976 to 1977. The manufacturer surveyed, representing 100 percent of sales in 1976 and 1977, reduced purchases from Riverpark Manufacturing Co. and reduced imports in 1977 compared with 1976. Total sales by Riverpark increased in the first quarter of 1978 compared with the first quarter of 1977.

CONCLUSION

After careful review, I determine that all workers of the Paterson, N.J. plant of Riverpark Manufacturing Co. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28]

[TA-W-3905]

S.J. KNITS, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the result of TA-W-3905: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 22, 1978, in response to a worker petition received on June 22, 1978, which was filed by Distributive Workers of America, on behalf of workers and former workers producing women's knit apparel at S.J Knits, Inc., Ridgefield, N.J.

The notice of investigation was published in the FEDERAL REGISTER on July 7, 1978 (43 FR 29365-66). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of S.J. Knits, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses', and children's dresses have increased absolutely in the first quarter of 1978 as compared to the first quarter of 1977 going from 371,000 dozen to 403,000 dozen, respectively. Imports of women's, misses', and children's suits, including skirt suits, pantsuits, and jumpsuits have increased absolutely in the first quarter of 1978 compared to the same period of 1977 going from 62,000 dozen to 104,000 dozen, respectively.

All workers of S.J. Knits, Inc. were permanently laid off in May 1978. S.J. Knits went out of business in June 1978.

In April 1978, the manufacturer that represented a major portion of S.J. Knits contract work in 1978, ceased contract work with S.J. Knits. A departmental survey of this manufacturer indicated it had begun importing women's knit apparel in 1976, and increased its import purchases in 1977 and 1978 coinciding with decreases in contract work with S.J. Knits, Inc.

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's knit apparel produced at S.J. Knits, Inc. contributed importantly to the decline in sales or production and to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at S.J. Knits, Inc., Ridgefield, N.J., who became totally or partially separated from employment on or after November 12, 1977, are eligible to apply for adjust-

ment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this

which was filed on behalf of workers and former workers employed by Warren Young, Johnstown, Pa., who

town, Pa. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of

[TA-W-3910]

VERNITRON, INC. (VRN)

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3910: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 26, 1978, in response to a worker petition received on June 23, 1978, which was filed on behalf of all workers producing electric components and potentiometers at the St. Petersburg, Fla., plant of Vernitron, Inc.

The notice of investigation was published in the FEDERAL REGISTER on July 7, 1978 (43 FR 29364). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of VRN, Inc., the U.S. Department of Commerce, the United States International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. It is concluded that all of the requirements have been met.

U.S. imports of variable nonwire wound resistors, a category that includes the nonwire wound potentiometers produced at the St. Petersburg plant, increased in quantity in the first 3 months of 1978 to 64.4 million units from 55.8 million units in the first 3 months of 1977. The ratio of imports of variable nonwire wound resistors to U.S. production increased to 37.4 percent in the first 3 months of 1978 from 30.3 million units in the first 3 months of 1977.

Company imports of potentiometers, both wire and nonwire wound, increased in the first 6 months of 1978 compared to the first 6 months of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with potentiometers produced by Vernitron, Inc., St. Petersburg, Fla., contributed importantly to the total or partial separation of workers at the plant. In accordance with the provisions of the Act, I make the following certification:

All workers at Vernitron, Inc., St. Petersburg, Fla., who became totally or partially separated from employment on or after March 31, 1978, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-3265]

VICTOR GLOVES MANUFACTURING CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3265: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 27, 1978, in response to a worker petition received on February 15, 1978, which was filed by the Amalgamated Clothing & Textile Workers Union on behalf of former workers producing foot protectors, toys, dolls, and other sundry item at Victor Gloves Manufacturing Corp., New York, N.Y. During the course of the investigation, it was established that Victor Gloves Manufacturing Corp. produced work gloves, foot protectors, and laboratory garments.

The notice of investigation was published in the FEDERAL REGISTER on March 14, 1978 (43 FR 10648). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Victor Gloves Manufacturing Corp., its customers, the U.S. Department of Commerce, the United States International Trade Commission, the National Association of Hosiery Manufacturers, the National Association of Uniform Manufacturers, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The investigation revealed that, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations or threat thereof, and to the absolute decline in sales or production.

Approximately 50 to 60 percent of 1976 and 1977 sales by Victor Gloves Manufacturing Corp. consisted of lightweight work gloves for men and women, 30 to 35 percent of sales consisted of foot protectors, while the remainder of sales consisted of laboratory garments and various protective fabric coverings.

Evidence developed during the course of the investigation revealed that imports of laboratory garments are negligible. Imports of all hosiery, except pantyhose, declined from 1,552 thousand dozen in 1975 to 573 thousand dozen in 1976 and to 505 thousand dozen in 1977. The ratio of imports to domestic hosiery production declined from 0.31 percent in 1976 to 0.26 percent in 1977.

Customers surveyed who decreased purchases from Victor Gloves in 1977 from 1976 did not purchase imported work gloves or foot protectors.

CONCLUSION

After careful review, I determine that workers of Victor Gloves Manufacturing Corp., New York, N.Y., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3906]

WARREN YOUNG

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3906: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 22, 1978, in response to a worker petition received on April 25, 1978, which was filed on behalf of workers and former workers employed by Warren Young, Johnstown, Pa., who leased trucks to Birk Transfer, Inc., for the provision of transportation services to the Johnstown, Pa. plant of Bethlehem Steel Corp.

The notice of investigation was published in the FEDERAL REGISTER on July 7, 1978 (43 FR 29365). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Warren Young and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The Department has determined that services are not "articles" within the meaning of section 222 of the Act and that independent firms for which the subject firm provides services cannot be considered to be the "workers' firm."

Warren Young was an independent broker who provided trucks and drivers to Birk Transfer Co., Inc. on a need basis. Mr. Young ran his business as an individual and did not incorporate.

Warren Young was a subcontractor who owned the trucks used by his drivers. Mr. Young died in June 1977. The assets of the business were sold in August 1977.

Birk Transfer Co. contracted with Bethlehem Steel Corp.'s Johnstown, Pa. plant to provide intraplant transport services. Birk Transfer Co. contracted with Warren Young to provide trucks and drivers.

Employees of Warren Young were engaged in providing transportation services and did not produce an article within the meaning of section 222(3) of the Act.

Warren Young and his customers had no controlling interest in each other. All workers engaged in providing transportation services for Warren Young were employed by him. All personnel actions and payroll transactions were controlled by Warren Young. All employment benefits were provided and maintained by Warren Young. Workers were not at any time under supervision or employment by Birk Transfer Co., or Bethlehem Steel Corp. Thus, Warren Young must be considered the "workers' firm."

CONCLUSION

After careful review, I conclude that all workers at Warren Young, Johnstown, Pa. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1840]

WHITINSVILLE SPINNING RING CO.

Revised Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor issued a certification of eligibility to apply for adjustment assistance on August 23, 1977, applicable to workers and former workers producing spinning rings and twister rings at the Whitinsville, Mass., plant of Whitinsville Spinning Ring Co. The notice of certification was published in the FEDERAL REGISTER on September 2, 1977 (42 FR 44312).

At the request of the petitioners' attorney, a further investigation was instituted by the Director of the Office of Trade Adjustment Assistance. A review of the case revealed that some layoffs of nonseasonal workers occurred in the early part of February 1977. These layoffs were not covered by the original impact date of February 21, 1977.

The intent of the certification is to cover all workers at the Whitinsville, Mass., plant of Whitinsville Spinning Ring Co. who were affected by the decline in production of spinning and twister rings related to import competition. The certification, therefore, is revised, providing a new impact date of January 9, 1977.

The revised certification applicable to TA-W-1840 is hereby issued as follows:

All workers at the Whitinsville, Mass., plant of Whitinsville Spinning Ring Co. who became totally or partially separated from employment on or after January 9, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of September 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

WORKER ADJUSTMENT ASSISTANCE

Investigations Regarding Certifications of Eligibility To Apply

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under title II, chapter 2, of the Act in accordance with the provisions of subpart B of 29 CFR part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 6, 1978.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 6, 1978.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 14th day of September 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[4510-28]

UNALLOYED UNWROUGHT COPPER

Increased Imports

On August 23, 1978, the International Trade Commission (ITC) determined that increased imports of "Unalloyed Unwrought Coppper" are a substantial cause of serious injury, or the threat thereof, to the domestic industry for purposes of the import relief provisions of the Trade Act of 1974 (43 FR 38948).

Section 224 of the Trade Act directs the Secretary of Labor to initiate an industry study whenever the ITC begins an investigation under the import relief provisions of the Act. The purpose of the study is to determine the number of workers in the domestic industry petitioning for relief who have been or are likely to be certified as eligible for adjustment assistance and the extent to which existing programs can facilitate the adjustment of such workers to import competition. The Secretary is required to make a report of this study to the President and also make the report public (with the exception of information which the Secretary determines to be confidential).

The Department of Labor has concluded its report on "Unalloyed Unwrought Copper." The report found as follows:

1. Since April 3, 1975, the effective date of the adjustment assistance program, the U.S. Department of Labor has received 66 petitions involving workers in the three stages of refined copper production: copper mining and associated operations, copper smelting, and copper refining. Thirty-six of the petitions have been certified, eight denied, and twenty-two are still under investigation by the Department as of August 31, 1978. As of May 31, 1978 the Department paid out $24,875,896 in trade readjustment allowances to 11,970 workers involved in the three stages of refined copper production. It is not possible to break out payments by the various stages of production due to the integrated nature of the production facilities of some of the firms with certified workers.

In addition to the readjustment allowances the Department has paid out $87,205 in relocation allowances and $31,803 in job search allowances to certified workers in the industry. Also, the total number of workers entering training through May 31, 1978 was 868.

2. Employment in all three stages of refined copper production declined in 1977. Employment in copper mining and associated operations continued to decline in the first quarter of 1978 while copper smelter and refinery employment increased slightly. However, employment in all three stages of refined copper production is unlikely to improve substantially in the near future. Also, as the industry experiences increasing production costs due to pollution, and health and safety regulations there will be greater difficulty in competing with low priced imports. This may result in further reductions in employment. The majority of the displaced workers should be eligible for trade adjustment assistance.

3. An examination of local unemployment rates, available job vacancy data, and recent turnover data indicate reemployment prospects for separated workers in the three stages of refined copper production are generally poor for most separated workers. For areas with copper mine and associated operations, eight of the 18 areas had unemployment rates above the national average of 5.8 percent, unadjusted for April. In addition, some areas with relatively low April unemployment rates have since experienced deteriorating job market conditions due to mine closings.

For areas with copper smelters conditions appear to be less severe than for mining and associated operations but reemployment prospects remain unfavorable; 9 of the 16 areas had unemployment rates above the national average for April. For areas with copper refineries 11 of the 17 areas had unemployment rates above the national average and some recent operating cutbacks and closings by refineries have made job prospects poor for many separated workers. Also an examination of Employment Service vacancy data indicate that many areas with high unemployment rates also have a high ratio of workers registered seeking employment to the number of vacancies in common occupations found in the three stages of refined copper production.

4. An examination of the level of enrollment and the level of accrued expenditures relative to the planned level for CETA spon-

sors indicates that while adequate funding and client openings exist for many of the

findings and recommendations with respect to the Nation's employment

[7536-01]

NATIONAL FOUNDATION ON THE

meetings would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close these meetings

[7590-01]

Any person who wishes to have his

V 43/187 SEP 26 78 V4

sors indicates that while adequate funding and client openings exist for many of the CETA programs, some programs may have difficulty, from a funding and slot availability viewpoint, in meeting the training needs of eligible workers. This problem appears most common in areas with copper refineries and copper mining and associated operations.

A comparison of the worker characteristics for the three stages of refined copper production, and CETA client characteristics indicates there are some differences in age and sex distribution and probable economic position. The differences between worker characterstics and CETA client characteristics are most pronounced for refinery workers, who tend to be older and more predominately male than workers in the other two stages of production. Workers in mining and associated operations are closer to CETA client characteristics, and are more likely to be eligible for CETA programs.

For displaced workers not covered by CETA programs the Department has the authority to purchase specific training for trade impacted workers.

Copies of the Department report containing nonconfidential information developed in the course of the 6-month investigation may be purchased by contacting the Office of Trade Adjustment Assistance, U.S. Department of Labor, 200 Constitutiton Avenue NW., Washington, D.C. 20210, phone 202-523-7665.

Signed at Washington, D.C., this 15th day of September 1978.

HOWARD D. SAMUEL,
Deputy Under Secretary, International Affairs.

[4510-30]

NATIONAL COMMISSION FOR MANPOWER POLICY

MEETING

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463; 86 Stat. 770) notice is hereby given that the National Commission for Manpower Policy will sponsor a conference on November 3, 1978, in the Mount Vernon Room of the Sheraton Carlton Hotel, located at the corners of 16th and K Streets NW., Washington, D.C. The meeting will begin at 9 a.m. and adjourn at 5 p.m.

The National Commission for Manpower Policy was established pursuant to Title V of the Comprehensive Employment and Training Act of 1973 (Pub. L. 92-203). The Act charges the Commission with the broad responsibility of advising the President, the Congress, the Secretary of Labor, and other Federal agency administrators on national employment and training issues. The Commission is specifically charged with reporting annually to the President and the Congress on its findings and recommendations with respect to the Nation's employment and training policies and programs.

The agenda will be concerned with identifying and exploring how to obtain the advice and guidance of private sector employers on national employment issues. Specifically, the discussions will focus on current and future national employment issues and potential public/private approaches to them; initiatives to increase the employability and employment of the structurally unemployed; and alternative measures to increase private sector employment of the structurally unemployed.

Members of the general public or other interested individuals may attend the conference. Members of the public desiring to submit written statements to the Commission that are germane to the agenda may do so: *Provided*, That such statements are in reproducible form and are submitted to the Director no later than 2 days before and 7 days after the conference.

Additionally, members of the general public may request to make oral statements to the Commission to the extent that the time available for the conference permits. Such oral statements must be directly germane to the announced agenda and written applications must be submitted to the director of the Commission 3 days before the conference. This application shall identify the following: The name and address of the applicant; the subject of his or her presentation and its relationship to the agenda; the amount of time requested; the individual's qualifications to speak on the subject matter. The application shall also include a statement justifying why a written presentation would not suffice. The Chairman reserves the right to decide to what extent public oral presentation will be permitted at the conference. Oral presentations shall be limited to statements of fact and views and shall not include any questions of Commission members or other participants unless these questions have been specifically approved by the Chairman.

Minutes of the meeting, working papers, and other documents prepared for the conference will be available for public inspection 5 working days after the meeting at the Commission's headquarters located at 1522 K Street NW., Suite 300, Washington, D.C.

Signed at Washington, D.C., this 19th day of September 1978.

ISABEL V. SAWHILL,
Director, National Commission for Manpower Policy.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

ADVISORY COMMITTEE; HUMANITIES PANEL

Meeting

SEPTEMBER 18, 1978.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at 806 15th Street NW., Washington, D.C. 20506:

1. Date: October 12 and 13, 1978. Time: 9 a.m. to 5:30 p.m. Room: 807. Purpose: To review applications for the development of humanities public program formats submitted to the National Endowment for the Humanities for projects beginning after January 1, 1979.
2. Date: October 13, 1978. Time: 9 a.m. to 5:30 p.m. Room: 500. Purpose: To review conference proposals submitted to the National Endowment for the Humanities for projects beginning after December 1, 1978.
3. Date: October 16, 1978. Time: 9 a.m. to 5:30 p.m. Room: 11th floor conference room. Purpose: To review Germanic language applications submitted to the Translations Program of the National Endowment for the Humanities, for projects beginning April 1, 1979.
4. Date: October 19 and 20, 1978. Time: 9 a.m. to 5:30 p.m. Room: 807. Purpose: To review NEH institutional development grant applications submitted to the National Endowment for the Humanities for projects beginning after April 1, 1979.
5. Date: October 13, 1978. Time: 9 a.m. to 5:30 p.m. Room: 1130. Purpose: To review NEH summer seminar applications in science, technology, and human value submitted to the National Endowment for the Humanities for projects beginning after January 1, 1979.
6. Date: October 13 and 14, 1978. Time: 9 a.m. to 5:30 p.m. Room: 314. Purpose: To review NEH independent fellowship applications in all fields submitted to the National Endowment for the Humanities for projects beginning after January 1, 1979.
7. Date: October 16, 1978. Time: 9 a.m. to 5:30 p.m. Room: 314. Purpose: To review NEH summer seminar applications in classics submitted to the National Endowment for the Humanities for projects beginning after January 1, 1979.
8. Date: October 23, 1978. Time: 9 a.m. to 5:30 p.m. Room: 11th floor conference room. Purpose: To review Slavic language applications submitted to the translations program of the National Endowment for the Humanities, for projects beginning April 1, 1979.

Because the proposed meetings will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that the meetings would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close these meetings to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 805 15th Street NW., Washington, D.C. 20506, or call area code 202-724-0367.

STEPHEN J. MCCLEARY,
Advisory Committee, Management Officer.

ADVISORY COMMITTEE; HUMANITIES PANEL

Meeting

SEPTEMBER 6, 1978.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that a meeting of the Humanities Panel will be held at the Tulsa Public Library, 400 Civic Center, Tulsa, Okla., in the Third Floor Conference Room, from 9 a.m. to 5:30 p.m. on October 16, 1978.

The purpose of the meeting is to review applications for the development of humanities Public Library Program formats submitted to the National Endowment for the Humanities for projects beginning after January 1, 1979.

Because the proposed meeting will consider financial information and disclose information of a personal nature and disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 806 15th Street NW., Washington, D.C. 20506, or call area code 202-724-0367.

STEPHEN J. MCCLEARY,
Advisory Committee, Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-443-A and 50-444-A]

PUBLIC SERVICE CO. OF NEW HAMPSHIRE, ET AL., SEABROOK STATION, UNITS 1 AND 2

Receipt of Additional Antitrust Information: Time for Submission of Views on Antitrust Matters

Public Service Co. of New Hampshire, pursuant to section 103 of the Atomic Energy Act of 1954, as amended, filed on May 15, 1978, information requested by the Attorney General for Antitrust Review as required by 10 CFR Part 50, Appendix L. This information adds Massachusetts Municipal Wholesale Electric Co., Vermont Electric Cooperative, Inc., Maine Public Service Co., Taunton Municipal Lighting Plant Commission, and Bangor Hydro-Electric Co. as possible co-owners of the Seabrook station, units 1 and 2.

The information was filed by Public Service Co. of New Hampshire, the United Illuminating Co., Central Maine Power Co., Central Vermont Public Service Corp., the Connecticut Light & Power Co., Fitchburg Gas & Electric Light Co., Montaup Electric Co., New Bedford Gas & Edison Light Co., New England Power Co., Vermont Electric Power Co., Inc., Massachusetts Municipal Wholesale Electric Co., Vermont Electric Cooperative, Inc., Maine Public Service Co., Taunton Municipal Lighting Plant Commission, Bangor Hydro-Electric Co., and Town of Hudson, Mass., Light and Power Department in connection with their application for construction permits and operating licenses for the Seabrook station, units 1 and 2. The site for this plant is located in Rockingham County, N.H.

The original antitrust portion of the application was submitted on July 9, 1973, and Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicant's Environmental Report; Time for Submission of Views on Antitrust Matters, was published in the FEDERAL REGISTER on August 9, 1973 (38 FR 21522). The notice of hearing was published in the FEDERAL REGISTER on August 9, 1973 (38 FR 21519).

Copies of the above stated documents are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Exeter Public Library, Front Street, Exeter, N.H.

Information in connection with the antitrust review of this application can be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation.

Any person who wishes to have his views on the antitrust matters with respect to the Massachusetts Municipal Wholesale Electric Co., Vermont Electric Cooperative, Inc., Maine Public Service Co., Taunton Municipal Lighting Plant Commission, and Bangor Hydro-Electric Co., presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission on or before November 6, 1978.

Dated at Bethesda, Md., this 21st day of August 1978.

For the Nuclear Regulatory Commission.

STEVEN A. VARGA,
Chief, Light Water Reactors Branch No. 4, Division of Project Management.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS; SUBCOMMITTEE ON WASTE MANAGEMENT

Meeting

The ACRS Subcommittee on Waste Management will hold an open meeting on October 11-12, 1978 in Room 1046, 1717 H Street NW., Washington, D.C. 20555, to review NRC research regarding waste management for inclusion in the annual ACRS report to Congress on safety research. Notice of this meeting was published August 15 and September 21, 1978 (43 FR 36151 and 42826, respectively).

In accordance with the procedures outlined in the FEDERAL REGISTER on October 31, 1977 (42 FR 56972), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the designated Federal employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows: Wednesday, October 11, and Thursday, October 12, 1978, 8:30 a.m. until the conclusion of business each day.

The subcommittee may meet in executive session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full committee.

At the conclusion of the executive session, the subcommittee will hear

for Trade Negotiations, 1800 G Street, Room 725, Washington, D.C. 20506.

V 43 / 187 SE 26 78

At the conclusion of the executive session, the subcommittee will hear presentations by and hold discussions with representatives of the NRC staff, the Department of Energy, and their consultants, pertinent to the agenda items. The subcommittee may then caucus to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full committee.

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the designated Federal employee for this meeting, Mr. Raghwald Muller, telephone 202-634-1414, between 8:15 a.m. and 5 p.m., e.d.t.

Dated: September 25, 1978.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

ADVISORY COMMITTEE FOR TRADE NEGOTIATIONS

Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App. (the Act), notice is hereby given that a meeting of the Advisory Committee for Trade Negotiations will be held Wednesday, October 25, 1978, from 1 p.m. to 5 p.m. at the Office of the Special Representative for Trade Negotiations, 1800 G Street NW., Washington, D.C.

The purpose of this meeting will be to review and discuss the status of, and the United States strategy and objectives for, the multilateral trade negotiations currently underway in Geneva.

In accordance with section 10(d) of the Act, the meeting will not be open to the public because information falling within the purview of 5 U.S.C. 552b(c)(1) (the exception to the Government in the Sunshine Act for matters specifically required by Executive order to be kept secret in the interest of foreign policy) will be reviewed and discussed.

More detailed information can be obtained by contacting Phyllis O. Bonanno, Executive Director, Advisory Committee for Trade Negotiations, Office of the Special Representative for Trade Negotiations, 1800 G Street, Room 725, Washington, D.C. 20506.

PHYLLIS O. BONANNO,
Executive Director, Advisory Committee for Trade Negotiations.

ADVISORY COMMITTEE FOR TRADE NEGOTIATIONS

DETERMINATION OF CLOSING OF MEETING

The meeting of the Advisory Committee for Trade Negotiations (the Advisory Committee) to be held Wednesday, October 25, 1978, from 1 p.m. to 5 p.m. at the Office of the Special Representative for Trade Negotiations, 1800 G Street NW., Washington, D.C., will involve a review and discussion of the status of, and United States strategy and objectives for, the multilateral trade negotiations currently underway in Geneva. Such review and discussion will deal with information properly classified pursuant to Executive Order 11652 and specifically required by such order to be kept secret in the interests of national security (i.e., the conduct of foreign relations) of the United States. All members of the Advisory Committee have appropriate security clearances. Accordingly, I hereby determine that this meeting of the Advisory Committee will be concerned with matters listed in section 552b(c)(1) of Title 5 of the United States Code.

ROBERT S. STRAUSS,
Special Representative for Trade Negotiations.

Internal Revenue Service

DEPARTMENT OF LABOR

Pension and Welfare Benefit Programs

[Prohibited Transaction Exemption 78-13; Application No. D-175]

RAGNAR BENSON PROFIT SHARING PLAN AND TRUST

Exemption From Prohibitions

AGENCIES: Department of Labor; Department of the Treasury/Internal Revenue Service.

ACTION: Grant of individual exemption.

SUMMARY: This exemption enables the Ragnar Benson Profit Sharing Plan and Trust (the Trust) to acquire, from a group of independent banks, a $1 million participation interest in a long-term mortgage loan to Woodlane Corp. (Woodlane), a company 50 percent of whose stock is owned by Ragnar Benson, Inc. (Ragnar Benson), the employer of employees covered by the Trust. Certain related transactions are also exempted by this action.

FOR FURTHER INFORMATION CONTACT:

Frederic G. Burke, Office of Regulatory Standards and Exceptions, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20216, 202-523-8195. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On January 4, 1977, notice was published in the FEDERAL REGISTER (42 FR

V 43 / 187 SE 26 78 V 4

956) of the pendency before the Department of Labor (the Department) [illegible] Revenue Service (the

it—instead of the sum of $1 million which was proposed in the notice of pendency. A loan participation of $1

interest in the security in proportion to its share of the total indebtedness.

(f) The participation agreement pro-

or disqualifed person from certain other provisions of the Act and the Code, including any prohibited trans-

The availability of this exemption is subject to the express conditions that the materials facts and representa-

stitute a clearly unwarranted invasion of personal privacy. Accordingly, closure of this portion of the meeting is

956) of the pendency before the Department of Labor (the Department) and the Internal Revenue Service (the Service) (collectively referred to as "the Agencies"), of an exemption from the restrictions of section 406 of the Employee Retirement Income Security Act of 1974 (the Act) and from the taxes imposed by section 4975 (a) and (b) of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1) of the Code, for transactions described in an application submitted by Ragnar Benson and the trustee and plan committee under the Trust (collectively referred to as "Applicants"). The notice, which was supplemented by a correction published in the FEDERAL REGISTER on January 11, 1977 (42 FR 2389), set forth a summary of the facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The applications and all documents and letters containing facts, representations, and comments that were submitted to the Agencies after the publication of the notice, as well as the record of the public hearing referred to below, have been available for public inspection at the Agencies in Washington, D.C.

The exemption was proposed in accordance with the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). All interested persons were invited by the notice to submit written comments on the proposed exemption and to submit a written request that a hearing be held relating to the exemption.

Following the receipt of requests for a hearing from a majority of participants in the Trust, and pursuant to a notice published in the FEDERAL REGISTER on May 6, 1977 (42 FR 23220), a public hearing was held on May 27, 1977, at which interested persons were afforded the opportunity to present their views on the proposed exemption.

COMMENTS RECEIVED

None of the comments raised objections to the grant of an exemption with respect to the Trust's proposed investment in a long-term mortgage loan to Woodlane for the financing of the third addition to the Bell System Center for Technical Education (the third addition). Nor were any objections raised regarding the other related transactions covered by the proposed exemption. Rather, the comments urged the Agencies to expand the proposed exemption so as to permit the Trust to invest $4 million of its assets in the mortgage loan—which assets are currently held in cash and short-term certificates of deposit—instead of the sum of $1 million which was proposed in the notice of pendency. A loan participation of $1 million, together with the $450,000 which remains outstanding on a previous loan by the Trust to Woodlane, would represent approximately 25 percent of Trust assets. A loan participation of $4 million, in addition to the $450,000 outstanding loan, would represent approximately 65 percent of Trust assets.

In testimony at the public hearing, and by written submissions to the Agencies subsequent to the hearing, the Applicants, including members of the plan committee, officers of Ragnar Benson, Inc., and Raymond Benson, the trustee under the Trust and principal officer of Ragnar Benson, Inc. as well as an officer of Woodlane, offered evidence and argument designed to demonstrate that adequate safeguards would be present to protect plan participants despite an investment of substantially more than half of the Trust's assets in the single employer-related real estate venture in question.

The following summary of the facts and representations submitted to the Agencies by written comments and testimony at the public hearing amend or supplement those facts and representations which were summarized in the notice of pendency.

(a) The financing of the third addition to the Bell Training Center was completed by September 1976. The National Security Bank of Chicago (National Security Bank), as mortgagee and noteholder under a March 26, 1976, mortgage indenture with Woodlane, together with 13 banks in the Chicago area who signed an agreement with National Security Bank to participate in the financing, provided $6,375,000 in a combined construction and 15-year permanent mortgage loan to Woodlane.

(b) On October 1, 1976, Western Electric occupied the third addition and began paying rent in accordance with the terms of the 15-year lease with Woodlane.

(c) By an assignment instrument made on March 26, 1976, and filed with the Du Page, Ill., county clerk on October 5, 1976, Woodlane assigned the lease and all rents payable thereunder to National Security Bank.

(d) Under the terms of the participation agreement, National Security Bank, as the "lead" bank, holds the note evidencing the mortgage loan and the collateral therefor, receives all payments representing principal and interest on the loan, and remits to the participating banks their pro rata shares of the proceeds with interest computed at the rate of 9½ percent annually.

(e) Each of the participating banks has an equal and coordinate first lien interest in the security in proportion to its share of the total indebtedness.

(f) The participation agreement provides that in the event that the Trust decides at any time to participate in the mortgage loan in an amount not to exceed $4 million, each then existing participant will, at the request of National Security Bank, reduce its participation on a pro rata basis.

(g) The Applicants submitted letters from two institutional mortgage lenders, each of whom expressed interest in providing all of the financing required for the third addition. However, none of the banks which actually participate in the financing furnished more than $1 million of the $6.375 million provided to Woodlane.

(h) The Applicants represent that two finanicial institutions have expressed interst in purchasing either the third addition and the 1 acre of land thereunder or the entire Bell System Center for Technical Education at a price in excess of 10 times the annual rentals attributable to those parcels.

The Agencies have reviewed the complete record of this proceeding in light of the statutory criterial in § 408(a) of the Act and section 4975(c)(2) of the Code. Before an administrative exemption can be granted under those sections, the Department and the Service, respectively, must find that the requested exemption is administratively feasible, in the interests of the plan and its participants and beneficiaries and protective of the rights of plan participants and beneficiaries. In this connection, the Department reviewed the record in light of the congressional concern expressed in section 404(a)(1)(C) of the Act, which is solely within the jurisdiction of the Department, that plan fiduciaries diversify plan investments so as to minimize the risk of large losses unless under the circumstances it is clearly pruduent not to do so. Based on their respective reviews of the record, the Agencies cannot jointly agree that the statutory findings required for an administrative exemption can be made for a loan participation by the Trust of $4 million. The Agencies do agree, however, that the statutory findings can be made with respect to a loan participation for $1 million. Accordingly, the Agencies have decided to grant the exemption set forth below for a loan participation of $1 million, as originally proposed.

GENERAL INFORMATION

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualifed person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which require, among other things, that a fiduciary discharge his duties respecting the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) The exemption set forth herein is supplemental to, and not in derogation of, any other provisions of the Code and the Act, including statutory exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) This document does not meet the criteria for significant regulations set forth in paragraph 8 of the proposed Treasure directive appearing in the FEDERAL REGISTER for Wednesday, May 24, 1978 (43 FR 22319).

EXEMPTION

Pursuant to section 4975(c)(2) of the Code and section 408(a) of the Act and the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722 and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the facts and respresentations contained in the application for exemption submittee by the Applicants, the public comments received and the record of hearing, the Agencies find that it is administratively feasible, in the interests of the Trust and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the Trust to grant, and hereby grant, and exemption effective this date so that the restrictions of section 406 of the Act and the taxes imposed by section 4975 (a) and (b) of the Code, by reason of section 4975(c)(1) of the code, shall not apply to: The proposed aquisition by the Trust of a $1 million participation interest in the long-term mortgage loan to Woodlane and the release by the Trust of its prior rights in the security for such loan; and the furnishing of guaranties by Ragnar Benson to the Trust as additional security for its proposed investment in the mortgage loan to Woodlane, pursuant to the terms, conditions, and representations set forth in the application.

The availability of this exemption is subject to the express conditions that the materials facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction consummated or to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 20th day of September 1978.

IAN LANOFF,
Administrator, Pension and Welfare Benefits Programs, Labor-Management Services Administration, Department of Labor.

VETERANS ADMINISTRATION

CAREER DEVELOPMENT COMMITTEE

Meeting

The Veterans Administration gives notice, pursuant to Pub. L. 92-463, that a meeting of the Career Development Committee, authorized by 38 U.S.C. 4101, will be held in room A-35 of the Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420, October 30-31, 1978, at 8:30 a.m. The meeting will be for the purpose of scientific review of applications for appointment to the Career Development Program in the Veterans Administration system. The Committee advises the Director, Medical Research Service, on selection and appointment of Associate Investigators, Research Associates, Clinical Investigators, Medical Investigators, Senior Medical Investigators, and William S. Middleton Award Nominees.

The meeting will be open to the public up to the seating capacity of the room from 8:30 a.m. to 9 a.m. to discuss the general status of the program. Because of the limited seating capacity of the room, those who plan to attend should contact Mr. David D. Thomas, Executive Secretary of the Committee, VA Central Office, Washington, D.C., 202-389-2317, prior to October 20, 1978.

The meeting will be closed from 9 a.m. to 5 p.m. on October 30-31 for consideration of individual applications for positions in the Career Development Program. This necessarily requires examination of personnel files and discussion and evaluation of the qualifications, competence, and potential of the several candidates, disclosure of which information would constitute a clearly unwarranted invasion of personal privacy. Accordingly, closure of this portion of the meeting is permitted by section 10(d) of the Federal Advisory Committee Act, Pub. L. 92-463, as amended, in accordance with section (c)(6) of the Government in the Sunshine Act, 5 U.S.C. 552b.

Minutes of the meeting and rosters of the committee members may be obtained from Mr. David D. Thomas, Chief, Career Development Program, Medical Research Service, Veterans Administration, Washington, D.C. Phone 202-389-2317.

Dated: September 20, 1978.

By direction of the Administrator:

JOHN J. LEFFLER,
Associate Deputy Administrator.

[FR Doc. 78-27001 Filed 9-25-78; 8:45 am]

[8320-01]

COOPERATIVE STUDIES EVALUATION COMMITTEE

Meeting

The Veterans Administration gives notice pursuant to Pub. L. 92-463 that a meeting of the Cooperative Studies Evaluation Committee, authorized by 38 U.S.C. 4101, will be held at the Burlington Hotel, Vermont Avenue, at Thomas Circle NW., Washington, D.C., on October 23 and 24, 1978. The meeting will be for the purpose of reviewing proposed cooperative studies and advising the Veterans Administration on the relevance and feasibility of the studies, the adequacy of the protocols, the scientific validity and the technical details, including involvement of human subjects. The Committee advises the Director, Medical Research Service, through the Chief of the Cooperative Studies Program, on its findings.

The meeting will be open to the public up to the seating capacity of the room from 8 to 8:30 a.m., October 23 and 24, to discuss the general status of the program. To assure adequate accommodations, those who plan to attend should contact Dr. James A. Hagans, Coordinator of the Committee, Veterans Administration Central Office, Washington, D.C., 202-389-3702, prior to October 13.

The meeting will be closed from 8:30 a.m. to 4:30 p.m., October 23, and 8:30 a.m. to 1 p.m., October 24, for consideration of specific proposals in accordance with provisions set forth in subsection 10(d) of Pub. L. 92-463, as amended by Pub. L. 94-409, and subsection 552b(c)(6) of title 5, United States Code. During this portion of the meeting, discussion and decisions will deal with qualifications of personnel conducting the studies and the medical records of patients who are

study subjects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Questions and requests for single copies of the Environmental Assessment should be addressed to: Mr. Jack

1978 (2 weeks), at Denver, CO, in a hearing room to be later designated.

PROPOSED NATIONAL CEMETERY, BOURNE, MASS.

Finding of No Significant Impact

The proposed project converts a 749-acre area of excessed Otis Air Force Base land used occasionally as a military training facility and camping/hunting area to a restricted park-like environment of a National Cemetery. Publicity given the project has created no adverse public comment. The project appears compatible with existing and proposed uses of adjacent lands. A Master Plan has been developed for the project which gives full consideration to existing constraints and leaves the most environmentally sensitive areas undisturbed.

It was originally determined that this project would require an Environmental Impact Statement. However, in the development of the statement, an analysis of the nature and degree of significance of the impacts indicated that these could be adequately addressed in an assessment.

A brief summary of the impacts follows as a result of this change in land use:

There will be a withdrawal of 750 acres from the existing 3,000 acres of hunting area existing at the Otis Air Force Base.

Vegetation and wildlife will be affected by the clearing of approximately one-half of the existing vegetation on the site but will be ameliorated to some extent by substantial landscape plantings of indigenous or adaptable plant materials. However, the site transects the north to south movement of the only remaining deer herd on the Cape and the fencing of the site will impede, though not completely prevent, this deer migration. Existing birds and small mammals will generally adapt to the "edge" habitat created.

Cemetery-generated traffic will increase overall traffic on an averge day by about 3 percent, but would have significance only as it contributes to the seasonally heavy tourist traffic to the Cape.

An analysis of all environmental factors related to the development of a National Cemetery on the site indicates a Finding of No Significant Impact.

Questions and requests for single copies of the Environmental Assessment should be addressed to: Mr. Jack S. Westall, Assistant Chief Medical Director for Administration (13), 810 Vermont Avenue NW., Washington, D.C. 20420, 202-389-2706.

By direction of the Administrator:

Dated: September 20, 1978.

MAURY S. CRALLE, Jr.,
Assistant Deputy Administrator for Financial Management and Construction.

INTERSTATE COMMERCE COMMISSION

[Notice No. 717]

ASSIGNMENT OF HEARINGS

SEPTEMBER 21, 1978.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the official docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interestes.

MC 116254 (Sub-188), Chem-Haulers, Inc., now being assigned for hearing on November 13, 1978 (1 day), at Louisville, KY, in a hearing room to be later designated.

MC 115841 (Sub-575), Colonial Refrigerated Transportation, now being assigned for hearing on November 14, 1978 (1 day), at Louisville, KY, in a hearing room to be later designated.

MC 134402 (Sub-5F), Williams Truck Line, Inc., now being assigned October 18, 1978 (2 days), at Des Moines, IA, in Room 453 Federal Building, 210 Walnut Street.

MC-C-7287, AAAcon Auto Transport, Inc., investigation and revocation of certificates, now being assigned prehearing conference, October 4, 1978, at the offices of the Interstate Commerce Commission, Washington, DC.

MC 128279 (Sub-30), Arrow Freightways, Inc., is assigned for hearing October 2, 1978, at Albuquerque, NM., and will be held at Sheraton Old Town Inn, 800 Rio Grande Boulevard NW.

MC 116254 (Sub-188), Chem-Haulers, Inc., now being assigned for hearing on November 13, 1978 (1 day), at Lousiville, KY, in a hearing room to be later designated.

MC 115841 (Sub-575), Colonial Refrigerated Transportation, Inc., now being assigned for hearing on November 14, 1978 (1 day), at Louisville, KY, in a hearing room to be later designated.

MC 116915 (Sub-45), Eck Miller Transportation Corp., now being assigned for hearing on November 15, 1978 (1 day), at Louisville, KY, in a hearing room to be later designated.

MC 112617 (Sub-382F), Liquid Transporters, Inc., now being assigned for hearing on November 16, 1978 (1 day), at Louisville, KY, in a hearing room to be later designated.

MC 112304 (Sub-139F), Ace Doran Hauling & Rigging Co., now being assigned for hearing on November 17, 1978 (1 day), at Louisville, KY, in a hearing room to be later designated.

MC 134286 (Sub-53F), Illini Express, Inc., and MC 144364 (Sub-2F), Art Betz, now being assigned October 20, 1978 (1 day), at Des Moines, IA, in Room 453 Federal Building, 210 Walnut Street.

MC 28536 (Sub-16), Fox & Ginn, and MC 108473 (Sub-39), is assigned for continued hearing on October 16, 1978 (5 days), in Portland, ME, and will be held in Room 232 Bankruptcy Court, 156 Federal Street.

MC 111231 (Sub-222), Jones Truck Line, Inc., is assigned for hearing October 11, 1978, at Atlanta, GA, and will be held at Marriott Hotel, Stone Mountain Room, Courtland International Boulevard.

MC-F-13588, M B Transport Services, Inc.—Control—Con-AG Transport, Inc., now being assigned for hearing on January 9, 1979 (4 days), at Portland, OR, in a hearing room to be later designated.

MC 115931 (Sub-56F), Bee Line Transportation, Inc., now being assigned for hearing on January 15, 1978 (5 days), at Portland, OR, in a hearing room to be later designated.

MC 133796 (Sub-46), George Appel, now assigned for hearing on October 4, 1978, at Washington, DC, is canceled and transferred to modified procedure.

MC 133796 (Sub-47), George Appel, now assigned for hearing on October 5, 1978, at Washington, DC, is canceled and transferred to modified procedure.

MC 47583 (Sub-69F), Tollie Freightways, Inc., now assigned for hearing on October 17, 1978, at Chicago, IL, is canceled and transferred to modified procedure.

MC 35638 (Sub-398F), Interstate Motor Freight System, transferred to modified procedure.

MC 2253 (Sub-79F), Carolina Freight Carriers Corp., transferred to modified procedure.

W-1323F, Sause Bros. Ocean Towing Co., Inc., transferred to modified procedure.

MC 143691 (Sub-6), Pony Express Courier Corp., transferred to modified procedure.

MC 144140 (Sub-6F), Southern Freightways, Inc., now being assigned for hearing on December 6, 1978 (3 days), at Orlando, FL, in a hearing room to be later designated.

MC 119670 (Sub-33F), the Victor Transit Corp., now assigned for prehearing conference on October 16, 1978, at Washington, DC, is canceled and transferred to modified procedure.

MC-F-13467, Bhy Trucking, Inc.—Purchase (portion)—Western Gillette, Inc., now assigned October 3, 1978, at Washington, DC, is postponed indefinitely.

MC 110817 (Sub-25F), E. L. Farmer & Co., now assigned December 11, 1978, at Denver, CO, is advanced to October 16, 1978, at Denver, CO (2 weeks), in a hearing room to be later designated.

MC 113822 (Sub-6F), Dalgarno Transportation, Inc., now being assigned October 16, 1978 (2 weeks), at Denver, CO, in a hearing room to be later designated.

MC 105006 (Sub-7F), L. L. Smith Trucking, a corporation, MC 143443 (Sub-1F), Gary L. McCallister and Monte A. McCallister, d.b.a. McCallister Bros., and MC 143993 (Sub-4F), Black Hills Trucking, Inc., now being assigned October 16, 1978 (2 weeks), at Denver, CO, in a hearing room to be later designated.

MC 119789 (Sub-424F), Caravan Refrigerated Cargo, Inc., is assigned for hearing October 11, 1978, at Chicago, IL, and will be held at Room 572, 219 South Dearborn Street.

MC 51146 (Sub-577F), Schneider Transport, Inc., is assigned for hearing October 16, 1978, at Chicago, IL, and will be held at Room 350, 230 South Dearborn Street.

MC 142706 (Sub-2F), Early Bird Transfer, Inc., is assigned for hearing October 16, 1978, at Chicago, IL, and will be held at Room 209, 536 South Clark Street.

MC 136315 (Sub-21), Olen Burrage Trucking, Inc., is assigned for hearing October 16, 1978, at New Orleans, LA, and will be held at Downtowner Motor Inn, 541 Bourbon Street.

MC 116915 (Sub-38), Eck Miller Transportation Corp., is assigned for hearing October 11, 1978, at Birmingham, AL, and will be held at Room 430, Federal Building, Fifth Avenue and 19th Street North.

MC 140829 (Sub-94F), Cargo Contract Carrier Corp., is assigned for hearing October 16, 1978, at Chicago, IL, and will be held at Room 1669, 219 South Dearborn Street.

MC 144512F, Bud's Service, Inc., is assigned for hearing October 12, 1978, at Chicago, IL, and will be held at Room 3855A, Federal Building, 230 South Dearborn Street.

[7035-01]

[Decisions Volume No. 32]

DECISION-NOTICE

Decided: September 13, 1978

The following applications are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the FEDERAL REGISTER. Failure to file a protest, with 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with Rule 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding, (as specifically noted below), and shall

specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations

cation of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to

gus Counties, NY, to points in GA. (Hearing site: Washington, DC.)

NOTE.—The person or persons who appear

AR, LA, TX, ND, SD, and MN. (Hearing site: St. Louis, MO.)

MC 50307 (Sub-97F), filed July 17,

68106. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Communica-*

with the terms and conditions of its certificate and with the requirements of the Interstate Commerce Act and applicable Commis-

V 43 / 187 SEP 26 78

specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an applicaton under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

We find:

With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is not a major Federal action significantly affecting the quality of the human environment.

It is ordered:

In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall be construed as conferring more than a single operating right.

By the Commission, Review Board Number 2, Members Boyle, Eaton, and Liberman.

H. G. Homme, Jr.,
Acting Secretary.

MC 297 (Sub-9F), filed July 18, 1978. Applicant: WOODLAND TRUCK LINE, INC., 635 Park Street, P.O. Box 70, Woodland, WA 98674. Representative: Lawrence V. Smart, Jr., 419 Northwest 23d Avenue, Portland, OR 97210. To operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Doors and door components,* and (2) *materials, equipment, and supplies* used in the manufacture and distribution of doors, between points in WA, OR, ID, and UT. [Notice No. 170]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

SEPTEMBER 26, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day afer the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 30837 (Sub-486TA), filed July 17, 1978. Applicant: KENOSHA AUTO TRANSPORT CORP., 4314 39th Avenue, Kenosha, WI 53142. Representative: Fred C. Milloy, 4314 39th Avenue, Kenosha, WI 53142. Dineen, 710 North Plankinton Avenue, Milwaukee, WI 53203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are used in the manufacture and distribution of furniture (except in bulk), from Aurora and Montgomery, IL, to the facilities of All-Steel Inc., at West Hazelton, PA, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): All-Steel, Inc., P.O. Box 871, Aurora, IL 60507. Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commerce, Bureau of Operations, U.S. Federal Buildig and Courthouse, 517 East Wisconsin Avenue, Room 619, Milwaukee, WI 53202.

MC 83539 (Sub-504TA), filed July 18, 1978. Applicant: C & H TRANSPORTATION CO., INC., 9757 Military

Parkway, P.O. Box 270535, Dallas, TX 75227. Representative: Thomas E. Jones (same address as applicant). Au-

NOTE.—Applicant can already perform the service sought by tacking through Kansas City, MO. The mileage savings over the direct routes sought is approximately six (6)

RITY, INC., 3333 New Hyde Park Road, New Hyde Park, NY 11040. Representative: Elizabeth L. Henoch, Pur-

used in the installation thereof, from the plantsite of U.S. Gypsum Co., at Heath, MT, to CO, for 180 days. Appli-

Commerce Street, Room 13C12, Dallas, TX 75242.

MC 128791 (Sub-12TA), filed July 18,

lores A. Poe, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 414 Federal

V 43 / 187 SEP 26 78

Parkway, P.O. Box 270535, Dallas, TX 75227. Representative: Thomas E. Jones (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Ferroboard liners and hot top products*, from points in Travis County, TX, to points in the United States (except AK, HI, and TX), for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Oglebay Norton Co., The Hanna Building, Cleveland, OH 44115. Send protests to: Opal M. Jones, Transportation Assistant, Interstate Commerce Commission, 1100 Commerce Street, Room 13C12, Dallas, Tx 75242.

MC 111231 (Sub-241TA), filed July 17, 1978. Applicant: JONES TRUCK LINES, INC., 610 East Emma Avenue, Springdale, AR 72764. Representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20014. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities which require the use of special equipment), between Joplin, MO, and Denver, CO, serving the commercial zones of Joplin and Denver with interlining and tacking at both termini: (1) From Joplin over MO Hwy 43 to junction MO Hwy 171, then over MO Hwy 171 to junction MO Hwy 96, then over MO Hwy 96 to the MO KS State line, then over KS Hwy 96 to junction U.S. HIghway 77, then over U.S. Hwy 77 to junction KS Hwy 196, then over KS Hwy 196 to junction Interstate Hwy 35W, then over Interstate Hwy 35W to Salina, KS, then over Interstate Hwy 70 to Denver (traversing U.S. Hwy 24 where Interstate Hwy 70 is not completed), and return over the same routes, serving no intermediate points; and (2) From Joplin to MO-KS State line as in (1) above, then over KS Hwy 57 to junction U.S. Hwy 160, then over U.S. Hwy 160 to junction KS Hwy 96, then over U.S. Hwy 96 to junction Interstate Hwy 35W, then to Denver as in (1) above, and return over the same routes, serving no intermediate points, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): There are approximately (40) statements of support attached to this application which may be examined at the Interstate Commerce Commission in Washington, DC, or copies thereof which may be examined at the field office named below. Send protests to: William H. Land, Jr., District Supervisor, 3108 Federal Office Building, 700 West Capitol, Little Rock, AR 72201.

NOTE.—Applicant can already perform the service sought by tacking through Kansas City, MO. The mileage savings over the direct routes sought is approximately six (6) percent. Tack and interlining is requested at the termini.

MC 112617 (Sub-400TA), filed July 17, 1978. Applicant: LIQUID TRANSPORTERS, INC., P.O. Box 21395, 1292 Fern Valley Road, Louisville, KY 40219. Representative: Charles R. Dunford (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid latex* (in bulk, in tank trucks), from Ringwood, IL, to Nicholasville, KY, for 180 days. Supporting shipper(s): Mr. J. L. Callaghan, Traffic Manager, Morton Chemical Co., Inc., 110 North Wacker Drive, Chicago, IL 60606. Send protests to: Linda H. Sypher, District Supervisor, Interstate Commerce Commission, 426 Post Office Building, Louisville, KY 40202.

MC 112801 (Sub-204TA), filed July 18, 1978. Applicant: TRANSPORT SERVICE CO., 2 Salt Creek Lane, Hinsdale, IL 60521. Representative: Gene Smith (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additive, dry*, (in bulk, in tank vehicles), from the facilities of the Hill and Griffith Co., at Cicero, IL, to points in IN, IA, MI, and WI, for 180 days. Supporting shipper(s): The Hill & Griffith Co., Harlan Dye, vice president, 4606 West 16th Street, Cicero, IL 60650. Send protests to: Lois M. Stahl, Transportation Assistant, Interstate Commerce Commission, 219 South Dearborn Street, Room 1386, Chicago, IL 60604.

MC 114552 (Sub-170TA), filed July 17, 1978. Applicant: SENN TRUCKING CO., P.O. Drawer 220, Newberry, SC 29108. Representative: Frank A. Graham, Jr., 707 Security Federal Building, Columbia, SC 29201. [Notice No. 171]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

SEPTEMBER 26, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC, and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 35807 (Sub-83TA), filed July 18, 1978. Applicant: WELLS FARGO ARMORED SERVICE CORP., P.O. Box 4313, 7210 Baker Street NW., Atlanta, GA 30302. Representative: Steven J. Thatcher, P.O. MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. W-1152 (Sub-4TA). By order of September 12, 1978, the Motor Carrier Board granted United Transportation, Inc., Bethel, Alaska, 90-day temporary authority to engage in the business of transportation by water vessel, in interstate commerce, in the transportation of general commodities, between Tuluksak, AK and points on the Kukokwim River at and north of Tuluksak, AK. Applicant is authorized to tack this authority with its existing authority under W-1152 at Tuluksak, AK. Andrew E. Hoge, Esq. 3201 "C" Street, Anchorage, AK 99502, applicant's representative.

Any interested person may file a petition for reconsideration within 20 days of the date of this publication. Within 20 days after the filing of such petition with the Commission, any interested person may file and serve a reply thereto.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[M-165; Sept. 20, 1978]

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 9 a.m., September 27, 1978.

PLACE: Room 1011, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: Docket 30332, IATA agreement proposing increase in North Atlantic cargo rates.

STATUS: Closed.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: Discussion of this item will involve issues of foreign policy relating to Order 78-6-78 and discussion of the Board's litigation strategy in the pending court review of Order 78-7-115. Premature disclosure of the options, plans, and opinions of the Board could seriously compromise the U.S. ability to resolve this matter in the best interest of the United States and seriously interfere with the Board's successful participation in pending civil proceedings. Accordingly, the following Members have voted that the meeting on this subject would involve matters the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency action and specifically concern the agency's participation in a civil action within the meaning of the exemptions provided under 5 U.S.C. 552b(c) (9)(B) and (10) and 14 CFR section 410b.5 (9)(B) and (10):

Chairman, Alfred E. Kahn
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey

PERSON EXPECTED TO ATTEND

Board Members.—Chairman, Alfred E. Kahn; Member, Richard J. O'Melia; and Member, Elizabeth E. Bailey.

Assistants to Board Members.—Mr. Mike Roach, Mr. Elias Rodriguez, Mr. David M. Kirstein, and Mr. James Casey.

Office of the Managing Director.—Mr. Dennis Rapp and Mr. John Hancock.

Office of the General Counsel.—Mr. Phil Bakes, Mr. Larry Myers, and Mr. Mark Kahan.

Bureau of Consumer Protection.—Mr. Rueben Robertson and Mr. John Golden.

Bureau of Pricing and Domestic Aviation.—Mr. Michael E. Levine, Mr. Jim McMann, Mr. James Deegan, Mr. Herbert Aswall, and Mr. Don C. Sauers.

Bureau of International Affairs.—Mr. Donald Farmer.

Office of Economic Analysis.—Mr. Bob Frank and Mr. Richard Klem.

Office of the Secretary.—Mrs. Phyllis T. Kaylor and Ms. Deborah A. Lee.

GENERAL COUNSEL CERTIFICATION

I certify that this meeting may be closed to the public under 5 U.S.C. 552b(c) (9)(B) and (10) and 14 CFR 410b.5 (9)(B) and (10) and that the meeting may be closed to public observation.

GARY J. EDLES,
Acting General Counsel.

Memorandum and resolution proposing changes in the membership of the four standing committees of the Corporation.

Recommendations with respect to the amendment of Corporation rules and regulations:

Memorandum and resolution proposing the final adoption of a new part 345 of the Corporation's rules and regulations, to be entitled "Community Reinvestment."

Memorandum and resolution proposing the publication for comment of amendments to part 303 of the Corporation's rules and regulations to delegate the Board's authority to approve requests, pursuant to section 19 of the Federal Deposit Insurance Act, for the Corporation's consent to service of persons convicted of offenses involving dishonesty or a breach of trust as directors, officers, or employees of insured banks.

Memorandum and resolution proposing the publication for comment of amendments to parts 303, 304, and 328 of the Corporation's rules and regulations to revise the Corporation's procedures relating to remote service facilities.

Memorandum and order extending Federal deposit insurance on domestic branches of Puerto Rican banks.

Memorandum and resolution proposing the final adoption of "Truth in Lending Enforcement Guidelines."

Memorandum and resolution proposing the publication for comment of revisions in the reporting requirements for Reports of Condition and Reports of Income for mutual savings banks.

Memorandum and resolution proposing the publication for comment of revisions in the reporting requirements for Reports of Condition and Reports of Income for small banks.

Reports of committees and officers:

Minutes of the actions approved by the Committee on Liquidations, Loans and Purchases of Assets pursuant to authority delegated by the Board of Directors.

Reports of the Director of the Division of Bank Supervision with respect to applications or requests approved by him and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Reports of security transactions authorized by the Acting Chairman.

DEPARTMENT OF STATE

Agency for International Development

PRIVACY ACT ISSUANCES

Notice of Incorporation by Reference

Agency: Agency for International Development.

Action: Incorporation by reference of Privacy Act issuances.

Summary: Federal agencies are required by the Privacy Act of 1974 to give annual notice of certain records they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purpose of this document is to incorporate by reference the notices that appear in "Privacy Act Issuances—1977 Compilation".

Dates: This document fulfills the annual notice requirements of the Privacy Act for 1978.

For further information contact:

Mr. James L. Harper
Agency for International Development
Washington, D.C. 20523

Approval of the Director

The notices of systems of records of this agency which appear in "Privacy Act Issuances—1977 Compilation" are incorporated by reference. The Director of the Office of the Federal Register granted approval to incorporate by reference these Privacy Act issuances on July 13, 1978.

1977 Compilation Up-to-Date

Information about this agency's systems of records that appears in "Privacy Act Issuances—1977 Compilation" is complete and up-to-date. Since publication of the 1977 Compilation, this agency has made no changes to its systems of records.

Availability of 1977 Compilation

"Privacy Act Issuances—1977 Compilation" is available from Regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal Information Centers, which are located at 38 central points around the country and may be examined at the central headquarters and all field offices of this agency. It is also available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

Location of Notices in 1977 Compilation

Notices of this agency's systems of records appear in Volume I of the 1977 Compilation at 47371 thru 47387 (42 FR 47341). The price of this Volume is six dollars and fifty cents.

James W. McCulla,
Director, Office of Public Affairs.

COMMODITY FUTURES TRADING COMMISSION

PRIVACY ACT ISSUANCES

Notice of Incorporation by References

Agency: Commodity Futures Trading Commission.

Action: Incorporation by reference of Privacy Act issuances.

Summary: Federal agencies are required by the Privacy Act of 1974 to give annual notice of certain records they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purposes of this document is to incorporate by reference the notices that appear in "Privacy Act Issuances—1977 Compilation" and to publish in full the systems that this agency has amended since publication of the 1977 Compilation.

Dates: This document fulfills the annual notice requirements of the Privacy Act for 1978.

For Further Information Contact:

Ralph Marceron
(202) 254-6599

Approval of the Director

The notices of systems of records of this agency which appear in "Privacy Act Issuances—1977 Compilation" are incorporated by reference. The Director of the Office of the Federal Register granted approval to incorporate by reference these Privacy Act issuances on August 8, 1978. Published below is the full text of systems of records that this agency has amended since publication of the 1977 Compilation.

Availability of 1977 Compilation

"Privacy Act Issuances—1977 Compilation" is available from Regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal Information Centers, which are located at 38 central points around the country and may be examined at the central headquarters office of the Commission. It is also available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

Location of Notices in 1977 Compilation

Notices of the Commission's systems of records appear in Volume VI of the 1977 Compilation at pages 54742-54755 (42 FR 54742-54755, October 7, 1977). The price of this Volume is five dollars and seventy-five cents.

Donald L. Tendick,
Executive Director.

The Location of Systems of Records

The first and sixth items described above call for the address of the Commission Office involved. The Commission maintains offices in the following locations:

2033 K Street, NW.
Washington, D.C. 20581
Telephone: (202) 254-8630

233 South Wacker Drive
46th Floor
Chicago, Illinois 60606

4901 Main Street
Room 208
Kansas City, Missouri 64112

One World Trade Center
Suite 4747
New York, New York 10004

Two Embarcadero Center
Suite 1600
San Francisco, California 94111

510 Grain Exchange Building
Minneapolis, Minnesota 55415

Where multiple locations are involved in a system notice, rather than listing each address the notice merely identifies the offices and refers to this introductory section for each address. In the system notice, the Washington office is referred to as the "principal office," the Chicago, Kansas City, New York, and San Francisco offices as the "regional offices," and all offices collectively are described as "all CFTC officers."

In many cases records within a system will not all be available at each of the offices listed in the system notice. For example, investigation files are basically maintained in the office where the investigation is being conducted, but certain information may be maintained in other offices as well. Similarly, many but not necessarily all employee records are maintained in the particular office where the employee works. In addition, the Commission's computer is physically located in Chicago, although information in computer printout form may be available in any office.

Of course, it will be the Commission's responsibility, unless otherwise specified in the system notice, to determine where the particular records being sought are located. However, if the individual seeking the records in fact knows the location, it would be helpful to the Commission if he would indicate that location.

System Notices

The Commission's system of records are set forth below. For further information contact:

Privacy Unit
Commodity Futures Trading Commission
2033 K Street NW.
Washington, D.C. 20581

CFTC—1

System name: Matter Register and Matter Indices—CFTC

System location: Records in this system are maintained in the Commission's principal office and in each of the regional offices. Addresses and telephone numbers of these offices are set forth in the introduction to these system notices under the caption "location of systems of records."

Categories of individuals covered by the system: a. Persons alleged to have violated or suspected of having violated the Commodity Exchange Act or the rules and regulations adopted thereunder.

b. Persons lodging complaints with the Commission.

c. Agency referrals.

Categories of records in the system: The records in this system include:

a. The matter register, a summary of complaints received from the public concerning an individual (or business entity) as well as a summary of leads as to possible areas of violation which were developed from other sources. A complaint number is assigned to each case and the record is filed according to that number. The register also, among other matters, names the individual complained about, his employer, the name of the complainant, the type of complaint, the date received, the disposition, the date closed and the investigator assigned.

b. The matter index, which contains a summary of the same information as the complaint register, but is maintained alphabetically by the name of the person who is the subject of the complaint.

c. The matter index, which contains a summary of the same information as the complaint register but is maintained alphabetically by the name of the complainant.

Authority for maintenance of the system: Section 8 of the Commodity Exchange Act, 7 U.S.C. 12.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The routine uses applicable to this system of records are set forth in the introduction to these system notices under the caption "general statement of routine uses."

Storage: Paper records in file folders, in looseleaf binders, or on index cards.

Retrievability: Information in the register is retrievable by assigned matter number. This is cross-indexed to the individual's name through the matter index.

Safeguards: Records are located in secured rooms or on secured premises with access limited to those whose official duties require access. In appropriate cases the records are maintained in lockable file cabinets.

Retention and disposal: The index is maintained indefinitely. The register is maintained on the premises for 5 years, then in the Federal Records Center for 5 years before being destroyed.

System manager(s) and address: The Director of the Division of

phone: (202) 254-8630. The request should specify the system manager under whose jurisdiction the records are maintained, if known.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their in-

Categories of individuals covered by the system: All CFTC employees.

Categories of records in the system: This system includes various records reflecting a breakdown of time and attendance of CFTC employees, and a record of leave status.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information from these records is transmitted to the U.S. Treasury to effect reimbursement of travel expenses and issuance of paychecks, as well as distribution of pay to other sources according to employee instructions. Appro-

Retention and disposal: The index is maintained indefinitely. The register is maintained on the premises for 5 years, then in the Federal Records Center for 5 years before being destroyed.

System manager(s) and address: The Director of the Division of Enforcement in the Commission's principal office and the Regional Counsel of each regional office. Addresses of these offices are set forth in the introduction of these system notices under the caption "location of systems of records."

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Telephone: (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: Persons submitting complaints to the Commission; other miscellaneous sources including customers, other law enforcement and regulatory agencies, commodity exchanges, various trade sources, and items generated internally by the Commission staff.

CFTC—2

System name: Correspondence Files—CFTC

System location: These records are maintained in the Commission's principal offices at 2033 K Street, NW., Washington, D.C. 20581.

Categories of individuals: Persons corresponding with the Commission, directly or through attorneys or other representatives. Persons discussed in correspondence to or from the Commission.

Categories of records in the system: This system contains incoming and outgoing correspondence and indices of correspondence, and certain internal reports and memoranda related to the correspondence.

This system does not include all Commission correspondence, but only those records which are part of a general correspondence file maintained by the office involved. It includes correspondence indexed by subject matter, by date or by assigned number. It includes correspondence files maintained by the Office of Public Information relating to requests by individuals under the Freedom of Information Act and the Privacy Act.

Authority for maintenance of the system: 44 U.S.C 3101

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The routine uses applicable to this system of records are set forth in the introduction to these system notices under the caption "general statement of routine uses."

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders, in looseleaf binders, or on index cards.

Retrievability: By name. This may be the name of the person who sent the letter, the person who received the letter, or the person on whose behalf the letter was sent or received. On occasion it may also be another person who was the principal subject of the letter, where circumstances appear to justify this treatment. See previous discussion concerning the category of records maintained in this system.

Safeguards: Records are located in secured rooms or on secured premises with access limited to those whose official duties require access.

Retention and disposal: These records are maintained indefinitely or for varying periods of time depending on the policies and practices of the offices involved.

System manager(s) and address: The system managers include: a. The General Counsel; b. the Director of the Office of Public Information; c. the Director of the Division of Enforcement; d. the Office of the Secretariat. All are located at 2033 K Street, N.W., Washington, D.C. 20581.

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581 Telephone: (202) 254-8630. The request should specify the system manager under whose jurisdiction the records are maintained, if known.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: Persons corresponding with the Commission and correspondence and memoranda prepared by the Commission.

CFTC—3

System name: Docket Files—CFTC

System location: The records are maintained in the Office of Hearings and Appeals in the Commission's principal offices at 2033 K Street, NW., Washington, D.C. 20581.

Categories of individuals covered by the system: Parties and other persons involved in any CFTC proceeding.

Categories of records in the system: The records in this system include all pleadings, motions, applications, stipulations, affidavits, transcripts and documents introduced as evidence, briefs, orders, findings, opinions, and other matters which are part of the record of an administrative proceeding. They also contain related correspondence and indices.

Authority for maintenance of the system: The Commission is authorized or required to conduct hearings under several provisions of the Commodity Exchange Act. The maintainenance of these files is a necessary concomitant for the conduct of orderly hearings. See also 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: These are public records, except to the extent the Commission or the assigned hearing officer determines they may be treated as non-public consistent with the provisions of the Freedom of Information Act and that for good cause they should be treated as non-public. Non-public portions may be used for any purpose specifically authorized by the hearing officer who ordered non-public treatment or by the Commission.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: These records are filed by the docket number and cross-indexed by the respondent's name, and his attorney's name.

Safeguards: The information in these files is in most cases a matter of public record. Those items which the Commission or the hearing officer has directed be kept non-public are segregated and precautions are taken to assure that access is restricted only to authorized personnel.

Retention and disposal: These records are maintained in the files of the Commission indefinitely.

System manager(s) and address: Chief Administrative Law Judge, Office of Hearing and Appeals, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581.

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Telephone: (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: Commission staff members; opposing parties and their attorneys; witnesses in the proceeding; and other miscellaneous sources.

CFTC—4

System name: Employee Leave, Time and Attendance—CFTC.

System location: These records are maintained by all CFTC offices at the addresses set forth in the introduction to these system notices under the caption "location of systems of records."

Categories of individuals covered by the system: All CFTC employees.

Categories of records in the system: This system includes various records reflecting a breakdown of time and attendance of CFTC employees, and a record of leave status.

Authority for maintenance of the system: 5 U.S.C. 6301-6323; 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. In response to legitimate requests, this information may be provided to other federal agencies for the purpose of hiring or retaining employees, and may be provided to other prospective employers, to the extent that the information is relevant to the prospective employer's decision in the matter.

b. The information may be provided to the Justice Department or other federal agencies or used by the Commission in connection with any investigation, or administrative or legal proceeding involving any violation of any federal law or regulation thereunder.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders or on index cards.

Retrievability: By the name of the employee or by the employee number, cross-indexed by name.

Safeguards: The records are maintained in locked cabinets.

Retention and disposal: Records for current employees are maintained for three years; the final record of former employees is maintained for ten years, then destroyed.

System manager(s) and address: For employees of the Commission's principal office records are maintained by the Budget Officer. For regional office employees, records are maintained by the administrative officer in each of the regional offices. Addresses of these offices are set forth in the introduction to these system notices under the caption location of systems of records."

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Telephone: (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: The individual on whom the record is maintained.

CFTC—7

System name: Employee Records maintained by the National Finance Center/USDA—CFTC.

System location: National Finance Center, U.S. Department of Agriculture, New Orleans, Louisiana 70160.

Categories of individuals covered by the system: All CFTC employees.

Categories of records in the system: The National Finance Center is used by the Commission to provide data processing capability for various personnel, payroll and accounting related matters. The records in the system include:

a. General records relating to the employee including information from the notification of personnel action (Form 350 and 350A) prepared and submitted by the CFTC, and other related sources. The information includes the name, social security or other employee number, birth date, veteran's preference, tenure, leave group, insurance coverage, retirement coverage, type of employment, date service commenced and ended, grade and step, base salary, duty station, various computation dates, leave codes and status, employing office and other miscellaneous information.

b. Various payroll related information for CFTC employees, including payroll and leave data for each employee relating to rate and amount of pay, leave, and hours worked, and leave balances, tax and retirement deductions, life insurance and health insurance deductions, savings allotments, savings bond and charity deductions, mailing addresses and home addresses. This includes copies of the CFTC time and attendance reports as well as authorizations relating to deductions.

Authority for maintenance of the system: 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information from these records is transmitted to the U.S. Treasury to effect reimbursement of travel expenses and issuance of paychecks, as well as distribution of pay to other sources according to employee instructions. Appropriate information from these records is also forwarded to taxing authorities and others receiving proceeds from the employee's pay.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders; magnetic tape.

Retrievability: Indexed by social security number or equivalent employee number and by name of employee.

Safeguards: Protection is afforded by limiting access to the offices where the records are maintained. Certain records are kept in lockable file cabinets.

Retention and disposal: Records are maintained indefinitely on tape; paper records are sent to the Federal Records Center after an appropriate period.

System manager(s) and address: Director, National Finance Center, U.S. Department of Agriculture, Office of Management and Finance, New Orleans, Louisiana 70160.

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Telephone: (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: Records furnished by the CFTC.

CFTC—8

System name: Employment Applications—CFTC

System location: These records are maintained in the Commission's principal offices and in each of the regional offices. The address and telephone number of each of these offices is set forth in the introduction to these systems notices under the caption "location of systems of records".

Categories of individuals covered by the system: Applicant for positions with the CFTC.

Categories of records in the system: Contains the application form (SF-171) and/or the resume of the person applying.

Authority for maintenance of the system: 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information about these records is used in making inquires concerning the qualifications of the applicant.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Indexed by the name of the applicant; cross-indexed by interest.

Safeguards: These records are maintained in a locked file cabinet.

Retention and disposal: Applications are maintained two years, then destroyed.

System manager(s) and address: The Personnel officer of the Commission is the system manager for all records maintained in the Commission's principal office. The system manager for records maintained in the regional offices is the Administrative Officer in each regional office. Addresses of these offices are set forth in the introduction of these systems notices under the caption "location of systems of records".

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Telephone (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Categories of individuals covered by the system: a. Individuals whom the staff of the Commission has reason to believe have violated, are violating, or are about to violate the Commodity Exchange Act and the rules, regulations, and orders promulgated thereunder, or

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: The information is generally obtained from the parties or their attorneys or from the Commission's Office

address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: The individual of whom the record is maintained.

CFTC—10 (Reserved)

CFTC—11 (Reserved)

CFTC—12

System name: Fitness Investigations—CFTC

System location: These records are located in the Division of Trading and Markets in the Commission's principal offices at 2033 K Street, NW., Washington, D.C. 20581. Limited records are located at the Chicago regional office, 233 South Wacker Drive, 46th floor, Chicago, Illinois, 60606.

Categories of individuals covered by the system: Persons who have applied to the Commission for registration as an associated person or as a floor broker; including partners, sole proprietors, officers, directors, branch office managers, agents, more than 10 percent stockholders and persons performing similar functions for futures commission merchants, commodity trading advisers and commodity pool operators.

Categories of records in the system: Contains various information pertaining to the fitness of the above described persons to engage in business subject to the Commission's jurisdiction. The file includes the application for registration and supplements. It also includes correspondence, reports and memoranda reflecting information developed from various sources outside the agency. The system contains records of the CFTC investigation.

Authority for maintenance of the system: Section 8a(2)(B) of the Commodity Exchange Act, 7 U.S.C. 12a(2)(B).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The routine uses applicable to this system of records are set forth in the introduction to these system notices under the caption "general statement of routine uses."

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: By the name of the firm or individual.

Safeguards: Records are maintained in locked cabinets. Further protection is afforded by limiting access to the office where the record is maintained to those whose official duties require access.

Retention and disposal: The records are maintained on the premises for 5 years, then held in the Federal Records Center for 5 years before being destroyed.

System manager(s) and address: Regional Director, Commodity Futures Trading Commission, 233 South Wacker Drive, 46th Floor, Chicago, Illinois 60606.

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Telephone (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: The individual on whom the record is maintained, his employer, federal, state, and local regulatory and law enforcement agencies, commodity and stock exchanges, National Association of Security Dealers, and other miscellaneous sources.

CFTC—14

System name: Matter Files—CFTC

System location: These records are maintained in the Commission's principal office and in the regional offices. Files concerning pending investigations may be located in other Commission offices when the investigation is being conducted by those offices. Addresses of Commission offices are set forth in the introduction to these system notices under the caption "location of systems of records."

Categories of individuals covered by the system: a. Individuals whom the staff of the Commission has reason to believe have violated, are violating, or are about to violate the Commodity Exchange Act and the rules, regulations, and orders promulgated thereunder, or the rules and regulations of any board of trade designated as a contract market.

b. Individuals whom the staff of the Commission has reason to believe may have information concerning violations of the Commodity Exchange Act and the rules, regulations, and orders promulgated thereunder, or the rules and regulations of any board of trade designated as a contract market.

c. Individuals involved in investigations authorized by the Commission concerning the activities of members of the Commission or its employees based upon formal complaint or otherwise.

d. Individuals filing Form 4-R (registration as an associated person) or Form 94 (biographical information questionnaire) in connection with an application for registration with the Commission.

Categories of records in the system: Contains anything obtained during the course of an investigation including data from Commission reporting forms, account statements, and other trading records, exchange records, bank records, and credit information, business records, reports of interviews, transcripts of testimony, exhibits to transcripts, affadavits, statements by witnesses, contracts and agreements. Also contains internal memoranda, reports of investigation, subpoenas, warning letters stipulations of compliance, correspondence and other miscellaneous matters. The nature of the personal information contained in these files varies according to what is considered relevant to the attorney assigned to the case based on the circumstances of the particular case under investigation. For example, the file may contain personal background information about the individual involved, his education and employment history, information on prior violations, and a wide variety of financial information, as well as detailed examination of the individual's activities during the period in question.

Authority for maintenance of the system: Section 8 of the Commodity Exchange Act, 7 U.S.C. 12; 44 U.S.C. 3101; 5 U.S.C. 552a(K)(2).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The routine uses applicable to this system of records are set forth in the introduction of these system notices under the caption "general statement of routine uses." In addition, information concerning traders and their activities may be disclosed and made public by the Commission to the extent permitted by law when deemed appropriate to further the practices and policies of the Commodity Exchange Act. Furthermore, information collected during the investigation may be included in public report to be issued by the Commission following an investigation, to the extent that this is authorized under Section 8 of the Commodity Exchange Act, 7 U.S.C. 12.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: The records are maintained by assigned case number or by the title of the case. Matter cases are filed by number and cross-indexed by matter title.

Safeguards: In addition to normal office and building security, certain of these records are maintained in locked file cabinets. All employees are aware of the sensitive nature of the information gathered during investigations.

Retention and disposal: Regional office records are maintained on the premises for 5 years, then sent to the Federal Records Center for 5 years, before being destroyed. The records in the Office of the General Counsel are generally maintained until the investigation is closed and any action arising therefrom has been completed, including all review at the appellate level. Thereafter, certain basic information may be retained and sent to the Federal Records Center, while the remaining information is either returned to the person from whom it was obtained or destroyed.

System manager(s) and address: Director of the Division of Enforcement in the Commission's principal office. The Regional Counsel of the Region where the investigation is being conducted. Addresses of CFTC offices are set forth in the introduction to these system notices under the caption "location of systems of records."

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581. Telephone: (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: a. Reporting forms and other information filed with the Commission; b. boards of trade; c. futures commission merchants, commodity trading advisors, commodity pool operators, floor brokers, d. Federal, State and local regulatory and law enforcement agencies; e. banks, credit organizations and other institutions, pursuant to subpoena or otherwise; f. corporations, pursuant to subpoena or otherwise; g. individuals having knowledge of the facts, pursuant to subpoena or otherwise; h. attorneys; i. publications; j. courts; and k. other miscellaneous sources.

CFTC—16

System name: Case Files—CFTC

System location: Files in this system of records are maintained in the Commission's principal office and in the regional offices. For pending litigation, files may also be located in other offices participating in the litigation. Addresses and telephone numbers of CFTC offices are set forth in the introduction to the system notices under the caption "location of systems of records."

Categories of individuals covered by the system: Persons or firms against whom the Commission has issued a complaint based on violations of the Commodity Exchange Act or the rules and regulations promulgated thereunder.

Categories of records in the system: The file contains copies of various papers filed by or with the Commission or the courts in connection with administrative proceedings or injunctive actions brought by the Commission. It includes, as a minimum, a copy of the complaint and the final decision and order, and may contain other documents as well.

Authority for maintenance of the system: The maintenance of these files is necessary to the orderly and effective conduct of various litigation authorized under the Commodity Exchange Act and other Federal statutes. See e.g., Section 6c of the Commodity Exchange Act, 7 U.S.C. 13a-1, authorizing injunctive actions, and various provisions in that Act authorizing administrative actions.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The information in these files is generally a matter of public record and may be disclosed without restriction. In other cases the routine uses applicable to this system of records are set forth in the introduction to these system notices under the caption "general statement of routine uses."

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in folders or binders.

Retrievability: Cases are maintained in alphabetical order and cross-indexed to the original matter number.

Safeguards: Protection of non-public records is afforded by general office security measures. Records are located in secured rooms or on secured premises with access limited to those whose official duties require access.

Retention and Disposal: These files are maintained indefinitely, although when the action is completed they are usually reduced to only the complaint and the final decision and order.

System manager(s) and address: These records are maintained by the Director of the Division of Enforcement at the Commission's principal office and by the Regional Counsel for the region where the records are located. Addresses and telephone numbers of CFTC offices are set forth in the introduction to these system notices under the caption "locations of systems of records."

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, 2033 K Street NW., Washington, D.C. 20581. Telephone: (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: The information is generally obtained from the parties or their attorneys or from the Commission's Office of Hearings and Appeals or the relevant court.

CFTC—20

System name: Registration of Futures Commission Merchants, Commodity Trading Advisors and Commodity Pool Operators—CFTC.

System location: The primary files are maintained in the Chicago office. All CFTC offices have summary information in the form of microfiche records. Addresses and telephone numbers of these offices are set forth in the introduction of these systems notices under the caption "location of systems of records."

Categories of individuals covered by the system: Partners, sole proprietors, officers, directors, branch office managers, agents or more than 10 percent stockholders and persons performing similar functions for futures commission merchants, commodity trading advisors and commodity pool operators.

Categories of records in the system: Contains various information pertaining to the fitness of and registration as futures commission merchants, commodity trading advisors and commodity pool operators. The Chicago office maintains the applications for registration (Form 7-R and related schedules) and supplements, as well as correspondence between the firm and/or individuals and the agency relating to registration. A computer system is also maintained by the Chicago office. A computerized record is maintained for each individual engaged as an officer, partner, sole proprietor, branch office manager, agent, more than 10 percent stockholder of a futures commission merchant as listed in the application as such. The computer memory consists of the name, firm affiliation, title, date and place (optional) of birth, social security number (optional), fitness and business address of each individual engaged as a partner, sole proprietor, officer, director and persons performing similar functions for futures commission merchants, commodity trading advisors and commodity pool operators.

Authority for maintenance of the system: Section 4f(1) and 4n(1) of the commodity Exchange Act, 7 U.S.C. 6f(1) and 6n(1).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The routine uses applicable to this system of records are set forth in the introduction to these system notices under the caption "general statement of routine use."

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in manual form in file folders, in computer memory, in computer printouts and microfiche records.

Retrievability: The application, correspondence and other primary records are filed by the name of the firm. The computer records are maintained by the name of the individual officer, director, partner, etc. and serves as a cross-index to the primary registration file.

Safeguards: Protection of non-public records is afforded by general office security measures. Records are located in secured rooms or on secured premises with access limited to those whose official duties requires access. In appropriate cases the records are maintained in lockable file cabinets.

Retention and disposal: Applications for registration and related documents and correspondence are maintained on the premises for three years. Records are then held in the Federal Record Center for seven years and destroyed. The computer memory is maintained permanently on the premises and updated periodically as long as the individual remains associated as a principal with a registrant. Printouts are maintained on the premises for six months and destroyed. Microfiche records are maintained on the premises for two months and destroyed.

System manager(s) and address: Regional Director, Commodity Futures Trading Commission, 233 South Wacker Drive, 46th Floor, Chicago, Illinois 60606.

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581. Telephone: (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: The individual of whom the record is maintained.

CFTC—10 (Reserved)

CFTC—11 (Reserved)

CFTC—12

System name: Fitness Investigations—CFTC

System location: These records are located in the Division of Trading and Markets in the Commission's principal offices at 2033 K Street, NW., Washington, D.C. 20581. Limited records are located at the Chicago regional office, 233 South Wacker Drive, 46th floor, Chicago, Illinois, 60606.

Categories of individuals covered by the system: Persons who have applied to the Commission for registration as an associated person or as a floor broker; including partners, sole proprietors, officers, directors, branch office managers, agents, more than 10 percent stockholders and persons performing similar functions for futures commission merchants, commodity trading advisers and commodity pool operators.

Categories of records in the system: Contains various information pertaining to the fitness of the above described persons to engage in business subject to the Commission's jurisdiction. The file includes the application for registration and supplements. It also includes correspondence, reports and memoranda reflecting information developed from various sources outside the agency. The system contains records of the CFTC investigation.

Authority for maintenance of the system: Section 8a(2)(B) of the Commodity Exchange Act, 7 U.S.C. 12a(2)(B).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The routine uses applicable to this system of records are set forth in the introduction to these system notices under the caption "general statement of routine uses."

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: By the name of the firm or individual.

Safeguards: Records are maintained in locked cabinets. Further protection is afforded by limiting access to the office where the record is maintained to those whose official duties require access.

Retention and disposal: The records are maintained on the premises for 5 years, then held in the Federal Records Center for 5 years before being destroyed.

System manager(s) and address: Regional Director, Commodity Futures Trading Commission, 233 South Wacker Drive, 46th Floor, Chicago, Illinois 60606.

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Telephone (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: The individual on whom the record is maintained, his employer, federal, state, and local regulatory and law enforcement agencies, commodity and stock exchanges, National Association of Security Dealers, and other miscellaneous sources.

CFTC—14

System name: Matter Files—CFTC

System location: These records are maintained in the Commission's principal office and in the regional offices. Files concerning pending investigations may be located in other Commission offices when the investigation is being conducted by those offices. Addresses of Commission offices are set forth in the introduction to these system notices under the caption "location of systems of records."

[6820—33]

COMMITTEE FOR PURCHASE FROM

erence. The Director of the Office of the Federal Register granted approval to incorporate by reference these Privacy Act issuances on July 13, 1978.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: The application is submitted by the applicant. The computerized record is prepared from the application, including supplements, information developed during the fitness inquiry and from correspondence prepared by the Commission, the registrant or applicant, commodity and stock exchanges, other government agencies and other persons with relevant information concerning an individual and firm's fitness.

CFTC—21 [Reserved]

CFTC—22

System name: Registration of Associated Persons and Floor Brokers—CFTC.

System location: The primary files are maintained in the Chicago office. All CFTC offices have summary information in the form of microfiche records. Addresses and telephone numbers of these offices are set forth in the introduction of these systems notices under the caption "location of systems of records."

Categories of individuals covered by the system: Persons who have applied to the Commission for registration as an associated person or as a floor broker including partners, sole proprietors, officers, directors, branch office managers, agents, more than 10 percent stockholders and persons performing similar functions for futures commission merchants, commodity trading advisors and commodity pool operators.

Categories of records in the system: Contains various information pertaining to the fitness for registration as an associated person or floor broker. The system includes the application for registration (Form 8-R and related schedules) plus supplements and correspondence between the applicant/registrant and the Commission relating to registration. It also includes reports reflecting information developed from various sources outside the agency. A computerized system consisting primarily of information taken from the application is maintained by the Chicago office. The computer memory includes the name, date and place (optional) birth, social security number (optional), fitness, membership and firm affiliation, business address and residence (optional) of each registered floor broker. In addition to the above, computer memory also includes education and experience for each registered associated person. Monthly microfiche records list the names, business address, and membership affiliation of all registered floor brokers and the name and firm affiliation of all individuals engaged as associated persons. These microfiche records, as well as non-confidential portions of the application for registration are considered public records and available to any person for inspection and copying. In addition certain auxiliary records, such as card indexes, are maintained, summarizing information contained in the system regarding each floor broker and associated person.

Authority for maintenance of the system: Section 4(1) and 4k(2) of the Commodity Exchange Act. 7 U.S.C. 6(1) and 6k(2).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The routine uses applicable to this system of records are set forth in the introduction to these system notices under the caption "general statement of routine use."

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in manual form in file folders and on index cards, computer memory, and in computer printout form.

Retrievability: By the name of the individual. The computer cross-indexes the record to the name of the futures commission merchant, commodity trading advisor or commodity pool operator with whom the individual is associated.

Safeguards: Protection of non-public records is afforded by general office security measures. Records are located in secured rooms or on secured premises with access limited to those whose official duties require access. In appropriate cases the records are maintained in lockable file cabinets.

Retention and disposal: Applications for registration and related documents and correspondence are maintained on the premises for three years. Records are then held in the Federal Record Center for seven years and destroyed. The computer memory maintained permanently on the premises and updated periodically as long as the individual remains registered or associated with a registrant. Printouts are maintained on the premises for six months and destroyed. Microfiche records are maintained on the premises for two months and destroyed.

System manager(s) and address: Regional Director, Commodity Futures Trading Commission, 233 South Wacker Drive, 46th Floor, Chicago, Illinois 60606.

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581 Telephone (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: The individual on whom the file is maintained, his employer, the commodity and stock exchanges, other government agencies and other persons with relevant knowledge about the individual. Correspondence may be prepared by the Commission or the applicant/registrant. The computer record is prepared from the application and supplement and from information developed during the fitness inquiry.

System name: Reparations Complaints—CFTC

System location: these records are located in the Reparations Unit, Division of Enforcement, in the Commission's principal offices at 2033 K Street, NW., Washington, D.C. 20581.

Categories of individuals covered by the system: Individuals filing customer reparations complaints, as well as the firms and individuals named in the complaints.

Categories of records in the system: These files consist of reparations complaints, answers, correspondence, and miscellaneous motions filed with the Reparations Unit.

Authority for maintenance of the system: Section 14 of the Commodity Exchange Act, 7 U.S.C. A18.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: These records are used in the conduct of the Commission's reparations program. In addition, these records can be used as set forth in the introduction to these system notices under the caption "General Statement of Routine Uses."

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Reparations files are maintained by number and are cross-indexed by the name of the complainant and respondent.

Safeguards: The information in these files is a matter of public record. The records are maintained in file boxes or cabinets.

Retention and disposal: At the present time records are maintained for an indefinite time period. After a case is forwarded to the Office of Hearings and Appeals, however, the records are included in the Commission's docket files and the Reparations Unit only maintains certain case records such as complaints, answers, and decisions and orders.

System manager(s) and address: Director, Division of Enforcement, Attention: Reparations Unit, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581.

Notification procedure: Individuals seeking to determine whether this system of records contains information about them should address their inquiries to the Privacy Unit, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Telephone: (202) 254-8630.

Record access procedures: Individuals seeking access to records about themselves in this system of records should address their inquiries to the Privay Unit at the address listed in the notification section above.

Contesting record procedures: Individuals contesting the content of records about themselves contained in this system of records should address their inquiries to the Privacy Unit at the address listed in the notification section above.

Record source categories: Persons filing reparation complaints or answers.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PRIVACY ACT ISSUANCES

Notice of Incorporation by Reference

Agency: Committee for Purchase from the Blind and Other Severely Handicapped.

Action: Incorporation by reference of Privacy Act issuances.

Summary: Federal agencies are required by the Privacy Act of 1974 to give annual notice of certain records they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purpose of this document is to incorporate by reference the notices that appear in "Privacy Act Issuances—1977 Compilation" and to publish in full the systems that this agency has amended since publication of the 1977 Compilation.

Dates: This document fulfills the annual notice requirements of the Privacy Act of 1978.

For further information contact:

C. W. Fletcher

(703) 557-1145

Approval of the Director

The notices of systems of records of this agency which appear in "Privacy Act Issuances—1977 Compilation" are incorporated by reference. The Director of the Office of the Federal Register granted approval to incorporate by reference these Privacy Act issuances on July 13, 1978.

1977 Compilation Up-To-date

Information about this agency's systems of records that appears in "Privacy Act Issuances—1977 Compilation" is complete and up-to-date. Since publication of the 1977 Compilation, this agency has made no changes to its systems of records.

Availability of 1977 Compilation

"Privacy Act Issuances—1977 Compilation" is available from regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal information Centers, which are located at 38 central points around the country and may be examined at the central headquarters and all field offices of this agency. It is also available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular record system published in the 1977 Compilation for a nominal fee.

Location of Notices in 1977 Compilation

Notices of this agency's systems of records appear in Volume 1 of the 1977 Compilation of page 48075 (42 FR 48075, Sept. 22, 1977). The price of this Volume is six dollars and fifty cents.

Dated: September 1978.

C. W. FLETCHER,
Executive Director.

NATIONAL LABOR RELATIONS BOARD
PRIVACY ACT ISSUANCES
Notice of Incorporation by Reference

Agency: National Labor Relations Board.

Action: Incorporation by reference of Privacy Act issuances.

Summary: Federal agencies are required by the Privacy Act of 1974 to give annual notice of certain records they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purpose of this document is to incorporate by reference the notices that appear in "Privacy Act Issuances—1977 Compilation."

Dates: This document fulfills the annual notice requirements of the Privacy Act for 1978.

For further information contact:

Maurice O. Brice

202-254-9200

Approval of the Director

The notices of systems of records of this agency which appear in "Privacy Act Issuances—1977 Compilation" are incorporated by reference. The Director of the Office of the Federal Register granted approval to incorporate by reference these Privacy Act issuances on August 2, 1978.

1977 Compilation Up-To-Date

Information about this agency's systems of records that appears in "Privacy Act Issuances—1977 Compilation" is complete and up-to-date with respect to current systems. Since publication of the 1977 Compilation, this agency has published notification of a proposed system of records, Equal Employment Opportunity Program Management System, in the Federal Register Volume 43, No. 168, dated August 29, 1978 (43 FR 38646).

This system will become effective without further notice on October 28, 1978, unless the Board feels that a change is necessary due to comments received on or before that date:

System name: Equal Employment Opportunity Program Management System.

System location: Data Systems Branch, NLRB, 1717 Pennsylvania Avenue NW., Washington, D.C. 20570.

Categories of individuals covered by the system: Current and former NLRB employees.

Categories of records in the system: This system of records contains information such as employee name, social security number, Minority Group Designator (MGD) Code, employment status, sex, date of birth, payroll block and unit number, pay plan, grade and step, entrance on duty date, date of last promotion, date of last quality step increase, employment class and date of separation.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: These records or information therefrom, are disclosed:

1. To Agency officials and employees who have a need for the record or information:
   a. In monitoring and evaluating the status and progress of minority/female employment.
   b. To respond to general requests for statistical information (without personal identification of individuals).
   c. As a data source for production of summary descriptive statistics and analytical studies in support of the Agency's EEO program.
   d. In connection with the investigation, processing, adjudication and/or settlement of an EEO complaint or civil action.
2. To the Civil Service Commission or other Federal agencies responsible for oversight and/or enforcement of Federal EEO regulations.
3. To a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
4. To the appropriate agency, whether Federal, State or local, where there is an indication of a violation, or potential violation of law, whether civil, criminal or regulatory in nature, charged with the responsibility of investigating or prosecuting such violation or enforcing or implementing the statute, rule, regulation, or, order issued pursuant thereto.
5. To officials of labor organizations recognized under Executive Order 11491, as amended, when relevant and necessary to their duties of exclusive representation of NLRB employees under the Order. Whenever feasible and consistent with responsibilities under the Order, such information shall be furnished in depersonalized form, i.e., without personal identifiers.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained on computer disk file and magnetic tape backup.

Safeguards: All doors to the computer room have combination locks and during duty hours the computer and magnetic tape backup are under surveillance of Agency personnel charged with custody of the records. After duty hours the computer disk file and magnetic tape backup are stored in a fireproof safe behind locked doors. Access is limited to authorized personnel only. All format programs are password protected and use of the machines for information printouts restricted to designated personnel.

Retention and disposal: The information in these records is updated as necessary as changes in the data elements occur. Information on former employees is retained for 3 years following their separation from the Agency.

System manager(s) and address: Director, Equal Employment Opportunity, NLRB, 1717 Pennsylvania Avenue NW., Washington, D.C. 20570.

Notification procedure: An individual inquiring whether this system contains a record on such individual should direct such inquiry to the System Manager specified above.

Access and contest: An individual seeking to gain access to, or to contest, records in the system pertaining to such individual should contact the System Manager specified above.

Record sources categories: Information in this syustem is obtained from the individual to whom the record pertains, Agency officials and from personnel records.

Retrievability: By social security account number or alphabetically by name.

Availability of 1977 Compilation

"Privacy Act Issuances—1977 Compilation" is available from Regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal Information Centers, which are located at 38 central points around the country and may be examined at the central headquarters and all field offices of this agency. It is also available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

Location of Notices in 1977 Compilation

Notices of this agency's systems of records appear in Volume I of the 1977 Compilation at Page 47786 (42 FR 47786). The price of this Volume is six dollars and fifty cents.

Dated, Washington, D.C., September 8, 1978.

By direction of the Board.

George A. Leet,
Associate Executive Secretary.

PANAMA CANAL COMPANY—CANAL ZONE GOVERNMENT
PRIVACY ACT ISSUANCES
Notice of Incorporation by Reference

Agencies: Panama Canal Company and Canal Zone Government.

Action: Incorporation of Privacy Act issuances by reference.

Summary: The Privacy Act of 1974, 5 U.S.C. sec. 552a(e)(4), requires Federal agencies to give annual notice in the Federal Register of the character and existence of the systems of records that they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purpose of this document is to incorporate by reference the descriptions of Panama Canal Company/Canal Zone Government systems of records as they appear in that Compilation. This document fulfills the annual notice requirements of the Privacy Act for 1978.

For further information contact:

Mrs. Hazel M. Murdock

Assistant to the Secretary

Panama Canal Company

Room 312, Pennsylvania Building

425 13th Street N.W.

Washington, D.C. 20004

(Telephone: 202 724-0104)

Incorporation by Reference

By the publication of this notice, the Panama Canal Company and the Canal Zone Government are incorporating by reference the descriptions of their systems of records which appear in "Privacy Act Issuances—1977 Compilation."

Approval of the Director

The Director of the Office of the Federal Register granted approval to incorporate these Privacy Act issuances by reference on July 13, 1978.

Location of Notices in 1977 Compilation

The Panama Canal Company and the Canal Zone Government last published the full text of the descriptions of their systems of records in the Federal Register of September 22, 1977 (42 FR 48182-48227). Those descriptions appear in Volume I of "Privacy Act Issuances—1977 Compilation six dollars and fifty cents" at pp. 48182-48227.

1977 Compilation up to Date

The descriptions of these agencies' systems of records that appear in the 1977 Compilation are complete and up to date. Since publication of that Compilation, these agencies have made no changes to their systems of records.

Availability of 1977 Compilation

"Privacy Act Issuances—1977 Compilation" is available from Regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal Information Centers, which are located at 38 central points around the country, and may be examined at the central headquarters and all field offices of this agency. In addition, Volume I of the Compilation may be examined at the Records Management Branch, Panama Canal Company (Room 14, Administration Building, Balboa Heights, Canal Zone). Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

Clarence C. Payne,
Acting Administrative Assistant to the Governor-President.

RAILROAD RETIREMENT BOARD
PRIVACY ACT ISSUANCES

of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

1. In the event that this system of records, maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular

number and claim number of the individual. Before information about any record will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information.

[7905-01]

RAILROAD RETIREMENT BOARD

PRIVACY ACT ISSUANCES

Notice of Incorporation by Reference

Agency: Railroad Retirement Board.

Action: Incorporation by reference of Privacy Act issuances.

Summary: Federal agencies are required by the Privacy Act of 1974 to give annual notice of certain records they maintain. The notices published last year were compiled by the Office of the Federal Register into "Privacy Act Issuances—1977 Compilation." The purposes of this document are to: incorporate by reference the notices that appear in "Privacy Act Issuances—1977 Compilation," publish in full three systems of records that this agency has amended since publication of the 1977 Compilation, give notice of a proposed change to one of these three systems and give notice of proposed changes to 10 other systems of records. These systems are also published in full below with proposed changes italicized.

The three systems of records amended since publication of the 1977 Compilation are: Master File of Railroad Employees' Creditable Compensation, Social Security Administration Summary Earnings File and Railroad Retirement, Survivor, and Pensioner Benefit System. The notice of these changes was published in the Federal Register on June 23, 1978 (43 FR 27267-27270). The proposed change to the Railroad Retirement, Survivor, and Pensioner Benefit System is the addition of a routine use which would authorize disclosure of medical records to vocational consultants in administrative proceedings.

An explanation of the proposed changes to the other 10 systems of records follows.

A routine use which authorizes release of records to attorneys is proposed for four systems of records: Unemployment Insurance Record File, Applications for Unemployment Benefits and Placement Service under the Railroad Unemployment Insurance Act, Protest and Appeals under the Railroad Unemployment Insurance Act and Railroad Unemployment and Sickness Insurance Benefit System.

The retention and disposal of certain records in both the Payroll Record System and Health Insurance Supplementary Medical Insurance Enrollment and Premium Payment System are being changed to reflect current procedures.

The period of retention of certain records in the Federal Employee Incentive Awards System is being revised due to a recent procedural change.

The safeguards of records in the Social Security Benefit Vouchering System have been updated to reflect recent changes.

The record system Medicare, Part B (Supplementary Medical Insurance) Payment System—Contracted to The Travelers Insurance Company and Appendix II have been changed to reflect changes due to location and organizational changes in The Travelers' offices.

In addition a number of minor editorial changes were made which do not affect the substance of any system.

Members of the public are invited to send their comments on the proposed changes to the Secretary of the Board, U.S. Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611, no later than October 26, 1978.

Dates: This document fulfills the annual notice requirements of the Privacy Act for 1978.

For further information contact:

Mr. W. V. Radesk
Director of Management Control
U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611
Telephone 312-751-4690

Approval of the Director

The notices of systems of records of this agency which appear in "Privacy Act Issuances—1977 Compilation" are incorporated by reference. The Director of the Office of the Federal Register granted approval to incorporate by reference these Privacy Act issuances on July 24, 1978.

Availability of 1977 Compilation

"Privacy Act Issuances—1977 Compilation" is available from Regional Depository Libraries at 50 locations around the country and can be examined at these libraries free of charge. The 1977 Compilation is also available at the General Services Administration Federal Information Centers, which are located at 38 central points around the country. It is also available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Upon request, the Office of the Federal Register will furnish a photocopy of the full text of a particular records system published in the 1977 Compilation for a nominal fee.

Location of Notices in 1977 Compilation

Notice of this agency's systems of records appear in volume I of the 1977 Compilation, pages 47469-47491. The price of this volume is six dollars and fifty cents.

Dated: September 12, 1978.

R. F. Butler,
Secretary.

System name: Master File of Railroad Employees' Creditable Compensation—RRB.

System location: U.S. Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

Categories of individuals covered by the system: All individuals with compensation creditable under the Railroad Retirement Act and Railroad Unemployment Insurance Act.

Categories of records in the system: Individual name, social security account number, claim number, date of birth, sex, race, last employer identification number, master file of service, and compensation 1937-current.

Authority for maintenance of the system: Section 7(b)(6) of the Railroad Retirement Act of 1974 (45 U.S.C. 231f(b)(6)) and Section 12(1) of the Railroad Unemployment Insurance Act (45 U.S.C. 362(1).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. Records may be transferred to the Social Security Administration to correlate disability freeze actions and in cases where the railroad employees do not acquire 120 creditable service months before retirement or death or have no current connection with the railroad industry, to enable SSA to credit the employee with the compensation and to pay or deny benefits.

b. Yearly service months, cumulative service months, yearly creditable compensation and cumulative creditable compensation may be released to the employees directly or through their respective employers.

c. Service months and earnings may be released to employers or former employers for correcting or reconstructing earnings records for railroad employees.

d. Information may be released to contractors to fulfill contract requirements pertaining to specific activities related to the Railroad Retirement Act and/or the Railroad Unemployment Insurance Act.

e. Employee identification and potential entitlement may be furnished to the Social Security Administration, Bureau of Supplemental Security Income, to Federal, State, and local welfare or public aid agencies to assist them in processing application for benefits under their respective programs.

f. Employee identification and other pertinent information may be released to the Department of Labor in conjunction with payment of benefits under the Federal Coal Mine and Safety Act.

g. The last employer information may be disclosed to the Department of Health, Education, and Welfare in conjunction with the Parent Locator Service.

h. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

i. Pursuant to a request from an employer covered by the Railroad Retirement Act or the Railroad Unemployment Insurance Act, information regarding the employee's potential eligibility for unemployment, sickness or retirement benefits may be released to the requesting employer for the purpose of determining entitlement to and the rates of private supplemental pension, sickness or unemployment benefits and to calculate estimated benefits due from the employer.

j. If a request for information pertaining to an individual is made by an official of a labor organization of which the individual is a member and the request is made on behalf of the individual, information from the record of the individual concerning his anticipated benefit may be disclosed to the labor organization official.

k. Records may be disclosed in a court proceeding relating to any claims for benefits by the beneficiary under the Railroad Retirement Act or the Railroad Unemployment Insurance Act and may be disclosed during the course of an administrative appeal hearing in which such records are relevant to the issue.

l. In the event that this system of records, maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

m. Information in this system of records may be released to the attorney representing an individual in connection with that individual's claim for benefits under the Railroad Retirement Act or the Railroad Unemployment Insurance Act, upon receipt of a written letter or declaration stating the fact of representation, subject to the same procedures and regulatory prohibitions as the subject individual.

n. All records may be disclosed to the Social Security Administration for purposes of administration of the Social Security Act.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Magnetic tape, magnetic disk and paper.

Retrievability: Social security number, claim number and name.

Safeguards: Magnetic tape and magnetic disk: computer and computer storage rooms are restricted to authorized personnel; on-line query safeguards include a lock/unlock password system, a terminal oriented transaction matrix and an audit trail. Paper: bound in hard covers and stored on steel shelving accessible to only authorized personnel.

Retention and disposal: Magnetic tape and magnetic disk: permanent retention; updated annually. Paper: retained five years and destroyed last year ledger put in storage when current year ledger complete.

System manager(s) and address: Director of Data Processing and Accounts, U.S. Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

Notification procedure: Requests for information regarding an individual's record should be in writing addressed to the System Manager identified above, including the full name and social security number. Before information about any record will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information.

Record access procedures: See Notification section above.

Contesting record procedures: See Notification section above.

Record source categories: Railroad employer.

System name: Social Security Administration Summary Earnings File—RRB.

System location: U.S. Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

Categories of individuals covered by the system: Railroad employees and their auxiliary beneficiaries.

Categories of records in the system: Social security account number, name, date of birth, sex, social security claim status, creditable earnings from 1937 to date.

Authority for maintenance of the system: Section 7(b)(6) of the Railroad Retirement Act of 1974 (45 U.S.C. 231(b)(6)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Internal use only.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Magnetic tape and magnetic disk.

Retrievability: Social security account number and name.

Safeguards: Magnetic tape and magnetic disk: computer and computer storage rooms are restricted to authorized personnel; on-line query safeguards include a lock/unlock password system; a terminal oriented transaction matrix; and an audit trail.

Retention and disposal: Magnetic tape and magnetic disk: permanent retention; updated annually.

System manager(s) and address: Director of Data Processing and Accounts, U.S. Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

Notification procedure: Requests for information regarding an individual's record should be in writing addressed to the System Manager identified above, including the full name, social security account number and claim number of the individual. Before information about any record will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information.

Record access procedures: See Notification section above.

Contesting record procedures: See Notification section above.

Record source categories: Social Security Administration.

System name: Railroad Retirement, Survivor, and Pensioner Benefit System—R.R.B.

System location: U.S. Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611. Regional and District Offices: See Appendix I for address.

Categories of individuals covered by the system: Applicants for retirement and survivor benefits, their dependents (spouses, children, parents, grandchildren), individuals who filed for lump sum death benefits and/or residual payments.

Categories of records in the system: Information pertaining to the payment or denial of an individual's claim for benefits under the Railroad Retirement Act: name, address, social security number, claim number, proofs of age, marriage, relationship, and military service, creditable earnings and service months (including military service), entitlement to benefits under the Social Security Act. Veterans Administration or other benefit systems, rates, effective dates, medical reports, correspondence and telephone inquiries to and about the beneficiary, record of determination and appeal by beneficiary, suspension and termination dates, health insurance effective date, option, premium rate and deduction, direct deposit data and employer pension information.

Authority for maintenance of the system: Section 7(b)(6) of the Railroad Retirement Act of 1974 (45 U.S.C. 231f(b)(6)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. Beneficiary identifying information may be disclosed to third party contacts to determine if incapacity of the beneficiary or potential beneficiary to understand or use benefits exists, and to determine the suitability of a proposed representative payee.

b. In the event the Board has determined to designate a person to be the represenative payee of an incompetent beneficiary, disclosure of information concerning the benefit amount and other similar information may be made to the representative payee from the record of the individual.

c. Entitlement and benefit rates may be released to primary beneficiaries regarding secondary beneficiaries (or vice versa) when the addition of such beneficiary affects either the entitlement or benefit payment.

d. Identifying information such as full name, address, date of birth, social security number, employee identification number, and date last worked, may be released to any last employer to verify entitlement for benefits under the Railroad Retirement Act.

e. Beneficiary identifying information, address, check rate, number and date may be released to the Treasury Department to control for reclamation and return of outstanding benefit checks, to issue benefit checks, to reconcile reports of non-delivery, and to insure delivery of check to the correct address of the beneficiary or representative payee.

f. Beneficiary identifying information, address, check rate, date, number and other supporting evidence may be released to the U.S. Postal Service for investigation of alleged forgery or theft of railroad retirement or social security benefit checks.

g. Beneficiary identifying information, entitlement data, medical evidence and related evaluatory data, and benefit rate may be released to the Social Security Administration and the Health Care Financing Administration to correlate actions with the administration of Title II and Title XVIII of the Social Security Act, as amended.

h. Beneficiary identifying information, including social security account number, and supplemental annuity amounts may be released to the Internal Revenue Service, State and local taxing authorities for tax purposes (Form G-1099, for those annuitants receiving supplemental annuities).

i. Beneficiary identifying information, entitlement, benefit rates, medical evidence and related evaluatory data and months paid may be released to the Veterans Administration to verify continued entitlement to benefits.

j. Beneficiary identifying information, entitlement data and benefit rates may be released to the Department of State and embassy officials to aid in the development of applications, supporting evidence

and the continued eligibility of beneficiaries and potential beneficiaries living abroad.

k. Beneficiary identifying information, entitlement, benefit rates and months paid may be released to the Social Security Administra-

bb. Beneficiary identifying information, including but not limited to name, address, social security account number, payroll number and occupation, the fact of entitlement and benefit rate may be released to the Pension Benefit Guaranty Corporation to enable that agency

mation regarding the Board's payment of unemployment or sickness benefits, the methods by which such benefits are calculated, entitlement data and present address may be released to the requesting employer for the purposes of determining entitlement to and rates of

Record source categories: Individual claimant or his authorized representative, employers, State employment and unemployment claims records, Federal, and Social Security Administration employer compensation reports.

V 43/187
SE 26 78

and the continued eligibility of beneficiaries and potential beneficiaries living abroad.

k. Beneficiary identifying information, entitlement, benefit rates and months paid may be released to the Social Security Administration. Bureau of Supplemental Security Income, Health Care Financing Administration, to Federal, State and local welfare or public aid agencies to assist them in processing applications for benefits under their respective programs.

l. The last addresses and employer information may be released to the Department of Health, Education, and Welfare in conjunction with the Parent Locator Service.

m. Beneficiary identifying information, entitlement, rate and other pertinent data may be released to the Department of Labor in conjunction with payment of benefits under the Federal Coal Mine and Safety Act.

n. Beneficiary identifying information and medical evidence may be released to State or local agencies required by State or local law to be informed of the existence of a legally reportable medical condition, when discovered in connection with an application for a disability annuity.

o. Medical evidence may be released to Board-appointed medical examiners to carry out their functions.

p. Information obtained in the administration of Title XVIII (Medicare) which may indicate unethical or unprofessional conduct of a physician or practitioner providing services to beneficiaries may be released to Professional Standards Review Organizations and State Licensing Boards.

q. Information necessary to study the relationship between benefits paid by the Railroad Retirement Board and civil service annuities may be released to the Civil Service Commission.

r. Records may be disclosed to the General Accounting Office for auditing purposes and for collection of debts arising from overpayments under Title II and Title XVIII of the Social Security Act, as amended, or the Railroad Retirement Act.

s. Records may be released to contractors to fulfill contract requirements pertaining to specific activities related to the Railroad Retirement Act.

t. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

u. Pursuant to a request from an employer covered by the Railroad Retirement Act or the Railroad Unemployment Insurance Act, information regarding the Board's payment of retirement benefits, the methods by which such benefits are calculated, entitlement data and present address may be released to the requesting employer for the purposes of determining entitlement to and rates of private supplemental pension, sickness or unemployment benefits and to calculate estimated benefits due.

v. If a request for information pertaining to an individual is made by an official of a labor organization of which the individual is a member and the request is made on behalf of the individual, information from the record of the individual concerning his benefit or anticipated benefit and concerning the method of calculating that benefit may be disclosed to the labor organization official.

w. Records may be disclosed in a court proceeding relating to any claims for benefits by the beneficiary under the Railroad Retirement Act, and may be disclosed during the course of an administrative appeal hearing in which such records are relevant to the issue.

x. In the event that this system of records, maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

y. Information in this system of records may be released to the attorney representing such individual in connection with the individual's claim for benefits under the Railroad Retirement Act, upon receipt of a written letter or declaration stating the fact of representation, subject to the same procedures and regulatory prohibitions as the subject individual.

z. The amount of a residual lump sum payment and the identity of the payee may be released to the Internal Revenue Service for tax audit purposes.

aa. The amount of any death benefit or annuities accrued but unpaid at death and the identity of such payee may be released to the appropriate state taxing authorities for tax assessment and auditing purposes.

bb. Beneficiary identifying information, including but not limited to name, address, social security account number, payroll number and occupation, the fact of entitlement and benefit rate may be released to the Pension Benefit Guaranty Corporation to enable that agency to determine and pay supplemental pensions to qualified railroad retirees.

cc. Medical records may be disclosed to vocational consultants in administrative proceedings.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper, microforms, magnetic tape and magnetic disk.

Retrievability: Claim number, social security number and full name.

Safeguards: Paper and microforms: maintained in areas not accessible to the public, offices are locked during non-business hours. Magnetic tape and magnetic disk: computer and computer storage rooms are restricted to authorized personnel; on-line query safeguards include a lock/unlock password system, a terminal oriented transaction matrix and an audit trail.

Retention and disposal: Paper, individual claim folders with records of all actions pertaining to the payment or denial of claims are shredded 25 years after the date of last payment or denial activity, other paper listings are destroyed one year after date of issue, except for accounts receivable listings which are destroyed only after General Accounting Office audit. Microforms: originals are kept for five years, duplicates are kept for one year and then destroyed by shredding. Magnetic tape: magnetic tape records are used to daily update the disk files and then are retained for 90 days and then written over. Magnetic disk: continually updated and permanently retained.

System manager(s) and address: Director of Retirement Claims, U.S. Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

Notification procedure: Requests for information regarding an individual's records should be in writing addressed to the System Manager identified above, including the full name and social security number and claim number of the individual. Before information about any records will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish and authorization from the individual to permit release of information.

Record access procedures: See Notification section above.

Contesting record procedures: See Notification section above.

Record source categories: Individual applicants or their representatives, railroad employers, other employers, physicians, labor organizations, federal, state and local government agencies, attorneys, funeral homes, congressmen, schools, foreign governments.

System name: Unemployment Insurance Record File—RRB

System location: District Offices: See Appendix I for addresses.

Categories of individuals covered by the system: Claimants for unemployment benefits under the Railroad Unemployment Insurance Act and their respective employers.

Categories of records in the system: Developent file containing letters from claimants, report of Railroad Unemployment Insurance Act fraud investigations and supporting evidence, erroneous payment investigations, protest and appeal requests and responses.

Authority for maintenance of the system: Section 12(1) of the Railroad Unemployment Insurance Act (45 U.S.C. 362(1))

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. Beneficiary identifying information may be released to third party contacts to determine if incapacity of the beneficiary or potential beneficiary to understand or use benefits exists, and to determine the suitability of a proposed representative payee.

b. Benefit rate, name and address may be referred to the Treasury Department to control for reclamation and return of outstanding benefit checks, to issue benefit checks, reconcile reports of nondelivery, and to insure delivery of check to the correct address of the beneficiary or representative payee.

c. Beneficiary's name, address, check rate, date and number, plus supporting evidence may be released to the U.S. Postal Service for investigation of alleged forgery or theft of railroad unemployment or sickness benefit checks.

d. Identifying information such as full name, address, date of birth, social security number, employee identification number, and date last worked, may be released to any last employer to verify entitlement for benefits under the Railroad Unemployment Insurance Act.

e. Pursuant to a request from an employer covered by the Railroad Retirement Act or the Railroad Unemployment Insurance Act, information regarding the Board's payment of unemployment or sickness benefits, the methods by which such benefits are calculated, entitlement data and present address may be released to the requesting employer for the purposes of determining entitlement to and rates of private supplemental pension, sickness or unemployment benefits and to calculate estimated benefits due.

f. Benefit rates and effective dates may be released to the Social Security Administration, Bureau of Supplemental Security Income, to Federal, State and local welfare or public aid agencies to assist them in processing applications for benefits under their respective programs.

g. In the event the Board has determined to designate a person to be the representative payee of an incompetent beneficiary, disclosure of information concerning the benefit amount and other similar information may be made to the representative payee from the record of the individual.

h. Records may be disclosed to the General Accounting Office for auditing purposes and for collection of debts arising from overpayments under the Railroad Unemployment Insurance Act, as amended.

i. The last addresses and employer information may be disclosed to the Department of Health, Education, and Welfare in conjunction with the Parent Locator Service.

j. Disclosure may be made to a congressional office from the record of the individual in response to an inquiry from the congressional office made at the request of that individual.

k. If a request for information pertaining to an individual is made by an official of a labor organization of which the individual is a member and the request is made on behalf of the individual, information from the record of the individual concerning this benefit or anticipated benefit may be disclosed to the labor organization official.

l. Records may be disclosed in a court proceeding relating to any claims for benefits by the beneficiary under the Railroad Unemployment Insurance Act and may be disclosed during the course of an administrative appeal bearing in which such records are relevant to the issue.

m. In the event that this system of records, maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

n. Non-medical information in this system of records may be released to the attorney representing such individual upon receipt of a written letter or declaration stating the fact of representation, subject to the same procedures and regulatory prohibitions as the subject individual. Medical information may be released to an attorney when such records are requested for the purpose of contesting a determination either administratively or judicially.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper.

Retrievability: Name, social security number.

Safeguards: Kept in steel file cabinets away from the general public and are available only to district office and regional office personnel.

Retention and disposal: Shredded five years after end of benefit year in which originated.

System manager(s) and address:

Director of Unemployment and Sickness Insurance
U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611

Notification procedure: Requests for information regarding an individual's record should be in writing addressed to the System Manager identified above, including the full name and social security number and claim number of the individual. Before information about any record will be released, the System manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information.

Record access procedures: See Notification section above.

Contesting record procedures: See Notification section above.

Record source categories: Individual claimant or his authorized representative, employers, State employment and unemployment claims records, Federal, and Social Security Administration employer compensation reports.

System name: Applications for Unemployment Benefits and Placement Service under the Railroad Unemployment Insurance Act—RRB.

System location: District Offices: See Appendix I for addresses.

Categories of individuals covered by the system: Individuals who have made application for unemployment benefits and employment service.

Categories of records in the system: Name, address, account number, age, sex, education, height, weight, veteran status, employer, occupation, rate of pay, reason not working and last date worked, personal interview record, results of investigations.

Authority for maintenance of the system: Section 12(1) of the Railroad Unemployment Insurance Act (45 U.S.C. 362(1)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. Selected information may be disclosed to prospective employers for potential job placement.

b. In the event the Board has determined to designate a person to be the representative payee of an incompetent beneficiary, disclosure of information concerning the benefit amount and other similar information may be made to the representative payee from the record of the individual.

c. Beneficiary identification and entitlement information may be released to third party contacts to determine if incapacity of the beneficiary or potential beneficiary to understand or use benefits exists, and to determine the suitability of a proposed representative payee.

d. A record from this system of records may be disclosed to a Federal agency, in response to its request, in connection with the hiring, or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

e. Beneficiary identification, entitlement, and benefit rate information may be released to the Treasury Department to control for reclamation and return of outstanding benefit checks, to issue benefit checks, reconcile reports of nondelivery and to insure delivery of check to the correct address of the beneficiary or representative payee.

f. Information may be referred to the U.S. Postal Service for investigation of alleged forgery or theft of railroad unemployment or sickness benefit checks.

g. Beneficiary identification, entitlement, and benefit rate information may be released to the Social Security Administration, Bureau of Supplemental Security Income, to Federal, State, and local welfare or public aid agencies to assist them in processing applications for benefits under their respective programs.

h. The last addresses and employer information may be disclosed to Department of Health, Education, and Welfare in conjunction with the Parent Locator Service.

i. Information may be released to contractors to fulfill contract requirements pertaining to specific activities related to the Railroad Unemployment Insurance Act.

j. Records may be disclosed to the General Accounting Office for auditing purposes and for collection of debts arising from overpayments under the Railroad Unemployment Insurance Act, as amended.

k. Identifying information such as full name, address, date of birth, social security number, employee identification number, and date last worked, may be released to any last employer to verify entitlement for benefits under the Railroad Unemployment Insurance Act.

l. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

m. Pursuant to a request from an employer covered by the Railroad Retirement Act or the Railroad Unemployment Insurance Act, information regarding the Board's payment of unemployment or sickness benefits, the methods by which such benefits are calculated, entitlement data and present address will be released to the requesting employer for the purposes of determining entitlement to and rates of private supplemental pension, sickness or unemployment benefits and to calculate estimated benefits due.

n. If a request for information pertaining to an individual is made by an official of a labor organization of which the individual is a member and the request is made on behalf of the individual, information from the record of the individual concerning his benefit or

anticipated benefit and concerning the method of calculating that benefit may be disclosed to the labor organization official.

o. Records may be disclosed in a court proceeding relating to any claims for benefits by the beneficiary under the Railroad Unemployment Insurance Act and may be disclosed during the course of an administrative appeal hearing in which such records are relevant to the issue.

p. In the event that this system of records, maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

q. Non-medical information in this system of records may be released to the attorney representing such individual upon receipt of a written letter or declaration stating the fact of representation, subject to the same procedures and regulatory prohibitions as the subject individual. Medical information may be released to an attorney when such records are requested for the purpose of contesting a determination either administratively or judicially.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper.

Retrievability: Social security number.

Safeguards: Only authorized personnel have access to the records; offices locked during nonbusiness hours.

Retention and disposal: In routine cases, held for three years after end of benefit year in which orginated. In those with adverse activities (claims denied), held for five years after end of benefit year in which originated. At end of both periods, files are shredded.

System manager(s) and address:

Director of Unemployment and Sickness Insurance
U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611

Notification procedure: Requests for information regarding an individual's record should be in writing addressed to the System Manager identified above, including the full name and social security number and claim number of the individual. Before information about any record will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information.

Record access procedures: See Notification section above.

Contesting record procedures: See Notification section above.

Record source categories: Individual applicant or his authorized representative, present and former employers, State and Federal departments of employment security, Social Security Administration and labor organizations.

System name: Protest and Appeals under the Railroad Unemployment Insurance Act—RRB.

System location: Regional Offices: See Appendix I for addresses.

Categories of individuals covered by the system: Railroad Employees.

Categories of records in the system: Name, address, social security number, employment data, record of investigation on adverse action.

Authority for maintenance of the system: Section 12(1) of the Railroad Unemployment Insurance Act (45 U.S.C. 362(1))

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. In the event the Board has determined to designate a person to be the representative payee of an incompetent beneficiary, disclosure of information concerning the benefit amount and other similar information may be made to the representative payee from the record of the individual.

b. Identifying information such as full name, address, date of birth, social security number, employee identification number, and date last worked, may be released to any last employer to verify entitlement for benefits under the Railroad Unemployment Insurance Act.

c. Beneficiary identification, entitlement and benefit rates may be released to the Social Security Administration, Bureau of Supplemental Security Income, to Federal, State and local welfare or public aid agencies to assist them in processing applications for benefits under their respective programs.

d. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

e. Pursuant to a request from an employer covered by the Railroad Unemployment Insurance Act, information regarding the Board's payment of unemployment or sickness benefits, the methods by which such benefits are calculated, entitlement data and present address may be released to the requesting employer for the purposes of determining entitlement to and rates of private supplemental pension, sickness or unemployment benefits and to calculate estimated benefits due.

f. If a request for information pertaining to an individual is made by an official of a labor organization of the individual concerning his benefit or anticipated benefit may be disclosed to the labor organization official.

g. Records may be disclosed in a court proceeding relating to any claims for benefits by the beneficiary under the Railroad Unemployment Insurance Act and may be disclosed during the course of an administrative appeal hearing in which such records are relevant to the issue.

h. In the event that this system of records, maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

i. Non-medical information in this system of records may be released to the attorney representing such individual upon receipt of a written letter or declaration stating the fact of representation, subject to the same procedures and regulatory prohibitions as the subject individual. Medical information may be released to an attorney when such records are requested for the purpose of contesting a determination either administratively or judicially.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper.

Retrievability: Name, social security number.

Safeguards: Only authorized personnel have access to these records which are kept in an office that is locked at the close of business each day and remains so until start of business the next day.

Retention and disposal: Destroyed by shredding no later than five years after the end of the fiscal year in which originated.

System manager(s) and address:

Director of Unemployment and Sickness Insurance
U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611.

Notification procedure: Requests for information regarding an individual's record should be in writing, addressed to the System Manager identified above, including the full name and social security number and claim number of the individual. Before information about any record will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information

Record access procedures: See Notification section above.

Contesting record procedures: See Notification section above.

Record source categories: Employee, employer and district office records.

System name: Railroad Unemployment and Sickness Insurance Benefit System—RRB.

System location:

U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611 Regional and District Offices: See Appendix I for addresses.

Categories of individuals covered by the system: Applicants and claimants for unemployment and sickness (including maternity) benefits under the Railroad Unemployment Insurance Act: some railroad employees injured at work who did not apply for Railroad Unemployment Insurance Act benefits; all railroad employees paid separation allowances.

Categories of records in the system: Information pertaining to payment or denial of an individual's claim for benefits under the Railroad Unemployment Insurance Act: name, address, sex, social security number, date of birth, total months of railroad service (including creditable military service), total creditable compensation for base year, last employer and date last worked before applying for benefits, last rate of pay in base year, reason not working, applications and claims filed, benefit payment information for each claim filed, disqualification periods and reasons for disqualification, entitlement to benefits under other laws, benefit recovery information about personal injury claims and pay for time not worked, medical reports, placement data, correspondence and telephone inquiries to and about the claimant, record of protest or appeal by claimant of adverse determinations made on his claims.

Authority for maintenance of the system: Section 12(l) of the Railroad Unemployment Insurance Act (45 U.S.C. 351, et. seq.).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. Beneficiary identifying information may be disclosed to third party contacts to determine if incapacity of the beneficiary or potential beneficiary to understand or use benefits exists, and to determine the suitability of a proposed representative payee.

b. In the event the Board has determined to designate a person to be the representative payee of an incompetent beneficiary, disclosure of information concerning the benefit amount and other similar information may be made to the representative payee from the record of the individual.

c. Beneficiary identifying information, address, check rate, date and number may be released to the Treasury Department to control for reclamation and return of outstanding benefit checks, to issue benefit checks, respond to reports of non-delivery and to insure delivery of check to the correct address of the beneficiary or representative payee.

d. Beneficiary identifying information, address, check rate, date and number, plus other necessary supporting evidence may be released to the U.S. Postal Service for investigation of alleged forgery or theft of railroad unemployment/sickness benefit checks.

e. A record from this system of records may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

f. Under Section 2(f), the Railroad Retirement Board has the right to recover benefits paid to an employee who later receives remuneration for the same period, therefore, the Railroad Retirement Board may notify the person or company paying the remuneration of the Board's right to recovery and the amount of benefits to be refunded.

g. Under Section 12(o), the Railroad Retirement Board is entitled to reimbursement of sickness benefits paid on account of the infirmity for which damages are paid, consequently, the Railroad Retirement Board may send a notice of lien to the liable party, and, upon request by the liable party, advise the amount of benefits subject to reimbursement.

h. Records may be disclosed to contractors to fulfill contract requirements pertaining to specific activities related to the Railroad Unemployment Insurance Act.

i. Beneficiary identifying information, rate and entitlement data may be released to the Social Security Administration to correlate actions with the administration of the Social Security Act.

j. The last addresses and employer information may be released to Department of Health, Education, and Welfare in conjuction with the Parent Locator Service.

k. Benefit rate, entitlement and periods paid may be disclosed to the Social Security Administration, Bureau of Supplemental Security Income to federal, state and local welfare or public aid agencies to assist them in processing applications for benefits under their respective programs.

l. Beneficiary identifying information, entitlement, rate and other pertinent data may be released to the Department of Labor in conjunction with payment of benefits under the Federal Coal Mine and Safety Act.

m. Beneficiary identifying information and medical evidence may be released to State or local agencies required by State or local law to be informed of the existence of a legally reportable medical condition, when discovered in conntection with an application for disability or sickness benefits.

n. Records may be referred to the General Accounting Office for auditing purposes and for collection of debts arising from overpayments under the Railroad Unemployment Insurance Act.

o. If a request for information pertaining to an individual is made by an official of a labor organization, of which the individual is a member, information from the record of the individual concerning his benefit or anticipated benefit and concerning the method of calculating that benefit may be disclosed to the labor organization official.

p. Pursuant to a request from an employer covered by the Railroad Retirement Act or the Railroad Unemployment Insurance Act, information regarding the Board's payment of unemployment or sickness benefits, the methods by which such benefits are calculated, entitlement data and present address may be released to the requesting employer for the purposes of determining entitlement to and rates of private supplemental pension, sickness or unemployment benefits and to calculate estimated benefits due.

q. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

r. Records may be disclosed in a court proceeding relating to any claims for benefits by the beneficiary under the Railroad Unemployment Insurance Act and may be disclosed during the course of an administrative appeal hearing in which such records are relevant to the issue.

s. In the event that this system of records, maintained by the Railroad Retirement Board to carry out its function, indicates a violation, or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

t. Non-medical information in this system of records may be released to the attorney representing such individual upon receipt of a written letter or declaration stating the fact of representation, subject to the same procedures and regulatory prohibitions as the subject individual. Medical information may be released to an attorney when such records are requested for the purpose of contesting a determination either administratively or judicially.

u. Beneficiary identifying information, entitlement data, benefit rates and periods paid may be released to the Veterans Administration to verify continued entitlement to benefits.

v. Identifying information such as full name, social security number, employee identification number, date last worked, occupation, and location last worked may be released to any last employer to verify entitlement for benefits under the railroad Unemployment Insurance Act.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper, magnetic tape and microforms.

Retrievability: Social Security number (claim number) and name.

Safeguards: Records are maintained in areas not accessible to the public and are not permitted to be removed from headquarters without authorization.

Retention and disposal: Paper-transferred to the Chicago Federal Records Center one year after the end of the benefit year during which the case was closed. Destroyed by the General Services Administration five years after the end of the benefit year. In appeal cases, retention is permanent. In benefit recovery cases, the file is transfered to the Federal Records Center if there has been no recent activity; the file is not destroyed until five years after recovery has been completed. Magnetic tape-destroyed ten years after the end of the benefit year. Microforms-destroyed ten years after the end of the benefit year.

System manager(s) and address:

furnish an authorization from the individual to permit release of information.

Record access procedures: See Notification section above.

Contesting record procedures: See Notification section above.

Record source categories: Applicant, claimant or his representative, physicians, employers, unemployment claims agents, labor organizations, Federal, State, and local government agencies, all Railroad Retirement Board files, insurance companies, attorneys, congressmen, liable parties (in personal injury cases), funeral homes and survivors (for payment of death benefits).

System name: Payroll Record System—RRB.

System location:

U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611

Categories of individuals covered by the system: Railroad Retirement Board employees.

Categories of records in the system: Time, leave, and payroll information.

Authority for maintenance of the system: Pay Acts as amended.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. Salary and tax information may be disclosed to Internal Revenue Service. State and city taxing authorities for tax purposes.

b. Service history including pay, benefits, salary deductions for retirement, and other information necessary may be disclosed to Civil Service Commission for use in computation of civil service annuities and to carry out its Government-wide personnel management functions.

c. Computer check issue tapes may be released to the Department of Treasury for issuance of salary checks.

d. Identification information, check number, data and amount, plus other supporting evidence may be forwarded to the U.S. Postal Service for investigation of alleged forgery or theft of salary checks.

e. The last addresses and employer information may be released to Department of Health, Education, and Welfare in conjunction with the Parent Locator Service.

f. Records may be disclosed to the General Accounting Office for auditing purposes.

g. In the event that this system of records, maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

h. A copy of the employee's Form W-2, Wage and Tax Statement, or other similar form containing the name, social security number taxable earnings and amounts withheld, may be released to the State, city or other local jurisdiction which is authorized to tax the employee's compensation in accordance with a withholding agreement between the State, city or other local jurisdiction and the Department of the Treasury, or in absence thereof, in response to a written request from an appropriate official of the taxing jurisdiction to the Director of Budget and Fiscal Operations, U.S. Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper, tape and microfilm.

Retrievability: Social security number and name.

Safeguards: Housed in secured building and maintained in areas not accessible to the public; information released only at employee's request or to approved Federal and local authorities.

Retention and disposal: Consolidated pay tapes, first two master tapes, and last two master tapes for each year: Destroy record three years after close of calendar year in which prepared by erasing tape. Security record—current check issue tape. Dispose when National Personnel Records Center receives second subsequent document covering same type of payment. Paper: destroyed after four years. Microfilm: retained until replaced by a new record, usually within one year.

System manager(s) and address:

Director of Budget and Fiscal Operations
U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611

Notification procedure: Requests for information regarding an individual's record should be in writing addressed to the System Manager identified above, including the full name and social security number of the individual. Before information about any record will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information.

Record access procedures: See Notification section above.

Contesting record procedures: See Notification section above.

System name: Health Insurance and Supplementary Medical Insurance Enrollment and Premium Payment System (MEDICARE)—RRB.

System location:

U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611 District and Regional Offices—See Appendix I for addresses.

Categories of individuals covered by the system: Qualified Railroad Retirement beneficiaries who are eligible for medicare coverage, attending physicians, chiropractors and physicial therapists.

Categories of records in the system: Claim number, social security number, name, address, type of beneficiary under the Railroad Retirement Act, date of birth, method of Supplementary Medical Insurance premium payment, enrollment status, amount of premium, paid-thru date, third party premium payment information, coverage jurisdiction determination, direct premium billing and premium refund accounting, correspondence from beneficiaries, physicians suspected of overutilization and those suspended from payment by Medicare.

Authority for maintenance of the system: Section 7(d) of the Railroad Retirement Act of 1974 (45 U.S.C. 231f(d)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

a. Beneficiary identification, enrollment status and premium deductions information may be released to the Social Security Administration and the Health Care Financing Administration to correlate actions with the administration of Title II and Title XVIII (MEDICARE) of the Social Security Act.

b. Beneficiary identification may be disclosed to third party contacts to determine if incapacity of the beneficiary or potential beneficiary to understand or use benefits exists, and to determine the suitability of a proposed representative payee.

c. In the event the Board has determined to designate a person to be the representative payee of an incompetent beneficiary, disclosure of information concerning the benefit amount and other similar information may be made from the record of the individual to the representative payee.

d. Data may be disclosed to Department of Health, Education, and Welfare for reimbursement for work done under reimbursement provisions of Title XVIII of the Social Security Act, as amended.

e. Jurisdictional clearance, premium rate, coverage election, paid-thru date, and amounts of payments in arrears may be released to the Social Security Administration and the Health Care Financing Administration to assist that agency in administering Title XVIII of the Social Security Act.

f. Beneficiary identification, premium rate and paid-thru date may be released to effect state buy-in and third party premium payments.

g. Payment data may be disclosed to consultants to determine reasonable charges for hospital insurance payments in Canada.

h. Entitlement data may be disclosed to primary beneficiaries regarding secondary beneficiaries (or vice versa) when the addition of such beneficiary affects entitlement.

i. Records may be released to contractors to fulfill contract requirements pertaining to specific activities related to the Railroad Retirement Act and Social Security Act, as amended.

j. The last addresses information may be disclosed to Department of Health, Education, and Welfare in conjunction with the Parent Locator Service.

k. Beneficiary identification, entitlement data and rate information may be referred to the Department of State and embassy officials to aid in the development of applications, supporting evidence and the continued eligibility of beneficiaries and potential beneficiaries living abroad.

l. Records may be released to the General Accounting Office for auditing purposes and for collection of debts arising from overpayments under Title XVIII of the Social Security Act, as amended.

m. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

n. Pursuant to a request from an employer covered by the Railroad Retirement Act or the Railroad Unemployment Insurance Act, information regarding the Board's determination of medicare entitlement, entitlement data and present address may be released to the requesting employer for the purposes of determining entitlement to and rates of supplemental benefits payable under private employer welfare benefit plans.

o. If a request for information pertaining to an individual is made by an official of a labor organization of which the individual is a member and the request is made on behalf of the individual, information from the record of the individual concerning his entitlement to medicare may be disclosed to the labor organization official.

p. Records may be disclosed in a court proceeding relating to any claims for benefits by the beneficiary under the Railroad Retirement Act, or Social Security Act and may be disclosed during the course of an administrative appeal hearing which such records are relevant to the issue.

q. In the event that this system of records, maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arsing by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

r. Information in this system of records may be released to the attorney representing such individual in connection with the individual's claim for benefits under the Railroad Retirement Act and Title XVIII of the Social Security Act, as amended, upon receipt of a written letter or declaration stating the fact of representation, subject to the same procedures and regulatory prohibitions as the subject individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper, magnetic tape and microfilm.

Retrievability: Claim number, social security number, full name.

Safeguards: Records are maintained in areas not accessible by the public and are not permitted to be removed from headquarters without authorization.

Retention and disposal: Paper: Computer printouts are retained for three months, then shredded; applications materials in individual claim folders with records of all actions pertaining to the payment or denial of claims are shredded 25 years after the date of last payment or denial activity. Magnetic tape: Updated weekly; obsolete tape written over. Microfilm: Retained for 18 months then shredded.

System manager(s) and address:

Director of Retirement Claims
U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611

Notification procedure: Requests for information regarding an individual's records should be in writing addressed to the system Manager identified above, including the full name and social security number and claim number of the individual. Before information about any record will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information.

Record access procedures: See Notification section above.

Contesting record procedures: See Notification section above.

Record source categories: Applicant (the qualified railroad beneficiary), his/her representative, Social Security Administration. Health care financing Administration, The Travelers Insurance Company, federal, state or local agencies, third party premium payers, all other Railroad Retirement Board files, physicians.

System name: Federal Employee Incentive Awards System—RRB.

System location:

U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611

Categories of individuals covered by the system: Railroad Retirement Board employees who have submitted suggestions or have been nominated for awards.

Categories of records in the system: Employee suggestions, special achievement awards, quality increase awards, public service awards, government-sponsored awards.

Authority for maintenance of the system: Chapter 45, Title 5, U.S. Code.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. Information may be released to the public media for public relations purposes.

b. Records may be disclosed to the General Accounting Office for auditing purposes.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper.

Retrievability: System indexed by number assigned when suggestion or nomination is received. Suggestions are cross-referenced by name of suggester and subject of suggestion.

Safeguards: Only authorized staff has access to the files.

Retention and disposal: Denied suggestions are purged and destroyed 5 years after denial date. Adopted suggestions are retained permanently as are all special achievement and quality increase recommendations.

System manager(s) and address:

Chairman, Incentive Awards Committee
U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611

Notification procedure: Requests for information regarding an individual's record should be in writing addressed to the System Manager identified above, including the full name and social security number of the individual. Before information about any record will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information.

Record access procedures: See Notification section above.

Contesting record procedures: See Notification section above.

Record source categories: Suggestion or award submitted by suggester or nominator. Suggestions submitted by employees; recommendations for award submitted by supervisory personnel.

System name: Social Security Benefit Vouchering System—RRB.

System location: U.S. Railroad Retirement Board.
844 Rush Street
Chicago, Illinois 60611

Categories of individuals covered by the system: Applicants after December 31, 1974, for benefits under Title II of the Social Security Act who have completed ten years of creditable service in the railroad industry, the spouse or survivor of such an individual.

Categories of records in the system: Name, address, social security number, type and amount of benefit, suspension and termination information.

Authority for maintenance of the system: Section 7(b)(2) of the Railroad Retirement Act of 1974 (45 U.S.C. 231f(b)(2))

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. Benefit rate information may be disclosed to primary beneficiaries regarding secondary beneficiaries (or vice versa) when the addition of such beneficiary affects either the entitlement or benefit payment.

b. In the event the Board has determined to designate a person to be the representative payee of an incompetent beneficiary, disclosure of information concerning the benefit amount and other similar information may be made to the representative payee from the record of the individual.

c. Benefit rates, names and addresses may be released to the Treasury Department to control for reclamation and return of outstanding benefit checks, to issue benefit checks, act on reports of non-delivery, and to insure delivery of check to the correct address of the beneficiary or representative payee.

d. Beneficiary's name, address, check rate and date plus supporting evidence may be released to the U.S. Postal Service for investigation

of alleged forgery or theft of railroad retirement or social security benefit checks.

e. Beneficiary's name, effective date, benefit rate and months paid

i. Information in this system of records may be released to the attorney representing an individual in connection with that individ-

South Central
P.O. Box 5493

of alleged forgery or theft of railroad retirement or social security benefit checks.

e. Beneficiary's name, effective date, benefit rate and months paid may be disclosed to the Veterans Administration to verify continued entitlement to benefits.

f. Benefit rates and effective dates may be disclosed to the Social Security Administration, Bureau of Supplemental Security Income, to Federal, State and local welfare or public aid agencies to assist them in processing applications for benefits under their respective programs.

g. Last addresses information may be disclosed to the Department of Health, Education, and Welfare in conjunction with the Parent Locator Service.

h. Benefit rates, entitlement and other necessary information may be released to the Department of Labor in conjunction with payment of benefits under the Federal Coal Mine and Safety Act.

i. Pursuant to a request from an employer covered by the Railroad Retirement Act or the Railroad Unemployment Insurance Act, information regarding the Board's payment of benefits, the methods by which such benefits are calculated, entitlement data and present address may be released to the requesting employer for the purposes of determining entitlement to and the rates of private, supplemental pension benefits and to calculate estimated benefits due.

j. If a request for information pertaining to an individual is made by an official of a labor organization of which the individual is a member and the request is made on behalf of the individual, information from the record of the individual concerning his benefit or anticipated benefit and concerning the method of calculating that benefit may be disclosed to the labor organization official.

k. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

l. Information may be released to contractors to fulfill contract requirements pertaining to specific activities related to the Railroad Retirement Act.

m. Records may be disclosed to the General Accounting Office for auditing purposes and for collection of debts arising from overpayments under Title II of the Social Security Act, as amended.

n. Records may be disclosed in a court proceeding relating to any claims for benefits by the beneficiary under the Railroad Retirement Act and may be disclosed during the course of an administrative appeal hearing in which such records are relevant to the issue.

o. In the event that this system of records, maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

p. Information in this system of records may be released to the attorney representing an individual in connection with that individual's claim for benefits under the Railroad Retirement Act or Title II of the Social Security Act, as amended, upon receipt of a written letter or declaration stating the fact of representation, subject to the same procedures and regulatory prohibitions as the subject individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper, magnetic tape and microforms.

Retrievability: Social security account number, full name.

Safeguards: Paper and microforms: maintained in areas not accessible to the public, offices are locked during non-business hours. Magnetic tape: computer and computer storage rooms are restricted to authorized personnel.

Retention and disposal: Paper: Individual claim folders with records of all actions pertaining to the payment of claims are shredded 25 years after the date of last payment or denial activity. Other paper listings are destroyed one year after date of issue, except for accounts receivable listings which are destroyed only after General Accounting Office audit. Magnetic tape: Tapes are updated at least monthly, writing over obsolete data. Microforms: Originals are kept for five years; duplicates for one year: destroyed by shredding.

System manager(s) and address:

Director of Retirement Claims
U.S. Railroad Retirement Board
844 Rush Street
Chicago, Illinois 60611

Notification procedure: Requests for information regarding an individual's records should be in writing addressed to the System Manager identified above, including full name and social security number of the individual. Before any information about any record will be released, the System Manager may require the individual to provide proof of identity or require the requester to furnish an authorization from the individual to permit release of information.

Record access procedures: See Notidication section above.

Contesting record procedures: See Notification section above.

Record source categories: Individual applicant or his or her authorized representative, the Social Security Administration, other record systems maintained by the Railroad Retirement Board.s

System name: MEDICARE: Part B (Supplementary Medical Insurance) Payment System—Contracted to The Travelers Insurance Company—RRB.

System location:

Main Office: The Travelers Insurance Company
One Tower Square
Hartford, Connecticut 06115
Regional Offices: See Appendix II for addresses.

Categories of individuals covered by the system: Qualified railroad retirement beneficiaries covered by MEDICARE, Part B, who file claims under the medical insurance program.

Categories of records in the system: Name, health insurance claim number, address, telephone number, description of illness and treatment pertaining to claim, indication of other health insurance or medical assistance pertinent to claim, date(s) and place(s) of physician service, description of medical procedures, services, or supplies furnished, nature of illness(es), medical charges name, address and telephone of physician, Part B entitlement date, Part B deductible status.

Authority for maintenance of the system: Section 7(d) of the Railroad Retirement Act of 1974 (45 U.S.C. 231f(d)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

a. In the event the Board has determined to designate a person to be the representative payee of an incompetent beneficiary, disclosure of information concerning the benefit amount and other similar information may be made to the representative payee from the record of the individual.

b. Information regarding payments and deductibles may be released to the Social Security Administration for use in administering title XVIII of the Social Security Act, as amended, and to establish, audit, and maintain account and vouchering records.

c. Records may be disclosed in a court proceeding relating to any claims for benefits under Title XVIII of the Social Security Act, as amended and may be disclosed during the course of an appeal hearing.

d. Records may be disclosed to the General Accounting Office for auditing purposes and for collection of debts arising from overpayments under Title XVIII of the Social Security Act.

e. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

f. Pursuant to a request from an employer covered by the Railroad Retirement Act or the Railroad Unemployment Insurance Act, information regarding the status of a qualified railroad retirement beneficiary's enrollment in Medicare and premium payment status may be released to the requesting employer for the purposes of coordinating employee supplemental welfare benefits.

g. If a request for information pertaining to an individual is made by an official of a labor organization of which the individual is a member and the request is made on behalf of the individual, information from the record of the individual concerning his entitlement and premium status may be disclosed to the labor organization official.

h. In the event that this system of records maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

i. Information in this system of records may be released to the attorney representing an individual in connection with that individual's claim for benefits under the Railroad Retirement Act or Title XVIII of the Social Security Act, as amended, under receipt of a written letter or declaration stating the fact of representation, subject to the same procedures and regulatory prohibitions as the subject individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper, magnetic tape and microforms.

Retrievability: Health insurance claim number, name.

Safeguards: The Travelers Insurance Company is bound by the contract set forth by the Railroad Retirement Board which contains specific instruction regarding its responsibility in claim information handled and released. It is also bound by the same regulations regarding disclosure and security of information as the Board itself.

Retention and disposal: Each Travelers' office retains material for 27 months. At the end of 27 months the material is sent to the Federal Records Center. After 2 years the Federal Records Center destroys the material.

System name: Medical Examiner's Index—RRB.

System location: District Offices: See Appendix I for addresses.

Categories of individuals covered by the system: Physicians who have agreed to examine applicants.

Categories of records in the system: Physician's name, address, telephone number, medical field and specialties, special equipment available, fees, names of those examined and dates of examinations.

Authority for maintenance of the system: Section 7(b)(6) of the Railroad Retirement Act of 1974 (45 U.S.C. 231f(b)(6)) Section 12(l) of the Railroad Unemployment Insurance Act (45 U.S.C. 362(l)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: In the event that this system of records, maintained by the Railroad Retirement Board to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper.

Retrievability: Name of physician.

Safeguards: Kept in a special, separate file in an area of the office accessible only to district office employees. The office is locked during non-business hours.

Retention and disposal: Maintained indefinitely; cards will be removed and destroyed upon request of the doctor. If the physician's service has proved to be too slow or otherwise unsatisfactory, the record is destroyed by shredding.

System manager(s) and address:

Director of Retirement Clains
U.S. Railroad Retirement Board

SUBTITLE A—OFFICE OF THE SECRETARY

PART 94—GENERAL PROVISIONS FOR PROGRAMS UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

PART 97—SPECIAL FEDERAL PROGRAMS AND RESPONSIBILITIES UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Youth Programs Under the Comprehensive Employment and Training Act

AGENCY: Department of Labor.

ACTION: Final rules.

SUMMARY: The purpose of this publication is to publish final regulations to implement the Youth Community Conservation and Improvement Projects and the Youth Employment and Training Programs under the Youth Employment and Demonstration Projects Act of 1977 (YEDPA). Although these regulations are not effective until 30 days after publication, prime sponsors should utilize these regulations for planning and implementing the fiscal year 1979 program.

DATE: Effective date: October 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert Taggart, Administrator, Office of Youth Programs, U.S. Department of Labor, 601 D Street NW., Washington, D.C. 20213, 202-376-2646.

SUPPLEMENTARY INFORMATION: The Youth Employment and Demonstration Projects Act (YEDPA) of 1977, Pub. L. 95-93, became effective on August 5, 1977. It amended the Comprehensive Employment and Training Act (CETA) of 1973 by adding several new programs for youth. The purpose of these new programs is to employ and increase the future employability of young persons, to help coordinate and improve existing career development, employment and training programs, and to test different approaches in solving the employment problems of youth. YEDPA contains four distinct programs: (1) The Young Adult Conservation Corps (YACC) which emphasizes the participation of youth in needed conservation work on our Nation's public lands; (2) Youth Incentive Entitlement Pilot Projects (YIEPP), designed to test the effect of a year round structured work experience as an entitlement to encourage school completion; (3) Youth Community Conservation and Improvement Projects (YCCIP) designed to provide jobs and employment experience for youth in community betterment projects; and (4) Youth Employment and Training Programs (YETP) structured to make available to youth a broad range of employment and training services designed locally and adapted to local needs.

Section 702(a) of the Comprehensive Employment and Training Act (CETA) states that the Secretary may prescribe rules and regulations as he deems necessary to carry out the purposes of CETA. Pursuant to this authority, the Department of Labor is setting forth in this document the Federal regulations governing two of the new youth programs, YETP and YCCIP.

Both programs are to be operated by CETA Title I prime sponsors, sponsors of CETA Native American programs, sponsors of CETA migrant and seasonal farmworker programs and such other agencies and/or organizations as designated by the Secretary under his discretionary authority. The regulations in this document do not apply to Native American and migrant YETP and YCCIP programs. These regulations also do not apply to the Secretary's YETP and YCCIP discretionary funds.

For informational purposes, the following summary of requirements emphasizes several major provisions applicable to the implementation and operation of the YETP/YCCIP programs. These statements are in a narrative format to assist the reader in formulating an understanding of these programs.

Requirements Common to YCCIP and YETP Labor Union Participation

Section 353(d) of CETA requires that where an appropriate local labor organization represents employees who are engaged in similar work in the same area to that proposed to be performed under the program, that organization shall be afforded a reasonable period of time prior to the submission of the application in which to make comments.

The regulations provide for a 30-day comment period prior to the submission of YETP and YCCIP plans to the regional administrators. During that period, appropriate local labor organizations may make written comments to the eligible applicant. The eligible applicant must consider any such comment before submitting its plan to the Regional Administrator (RA). Additionally, if there are any changes in wage rates or job classifications to jobs in youth plans approved by the RA, appropriate labor organizations must be notified in writing at least 15 days prior to implementing such changes. If the appropriate labor organization disagrees with the proposed changes, the dispute must be resolved in writing prior to implementing such changes.

Requirements Common to YCCIP and YETP Annual Narrative Report

YEDPA as a Youth Employment and Demonstration Act, established a number of new procedures for youth programs as well as numerous demonstration programs to generate information for national as well as local decisionmakers. In March 1978, the Comprehensive Youth Initiatives Report was submitted to Congress reporting on the efficacy of different procedures to deal with the substantial unemployment problems of the Nation's youth.

One source of information about local operations is the prime sponsor's Annual Narrative Report. In the grant application process, prime sponsors shall describe qualitative and quantitative program goals which reflect local community and participant needs.

At the end of the fiscal year and on a date established by the Department of Labor, each prime sponsor shall submit an Annual Narrative Report. This report will include an assessment of the sponsor's performance and accomplishment of YETP and YCCIP.

Requirements for YCCIP Participation of Neighborhood and Community Based Organizations

Legislative history indicates the clear intent of Congress that YCCIP projects be carred out by neighborhood and community based organizations insofar as feasible. The regulations require that eligible applicants establish procedures which assure that potential project applicants, particularly neighborhood and community based organizations, are notified of the application process. Each eligible applicant is further required to establish objective project selection criteria which will be applied first to applications of neighborhood and community based organizations; only after these have been given such primary consideration may applications of other project applicants be considered. Furthermore, if eligible applicants elect to limit the types of activities for which the project applicants will compete, the regulations require that they secure the approval of the youth and planning councils in the selection of these activities.

Eligibility for Participation

Section 332 of CETA requires that any unemployed youth aged 16 to 19, inclusive, is eligible for YCCIP. However, it is intended that prime sponsors target the large majority of resources available to them for projects employing out-of-school youths. In section 354, CETA further requires that appropriate efforts be made to insure that participating youths shall be those who are experiencing severe difficulties in obtaining employment, including those who have demonstrated special needs, as determined by the Secretary. Because statistics show that youth in low-income families, particularly minority youth, have the highest unemployment rates, highest school dropout rates, and the greatest difficulties in entering the labor market, the regulations require that eligible applicants give preference to economically disadvantaged youth, and that they describe in their proposed plans the procedures they will use to assure this preference is given.

Program Funding Estimates

Section 333 of CETA provides for allocation of YCCIP funds among the States based on the relative number of unemployed persons within each State as compared to all States. No provision is made for allocations within States. Program funding estimates rather than allocations are provided to each title I eligible applicant based on the relative share of the unemployed in that eligible applicant's area compared to all unemployed within the State. If an eligible applicant declines to participate in YCCIP or submits insufficient approval project applications, the RA may award its funds to other eligible applicants in the State within 30 days after a notification from the RA.

Supervision at Work Sites

Section 335 of CETA requires that project applicants assure that there are adequate numbers of supervisory personnel on the project. Because well supervised activities are essential both for enhancing work habits and the development of skills, the regulations require that there should be at least the equivalent of 1 full-time supervisor to every 12 youths, unless adequate justification can be provided to support another ratio.

Limitation on Use of Funds

Because section 335 of CETA requires that this program be labor intensive, to the maximum extent feasible, the regulations have established percentage limitations on the use of the funds available. No more than 5 percent of the total funds available to an eligible applicant and program agents, if any, may be used for administrative costs. Of the remaining funds, at least 65 percent must be spent on participant wages and fringe benefits, unless the eligible applicant can justify a lower amount, and no more than 10 percent can be used by project applicants for administrative costs. Project applicants and eligible applicants are further encouraged to secure worksite supervisors, materials, and supplies from other sources, wherever feasible.

Role of Program Agents

Section 336 of CETA permits program agents under title II of CETA to act as program agents under YCCIP. A jurisdiction eligible to be a program agent and electing to assume those functions under YCCIP will be responsible for the approval and disapproval of project applications submitted in its area and for the administration of the projects pursuant to section 204(d) of CETA; however, program agents must share with eligible applicants the funds available for administrative costs.

Requirements for YETP Special Consideration for Community Based Organizations

Section 343(e) of CETA requires that special consideration be given to community based organizations (CBO's) of demonstrated local effectiveness in the delivery of employment and training services to youth. To assure special consideration, the regulations require that eligible applicants (1) actively involve local CBO's in the planning process and describe that role in the grant narrative; (2) provide public notification of the proposed youth plan through appropriate media to all CBO's and through written notification to CBO's of demonstrated local effectiveness in serving youth; (3) maintain documentation relating to the selection of service deliverers; and (4) consult with CBO's prior to directly performing classroom training, on-the-job training or work experience and document the administrative and programmatic benefits of such direct operation.

To further provide special consideration for CBO's the regulations require that, 30 days prior to the submission of youth plans to the RA, eligible applicants must provide to CBO's of demonstrated local effectiveness the full youth plan or a summary of the youth plan which at a miminum identifies the deliverers selected, the services each is to offer and the target group(s) to be served. Eligible applicants are to respond in writing to any substantive comments from CBO's regarding the selection of service deliverers and must include those responses in the plan submitted to the RA.

Eligibility for Participation

Section 345(a) of CETA generally limits participation in YETP to individuals who are in families whose income does not exceed 85 percent of the lower living standard income level determined by the Bureau of Labor Statistics. Although the legislation also permits in some cases the provision of services to youth from families above that income level, the legislation and legislative history clearly indicate that YETP funds should be concentrated on those having severest difficulties in obtaining employment. The regulations, therefore, limit services to youth from families with incomes above the lower living standard income level to: counseling; placement services, occupational, educational, and training information; job referral information through coordinated intake; and programs to overcome employment-related sex stereotyping. In order to further target these programs to those having greatest need, the regulations also require that eligible applicants give preference to economically disadvantaged youth and that they describe in their proposed plans, the procedures they will use to assure that this preference is given.

Section 345(a) of CETA also allows that 10 percent of the funds available for this program may be used for programs which include youth of all economic backgrounds in order to adequately test whether the disadvantaged benefit from participation in nontargeted programs. Programs mixing youths in different economic backgrounds must be an identifiable program component which follows a structured experimental design in which comparison groups and follow-up are used to determine the benefits to the disadvantaged. A report on the results must be submitted at the end of the fiscal year.

Agreements with Local Educational Agencies (LEA's)

Section 343(d) of CETA requires that not less than 22 percent of the funds allocated to each eligible applicant must be used for programs for in-school youth carried out pursuant to agreements between eligible applicants and local educational agencies.

Since it is the purpose of LEA agreements to link eligible applicants and local educational agencies, only those two public entities may be signatories to the agreement. The particular form of the agreement itself has, however, been left flexible. The agreement may be financial or nonfinancial, and local educational agencies are encouraged to use other service deliverers in the area that can effectively provide the types of activities needed to serve the YETP in-school target population.

The regulations further provide for in-school career employment experience which combines ancillary transition services with any in-school work

experience or on-the-job training sup-

contained in this section and the plan-

This term has been retained to empha-

experience or on-the-job training supported under YETP.

SUMMARY OF CHANGES FROM PROPOSED REGULATIONS

On July 5, 1978, the Department of Labor published in the FEDERAL REGISTER proposed changes to the YETP and YCCIP regulations for the fiscal year 1979. The comment period ended on July 31, 1978; during this period few comments were received, most of which supported the proposed changes. For those proposed changes on which no comments were received, the changes have been incorporated without explanation. For those regulations on which substantive comments were received each comment was reviewed with respect to the feasibility of implementing the change without disrupting the planning efforts currently underway and the particular merits of the suggestion. The changes made in these final regulations reflect the reactions to the comments received. For each of these changes, a short explanatory statement is provided to describe the substantive amendments. A description of these amendments to the July 5 proposed changes follows:

SECTION 97.602 AND 97.702—DEFINITIONS

The definition for the term "appropriate labor organization" found in these sections of the proposed regulations used the phrase "jurisdiction to represent employees." A comment was received from a national labor organization indicating that this phrase is too general. Therefore, the word local has been inserted to limit the term, "appropriate labor organizations" to mean local labor organizations that have jurisdiction to represent employees.

SECTION 97.616—APPLICATION FOR FEDERAL ASSISTANCE

The proposed regulations proposed and extension of the comment period for appropriate labor organizations from 15 to 30 calendar days in which they may submit written comments to the eligible applicant. Several comments were received, some in favor of the extended time period but most disagreeing with the change. However, the 30 day proposed provision is consistent with the time frame allowed for the State A-95 clearance process and does not disrupt the current plan comment period. Therefore, the final regulations contain the provision for a 30 day comment period for appropriate labor organizations.

Several commentors expressed their concern for the late publication of the proposed regulation changes, stressing that much of the fiscal year 1979 planning has occurred. To alleviate the difficulty in complying with the changes contained in this section and the planning provisions of other sections, § 97.616(b)(2) has been amended to include a statement that each RA shall establish a schedule for submission of the grant application which may include a request that a preliminary copy of the grant application be submitted to the regional office for review during the regular public comment period. However, the grant application cannot be approved until 30 days after submission of the plan to the appropriate organizations for comment and review. (This same provision has been included under § 97.711(a) of the YETP regulations.)

SECTION 97.623—ELIGIBILITY FOR PARTICIPATION

In the proposed regulations, a new paragraph (f) was added to this section to limit the enrollment of an individual to a maximum of 12 months in YCCIP. Many comments were received objecting to the limitation. This limitation is mandated by section 331 of CETA. The provision in the proposed regulations is not a new provision, but rather a reemphasis of § 97.611(c)(1) which requires all project applications to describe the expected duration of employment under each project and limits this duration to not more than 12 months.

SECTION 97.628—SUPERVISORY PERSONNEL

Although not a proposed change in the July 5, 1978, regulations, the provision of paragraph (b) of this section regarding the promotional rights of existing employees has been deleted. The provision is incorporated by reference in a new § 97.632, Maintenance of Effort which clarifies that the maintenance of effort provisions common to YETP apply to YCCIP.

SECTION 97.632—MAINTENANCE OF EFFORT

A new section addressing the maintenance of effort provisions applicable to the YCCIP has been added. This section clarifies that the maintenance of effort provisions under § 97.719 for YETP apply to YCCIP.

SECTION 97.705—ELIGIBLE APPLICANT PLANNING PROCESS

The proposed regulations added a new paragraph (e) to this section to provide a fair and open selection process of subgrantees/contractors and to bring the selection process to the attention of community-based organizations. In the proposed regulations, the word "competition" was used in discussing this process. Several commentors requested an explanation of this term, indicating that the language is subject to varying interpretations. This term has been retained to emphasize that prospective applicants should have an adequate opportunity to submit proposals and that prime sponsors should conduct a thorough and meaningful evaluation of such proposals. Paragraph (e)(2) sets forth specific procedures under which the competitive selection process is to be conducted; thus, there is little cause for confusion as to the meaning of "competition" in this context. This language is not intended to impose a requirement that selection of service delivers must be conducted by formal advertising or bidding; instead, it is designed to ensure that the selection process be a fair and open one.

Some commentors expressed concern that a competitive selection process would contravene the requirement at section 343(e) of CETA that special consideration be given to community-based organizations which have demonstrated effectiveness in the delivery of employment and training services. In response to these comments paragraph (e) has been revised to require that special consideration to such organizations shall constitute an element of the selection process.

This change is to ensure that even if the eligible applicant uses highly competitive and formalized selection methods; such as bidding, community-based organizations of demonstrated effectiveness will nontheless receive the special consideration to which they are statutorily entitled. It should also be noted that the YETP regulations contain numerous other provisions affording such organizations an opportunity to participate in the planning and development of YETP programs (see above discussion of "Special Consideration for Community Based Organizations").

Additionally, a clarification has been added to indicate that the provisions of paragraph (e) apply only when the eligible applicant does not administer the program itself and subgrants or contracts with other agencies to deliver services.

SECTION 97.709—NARRATIVE DESCRIPTION: PROGRAM AND PLANNING FORMS: ADDITIONAL DOCUMENTATION

The proposed regulations included a requirement that an occupational summary be included as a part of the sponsor's plan. Although no comments were received on this provision, the provision has been deleted since it is not a required planning form under YETP.

SECTION 97.714—ELIGIBILITY FOR PARTICIPATION

A new paragraph (g) has been added to this section which provides that wards of the court and offenders may be eligible for the program if they can

be determined to have left the family unit. This provision has been accepted as a provision under the SPEDY program and has been included to provide consistent eligibility criteria for wards of the court and youth offenders throughout the youth programs.

SECTION 97.716—ALLOWABLE ACTIVITIES AND SERVICES

Although not a proposed change in the July 5, 1978, regulations, a new paragraph (e) has been added to incorporate the vocational exploration program (VEP) as an allowable program activity under YETP. This paragraph clarifies the existing provision of § 97.717(a)(1)(H) and specifies the conditions governing the operation of VEP activities.

SECTION 97.717—IN-SCHOOL PROGRAM

In the proposed regulations, the time frame for the signing of LEA agreements had been reduced to 45 days. Comments were received stressing that the reduced time frame would make if difficult for eligible applicants and local educational agencies to reach agreement since the proposal was published so late in the planning phase of the program. Therefore, to alleviate this difficulty, the regulations have been finalized with the original 60 day period. Appropriate reference to the 45 day period for LEA agreements throughout the regulations has been changed to 60 days.

SECTION 97.718—PARTICIPANT BENEFITS

A new paragraph (c)(2) has been added to clarify that participants in vocational exploration programs (VEP) shall be paid allowances and to provide consistency with VEP programs under the summer youth program (SPEDY).

Paragraph (e) has been revised to indicate that "earnings" received under YETP shall be disregarded in determining eligibility of the youth's family for, and the amount of, any benefits based on need under any Federal or federally assisted programs. This change has been made so that the language of the regulation will parallel exactly the income disregard language of section 356 of CETA which uses the term "earnings".

SECTION 97.719—MAINTENANCE OF REPORT

Previously, paragraph (b) of this section made reference to § 97.334 of this Part 97. Some commentors indicated that the specific provisions of § 97.334 should be written out in these regulations rather than incorporated by reference. Therefore, this has been done.

Accordingly, Title 29 of the Code of Federal regulations is amended as follows:

§ 94.3 [Amended]

1. In § 94.3, Consolidated table of contents for Parts 94-99; the tables of contents for Part 97, Subparts G and H, are revised to read as follows:

Subpart G—Youth Community Conservation and Improvement Projects

GENERAL

§ 97.601 Scope and purpose.

(a) This subpart contains the Department of Labor's regulations governing the establishment and operation of Youth Community Conservation and Improvement Projects (YCCIP) under Title III, Part C, Subpart 2, of the act. The regulations at Part 98 of this title also apply to the YCCIP program, except to the extent noted in this subpart. The provisions at §§ 97.603 through 97.631 apply to the grants to eligible applicants which are title I prime sponsors.

(b) To the extent the regulations set forth in this subpart conflict with other regulations promulgated under the act in 29 CFR Parts 94 through 99, the requirements contained in this subpart shall apply.

(c) This program seeks to provide youth experiencing severe difficulties in obtaining employment with well supervised work in projects that produce tangible benefits to the community. In order to adequately meet community needs, the participation of neighborhood and community based organizations in the program is stressed. This program places predominant emphasis on the development and provision of jobs. Any training must be directly related to the development of specific skills needed for the job. Participation should result wherever possible in the attainment of academic credit for competencies gained from employment. The Department expects that supervisors will play a strong role in introducing and reinforcing desirable work habits. Program operators shall target activities primarily on economically disadvantaged youth, because these individuals, particularly minorities, have the highest unemployment rates, highest dropout rates and greatest difficulties in obtaining employment. Since it is expected that most participants will be school dropouts or have high dropout potential, projects should be structured so that academic credit may be granted for work experience. Youth are to be encouraged to remain in school or return to school if they are out of school. Any programs developed for in-school youth must be flexible enough to accommodate the scheduling needs of such youth.

(d) The Department of Labor will provide allocations of funds for States rather than to eligible applicants, but will provide eligible applicants with program funding estimates to be used by them for planning purposes. Eligible applicants are expected to submit quality project applications selected through an objective process at the local level. The Department will review these project applications, and will fund only those projects which fulfill the requirements of the program. Under certain conditions, an eligible applicant may be awarded less than its program funding estimate, with the remaining funds awarded for acceptable projects to eligible applicants elsewhere in the State.

§ 97.602 Definitions.

Definitions for abbreviations and major terms used in this subpart are contained in § 94.4 of this title. The following definitions are specific to this subpart:

(a) "Appropriate labor organization" shall mean a local labor organization that has jurisdiction to represent employees in the eligible applicant's area in the same or substantially equivalent jobs as those proposed to be filled or already filled by YCCIP participants.

(b) "Eligible applicant" shall mean any prime sponsor qualified under section 102 of CETA, sponsors of Native American programs qualified under section 302(c)(1) of CETA and sponsors of migrant and seasonal farmworkers programs qualified under section 303 of CETA.

(c) "Low-income housing" shall mean dwellings of individuals whose incomes are at or below 125 percent of the poverty level which are privately owned and owner occupied, privately owned by a nonprofit organization, or units of public housing. For weatherization or winterization projects funded and approved by the Federal Energy Administration or the Community Services Administration, "low-income housing" shall include privately owned rental housing.

(d) "Neighborhood and community-based organizations" shall mean (1) neighborhood groups organized at the local level to operate employment and training programs, and which have demonstrated local effectiveness. Such organizations can be private nonprofit organizations or associations; and (2) community-based organizations as defined in § 97.702(c).

(e) "Program funding estimate" shall mean the level of funds announced by the Department for each eligible applicant which is a prime sponsor qualified under section 102 of CETA for its planning purposes. The estimate is determined by apportioning the State allocation among such eligible applicants for YCCIP, using the unemployment data available for each such eligible applicant area in proportion to the unemployment data for the State.

(f) "Project" shall mean "Community Conservation and Improvement Project" which provides constructive work, which would not otherwise be carried out, conducted by youths, under the guidance of skilled supervisors, which (1) results in tangible outputs or a specific product; (2) benefits participants in terms of work habits, skills, and attainment of academic credit where applicable; and (3) will be completed within a definable period of time not to exceed 12 months.

(g) "YCCIP" shall mean the Youth Community Conservation and Improvements Projects.

§ 97.603 Eligible applicants.

Any eligible applicant may apply for funds for projects in its area.

§ 97.604 Allocation of funds; program funding estimates.

(a) *Allocations.* Allocations shall be provided to the States on the basis of the formula and distribution requirements in section 333 of the Act.

(b) *Program funding estimates.* The Secretary will provide eligible applicants with program funding estimates based on their relative share of the State's unemployed.

§ 97.605 Award of funds.

(a) The RA may award to an eligible applicant an amount of funds equal to the program funding estimate when sufficient approvable project applications are submitted by the eligible applicant.

(b) The RA may award to an eligible applicant an amount of funds greater than the program funding estimate when another eligible applicant within the same State has not submitted to the RA a Preapplication for Federal Assistance or sufficient approvable project applications within the time required.

§ 97.606 Reallocation of funds.

The RA shall reallocate funds from one State to another when the RA determines that an eligible applicant will not be able to use the funds within a reasonable period of time and that no other eligible applicant within the same State will be able to effectively use the funds within a reasonabale period of time. The notice and comment procedure described in § 98.11(d) of this title shall apply to such reallocations, except that the reference in § 98.11(d) to paragraph (c) (concerning reallocation based on need) does not apply.

§ 97.607 Redistribution of funds.

The RA shall redistribute funds, after a grant has been signed, from one eligible applicant to another within the State when:

(a) The RA determines that the eligible applicant will not be able to use the funds within a reasonable period of time. The actions described in § 98.11(d) of this title shall apply, except that the reference in § 98.11(d) to paragraph (c) (concerning reallocation based on need) does not apply; or

(b) The RA determines that the eligible applicant's performance is inadequate or that it has failed to comply with the act or the regulations. The procedures set forth in § 98.11(b) of this title shall apply to such cases.

GRANT PLANNING APPLICATION, AND MODIFICATIONS PROCEDURES

§ 97.608 Eligible applicant planning process.

Every eligible applicant which desires funds shall submit a preapplication pursuant to § 97.609 and a plan pursuant to §§ 97.615 through 97.619. The eligible applicant shall utilize the planning process and planning council as described in § 95.13(b) and (c) of this title and the youth council described in § 97.705(b) of this part in developing its plan.

§ 97.609 Preapplication for Federal Assistance (Standard Form 424).

(a) An eligible applicant interested in applying for funds shall submit a Standard Form 424 to the RA, governor and areawide A-95 clearinghouse by a date set by the RA.

(b) The RA may require that the additional information specified below be submitted at the same time as the Preapplication for Federal Assistance. Where the option to require additional information is exercised, an approval or disapproval decision concerning the adequacy of that information must be provided to the eligible applicant by five (5) working days after the submission date of the Standard 424. Further, the additional information submitted by the eligible applicant will not be required for resubmission in the formal proposed plan. The information that may be required in the preapplication includes a description of methods to be used to:

(1) Solicit applications, in particular, from neighborhood and community-based organizations, and for soliciting comments on the project applications from the planning and youth councils § 97.613(g);

(2) Objectively select and rank project applications § 97.614; and

(3) Insure involvement of appropriate labor organizations.

§ 97.610 Project planning process.

(a) In developing the program specifications, eligible applicants may consider proposals for any allowable activities under YCCIP or may elect to limit the types of activities for which project applicants will compete. In the latter case, the eligible applicant must secure the approval of the planning and youth councils in the selection of these activities. The eligible applicant may limit the types and number of project applications by:

(1) Establishing parameters regarding the size and duration of all projects;

(2) Identifying priority community needs, e.g., environmental, weatherization, and housing rehabilitation projects; and

(3) Identifying specific neighborhoods or geographic areas in which projects may be conducted.

(b) A program agent under title II may elect to be a program agent under this subpart. Program agents under YCCIP shall approve or disapprove projects, administer the program in their areas, and be subject to the limitation of funds provided in § 97.631.

(c) Each eligible applicant shall establish procedures for its own use and the use of any program agent(s) which will assure that potential project applicants (as defined in § 94.4 (ppp) of this title), particularly neighborhood and community-based organizations are notified of the project application process and the cut-off date for acceptance of project applications. The method of notification may be public hearings or public notice in the newspapers, bulletins, or other appropriate media.

§ 97.611 Project application content.

All project applications must contain the following information:

(a) Name of agency or organization applying for project funds, type of agency (community-based organization, local educational agency as defined in § 97.702, etc.) and, if applicable, the program agent to which it was submitted;

(b) *Description of Project.* (1) The need for the project in the area in which it will be conducted and how the project will meet the need;

(2) The types of jobs youth are to perform;

(3) The full-time supervisor to youth ratio, or its equivalent and the reason for selecting the ratio;

(4) The qualifications of the supervisors in terms of necessary skills and experiences, or where these are not yet specifically identified, assurances that supervisors will be adequately trained in the skills needed to carry out the projects and in instructing participating youth and a description of the method for selecting supervisors; and

(5) The beginning and ending dates of the project;

(c) *Participants.* (1) Identification of the number of participants to be enrolled and their expected duration of employment, not to exceed 12 months;

(2) List of target groups to be served; and

(3) Description of the expected benefits to participants, e.g., skills to be obtained, other positive terminations anticipated, academic credits to be earned, etc.;

(d) *Job titles, descriptions and wages.* (1) The principal job titles, job descriptions, and hourly wages to be paid for each. If job restructuring as defined in § 97.702(g) is to occur, a description of the methods of analysis to be used, the expected results, the methods for soliciting consultation of appropriate labor organizations, and the relevant expertise of personnel who performed the restructuring; and

(2) The participation of appropriate labor organizations and other affected organizations with regard to job classifications and wage rates;

(e) *Administration.* A description of the project applicant's organization (including type of organization, purpose of organization), experience in operating employment and training programs and/or providing public services, and a description of the accounting and financial management procedures and/or arrangements; and

(f) *Budget.* Totals for the following line items:

(1) Direct program costs as defined in § 98.12(f)(6)(iii) of this title;

(2) Costs of participant wages and fringe benefits;

(3) Costs of wages and fringe bene-

(7) Where job restructuring will

V 43 / 187 SEP 26 78 V4

(3) Costs of wages and fringe benefits of work-site supervisors;
(4) Costs of job-related training;
(5) Costs of materials, supplies and equipment used by participants on the job; and
(6) Cost of supportive services for participants.

§ 97.612 Project application submission.

The project applicant shall submit applications to the program agent for its area, or to the eligible applicant if there is no program agent for its area.

§ 97.613 Project approval.

(a) Criteria shall be established by the eligible applicant to be used consistently by itself and any program agents for evaluating and approving project applications. These criteria are subject to review and comment by the Youth and Planning Councils.
(b) Each project, in order to be approved, must:
(1) Provide tangible output and measurable benefits which will accrue to the community;
(2) Provide benefits to participants in terms of work habits, skills, and attainment of academic credit where applicable;
(3) Be labor intensive;
(4) Assure an adequate level of supervision, taking into account the complexity of the jobs to be created; and
(5) Describe or assure adequate qualifications for supervisors in terms of necessary skills and experience.
(c) Project applicants must assure that the project will result in an increase in employment opportunities over those which would otherwise be available, and that:
(1) It will not result in the displacement of currently employed workers;
(2) It will not substitute jobs assisted under this subpart for existing federally assisted jobs;
(3) It will not employ any youth when any other person is on layoff by the employer from the same or any substantially equivalent job in the same area;
(4) It will not employ any person to fill a job opening created by laying off or terminating the employment of any regular employee, or otherwise reducing the regular work force, in anticipation of filling vacancies by hiring youth to be supported under YCCIP;
(5) It will not infringe upon the promotional opportunities which would otherwise be available to persons currently employed in public service not subsidized under the Act;
(6) It will not permit a job to be filled in other than an entry-level position in each promotional line until applicable personnel procedures and collective bargaining agreements have been complied with; and
(7) Where job restructuring will occur or where new job classifications will be developed, these will not be done in order to negate established personnel procedures, or to displace currently employed workers.
(d) The project approval process shall assure that project applications from neighborhood and community-based organizations of demonstrated local effectiveness in providing employment and training services to youth will be considered before applications from other project applicants are considered. Where it can be documented that the neighborhood or community-based organization does not have the administrative capability to run the project, or its project application does not meet the criteria established by the prime sponsor, then project applications from other than neighborhood and community-based organizations may be considered: *Provided,* The same criteria are used.
(e) Program agents shall review the project applications submitted to them, approve or disapprove them, and submit all project applications to the eligible applicant, indicating their approval of disapproval.
(f) The eligible applicant shall review those project applications received, including those submitted by any program agent(s). When reviewing those submitted by a program agent, the eligible applicant shall give due consideration to project applications approved by the program agent.
(g) After review, the eligible applicant shall submit all project applications to the youth and planning councils for comment and recommendations.
(h) After review of any comments and/or recommendations of the planning and youth councils, the eligible applicant shall approve or disapprove the project applications. The eligible applicant, however, shall not disapprove a project application recommended for approval by the planning council unless it has first considered any comments and recommendations made by the planning and youth councils and unless it has provided the councils with a written statement of its reasons for disapproval (sec. 336(c)(2)).
(i) In cases of disapproval, the eligible applicant shall inform the project application in writing of its disapproval. It must also indicate the reasons for the disapproval.

§ 97.614 Project prioritization.

(a) Each eligible applicant shall rank, in terms of their relative priority, approved project applications.
(1) It shall first rank those projects having highest priority whose total proposed cost does not exceed the amount available for projects (see § 97.631).
(2) It shall then rank those additional approved project applications, if any, for future funding consideration as described in § 97.615 (b)(2).
(b) Eligible applicants shall document the rationale used for ranking the approved project applications.

§ 97.615 Submission of the proposed plan.

(a) Each eligible applicant must submit a proposed plan to the RA by a date established by the RA. The proposed plan shall consist of prioritized project applications as well as the items described in §§ 97.616 through 97.619. The eligible applicant shall also submit any project applications approved by any program agents, but disapproved by the eligible applicant, together with a description of the due consideration which was accorded to them.
(b) Each eligible applicant shall submit two separate lists of project applications prioritized in accordance with the provisions fo § 97.614:
(1) A primary listing of prioritized proposed projects not to exceed 100 percent of the program funding estimate; and
(2) A secondary listing of prioritized proposed projects without dollar or number limitations. This second listing will be considered for future funding in instances where:
(i) Projects submitted within the 100 percent are not acceptable to the RA;
(ii) A project is subsequently found to be non-productive or is withdrawn; or
(iii) Additional funds become available.
(3) Prime sponsors submitting a secondary listing will be given primary consideration for receipt of additional funding.

§ 97.616 Application for Federal Assistance.

(a) Standard Form 424, Application for Federal Assistance, shall be submitted.
(b)(1) Where there is an appropriate labor organization, it shall be given either the complete proposed plan or a summary of the proposed plan which includes a list of all job classifications and wage rates and afforded 30 calendar days to make written comments to the eligible applicant prior to the submission of the proposed plan to the RA.
(2) The comment and publication procedures provided in § 95.15 of this title shall apply to YCCIP; except that, the RA shall establish a schedule for submission of the grant application which may include a request that a preliminary copy of the grant application be submitted to the regional office for review. However, the grant application cannot be executed until 30 days after submission of the plan to appropriate organizations during which time comments can be submitted to the RA and prime sponsor.
(3) Project applicants and other interested parties must be notified through appropriate media that they may review the proposed plan at a designated location.

§ 97.617 Narrative description.

The narrative description shall contain the eligible applicant's overall strategy and design and shall describe the procedures to be used to implement and administer the program including:
(a) Methods used to solicit project applications, in particular those from neighborhood and community-based organizations;
(b) Methods used to approve and prioritize project applications;
(c) The criteria used for approving and prioritizing project applications;
(d) The participation of appropriate labor organizations;
(e) Recruiting methods to be used if different from those described in the Prime Sponsor Agreement (PSA). This description should include coordination with other programs under the Act;
(f) The target groups to be served and procedures used to assure that economically disadvantaged youths receive preference;
(g) Plans for assessing the results of the projects to both the participants and the community; and
(h) A description of the administrative structure including subgrant and contract administration, which will be used if different from that described in the PSA.

§ 97.618 Budget Information Summary and Program Planning Summary.

A Budget Information Summary and Program Planning Summary shall be completed by the eligible applicant and submitted as part of the plan. Eligible applicants shall use the classifications of costs by category which are provided in the grant package instructions.

§ 97.619 Special assurances and certifications.

(a) The proposed plan shall contain the following special assurances:
(1) Compliance with Prime Sponsor Agreement (PSA), including the assurances and certifications in the PSA;
(2) Compliance with the Youth Employment and Demonstration Projects Act of 1977 and the regulations of 29 CFR 97.601-97.631 and will be administered consistent with the Act and 29 CFR Subparts G and H;
(3) Compliance with the Hazardous Occupations Orders issued pursuant to the Fair Labor Standards Act and set forth at 29 CFR 570.50 *et seq.* with respect to the employment of youths under 18 years of age;
(4) Assurance that any person hired to supervise youth, under this subpart, will not impede the promotional rights of existing employees; and
(5) Assurance that local labor organizations who represent employees engaged in work similar to that proposed to be performed under this subpart are notified in writing of all wage rate and job classification changes.

§ 97.620 Plan review and approval.

(a) The RA shall first review the project applications to determine if they meet the requirements of the Act, the regulations of this subpart and other applicable law.
(b)(1) Using the factors and assurances set forth in § 97.613 (b) and (c), the RA shall consider ranked projects and may approve projects up to 100 percent of the amount of the eligible applicant's program funding estimate which is available for projects.
(2) The RA shall disapprove any project application which does not meet the factors and assurances of § 97.613 (b) and (c) and other requirements of the Act, the regulations and other applicable law. RA's will review individual applications for outstanding disagreements between appropriate labor organizations, employers and eligible applicants with respect to jobs that have been restructured. RA's will provide in writing to the eligible applicant an explanation for any prioritized project applications that are rejected.
(c) If there are not sufficient approvable prioritized project applications in the plan to equal the amount of the eligible applicant's program funding estimate which is available for projects, the RA shall allow the eligible applicant 30 days in which to modify the prioritized project applications which were submitted to the RA. If the eligible applicant fails to submit revised project applications or submits revised project applications which are not approvable, the RA shall award the unused funds to another eligible applicant within the State. In States with only one eligible applicant or in States where no other eligible applicant will be able to spend these funds within a reasonable period of time, the RA shall initiate the reallocation procedures set forth in § 97.606.
(d) The approval of the proposed plan will be in accordance with § 95.18 of this title.
(e) The RA shall determine whether or not the eligible applicant gave due consideration to project applications approved by any program agent, but disapproved by the eligible applicant.

§ 97.621 Modifications.

(a) Any modification to the plan will be in accordance with the provisions of § 95.21 of this title, except that in § 95.21(a) the term "project(s)" shall be read for the term "program activities," and references to public service employment shall be disregarded.
(b) Appropriate labor organizations and the RA must be notified in writing of all wage rate and job classification changes under the youth plan at least 15 calendar days prior to implementing such changes. If the appropriate labor organization disagrees with the proposed changes in job classification or wage rates, the dispute must be resolved in writing prior to implementing such changes.

ADMINISTRATIVE PROVISIONS

§ 97.622 Administrative provisions.

(a) Eligible applicants shall comply with the administrative provisions of Part 98 of this title in operating programs pursuant to this subpart, except as stated in §§ 97.629 and 97.631.
(b) Eligible applicants or program agents shall enter into financial agreements with project applicants except as provided in paragraph (d) of this section. With respect to such agreements, program agents are governed by the fund restrictions set forth in § 97.631.
(c) Eligible applicants must share administrative costs as provided under § 97.631(a) with the program agent(s).
(d) The eligible applicant or program agent may enter into a nonfinancial agreement with a project applicant if there is a written agreement between the project applicant and the eligible applicant that clearly identifies the adminstrative and programmatic benefits of such a non-financial agreement.

PROGRAM OPERATIONS

§ 97.623 Eligibility for participation.

(a) In order to participate, an individual must at the time of application and enrollment:
(1) Be 16 through 19 years of age, inclusive; and
(2) Be unemployed, as defined in § 94.4(ggg) of this title.
(3) If at the time of enrollment in any other program under the Act, a 16 through 19 year old youth was unemployed, that individual may be transferred into this program: *Provided:* The individual meets the age eligibility at the time of transfer.
(b) Eligible applicants shall give preference to the economically disadvantaged, as defined in § 94.4(s) of this title.
(c) Appropriate efforts shall be made to serve those youths who have severe

difficulties in obtaining employment,

§ 97.628 Supervisory personnel.

become a part of the construction

the Department in developing future

(ii) Developing new position descrip-

§ 97.704 Reallocation procedures.

(a) Reallocation procedures under

difficulties in obtaining employment, as described in § 97.714(e).

(d) The citizenship and veterans provisions of § 95.32 (d) and (e)(1) of this title shall apply to YCCIP programs.

(e) No youth may enroll in full-time employment opportunities if the eligible applicant determines that there is evidence the youth dropped out of high school in order to participate (sec. 353(f)(2)).

(f) Each participant shall be limited to a maximum enrollment of 12 months with no more than two terminations and reenrollments provided age eligibility is met at the time of each reenrollment. However every effort should be made to transition participants into unsubsidized jobs or other CETA opportunities upon completion of the 12 months enrollment (sec. 331).

§ 97.624 Acceptable project activities.

(a) Each project shall insure that each participant does constructive work in terms of individual and community benefits during the participation in the program. Such employment shall be in projects that may include the rehabilitation or improvement of public facilities (including accessing them for the handicapped by removing architectural barriers); neighborhood improvements; weatherization and basic repairs to low-income housing as defined in § 97.602(c); energy conservation including solar energy projects, especially those utilizing materials and supplies available without cost; and conservation, maintenance, or restoration of natural resources of non-Federal publicly held lands.

(b) Training provided must be directly related to a participant's job.

(c) Where in-school youth are served, they must be in a structured combination work and education program.

§ 97.625 Participant benefits.

(a) Participants shall be paid wages as described in § 97.718(d).

(b) Each participant shall be provided the benefits and working conditions as provided in § 98.24 of this title.

§ 97.626 Academic credit.

Eligible applicants shall make appropriate efforts to encourage educational agencies and postsecondary institutions to award academic credit for the competencies participants gain from their employment.

§ 97.627 Substitution for Title I programs.

Programs funded under YCCIP shall be supplementary to, and shall not replace programs and activities for youth available under title I of the Act (see §§ 95.13(b)(3) and 95.14(b)(3)(ii)(G) of this title).

§ 97.628 Supervisory personnel.

Each project must have an adequate number of skilled supervisors. There must be at least the equivalent of 1 full time supervisor to every 12 youths, unless satisfactory justification for another ratio is provided in the eligible applicant's plan. Supervisors must have the skill needed to carry out the project and must be able to instruct participants in those skills.

§ 97.629 Materials, equipment and supplies.

(a) Funds may be expended subject to the limitation of § 97.631 for the acquisition, lease or rental of supplies, equipment, and materials. The provisions of § 98.12(c) of this title which prohibits the use of funds for the costs of materials which become a part of the construction do not apply.

(b) Eligible applicants are encouraged to make use of resources from Community Services Administration and Federal Energy Administration to supplement YCCIP funds. Eligible applicants should be aware that Federal statutes which provide funds for materials, supplies, etc., often have Davis-Bacon related provisions which may affect wage rate levels in projects involving construction.

§ 97.630 Earnings disregarded.

Earnings received by any youth under this subpart shall be disregarded in determining the eligibility of the youth's family for, and the amount of, any benefits based on need under any Federal or federally assisted programs.

§ 97.631 Limitation on use of funds.

(a) No more than 5 percent of the total funds may be used by the eligible applicant and program agent(s) for administrative costs including those supportive costs as defined in § 98.12 (f)(6)(ii) of this title and those costs incurred in the establishment and maintenance of the prime sponsor's Planning Councils, in publishing a Comprehensive Manpower Plan, and in monitoring and providing technical assistance to contractors and subgrantees. The remaining funds must be made available for projects.

(b) Of the project funds:

(1) At least 65 percent of the funds must be used for participant wages and fringe benefits, unless adequate justification is provided in the eligible applicant's plan.

(2) No more than 10 percent may be used by project applicants for administrative costs including those direct program costs defined in § 98.12 (f)(6)(iii).

(3) Any remaining funds may be used for training of participants, materials, equipment, supplies, on-site supervisors, and supportive services, etc. Such materials and supplies which become a part of the construction project may be chargeable to a training cost category provided these costs are incurred for participants in either a work environment or classroom training.

§ 97.632 Maintenance of effort.

The provisions of § 97.719 shall apply to YCCIP programs

Subpart H—Youth Employment and Training Programs

General

§ 97.701 Scope and purpose.

(a) This subpart contains the regulations for the Youth Employment and Training Programs (YETP) which are authorized by Title III, Part C, Subpart 3 of the Act. These regulations also implement, with respect to YETP, the administrative provisions found in sections 341 through 347 of the Act. The regulations at part 98 of this title also apply to YETP programs except as indicated in this subpart. The regulations at sections 703 through 721 of this subpart apply only to eligible applicants which are title I prime sponsors. To the extent the regulations set forth in this subpart conflict with other regulations issued under the Act in 29 CFR, Parts 94 through 99, the regulations contained in this subpart shall prevail (sec. 357).

(b) It is the purpose of this program to enhance the job prospects and career opportunities of young persons to enable them to secure unsubsidized employment in the public and private sectors of the economy. It is not the purpose of this program to provide make-work activities but rather to provide youth, especially economically disadvantaged youth with opportunities to learn and earn, which will lead to meaningful employment opportunities after they have completed the program. In addition, this program explores methods of dealing with the structural unemployment problems of youth and the immediate difficulties of youth in need of and unable to find jobs (sec. 341).

(c) In order to achieve the highest quality of program services, coordination with existing services for youth is essential. These services include: Activities funded under the other parts of CETA; employment and educational services provided by local educational agencies, and post-secondary institutions; services offered by State Employment Security Agencies; programs funded through other sources such as community-based organizations; and employment and educational activities of business, labor, and nonprofit institutions in the community.

(d) Information gained from the operation of YETP will be considered by

the Department in developing future legislative and program designs.

§ 97.702 Definitions.

Definitions of abbreviations and major terms used in this subpart are contained in § 94.4 of this title. Special definitions applicable to terms found in this subpart are as follows:

(a) "Appropriate labor organization" shall mean a local labor organization that has jurisdiction to represent employees in the eligible applicant's area in the same or substantially equivalent jobs as those proposed to be filled or already filled by YETP participants.

(b) "Career employment experinece" shall mean a program activity for in-school youth which is a combination of both well supervised employment (work experience or on-the-job training) supported under YETP and certain transition services including, at a minimum, career information, counseling and guidance.

(c) "Community based organization (CBO)" shall mean a private nonprofit organization which is representative of a community or of particular segments of a community and which can provide employment and training services. Such organizations may include but are not limited to Opportunities Industrialization Centers, the National Urban League, SER-jobs for Progress, Mainstream, Community Action Agencies, union-related organizations, employer-related nonprofit organizations, neighborhood organizations, private nonprofit youth serving agencies concerned with youth employment and other similar organizations.

(d) "Eligible applicant"shall mean any prime sponsor qualified under section 102 of CETA, sponsors of Native American programs qualified under section 302(c)(1) of CETA and sponsors of migrants and seasonal farmworkers programs qualified under section 303 of CETA.

(e) "In-school program" shall mean a program which provides either or both career employment experience and transition services to in-school youth.

(f) "In-school youth" shall mean a youth who: (1) Is currently enrolled full-time in and attending a secondary, trade, technical, vocational school or community college, or is scheduled to attend full time the next regularly scheduled quarter or semester of any of these schools; or (2) has not completed high school and is scheduled to attend in a school program leading into a secondary school diploma or its equivalent (sec. 343(d)).

(g)(1) "Job restructuring" shall mean the procedure which includes:

(i) Identifying the separate tasks that comprise a job or group of jobs;

(ii) Developing new position descriptions which retain some of the tasks of the original job; and

(iii) Developing a career ladder which builds upward from the new positions containing the lesser skilled tasks to regular jobs.

(2) A restructured job shall be clearly different from the original one in terms of skills, knowledges, abilities, and experience needed to perform the work (sec. 342(a)(3)(L)).

(h) "Local education agency (LEA)" shall mean a public board of education or other public authority legally constituted within a State for either administrative control over, direction of, or service to public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or a combination of such school districts or counties which are recognized in a State as an administrative agency for their public elementary or secondary schools (sec. 343 (d)).

(i) "Of this title" shall mean "of Title 29 of the Code of Federal Regulations."

(j) "Transition services" shall mean services and activities which are designed to assist youth to make the transition from school to unsubsidized jobs. These services are set forth in § 97.717(a)(1).

(k) "YETP" shall mean the Youth Employment and Training Programs.

§ 97.703 Allocation of funds.

(a) *General.* The Secretary shall publish formula allocations to eligible applicants in the FEDERAL REGISTER.

(b) *Formula allocated funds (sec. 343).* (1) The Secretary shall allocate 75 percent of the funds available to YETP to eligible applicants which are prime sponsors under section 102 of CETA.

(2) Of the funds available to YETP, the Secretary shall allocate an amount equal to 5 percent of the funds available under Title III, Part C of the Act, to Governors for programs as specified in § 97.722.

(3) The Secretary shall allocate funds to eligible applicants and Governors using the formula set out in section 343(b) of the Act.

(c) *Additional allocations.* The Secretary shall allocate funds to Indian, Native American, and migrant and seasonal farmworker eligible applicants as provided in section 343 of the Act.

(d) *Secretary's discretionary funds.* The Secretary shall use all remaining funds for programs designed to identify and test approaches for dealing with the unemployment problems of youth (secs. 343, 348).

§ 97.704 Reallocation procedures.

(a) Reallocation procedures under YETP will apply only after a grant is signed.

(b) The RA shall reallocate funds awarded to an eligible applicant if the RA determines that the eligible applicant will not be able to use the funds within a reasonable period of time as determined by the RA (sec. 354(b)).

(c) The procedures described in § 98.11(d) of this title shall apply to reallocations except that the reference in § 98.11(d) to paragraph (c) (concerning reallocation based on need) does not apply.

(d) The RA may also reallocate funds based on nonperformance. The procedures set forth in § 98.11(b) of this title shall apply to the reallocation of funds based on nonperformance.

(e) If all proposed LEA agreements or certifications to existing agreements under a grant are not signed by the eligible applicant and the LEA(s) within 60 days after the initial submission of the YETP plan to the RA for review and approval, the RA shall initiate reallocation procedures for that portion of the 22 percent of the eligible applicant's funds which were required to be covered under LEA agreements. The procedures set forth in § 98.11(d) apply to such reallocations, except that, the reference in § 98.11(d) to paragraph (c) (concerning reallocation based on need) does not apply.

Grant Planning, Application, and Modification Procedures

§ 97.705 Eligible applicant planning process.

(a) *Youth plan.* Every eligible applicant which desires funds shall submit a youth plan containing the items listed in §§ 97.706 through 97.710. In developing its youth plan, the eligible applicant shall:

(1) Take into account the eligible applicant's Title I and summer program plans;

(2) Utilize the planning process and planning council, as described in § 95.13 (b) and (c) of this title, and the youth council described in paragraph (b) of this section;

(3) Afford an opportunity to community based organizations of demonstrated local effectiveness in providing employment and training activities for youth to participate in the development of the youth plan as required by paragraph (c) of this section; and

(4) Afford an opportunity to appropriate labor organizations to participate in the development of the youth plan as required by paragraph (d) of this section.

(b) *Youth council.* Each eligible applicant shall establish a youth council, (sec. 346).

(1) In consultation with the plan-

youth. Special consideration shall con-

(4) Written notification to all appli-

have participated in the planning and have been given special consideration

ments of this subpart and that its documentation is adequate and sufficient.

(e) Programs funded under this subpart shall give preference to economi-

(1) In consultation with the planning council, the eligible applicant shall make appointments to a youth council which include individuals who are representative of the local educational agencies, the local vocational advisory council, post-secondary education institutions, business, unions, the State employment security agency, local government and nongovernment agencies which are involved in serving youth, the local community, and the eligible applicant. In addition, youth council members shall include youths who are participants in, or eligible for YETP.

(2) The youth council may be either an entirely separate council or a subcommittee or subcouncil to the planning council, or eligible applicants may use existing youth councils created with respect to other programs under this Act if these councils meet the requirements set forth in this section. In all cases, the youth council must report to the planning council.

(3) The youth council shall advise the sponsor in setting basic goals, policies and procedures for its YEDPA subpart 3 program, make recommendations regarding program plans, and provide for continuing analyses of needs for employment, training and related services. The youth council will also monitor all YETP programs and evaluate youth programs in the prime sponsor area for the purpose of improving the utilization and coordination of the delivery of such services. The council shall make recommendations based upon its analyses to the planning council.

(4) The youth council shall at a minimum make recommendations to the planning council with respect to the planning and review of all program activities under Title III, Part C, of the Act, and shall review the proposed agreements with local educational agencies under YETP.

(5) No member of the youth council shall cast a vote on any matter under deliberation by the youth council which has a direct bearing on services to be provided by that member (or any organization with which that member is associated).

(c) *Community-based organizations (CBO's).* (1) Each eligible applicant shall involve CBO's in the planning process as follows:

(i) CBO's of demonstrated local effectiveness in the delivery of employment and training services to youth shall actively participate in the planning process; and

(ii) Public notification of the proposed youth plan will be provided to CBO's through appropriate media.

(2) Special consideration shall be given to CBO's of local demonstrated effectiveness in the delivery of employment and training services to youth. Special consideration shall consist of the following:

(i) Thirty (30) days prior to submission of the proposed youth plan to the RA either the complete youth plan or a summary of the proposed youth plan will be submitted to such CBO's. If a summary is submitted, it shall include at a minimum:

(A) Information on the emphases of the program; and

(B) Proposed service deliverers and the services to be provided by each; and

(ii) Any comments received must be considered prior to the submission of the youth plan to the RA and written responses will be made to any substantive comments from such CBO's regarding selection of service deliverers and these comments and responses will be included when the youth plan is transmitted to the RA.

(3) Each eligible applicant shall maintain documentation relating to selection of service deliverers for a minimum of 1 year.

(4) An eligible applicant may directly perform classroom training, on-the-job training or work experience as described in § 95.33(d)(1), (2), or (4) of this title, only if, after consultation with CBO's, the eligible applicant determines that direct operation of the program will promote the purposes of this subpart (sec. 342(b)). The eligible applicant shall document the administrative and programmatic benefits of such direct operation.

(d) *Appropriate labor organizations.* Each eligible applicant shall afford appropriate labor organizations an opportunity to participate in the development of its youth plan by giving them an opportunity to comment on either the full youth plan or a summary of the youth plan which includes at least any proposed job classifications and wage rates. The plan or summary shall be sent to the appropriate labor organizations at least 30 days prior to the submission of the youth plan to the RA, and any comments received must be considered prior to the submission of the youth plan to the RA.

(e) *Selection of service deliveries.* Except for in-school programs funded under the 22 percent LEA agreements and when the eligible applicant chooses not to deliver program activities, the selection of service deliverers for program activities shall consist of the following elements:

(1) A fair and open selection process;

(2) Announcement using appropriate media methods to bring the competition to the attention of community based and other eligible profit and nonprofit organizations;

(3) Use of published criteria to evaluate applications;

(4) Written notification to all applicants of subsequent funding or written explanation of the reasons for disapproval of funding; and

(5) Special consideration to community-based organizations of demonstrated effectiveness in the delivery of employment and training services.

§ 97.706 Content and description of the grant application.

In order to receive funds, each eligible applicant shall submit a youth plan which, when approved, together with the Prime Sponsor Agreement (PSA), shall become the grant. Additions to, or variations from the PSA, if any, shall be included in the youth plan. The youth plan shall also include the documents described in §§ 97.707 through 97.710

§ 97.707 Approval request letter.

Each eligible applicant shall submit an Approval Request Letter to the RA, by a date set by the RA.

§ 97.708 Application for Federal Assistance (Standard Form 424).

The Application for Federal Assistance shall identify the amount of funds requested and provide information on the number of people expected to be served.

§ 97.709 Narrative Description; program and planning forms; additional documentation.

(a) The narrative shall contain descriptions of:

(1) Objectives of the program;

(2) Local priorities;

(3) Implementation planning;

(4) Program activities and services;

(5) Management and administration;

(6) Results and benefits expected from the program;

(7) Program Planning Summary; and

(8) Budget Information Summary.

(b) The youth plan shall also include documentation which shows that:

(1) The planned expenditures for program activities will further the purpose of the program by:

(i) Developing long-term and coordinated solutions to the employment problems of youth, especially the economically disadvantaged;

(ii) Enhancing job prospects and career opportunities for youth; and

(iii) Enabling participants to secure appropriate unsubsidized employment (sec. 341);

(2) The identified performance goals in the youth plan are reasonable and can be achieved;

(3) A youth council has been established and the youth council has participated in the planning and review process for the youth plan;

(4) CBO's of demonstrated local effectiveness in the delivery of employment and training services to youth have participated in the planning and have been given special consideration as set forth in § 97.705(c);

(5) Appropriate labor organizations have participated in the development of the youth plan as required by § 97.705(d);

(6) There is a description of the procedures to be used to notify the appropriate labor organizations and the RA of any changes to job classifications of wage rates;

(7) The eligible applicant has a proposed in-school program to be operated pursuant to § 97.717;

(8) With respect to youth plans from Governors, there is adequate justification for each proposed activity as defined in § 97.722; and

(9) The eligible applicant has coordinated with local SESA offices to the maximum extent feasible.

§ 97.710 Special assurances and certifications

(a) The youth plan shall contain the following special assurances:

(1) Compliance with the Prime Sponsor Agreement;

(2) Compliance with the Youth Employment and Demonstration Projects Act of 1977 (YEDPA), other applicable CETA provisions, and the regulations in this subpart;

(3) Compliance with the Hazardous Occupations Orders issued pursuant to the Fair Labor Standards Act and set forth at 29 CFR 570.50 et seq. with respect to the employment of youths under 18 years of age and the Child Labor Standards of 29 CFR 570.31 et seq. with respect to the employment of youths aged 14 and 15; and

(4) Assurance that local labor organizations who represent employees engaged in work similar to that proposed to be performed under this subpart are notified in writing of all wage rate and job classification changes.

§ 97.711 Youth Plan, review and approval.

(a) *Comments and publication procedures.* The procedures of § 95.15 of this title shall apply to YETP, except that, the RA shall establish a schedule for submission of the grant application which may include a request that a preliminary copy of the grant application be submitted to the regional office for review. However, the grant application cannot be executed until 30 days after submission of the plan to the appropriate organizations during which time comments can be submitted to the RA and prime sponsor.

(b) *Standards for reviewing the youth plan.* The provisions of § 95.17(a), (b)(1), (2), (3), (4), (6), (8), (9), (10), and (11) shall be followed by the RA in reviewing the youth plan. The RA shall also determine whether the youth plan meets the requirements of this subpart and that its documentation is adequate and sufficient.

(c) *Awarding the grant.* The procedures specified in §§ 95.18, 95.19, and 95.20 of this title shall apply to the awarding of grants under YETP.

§ 97.712 Modifications.

(a) The procedures specified in § 95.21 of this title shall apply to the modifying of a YETP youth plan.

(b)(1) Appropriate labor organizations and the RA must be notified in writing of all wage rate and job classification changes under the youth plan at least 15 calendar days prior to implementing such changes.

(2) If the appropriate labor organization disagrees with the proposed changes in job classifications or wage rates, the dispute must be resolved in writing prior to implementing such changes.

ADMINISTRATIVE PROVISIONS

§ 97.713 Adminstrative provisions.

The administrative provisions of Part 98 (Grant Administration) of this title shall be applicable to the operation of programs under this subpart, except as otherwise indicated in this subpart.

PROGRAM OPERATIONS

§ 97.714 Eligibility for participation.

(a) an eligible applicant shall assure that every individual participating in the program meets the following criteria at the time of application and enrollment, except as provided in § 97.715 (sec. 345):

(1) Unemployed as defined in § 94.4 (ggg) or underemployed as defined in § 94.4 (fff) of this title, or in-school as defined in § 97,702(f);

(2) 16 through 21 years of age; and

(3) A member of a family with a total family income at or below 85 percent of the lower living standard income level, as defined in § 94.4 (nnn) of this title.

(b) An eligible applicant shall assure that for the purpose of participating in in-school career employment experience, the youth needs such participation in order to continue his or her education (sec. 346(c)).

(c) An eligible applicant shall assure that if, at the time of enrollment into any other program under the Act, an individual met the eligibility requirements of paragraph (a) of this section, and is still age eligible, that individual is eligible to transfer from that other program into YETP, and into YETP career employment experience if the individual also meets the requirements of paragraph (b) of this section.

(d) An eligible applicant shall assure that the citizenship and veterans provisions of § 95.32(d) and (e)(1) of this title also apply to YETP.

(e) Programs funded under this subpart shall give preference to economically disadvantaged youth. Appropriate efforts shall be made to give service to those youth who have severe handicaps in obtaining employment, including but not limited to those who lack credentials, those who require substantial basic and remedial skill development, those who are women and minorities, those who are veterans of military service, those who are offenders, those who are handicapped, those with dependents, or those who have otherwise demonstrated special needs as determined by the Secretary (sec. 354(a)).

(f) No youth may enroll in full-time employment opportunities if the eligible applicant determines that there is evidence the youth dropped out of high school in order to participate (sec. 353(f)(2)).

(g) Wards of the court and offenders 14 through 21 years of age determined to have left the family unit or who otherwise do not have access to the benefits that family income would normally be expected to provide shall be treated as a family of one and only income generated by themselves shall be used in determining income status; such a determination shall be based on the certification by an assigned probation officer, or other responsible court official that the youth has lived at home 50 percent or less of the time in the last 6 months.

§ 97.715 Eligibility for participation (extraordinary).

(a) Individuals otherwise eligible under § 97.714, who are in school, and who are 14 or 15 years old may participate in programs under YETP when the youth plan specifies a youth development strategy which provides broad career exposure for these youths (sec. 345(a)(1)(B)).

(b) Youths need not meet the income criteria described in § 97.714(a)(3), if they participate in a special component, as described in § 97.716(d) (sec. 345(a)(2)).

(c) Youths, who do not meet the income criteria defined in § 97.714(a)(3), and who are not in a special component described in § 97.716(d), may be offered services but these services are limited to:

(1) Counseling, including occupational information;

(2) Occupational, education, and training information;

(3) Placement services;

(4) Job referral information through coordinated intake systems; and/or

(5) Assistance in overcoming employment related sex-stereotyping in job development, placement, counseling and guidance.

§ 97.716 Allowable activities and services.

which are the subject of a labor dispute involving a work stoppage.

(K) Child care and other necessary supportive services;

supplant State and local funds expended for the same purpose; and

an agreement is not reached within 60 days, the RA shall initiate the reallo-

the restructuring. If, after agreeing to the restructured job, the labor organi-

§ 97.716 Allowable activities and services.

(a) Programs may include any type of employment and training activity authorized under Title I of the Act, except public service employment.

(b) *Job description.* A written job description shall be developed and maintained for all work experience and on the job training positions funded under this subpart to provide a basis for determining their comparability to existing jobs of other individuals similarly employed.

(c) *Child labor.* The child labor standards specified in 29 CFR 570.31 et seq. or appropriate State standards, whichever are stricter, shall apply to the employment of 14 or 15 year olds under YETP. The Hazardous Occupations Orders issued pursuant to the Fair Labor Standards Act and set forth at 29 CFR 570.50 et seq. shall apply to the employment of 16 and 17 year olds under YETP.

(d) *Special component.* An eligible applicant may design a special component using up to 10 percent of its YETP funds to serve a mixture of youth from families above and below the income level specified in § 97.714(a)(3) in order to test the desirability of serving such a mix of youth. This special component shall:

(1) Have and follow a structured experimental design;

(2) Establish and use comparison groups;

(3) Provide for followup on participants; and

(4) Provide for an end of the year report on the experimental outcomes.

(e) *Vocational exploration.* An eligible applicant may conduct a vocational exploration program for the purpose of exposing youth to the operation and types of jobs available in the private sector through observation of such jobs and instruction including, where appropriate, limited practical experience.

(1) The following provisions shall apply to all locally funded vocational exploration programs.

(i) All contracts, subgrants, or written agreements between sponsors and other parties for the operation of such programs shall at a minimum assure that:

(A) Participants in a vocational exploration program using YETP funds shall receive allowances in accordance with the provisions of § 97.718(c)(2). Wages shall not be paid to participants;

(B) Other benefits shall be paid in accordance with § 98.24(a)(2) of this title;

(C) The program has received the approval of any labor organization representing employees in the affected collective bargaining units;

(D) Youth will not be assigned to vocational exploration opportunities which are the subject of a labor dispute involving a work stoppage.

(E) A detailed curriculum has been developed; and

(F) The program shall not displace currently employed workers or prevent the hiring of new workers.

(ii) Organizations which have a contract, subgrant or written agreement with a prime sponsor may be reimbursed only for the costs incurred in the conduct of the program, provided that payments to employers organized for profit are only made for the costs of training which are over and above those normally provided by the employer.

(2) Whenever opportunities are located with a private-for-profit organization, the prime sponsor shall assure, in addition to items listed in paragraph (e)(1)(i) of this section, that youth will not be involved in work experience or any other activity that contributes, or could be expected to contribute, to additional sales or profit for the private-for-profit organization or otherwise result in the subsidization of wages for the organization.

(3) Where a nationally funded vocational exploration program operates in a prime sponsor's area, the prime sponsor shall enter into an agreement with the local representative of the program which shall include provisions dealing with arrangements for recruitment, selection, referral and certification of the youth entering the nationally funded program.

§ 97.717 In-school programs.

(a) *Activities and services.* The in-school programs shall be designed to provide for either or both of the following two classifications of services (sec. 342):

(1) *Transition services.* (i) These transition services shall be designed to prepared and assist youth to move from school to unsubsidized jobs in the labor market.

(ii) These services may include, but are not limited to:

(A) Outreach, assessment, and orientation;

(B) Counseling, including occupational information and career counseling;

(C) Activities promoting education to work transition;

(D) Provision of labor market information;

(E) Services to youth to help them obtain and retain employment;

(F) Literacy training and bilingual training;

(G) Attainment of certificates of high school equivalency;

(H) Job sampling, including vocational exploration in the public and private sector;

(I) Institutional skills training;

(J) Transportation assistance;

(K) Child care and other necessary supportive services;

(L) Job restructuring to make jobs more responsive to the objectives of this subpart, including assistance to employers in developing job ladders of new job opportunities for youth, in order to improve work relationships between employers and youth;

(M) Provision of information regarding employment and training related opportunities;

(N) Job development, direct placement, and placement assistance to secure unsubsidized employment opportunities for youth to the maximum extent feasible, and referral to employability development programs;

(O) Assistance in overcoming sexsterotyping in job development, placement, and counseling; and

(P) Outreach and other services to increase the labor force participation rate among minorities and women.

(2) *Career employment experience.* This activity is a combination of both well supervised employment (work experience or on-the-job training) and certain transition services including, at a minimum, career information, counseling, and guidance. Any work experience or on-the-job training must include those minimum ancillary transition services. Where work experience or on-the-job training is supported under the 22 percent or more of funds serving in-school youth under agreements with local educational agencies, the ancillary transition services must also include placement services.

(b) *Agreements with local educational agencies.* (1) Eligible applicants shall use at least 22 percent of their total funds to serve in-school youth in programs designed to enhance their career opportunities and job prospects (sec. 343 (d)(1)) pursuant to written agreements between them and local educational agencies (LEA's). The programs shall be operated in accordance with the provisions of sections 343 (d)(2) and 346(c) of the Act.

(2) Agreements may be between the eligible applicant and one or more local educational agencies or a combination of LEA's represented by one LEA, (sec. 702(a)).

(3) Each agreement may be either a financial or nonfinancial agreement and, whichever is determined most appropriate by the eligible applicant and the LEA(s), shall:

(i) Provide a description of the activities and services to be provided to eligible participants;

(ii) Detail the responsibility of each party to the agreement for providing the activities and services which have been selected;

(iii) Contain provisions to assure that services and/or funds received pursuant to the agreement will not

supplant State and local funds expended for the same purpose; and

(iv) Provide an assurance that the agreement has been reviewed by the youth council.

(4) Additional provisions are required in those agreements which specifically provide for career employment experience opportunities. These include:

(i) Assurances that participating youth will be provided constructive work experience, which will improve their ability to make career decisions and which will provide them with basic work skills needed for regular employment;

(ii) Assurances that job information, counseling, guidance, and placement services will be made available to participating youth and that funds provided under the agreement will be available to, and will be utilized by, the local educational agency or agencies to the extent necessary to pay the cost of school-based counselors to carry out the provisions of this in-school program;

(iii) Assurances that jobs provided under this program will be certified by the participating educational agency or institution as relevant to the educational and career goals of the participating youth;

(iv) Assurances that the eligible applicant will advise participating youth of the availability of other employment and training resources available in the local community to assist such youth in obtaining employment; and

(v) An assurance that career employment experience opportunities provided will be certified by a school-based counselor as being relevant to the career and educational program for the youth being provided those opportunities.

(5) In order to carry out the purposes of the LEA agreement, LEA's and prime sponsors, where appropriate, are encouraged to enter into subagreements, grants or contracts with post-secondary schools, with State accredited nonprofit educational institutions, State accredited profit institutions, SESA's and CBO's which have demonstrated effectiveness locally in serving youth, particularly those who are economically disadvantaged.

(6) Agreements for the use of the in-school funds under this section must be signed by the eligible applicant and local educational agencies no later than 60 days after initial submission of the YETP plan to the regional office for review and approval. This may be a new agreement or a certification that the existing agreement remains the same or that it is revised as described in attachments to the certification. All certification and revision information shall be included as part of the YETP grant documentation. If an agreement is not reached within 60 days, the RA shall initiate the reallocation process as required by § 97.704.

§ 97.718 Participant benefits.

(a) Each participant shall be provided the benefits and working conditions as provided in § 98.24 of this title.

(b) Participants in training activities shall be paid allowances. Participants in employment shall be paid wages. Participants in activities which are a combination of employment and training shall be paid in accordance with § 95.33(d)(7) of this title.

(c) *Allowances.* (1) Participants shall be paid allowances in accordance with § 95.34 of this title.

(2) Participants in a vocational exploration program using YETP funds shall receive allowances in accordance with § 95.34 of this title except, (i) only allowances may be paid for the vocational exploration portion of combined activities and (ii) participants receiving public assistance as defined in § 94.4(ss), or whose needs or income are taken into account in determining such public assistance payments to others, may receive a stipend as an additional allowance for participation in vocational exploration in the private sector (VEP) activities: *Provided,* That the participant's total allowances (the incentive allowance plus any stipend) does not exceed the basic allowances paid to other participants. This stipend is available to participants eligible for receipt of incentive allowances to provide for the exceptional expenses incurred by these participants which might otherwise prevent the individuals from participating in a VEP activity. Wages shall not be paid to participants.

(d) *Wages.* Participants receiving wages shall be paid no less than the highest of:

(1) The wage rate set forth in section 6(a)(1) of the Fair Labor Standards Act. Fourteen- and fifteen-year olds, however, may be paid the rate set forth in section 14(b) of the Fair Labor Standards Act; or

(2) The applicable State or local minumum wage, including exceptions for the wage rates of 14- and 15-year olds.

(3) The prevailing wage for a job which is substantially the same as existing jobs of the same employer, except that, the employer may pay less than its prevailing wage, but not less than the minimum wage, if:

(i) The employer, the eligible applicant and the appropriate labor organization agree in writing to a lesser wage; or

(ii) There is job restructuring. In order to accomplish job restructuring, the eligible applicant, employer, and appropriate labor organization, shall enter into an agreement concerning the restructuring. If, after agreeing to the restructured job, the labor organization, employer, or eligible applicant disagree over the wages to be paid for the restructured job and an agreement is not reached, the eligible applicant, employer, and appropriate labor organization should resolve such dispute at the local level within 30 days. If, after these 30 days, an agreement has not been reached, they shall either agree to negotiate in good faith with the RA to resolve the disagreement or select other jobs. If negotiations with the RA do not result in resolution within 30 days, the RA shall set the wage rate; or

(iii) The employer creates new job classifications or occupations. If disputes arise regarding whether the jobs are new to the employer, the eligible applicant, appropriate labor organization, and employer should attempt to resolve the issue within 30 days after the appropriate labor organization is informed of the "new" jobs. If no agreement can be reached within that time frame, they shall either agree to negotiate in good faith with the RA to resolve the disagreement, or select other jobs. If negotiations with the RA do not result in a resolution within 30 days, the RA shall make a determination as to whether or not the job is new to the employer; or

(4) The prevailing wage determined by the Secretary under the Davis-Bacon Act (See 29 CFR parts 1, 3, 5, and 7) in the case of jobs in projects to which the provisions of the Davis-Bacon Act, or any Federal law containing labor standards in accordance with the Davis-Bacon Act, apply. However, in the case of such projects financed under YETP and YCCIP under $5,000, the employer, eligible applicant, and appropriate labor organization may agree to pay youth participants not less than the applicable minimum wage and not more than the wage rate of the entering apprentice in the most nearly comparable apprenticeable trade, and to prescribe an appropriate ratio of journeymen to such participating youth to work on the project. If they cannot agree in 30 days, they may request a decision from the RA, or develop other jobs.

(e) Earnings received by any youth under YETP shall be disregarded in determining the eligibility of the youth's family for, and the amount of, any benefits based on need under any Federal or federally assisted programs (sec. 356).

(f) Because most jobs will be short-term and/or part-time work assignments, and are designed to enhance the employability of individuals who are new entrants who have never worked, or individuals who are new entrants who have not been working in the competitive labor market, most

jobs will be at entry level. Eligible applicants, therefore, are expected to

competencies participants gain from their participation in the program.

stitutions and those of the eligible applicant(s):

(3) Approval procedures to be followed for the Governor's youth plan

jobs will be at entry level. Eligible applicants, therefore, are expected to pay the minimum wage whenever feasible.

§ 97.719 Maintenance of effort (sec. 353(b)).

(a) Youth plans shall reflect the purpose of this program to provide additional resources, activities, and services over and above the current level which will have a positive impact on the employment problems of youth.

(b) Funds provided under this subpart shall be used to supplement, rather than supplant, the level of funds that would otherwise be made available from non-Federal sources for the purpose of planning and administering programs and activities within the scope of this subpart.

(c) The following provisions also apply to activities funded under this program:

(1) They will not result in the displacement of currently employed workers;

(2) They will not substitute jobs assisted under this part for existing federally assisted jobs;

(3) They will not employ any youth when any person is on layoff by the employer from the same or any substantially equivalent job in the same area;

(4) They will not be used to employ any person to fill a job opening created by laying off or terminating the employment of any regular employee, or otherwise reducing the regular work force, in anticipation of filling vacancies by hiring youth to be supported under YETP;

(5) They will not infringe upon the promotional opportunities which would otherwise be available to persons currently employed in public service not subsidized under the Act;

(6) They will not permit a job to be filled in other than an entry-level position in each promotional line until applicable personnel procedures and collective-bargaining agreements have been complied with;

(7) Where job restructuring will occur or where new classifications will be developed, they will not be done in order to negate established personnel procedures or to displace currently employed workers.

§ 97.720 Substitution for title I programs.

Programs funded under YETP shall be supplementary to but not replace programs and activities for youth available under title I of the Act (§§ 95.13(b) (3) and 95.14(b)(3)(ii)(G)).

§ 97.721 Academic credit.

Eligible applicants shall make appropriate efforts to encourage educational agencies and postsecondary institutions to award academic credit for competencies participants gain from their participation in the program.

§ 97.722 Governors youth programs.

(a) *Activities and services.* The Governor shall use the funds allocated pursuant to § 97.703(b)(2) to provide statewide youth services such as the following (sec. 343(c)):

(1) To give special emphasis to funding expanded and experimental programs in apprenticeship trades, or development of new apprenticeship arrangements, in conjunction with business, labor unions, and State apprenticeship councils;

(2) To provide funds to carry out special model employment and training programs and related services between appropriate State agencies and an eligible applicant or eligible applicants, including contractors selected by eligible applicants, with particular emphasis on experimental job training in the private sector;

(3) To provide labor market and occupational information to eligible applicants and local educational agencies without reimbursement;

(4) To foster cooperative efforts between State and local institutions which provide occupational and career guidance and counseling, as well as placement services for in-school and out-of-school youth; and

(5) To fund employment and training programs as defined in § 97.716 for eligible youth who are under the supervision of the State.

(b) *Eligibility for participation.* Individuals participating in programs using funds allocated pursuant to § 97.703(b)(2) must meet the eligibility criteria provided in § 97.714 or § 97.715 (sec. 345).

(c) *Limitation of funds.* The overall 20 percent limitation of funds used for administration as set out in § 98.12(f)(6) shall not apply to the Governor's youth plan.

(d) *Governor's youth plan.* The Governor's youth plans shall include the following information:

(1) A request for approval letter; and

(2) Application for Federal assistance (standard form 424);

(3) The narrative, which shall include the following;

(i) A discussion of any support to be given for expanded and experimental programs in apprenticeable trades;

(ii) A description of efforts to provide employment and training opportunities for youth under the supervision of the State;

(iii) A description of the efforts the State will undertake in the development, analysis and dissemination of appropriate labor market information as it relates to youth;

(iv) A description of efforts to coordinate existing State services or institutions and those of the eligible applicant(s);

(v) A description of any experimental, model or demonstration programs to be operated by the State and, any plans to assist eligible applicants in the development or operation of such programs;

(vi) A description of expected results and benefits to be derived from specific program activities under the grant; and

(4) Youth planning summary and youth budget information summary:

(i) The youth planning summary requires a quantitative statement of planned enrollment levels, the participants to be served by each program activity, and planned outcomes for program participants. It shall also include an identification of the target groups within the youth population and the number of individuals in each to be served.

(ii) The youth budget information summary shall include a quantitative statement of yearly planned expenditures by cost category, planned quarterly obligations, and planned quarterly expenditures by program activity.

(e) *Special assurance and certifications.* The Governor's youth plan shall assure:

(1) Compliance with the Governor's agreement;

(2) Compliance with the Youth Employment and Demonstration Project Act of 1977 (YEDPA), other applicable CETA provisions, and the regulations in this subpart;

(3) Compliance with the provisions of section 343(c) of the Act; and

(4) Compliance with the hazardous occupations orders issued pursuant to 29 CFR 570.50 et seq. with respect to the employment of youths under 18 years of age and the child labor standards of 29 CFR 570.13 et seq. with respect to the employment of youth aged 14 to 15.

(f) *Procedures for comment, modification and approval of Governor's youth plan.* (1) In developing the Governor's youth plan, the Governor shall establish a youth council as described in § 97.705(b) which shall report to the State Manpower Services Council (SMSC) described in § 95.13(d) of this title. The responsibilities of these councils shall be those described in § 95.13(d)(4) of this title. The references to local agencies in § 97.705(b)(1) shall mean representatives of State agencies who represent statewide concerns.

(2) In submitting the Governor's youth plan, the procedures specified in § 95.52(a) (c) and (d) of this title shall be followed except the preapplication procedures in § 95.52(a)(2) and the preapplication provisions in §§ 95.11 and 95.15(d), which are referenced in § 95.52 do not apply.

(3) Approval procedures to be followed for the Governor's youth plan are as specified in § 95.53 of this title, except that the provision in § 95.17(b)(7), referenced in § 95.53, does not apply.

(4) The modification procedures specified in § 95.54 of this title shall be used to modify Governor's grants under YETP.

Signed at Washington, D.C., this 19th day of September 1978.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

Title 45—Public Welfare

CHAPTER XIV—NATIONAL INSTITUTE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 1490—EDUCATIONAL EQUITY RESEARCH GRANTS PROGRAM

Final Rule for Awarding Federal Funds

AGENCY: National Institute of Education (NIE), Department of Health, Education, and Welfare.

ACTION: Final rule.

SUMMARY: This rule governs a discretionary program of field-initiated research in several areas of educational equity inquiry. These areas focus on individuals who: (1) Are participating in the process of school desegregation; (2) have limited or no knowledge of English; (3) have not received equal educational opportunities due to ethnic or racial minority membership; or (4) are restricted by sex-role stereotypes. This rule states eligibility requirements, funding criteria, and other rules for the administration of the program; it defines categories of projects to be funded and the competitive procedures and standards for funding the best proposals.

EFFECTIVE DATE: This regulation becomes effective 45 days after it is transmitted to Congress unless Congress disapproves the regulation or takes certain adjournments. If you want to know the effective date of this regulation, call or write the National Institute of Education contact person.

FOR FURTHER INFORMATION CONTACT:

Richard Werksman, Regulations Officer, Office of Administration, Management and Budget, National Institute of Education, Room 639—Mail Stop 33, 1200 19th Street, NW., Washington, D.C. 20208, 202-254-7924.

SUPPLEMENTAL INFORMATION: Under the authority of section 405 of the General Education Provisions Act, as amended (20 U.S.C. 1221e), a notice of proposed rulemaking which set forth proposed procedural and substantive requirements and criteria governing the submission and review of applications for funds under the educational equity research grants program was published in the FEDERAL REGISTER on April 6, 1978 (43 FR 14634). Interested persons were invited to submit written comments concerning the proposed rule. Seven persons submitted comments. Listed below are the comments received and the responses made.

A. BACKGROUND

The substantive research areas covered by this regulation will further the goal of educational equity and will focus on those individuals who are not well served by the Nation's educational systems and schools. It is intended that each award will produce knowledge to help determine how every person can best achieve an education of high quality regardless of race, color, religion, sex, national origin, or social class.

B. DISCUSSION OF COMMENTS

1. Two commenters suggested that the use of the expression, "exemplary methods" in one of the eligible project areas (§ 1490.5(a)(2) Desegregation) but not in the other three substantive areas, may create an impression that the Institute is not interested in funding research on exemplary methods for achieving equity in those other areas.

The Institute is interested in supporting exemplary research in all four substantive areas (so long as the project does not have as its primary purpose the kind of activities deemed ineligible under § 1490.6). The use of the expression "exemplary methods" was used as an example and was intended only to be illustrative and not restrictive. No change in the regulation is required.

2. Two commenters asked whether social class is an area of possible research under this program since the item is used only in § 1490.2, Purpose.

The Institute considers social class to be an eligible element for research within all the substantive areas described in § 1490.5. This intention is set forth clearly in the second paragraph of § 1490.2. For exemple, research focusing on bilingual education may study the relationship between social class and the need for bilingual education. No further clarification is deemed necessary.

3. One commenter suggested the addition of a fifth area of competition which would address barriers to educational equity. This area would include any aspect of educational research concerning barriers to educational equity for minorities, such as problems related to labelling or stereotyping educational environments that are populated by minorities; discrimination; or the function of standardized tests in excluding minorities from educational opportunities in speciality high schools, in colleges, and in professional schools.

Section 1490.5 identifies four eligible substantive areas. We believe that these four areas adequately cover the interests described by this commenter, so that the addition of a fifth category is unnecessary.

C. DRAFTING INFORMATION

The principal author of this regulation is Martin O. Milrod, of the former Educational Equity Group. Individuals from educational and research communities also participated extensively in developing this regulation. Copies of the proposed rulemaking were mailed to almost 3,000 institutions, organizations, and individuals.

APPLICATION INFORMATION: The publication of this final rule is not an invitation to submit applications. A notice of closing date of May 31, 1978, for fiscal year 1978 applications was published in the FEDERAL REGISTER on April 6, 1978 (43 FR 14634). Applications, instructions, and program information were provided by the program staff, of the educational equity research grants program, National Institute of Education, 1200 19th Street NW., Washington, D.C. 20208. Telephone, 202-254-5170.

(Catalog of Federal Domestic Assistance No. 13.950, Educational Research and Development.)

Dated: August 11, 1978.

PATRICIA ALBJERG GRAHAM,
Director,
National Institute of Education.

Approved: September 19, 1978.

JOSEPH A. CALIFANO, JR.,
Secretary of Health,
Education, and Welfare.

Title 45 of the Code of Federal Regulations is amended by adding to subchapter B of chapter XIV, a new part 1490 reading as follows:

Sec.
1490.1 Scope.
1490.2 Purpose.
1490.3 [Reserved]
1490.4 Applicant eligibility.
1490.5 Eligibility projects.
1490.6 Ineligible projects.
1490.7 Application requirements.
1490.8. Review of applications.
1490.9. Project duration.

AUTHORITY: Sec. 405, General Education Provisions Act, as amended (20 U.S.C. 1221e).

§ 1490.1 Scope.

(a) This part establishes procedures, substantive requirements, and criteria governing the submission and review of applications for funds under the educational equity research grants program.

(b) Each grant under this program is subject to applicable provisions of subchapter A of this chapter (general provisions for National Institute of Education (NIE) grants relating to fiscal, administrative, and other matters) (45 CFR Parts 1400-1424), except to the extent that such provisions are inconsistent with, or expressly made inapplicable by, the provisions of this part.

§ 1490.2 Purpose.

The purpose of the educational equity research grants program is to further the goal of educational equity by supporting research and development studies in the substantive areas described in § 1490.5.

It is intended that each award will produce knowledge to help determine how every person can best achieve an education of high quality regardless of race, color, religion, sex, national origin, or social class.

§ 1490.3 [Reserved]

§ 1490.4 Applicant eligibility.

(a) Colleges, universities, State and local educational agencies, other public or private agencies, organizations and groups, and individuals are eligible to apply.

(b) Applications from for-profit organizations must be submitted in accordance with criteria specified in this part and in Department of Health, Education, and Welfare (HEW) procurement regulations, subpart 3-4.52 (41 CFR Parts 3-4), and, if successful, are awarded contracts rather than grants.

§ 1490.5 Eligible projects.

(a) *Eligible research and development areas.* An application under this part must propose research or development in no more than one of the following substantives areas:

(1) *Educational equity theories.* This area includes research to develop better educational opportunity theories (including different definitions of equity and ways in which they are applied and with what results). These theories foster the kinds of analyses leading to public policies aimed at reducing the barriers faced by women and minorities in achieving equality of educational opportunity.

(2) *Desegregation.* This area includes any aspect of desegregation efforts, such as exemplary methods of educating students in desegregated settings and barriers to successful desegregation of institutions and systems of higher education.

(3) *Multicultural/bilingual education.* This area includes:

(i) Educational problems of students (A) who do not speak English, or have limited English speaking ability; (B) who speak nonstandard English; or (C) whose culture differs significantly from the majority of students in the United States, or

(ii) How all children may improve their educational opportunities through multicultural/bilingual education.

(4) *Barriers to women's educational equity.* This area includes any aspect of educational research concerning barriers to educational equity for women, such as, the problems related to sex-role stereotyping and discrimination, the special problems minority women face in obtaining equal educational opportunities and leadership positions, and the particular social and educational processes contributing to inequities and ways to eliminate such problems.

(b) *Eligible research processes.* Projects that involve research or development in one of the selected areas described in paragraph (a) of this section may be carried out using any research or development process other than those specified in § 1490.6.

(c) *Selection of areas to be funded.* In the announcement of a closing date for each research grants competition conducted under this program, the director shall indicate which of the areas described in paragraph (a) of this section will be included in that competition.

§ 1490.6 Ineligible projects.

A project whose primary purpose is the operation, development or demonstration of specific programs or materials is not eligible for support under this part. Examples of ineligible projects include:

(a) Operation of an educational program;

(b) Improvement of an educational program through the implementation of a new or improved instructional, administrative, or managerial procedure, technique, material, training, or piece of equipment;

(c) Course development through the production of a new curriculum, or the improvement of an existing curriculum, including the preparation of new instructional material or the modification of instructional material already in existence;

(d) Development or adaptation in an operational setting of any new or improved instructional, administrative, or managerial procedure, technique, material, training, or piece of equipment;

(e) A demonstration project which shows, exhibits, describes, or explains to others, either in person or through various other communication media, the procedure, technique, and/or material which must be employed in the execution of a new or modified instructional task, educational program, or administrative or management process.

§ 1490.7 Application requirements.

An applicant shall submit an application in the form and in such detail as the Director shall require.

§ 1490.8 Review of applications.

(a) *Substantive areas.* In each research grants competition announced under this program, each application will be evaluated in competition with other applications submitted in the same substantive area. The Director will seek to distribute awards equitably among the substantive areas selected in accordance with § 1490.5(c).

(b) *Criteria for evaluation.* Evaluation of applications will be based upon the following criteria:

(1) Evidence of sensitivity to and awareness of minority and women's concerns as shown by efforts to provide equal employment opportunities, or other exemplary projects.

(2) Significance of the proposal to educational equity and the likelihood of significantly increasing the knowledge base if the project is successful.

(3) Technical quality of the proposal, based upon:

(i) The quality of the research design, methodology, and where appropriate, instrumentation;

(ii) The extent to which the proposal exhibits thorough knowledge of pertinent previous work; and

(iii) The quality of the research evaluation design and the dissemination plan;

(4) Organizational and staff qualifications, based upon:

(i) The experience, previous research, and background of the principal investigator(s);

(ii) The adequacy of facilities and arrangements available for the project, including evidence of access to necessary organizations, groups, and individuals for study or research purposes; and

(iii) The willingness of study populations to participate in the research proposal, as appropriate.

(5) Probability of successful completion of the project, based upon:

(i) The overall balance of tasks to be performed and the adequacy of resources to perform these tasks, including budgetary, personnel, and design considerations;

(ii) The estimated cost of the project in relationship to the anticipated results.

(c) *Inapplicable criteria.* Evaluation criteria set forth in § 1403.10 of this chapter shall not apply to applications submitted under this part.

§ 1490.9 Project duration.

Funded projects normally will not exceed 12 months in duration.

COINSURANCE FOR PRIVATE MORTGAGE LENDERS

Proposed Eligibility Requirements, Contract Rights and Obligations

AGENCY: Department of Housing and Urban Development.

ACTION: Proposed rule.

SUMMARY: This proposed rule would establish eligibility requirements for private mortgage lenders who wish to participate in the coinsurance program authorized by section 244 of the National Housing Act. The rule would also establish the contract rights and obligations of the parties to coinsurance agreements. The rule is proposed in order to implement the coinsurance program.

DATES: Comments must be received on or before October 26, 1978.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal to the Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410. Communications should refer to the above docket number and title. A copy of each communication will be available for public inspection during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Robert Kolodny, Director, Multifamily Housing Development Division, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410, (202) 755-6310.

SUPPLEMENTARY INFORMATION: Section 244 of the National Housing Act, as added by section 224 of the Housing and Community Development Act of 1977, authorizes the Secretary of Housing and Urban Development to insure and make a commitment to insure, under any provision of title II of the National Housing Act, a mortgage executed by a mortgagor eligible for insurance under such provision and held by a mortgagee approved by the Secretary for coinsurance, if the mortgagee bears a percentage of any loss resulting from default. The Secretary is authorized to prescribe the percentage of coinsurance, which may not be less than 10 percent nor more than 90 percent. The Secretary is also authorized to prescribe the eligibility requirements for mortgagees and the terms and conditions of coinsurance agreements.

A finding of inapplicability of section 102(2)(C) of the National Environmental Policy Act of 1969 has been made in accordance with HUD Hand-

made by the coinsurer while it was approved.
255.106 Mortgage servicing and obligations during coinsurance period.
255.411 Date of default.
255.412 Notice of default.
255.413 Reinstatement of defaulted mortgage.

tial evaluation of existing projects by lenders who are willing to accept some, but are unwilling to accept all, of the risk of mortgage lending for

[Docket No. R-78-574]

COINSURANCE FOR PRIVATE MORTGAGE LENDERS

Proposed Eligibility Requirements, Contract Rights and Obligations

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, (HUD).

ACTION: Proposed rule.

SUMMARY: The Department hereby proposes to amend 24 CFR by adding a new part 255 entitled, "Coinsurance for Private Mortgage Lenders." This part would implement a coinsurance program limited solely to mortgage loans covering existing multifamily projects made by private mortgage lenders utilizing the authority contained in section 223(f) of the National Housing Act, as amended, and would impose requirements for that program. The demonstration program authorized by section 244 is intended to assure more careful initial evaluation of existing projects by lenders who are willing to accept some, but are unwilling to accept all, of the risk of mortgage lending for rental housing projects.

DATES: Comments due: (November 13, 1978).

ADDRESSES: Communications should be identified by the above docket number and title and should be filed with the rules docket clerk, Office of the General Counsel, Room 5218, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410. All relevant material received in the foregoing office will be considered before a final rule is adopted. Copies of written views or comments will be available during regular business hours at the foregoing office.

FOR FURTHER INFORMATION CONTACT:

Shelly Friedman, Office of the Deputy Assistant Secretary for Insured and Direct Loan Programs, HUD, Washington, D.C., 202-755-6495. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Section 307 of the Housing and Community Development Act of 1974 (Pub. L. 93-383) amended the National Housing Act by adding a new section 244 entitled Coinsurance. Section 244 of the National Housing Act (12 U.S.C. 1715z(9)) established a program which authorizes the Secretary of Housing and Urban Development to insure and make a commitment to insure, under any provision of title II of the National Housing Act, any mortgage otherwise eligible for insurance under such provisions pursuant to a coinsurance contract providing that the lender will (1) assume a percentage of any loss and (2) carry out (subject to audit, exception of review requirements) such credit approval, appraisal, inspection, commitment, property disposition or other functions as the Secretary approves.

Regulations issued on February 12, 1976, and contained in 24 CFR 204 implemented the demonstration program of coinsurance authorized by section 244 for mortgages covering one-to-four family dwellings.

On September 29, 1976, the Department amended 24 CFR by adding a new Part 250 entitled "Coinsurance for State Housing Finance Agencies." This part implements a demonstration program of coinsurance for mortgages covering multifamily projects financed by State Housing Finance Agencies.

The Department hereby proposes to amend 24 CFR by adding a new part 255 entitled "Coinsurance for Private Mortgage Lenders." This part would implement a coinsurance program limited solely to mortgage loans covering existing multifamily projects made by private mortgage lenders utilizing the authority contained in Section 223(f) of the National Housing Act, as amended, and would impose requirements for that program.

The Department remains concerned about permitting participating depository institutions to coinsure refinanced mortgages which they presently hold in portfolio. The basis for this concern is that the program design contained herein provides no mechanism to deter a depository institution from refinancing and coinsuring the existing indebtedness on its own lesser-quality mortgages it presently holds. The Department does not believe that the Congress intended section 244 of the National Housing Act to be so used. Therefore, the Department will continue to consider incorporating deterrents against such a practice into these regulations, and specifically requests comments on the issue. Such deterrents under consideration include: (1) An outright ban on coinsuring refinancing transactions on mortgages already held by the coinsurer; (2) a percentage ceiling for such mortgages within the coinsurance portfolio of the depository institution; or (3) Pre-commitment review of such mortgage transactions by the field office, with necessary standards developed to guage appraisal values and risk determination.

A finding of inapplicability of section 102(2)(C) of the National Environmental Policy Act of 1969 has been made in accordance with HUD Handbook 1390.1 with respect to these proposed regulations. A copy of this finding of inapplicability will be available during regular business hours at the Office of the Rules Docket Clerk, at the address set forth above.

Comments are requested from interested persons on the impact the program authorized by this part might have on the mortgage market, the availability of mortgage credit to borrowers dependent on mortgage insurance provided under sections of the National Housing Act other than section 244, and the flow of credit to older declining areas and purchasers of older and low-cost housing. This comment period will provide the mortgage lending industry an adequate opportunity to make its views known and those comments shall be considered as due consultation with the industry as required by section 244 of the National Housing Act. Section 255.2 provides notice that the Department has met its statutory obligations concerning such consultations, and will be adopted as stated upon final publication. All comments from the industry and any other interested persons on these areas as well as others will be carefully considered before final regulations are adopted.

It is hereby certified that the economic and inflationary impacts of these proposed regulations have been carefully evaluated in accordance with Executive Order 11821.

It is proposed to amend chapter II, subchapter B, of Title 24 CFR by adding a new part 255 as set forth below:

PART 255—COINSURANCE FOR PRIVATE MORTGAGE LENDERS

Subpart A—General Provisions

Sec.
255.1 Purpose.
255.2 Effect of implementation of program on mortgage market.
255.3 Utilization of existing multifamily insurance authorities.
255.4 Effect of availability of coinsurance on insurance otherwise authorized.
255.5 Effect of availability of coinsurance on flow of mortgage credit to older, declining areas.
255.6 Safeguards for consumers.
255.7 Definition of private mortgage lender.

Subpart B—Approval of Private Lender as Coinsurer

255.101 Review of operation prior to approval as coinsurer.
255.102 Technical review prior to approval as a coinsurer.
255.103 Duration of approval.
255.104 Withdrawal of approval.
255.105 Effect of withdrawal of approval as a coinsurer on insurance commitments made by the coinsurer while it was approved.
255.106 Mortgage servicing and obligations during coinsurance period.
255.107 Required regulatory agreement with mortgagors.

Subpart C—Eligibility Requirements Applicable to Mortgages Insured Under Section 207 Pursuant to Section 223(f)

255.201 Application.
255.202 Application fees, inspection fees, and service charges.
255.203 Processing and commitment.

ELIGIBLE MORTGAGES

255.209 Mortgage provisions.
255.210 Mortgage lien and other obligations.
255.211 Maximum mortgage amounts.
255.212 Maturity.
255.213 Payment requirements.
255.214 Maximum mortgage interest rate.
255.215 Mortgage to cover entire property.
255.216 Covenant for hazard insurance.
255.217 Soundness of project.
255.218 Accumulation of accruals.
255.219 Application of mortgage payments.
255.220 Prepayment privileges.
255.221 Late charges.

SUPERVISION OF MORTGAGORS

255.222 In general.
255.223 Required supervision of private mortgagors.
255.224 Non-discrimination in housing.
255.225 Discrimination in employment.
255.226 Covenant regarding use of property.

PROPERTY REQUIREMENTS

255.227 Eligibility of property.
255.228 Development of property.
255.229 Commercial facilities.

TITLE

255.230 Eligibility of title.
255.231 Title evidence.

COST CERTIFICATION REQUIREMENTS

255.232 Agreement to certify cost requirements.
255.233 Reserved.
255.234 Reserved.
255.235 Certificate of actual cost—contents in general.
255.236 Reserved.
255.237 Reserved.
255.238 Reserved.
255.239 Reduction in mortgage amount.
255.240 Requisites of certification of actual costs.
255.241 Cost certification incontestable.

Subpart D—Contract Rights and Obligations

255.401 Definition.
255.402 Insurance of mortgage.

MORTGAGE INSURANCE PREMIUMS

255.403 Amount of MIP to be collected from the mortgagor.
255.404 Method of payment of MIP.
255.405 Annual payment of MIP on a level percentage of the declining principal balance.
255.406 Duration of MIP.
255.407 Pro rata payment of annual MIP.

DEFAULT UNDER THE MORTGAGE

255.410 Definition of default.
255.411 Date of default.
255.412 Notice of default.
255.413 Reinstatement of defaulted mortgage.
255.414 Forbearance relief.

TERMINATION

255.415 Termination of coinsurance contract.
255.416 Notice and date of termination by Commissioner.
255.417 Effect of termination.

CLAIM PROCEDURE

255.420 Acquisition of property.
255.421 Deed in lieu of foreclosure.
255.422 Notice to Commissioner.
255.423 Application for insurance benefits.

PAYMENT OF INSURANCE BENEFITS

255.424 Method of payment.
255.425 Disposition of property.
255.426 Amount of payment.
255.427 Items included in payment.
255.428 Items deducted from payment.
255.429 Cash—Debentures.

AMENDMENTS

255.430 Effect of amendments.

AUTHORITY: Section 244 of the National Housing Act, 12 U.S.C. 1715z(9).

Subpart A—General Provisions

§ 255.1 Purpose.

(a) Section 307 of the Housing and Community Development Act of 1974 amended the National Housing Act by adding a new section 24 entitled, "Coinsurance." Section 244 authorizes the Secretary of Housing and Urban Development to insure and make a commitment to insure, under any provision of title II of the National Housing Act, any mortgage otherwise eligible for insurance under such provisions, pursuant to a coinsurance contract providing that the lender will (1) assume a percentage of any loss and (2) carry out (subject to audit, exception, or review requirements) such credit approval, appraisal, inspection, commitment, property disposition or other functions as the Secretary approves.

(b) Section 311 of the Housing and Community Development Act of 1974 also added a new section 223(f) to the National Housing Act. Section 223(f) authorizes the Secretary to insure a mortgage executed in connection with the purchase or refinancing of an existing multifamily project.

(c) It is intended that a demonstration coinsurance program under section 244 to provide insured financing or refinancing for existing housing will assist in the conservation of neighborhoods and existing housing resources. By placing some of the risks, which HUD now assumes when insuring mortgages on approved private mortgage lenders, the demonstration program authorized by section 244 could help to assure more careful initial evaluation of existing projects by lenders who are willing to accept some, but are unwilling to accept all, of the risk of mortgage lending for rental housing projects. It could also make feasible assumption by lenders of the processing responsibilities incidental to a mortgage insurance program and perhaps reduce the present length of time required to approve applications for mortgage insurance.

(d) Congress, in enacting section 307 of the Housing and Community Development Act of 1974, which authorized the program which would be implemented by this part, made clear that it was concerned that implementation of this program not disrupt the mortgage market or reduce the availability of mortgage credit to borrowers who depend on mortgage insurance authorized under provisions of the National Housing Act other than section 244. The Congress also indicated its concern that in delegating mortgage insurance processing duties to lenders, physical inspections of dwelling units be continued in accordance with the same standards used under the regular FHA program. To accord with these concepts, this part sets forth the Department's regulations describing a coinsurance program for mortgages on existing multifamily projects underwritten by private mortgage lenders.

(e) In recognition of the capabilities of private lenders, these regulations vest the maximum amount of processing responsibilities with these lenders and to the maximum extent permissible under the statutes authorizing this program, permit these lenders to retain autonomy in their underwriting practices.

(f) The authority for the program to be implemented by this part expires on September 30, 1978. No mortgage shall be insured pursuant to this part after the Secretary's authority to insure pursuant to this part shall have expired, except pursuant to a commitment to insure made before that date.

§ 255.2 Effect of implementation of program on mortgage market.

Section 244 of the National Housing Act requires that no contract of coinsurance will be entered into under this part until the Secretary has, after due consultation with the mortgage lending industry, determined that the program described in this part will not disrupt the mortgage market or reduce the availability of mortgage credit to borrowers who depend upon mortgage insurance provided under provisions of the National Housing Act other than section 244. The mortgage lending industry has received adequate opportunity through the public comment period which was devoted to these regulations when proposed to make its views known and the issuance of these

regulations shall be considered a determination that no adverse effects on the mortgage market are reasonably predictable from such an issuance.

§ 255.7 Definition of private lender.

To be an eligible mortgagee under this part, the institution must be a savings bank, a savings and loan asso-

has been suspended or withdrawn. Certification as an approved lender under this part may be suspended or

§ 255.106 Mortgage servicing and obligations during coinsurance period.

Servicing functions during the

§ 255.203 Processing and commitment.

The lender shall, as agent for the Secretary, perform all of the process-

regulations shall be considered a determination that no adverse effects on the mortgage market are reasonably predictable from such an issuance. The Department intends, however, to continuously monitor the impact of this program and to consider evidence submitted at any time which would tend to suggest that disruptions in the mortgage market or reduced availability of mortgage credit to borrowers are causally related to the availability of coinsurance under this part.

§ 255.3 Utilization of existing multifamily insurance authorities.

Mortgages for multifamily projects which meet the requirements for eligibility of this part shall be insured under section 207 pursuant to section 223(f) and pursuant to section 244 of the National Housing Act and the regulations implementing those sections as set forth in this part.

§ 255.4 Effect of availability of coinsurance or insurance otherwise authorized.

No insurance authorized under any provision of the National Housing Act other than section 244 of that Act shall be withdrawn, denied, or delayed by reason of the availability of insurance under the program authorized by this part.

§ 255.5 Effect of availability of coinsurance on flow of mortgage credit to older, declining areas.

Insurance will continue to be available under this part only to the extent the Secretary has determined that the availability of insurance authorized by this part does not adversely affect the flow of mortgage credit to older, and lower-cost housing. Insurance authorized by this part will not be available for mortgages on properties which are eligible to be insured solely pursuant to the authority of section 223(e) of the National Housing Act.

§ 255.6 Safeguards for consumers.

(a) The inspection of repairs and improvements on projects covered by mortgages approved for coinsurance prior to the beginning of repairs under this part shall be conducted in accordance with the intent of the standards and criteria set forth in subpart S of part 200 of this chapter and used with respect to dwellings or projects approved for mortgage insurance under provisions of title II of the National Housing Act other than section 244.

(b) The National Environmental Policy Act of 1969, as amended, is applicable to major Federal actions proposed pursuant to this part.

(c) Part 403 of this chapter, providing for Federal preemption of local rent control, is not applicable to a project coinsured under this part.

§ 255.7 Definition of private lender.

To be an eligible mortgagee under this part, the institution must be a savings bank, a savings and loan association, a commercial bank, or other such depository institution whose deposits are insured by the Federal Deposit Insurance Corporation, by the Federal Savings and Loan Insurance Corporation, or by an agency or instrumentality of a State.

Subpart B—Approval of Private Lender as Coinsurer

§ 255.101 Review of operation prior to approval as coinsurer.

Approval of a private lender as defined in § 255.7, as a coinsurer of mortgage loans, eligible to underwrite and service mortgages on multifamily projects for coinsurance, will be made for lenders who have requested approval and who are currently approved as mortgagees under the provisions of §§ 203.2 and 203.4 of this chapter, after a review of the lender's operations by HUD as prescribed in § 255.102 of this part.

§ 255.102 Technical review prior to approval as a coinsurer.

A lender's technical staff and procedures must undergo a review prior to being approved as a coinsurer. As part of this review, the following special requirements are necessary for certification as an approved coinsurer eligible to underwrite mortgages for multifamily projects under this part:

(a) It shall provide a written opinion of its Counsel that it has the necessary powers to participate in the program authorized under this part;

(b) It shall submit such evidence as the Commissioner may require regarding a net worth, surplus accounts, equity capital or other similar category satisfactory to the Commissioner of at least $1,000,000, and evidence that its assets, which must be acceptable to the Commissioner, are properly proportioned to its liabilities and are adequate for the character and extent of its intended operations;

(c) It shall submit evidence to the Commissioner that it has the ability, either through technical staff employed by it, or through contracts with persons not on the lender's staff, for discharging full mortgage underwriting, servicing and property disposition functions in a manner which is consistent with the requirements of this part.

(d) It shall submit to periodic auditing and review by the Commissioner, the Inspector General or the Comptroller General of the United States with respect to its participation in the program authorized by this part.

(e) It shall submit its most recent detailed audit report of its books made by an independent certified public accountant selected in accordance with applicable State law or procedures supplemented by such additional information as the Commissioner shall request;

(f) It shall file with the Commissioner similar annual audits (1) within such period of time required pursuant to applicable State law and procedures or (2) within 75 days of the closing of its fiscal year so long as it continues as an approved lender;

(g) It shall promptly notify the Commissioner of any adjustments in its processing procedures which take place after its certification as an approved lender and shall make no adjustments in its processing procedures that are inconsistent with the requirements of this part;

(h) It shall have in its immediate employ a technical staff consisting of at least one individual who is knowledgeable in the area of construction, one in underwriting skills and one who is skilled in the management and disposition of multifamily projects;

(i) It shall have in its immediate employ staff with sufficient professional and technical competence to monitor the performance of any work it contracts to have done by persons not in the lender's employ such as appraisals, cost, credit analysis, architectural, engineering and management services;

(j) All appraisers assigned by the lender to determine the value of properties intended to serve as security for coinsured mortgages must adhere to minimum standards of education and experience established by the Commissioner;

(k) It shall file with the Commissioner satisfactory proof that it has the capacity to service mortgages coinsured pursuant to this part.

(l) It shall abide by all applicable requirements issued by the Commissioner for discharging its mortgage underwriting, servicing and property disposition functions pursuant to this part.

§ 255.103 Duration of approval.

Initial certification of a private lender as an approved coinsurer under § 255.102 of this part will be valid until the Secretary's authority to coinsure pursuant to this part shall have expired, unless such approval is withdrawn pursuant to the provisions of § 255.104 of this part.

§ 255.104 Withdrawal of approval.

The Commissioner may refrain from endorsing a credit instrument for mortgage insurance authorized by this part with respect to any project proposed for coinsurance by a private lender which has been given written notice by the Commissioner that its approval as a coinsurer under this part has been suspended or withdrawn. Certification as an approved lender under this part may be suspended or withdrawn pursuant to the provisions of part 24 of this title for any of the following causes:

(a) Failure to maintain satisfactory capital funds or sturcture;

(b) Failure to perform underwriting, servicing, or property disposition functions consistent with the requirements of this part; as evidenced by, among other things, a coinsurer's ratio of coinsured loans in default or in forebearance in relation to its entire coinsured portfolio;

(c) Failure to discharge its responsibilities under a coinsurance contract;

(d) Transfer of a coinsured mortgage to a lender not approved under this part;

(e) Failure to segregate all escrow funds received from mortgagors on account of ground rents, taxes, assessments and insurance premiums, and to deposit such funds to a special account or accounts;

(f) Use of escrow funds for any purpose other than that for which they were received;

(g) Payment by the lender of any fee, kickback, or other consideration, directly or indirectly, in connection with any insured mortgage transaction or transactions to any person including an attorney, escrow agent, title company, consultant, mortgage broker, seller, builder, or real estate agent if such person has received any other payment or other consideration from the mortgagor, the seller, the builder, or any other person for services related to such transaction or transactions or from or related to the purchase or sale of the mortgaged property, except that compensation may be paid for the actual performance of such services as may be approved by the Commissioner.

(h) Such other reasons as the Commissioner determines to be justified in accordance with part 24 of this title, by action of the agency review board established by part 25 of this title or § 203.7 of this chapter.

(i) A principal whose participation in a proposed project has been disapproved and whose request for reconsideation has resulted in confirmation of the disapproval may appeal under section 24.10 of this title.

§ 255.105 Effects of withdrawal of approval as a coinsurer on insurance commitments made by the coinsurer while it was approved.

Withdrawal or termination of a private lender as an approved coinsurer under this part will not affect any mortgage or the insurance of any mortgages accepted for insurance while the lender was an approved coinsurer.

§ 255.106 Mortgage servicing and obligations during coinsurance period.

Servicing functions during the period when the Commissioner is a coinsurer of the mortgage shall be performed only by the lender, except that the lender may elect to delegate servicing to another entity if the lender retains its obligations under this part. However, the lender may not transfer its risk of loss which would result from default of a coinsured mortgage through reinsurance or otherwise.

§ 225.107 Required regulatory agreement with mortgagors.

(a) The lender and the mortgagor shall effect an agreement whereby the mortgagor, as further consideration for the making of the mortgage loan, contracts with the lender that it will fulfill the provisions of subpart C, §§ 255.222 through 255.226. Such regulation or restriction will be in the form of a regulatory contract between the mortgagor and the lender which shall be responsible for enforcing the provisions of the regulatory contract.

(b) The lender may regulate and restrict the mortgagor, as long as the commissioner and the lender are coinsurers of the mortgage, on such other matters as may be required by the lender as conditions for lending which do not conflict with the requirements of the Commissioner under this part.

Subpart C—Eligibility Requirements Applicable to Mortgages Insured Under Section 207 Pursuant to Section 223(f)

§ 255.201. Application.

The application for a commitment to make a coinsured mortgage loan on a project shall be submitted to the lender, as agent for the Secretary, by the sponsor of such project accompanied by such exhibits as may be required by the lender to enable the lender to comply with requirements for coinsurance of the mortgage established under this part. An application for a commitment to make a mortgage loan may be required by the lender prior to the submission of the application contemplating mortgage insurance.

§ 255.202 Application fees, inspection fees, and service charges.

The lender may collect from the mortgagor such application fees, inspection fees, and initial service charges as it may require to reimburse itself for the cost of processing an application, conducting inspections, and closing a mortgage transaction. In no event will the total fees be permitted to exceed those allowed in the fully-insured section 223(f) program.

§ 255.203 Processing and commitment.

The lender shall, as agent for the Secretary, perform all of the processing, including the issuance of both conditional and firm commitments, and make all of the determinations of the eligibility of a mortgage for coinsurance under this part except for environmental clearances under HUD handbook 1390.1 done by HUD field offices prior to issuance of a conditional commitment. Upon completion of all required repairs and improvements and receipt by the Commissioner of the lender's certification that the terms and conditions of the commitment for coinsurance have been satisfied, the Commissioner shall promptly endorse the credit instrument for insurance. The commitment to insure upon completion shall be effective for 18 months. The term of the commitment may be extended or may be amended in such a manner as the lender may prescribe from time to time pursuant to an application to the Commissioner for such extension or amendment of said commitment, which application shall be acted upon by the Commissioner and returned to the lender promptly after receipt thereof. An expired commitment may be reopened if a request for reopening is received by the lender from the mortgagor within 90 days of the expiration of the commitment and the Commissioner shall act upon the application for reopening of such expired commitment in the manner prescribed for amendment or extension of commitments herein above set forth.

Eligible Mortgages

§ 255.209 Mortgage provisions.

(a) The mortgage shall be:

(1) Executed on a form approved by the Commissioner for use in the jurisdiction in which the property covered by the mortgage is situated, which form shall not be changed without the prior written approval of the Commissioner.

(2) Executed by a mortgagor with the qualifications as provided by this subpart.

(3) A first lien on property that conforms with the intent of the property standards prescribed by the Commissioner.

(b) In the case of cooperative mortgagors, the mortgage shall provide that the mortgagor will not arrange for management of the property except in the manner and under an agreement approved by the lender and the Commissioner in writing.

§ 255.210 Mortgage lien and other obligations.

A mortgagor shall certify at endorsement of the loan for insurance and the lender shall determine that:

(a) The property covered by the mortgage is free and clear of all liens other than the insured mortgage and

pal obligation in excess of the lessor of the following:

(a) *Dollar limitations on units.*

tions of comparable properties. Market value by direct sales comparison will be estimated by comparison of

nents, as defined by the Commissioner, in the project;

adversely affecting the economic soundness of the project.

the actual amount thereof so paid by the mortgagor.

V 43 / 187 SE 26 78

(a) The property covered by the mortgage is free and clear of all liens other than the insured mortgage and such other liens as may be approved by the lender, in accordance with standards established by the Commissioner. Liens other that the insured mortgage which may be approved (other than liens of taxes and assessments of the State or subdivisions of the State not yet due and payable, or ground rents) may not have under applicable law a priority equal or superior to the insured mortgage.

(b) There will not be outstanding unpaid obligations contracted for in connection with the mortgage transaction, the purchase of the mortgage property, or the repairs and improvements to the project, except obligations approved by the lender, in accordance with standards established by the Commissioner. Obligations of the mortgagor shall be approved by the lender under this section only if such obligations are determined by the lender to be of a lesser priority for payment than the obligation of the insured mortgage.

(c) When a loan is made to finance the purchase of an existing multifamily housing project, the mortgagor may not have any additional obligations in connection with the transaction which exceed the lesser of:

(1) Seven and one-half percent of the lender's estimate of value as defined in § 225.211(b), or

(2) seven and one-half percent of the cost of acquisition as defined in § 255.211(d).

(d) When a loan is made to refinance an existing multifamily housing project, the mortgagor may not have any additional obligations in connection with the transaction which exceed the lesser of:

(1) Seven and one-half percent of the lender's estimate of value, or

(2) Fifty percent of the difference between the cost to refinance as defined in § 255.211(c)(2) and the maximum mortgage amount as determined by the lender.

(e) The additional obligations, if any, provided for in paragraphs (c) and (d) of this section shall be represented by promissory notes on forms approved by the Commissioner. Such notes shall not be due and payable until the maturity date of the mortgage to be insured pursuant to this part, but may be prepaid from surplus cash and in accordance with the conditions prescribed in the regulatory agreement between the lender and the mortgagor.

§ 255.211 Maximum mortgage amounts.

In addition to the limitations in paragraphs (c) and (d) of this section, a mortgage may not involve a principal obligation in excess of the lessor of the following:

(a) *Dollar limitations on units.*

(1) The total of the amounts per family dwelling unit for other than elevator type structures (excluding exterior land improvements as defined by the Commissioner) depending upon the number of bedrooms, which may be: $19,500 per family unit without a bedroom. $21,600 per family unit with one bedroom. $25,800 per family unit with two bedrooms. $31,800 per family unit with three bedrooms. $36,000 per family unit with four or more bedrooms.

(2) *Increased mortgage amount—elevator type structures.* In order to compensate for the higher costs incident to construction of elevator type structures of sound standards of construction and design, the lender may, pursuant to guidelines issued by the Commissioner, increase the dollar amount limitations per family unit for these type structures to not in excess of: $22,500 per family unit without a bedroom. $25,200 per family unit with one bedroom. $30,900 per family unit with two bedrooms. $38,700 per family unit with three bedrooms. $43,758 per family unit with four or more bedrooms.

(3) *Increased mortgage amount—high cost areas.* (i) In any geographical area where the Commissioner finds cost levels so require, the Commissioner may increase, by not to exceed 50 percent, the dollar amount limitations set forth in paragraphs (a) (1) and (2) of this section.

(ii) If the Commissioner finds that because of high costs in Alaska, Guam, or Hawaii, it is not feasible to construct dwellings without the sacrifice of sound standards of construction, design, and livability within the limitations of maximum mortgage amounts provided in this section, the principal obligation of mortgages may be increased in such amounts as may be necessary to compensate for such costs but not to exceed in any event the maximum, including high cost area increases, if any, otherwise applicable by more than one-half thereof.

(b) *Value:* An amount not exceeding 85 percent of the lender's estimate of market value. The final estimate of value for the purpose of this section shall result from consideration of three indicators of market value:

(1) The estimated market value of the project by capitalization;

(2) The estimated market value by direct sales comparison;

(3) The total estimated replacement cost of the project (without deducting depreciation). Capitalization will use net income which results from market rents estimated by comparison with unsubsidized projects, capitalized at rates extracted from market transactions of comparable properties. Market value by direct sales comparison will be estimated by comparison of the subject property with competing properties recently sold, using at least two units of comparison. The total estimated replacement cost of the project (before depreciation) provides only an upper limit. The final estimate of value must lie between that indicated by capitalization and that indicated by direct sales comparison, but in no event shall the final estimate of value exceed the total estimated replacement cost of the project.

(c) *Property to be refinanced.* If the property is to be refinanced by the insured mortgage without a change of ownership, or, if property is sold to a purchaser who has an identity of interest with the seller and the purchase is to be financed with the insured mortgage, then the maximum mortgage amount shall not exceed the greater of:

(1) 70 percent of the lender's estimate of value of the project, or,

(2) The cost to refinance the existing indebtedness which will consist of the following items, the eligibility and amounts of which must be determined by the lender:

(i) The amount required to pay off the existing indebtedness;

(ii) An amount for the initial deposit for the reserve fund for replacements;

(iii) Reasonable and customary legal, organizational, title, and recording expenses, including discounts charged by the lender, as permitted by the Commissioner;

(iv) The estimated repair costs, if any, including the estimated cost of installing safety and fire prevention components, as defined by the Commissioner, in the project;

(v) Architect's municipal inspection and/or engineering fees.

(d) *Property to be acquired.* If the project is to be acquired by the mortgagor and the purchase price is to be financed with the insured mortgage, the maximum amount shall not exceed 85 percent of the cost of acquisition as determined by the lender. The cost of acquisition shall consist of the following items (to the extent that each item is paid by the purchaser separately from the purchase price), the eligibility and amounts of which must be determined by the lender:

(1) Purchase price as indicated in the purchase agreement;

(2) An amount for the initial deposit to the reserve fund for replacements;

(3) Reasonable and customary legal, organizational, title, and recording expenses, including discounts charged by the lender, as permitted by the Commissioner;

(4) The estimated repair cost, if any, including the estimated cost of installing fire prevention and safety compo-

nents, as defined by the Commissioner, in the project;

(5) Architects's municipal inspection and/or engineering fees.

(e) *Debt service.* An amount that can be amortized by 85 percent of the projected net income of the project after payment of operating expenses and taxes.

(f) *Reduced mortgage amount—leaseholds.* In the event the mortgage is secured by a leasehold estate rather than a fee simple estate, the value of the property described in the mortgage shall be the value of the leasehold estate (as determined by the lender) which shall in all cases be less than the value of the property in fee simple.

§ 255.212 Maturity.

The mortgage shall have a maturity satisfactory to the lender, not less than 10 years, nor shall it exceed the lesser of 35 years or 75 percent of the estimated remaining economic life of the physical improvements. The term of the mortgage shall begin on the first day of the second month following the date of initial-final endorsement of the mortgage for insurance.

§ 255.213 Payment requirements.

Method of payment. The mortgage shall provide for monthly payments on the first day of each month on account of interest and principal and shall provide for payments in accordance with an amortization plan as agreed upon by the mortgagor, and the lender.

§ 255.214 Maximum mortgage interest rate.

(a) On and after September 2, 1975, the maximum interest rate on which commitments to insure shall be issued shall not exceed 9 percent per annum.

(b) The insured mortgage shall bear interest at such rate as may be agreed upon by the mortgagor and the lender but such rate shall not exceed the rate specified in the commitment to insure. At the option of the lender, it may issue an amended commitment to insure at a higher or lower interest rate. If the amended commitment is to insure at a higher rate, such higher rate shall not exceed the maximum rate in effect at the time of the issuance of the amended commitment which shall be no later than the date that the mortgage is endorsed for insurance. The lender shall only request a commitment to insure a mortgage at a higher rate than that specified in the original commitment to insure if it is determined by the lender that the project which is the security for the mortgage will be able to charge the increased rentals required to amortize a mortgage at the higher rate without adversely affecting the economic soundness of the project.

§ 225.215 Mortgage to cover the entire property.

The mortgage shall cover the entire property included in the housing project.

§ 225.216 Covenant for hazard insurance.

The mortgage shall contain a covenant acceptable to the Commissioner binding the mortgagor to keep the property insured by a standard policy or policies against loss from fire and such other hazards as the lender, upon the insurance of the mortgage, may stipulate, in an amount which will comply with the coinsurance clause applicable to the location and character of the property, but not less than 80 percent of the actual cash value of the insurable improvements and equipment of the project. The policies evidencing such insurance shall have attached thereto a standard mortgagee clause making loss payable to the lender and the Commissioner as their interests may appear.

§ 225.217 Soundness of project.

No mortgage shall be accepted for insurance unless the lender finds that the property or project with respect to which the mortgage is executed is economically sound, except that as to mortgages covering property located in Alaska, or in Guam, or in Hawaii, no mortgage shall be accepted for insurance unless the lender, with prior notice to the Commissioner finds that the property or project is an acceptable risk giving consideration to the acute housing shortage in Alaska, or in Guam, or in Hawaii.

§ 225.218 Accumulation of accruals.

(a) The mortgage shall provide for payments by the mortgagor to the lender on each interest payment date of an amount sufficient to accumulate in the hands of the lender one payment period prior to its due date, the next annual mortgage insurance premium. Such payments shall continue only so long as the contract of coinsurance shall remain in effect.

(b) The mortgage shall provide for such equal monthly payments by the mortgagor to the lender as will amortize the ground rents, if any, and the estimated amount of all taxes, water rates and special assessments, if any, and fire and other hazard insurance premiums, within a period ending one month prior to the date on which the same become delinquent. the mortgage must also make provisions for adjustments, in case the estimated amount of such taxes, water rates and assessments, and insurance premiums shall prove to be more, or less, than the actual amount thereof so paid by the mortgagor.

§ 255.219 Application of mortgage payments

The mortgage shall provide that all monthly payments being made by the mortgagor to the lender shall be added together and the aggregate thereof shall be paid by the mortgagor upon each monthly payment date in a single payment. The lender shall apply all payments received from the mortgagor or for the account of the mortgagor to the following items in the order set forth:

(1) Premium charges under the contract of insurance, where applicable.

(2) Ground rents, taxes, special assessments and fire and other hazard insurance premiums.

(3) Interest on the mortgage.

(4) Amortization of the principal of the mortgage.

§ 225.220 Prepayment privileges.

The mortgage may establish such conditions or penalties for prepayment as may be agreed upon by the lender and mortgagor.

§ 255.221 Late charges.

The mortgage may provide for the collection by the lender of a late charge, not to exceed two cents for each dollar, of each payment to interest and principal more than 15 days in arrears, or such other charges as may be agreed to by the lender and the Commissioner, to cover the extra expense involved in handling delinquent payments. Late charges shall be separately charged to and collected from the mortgagor and shall not be deducted from any aggregate monthly payment.

SUPERVISION OF MORTGAGORS

§ 255.222 In general.

In order to be eligible for the benefit of insured financing under this part, a mortgagor must agree to be regulated and restricted by the lender as to rents, sales, charges, capital structure, rate of return, and methods of operation.

§ 255.223 Required supervision of private mortgagors.

The regulatory agreement required by § 255.107 shall provide that the following items are regulated or restricted:

(a) *Capital structure.* (1) The number of shares of capital stock, in the case of a corporation, may be issued in such amounts and form as may be agreed upon by the sponsors and the lender prior to the endorsement of the mortgage for insurance; and

(2) In the case of a trust entity beneficial certificates of interest may be issued in such amounts and form as

amination by the commissioner and the lender, or their authorized agents at all reasonable times.

(b) Comply with the provisions of title VIII of the Civil Rights Act of 1968, as amended, which prohibits dis-

(3) Under a lease having a period of not less than 75 years to run from the date the mortgage is executed; or

(d) *Critical defect.* As used herein, the term "critical defect" shall include, but is not limited to: Holes, open cracks, or loose or missing mate-

dence of title in accordance with subparagraph (2), (3), or (4) of this paragraph, as the lender may require. Any policy of title insurance, or evidence of

(2) In the case of a trust entity beneficial certificates of interest may be issued in such amounts and form as may be agreed upon by the mortgagor and the lender.

(b) *Rate of return.* Dividends of other distributions, as defined in the charter, trust agreement, or regulatory agreement, may be declared or made only as of or after the end of a semiannual or annual fiscal period. No dividends or other distributions shall be declared or made except out of surplus cash legally available and remaining after:

(1) The payment of: (i) All sums due or currently required to be paid under the terms of any mortgage or note insured under this part;

(ii) All amounts required to be deposited in the reserve fund for Replacements;

(iii) All obligations of the project other than the mortgage insured under this part unless funds for payment are set aside or deferment of payment has been approved by the lender.

(2) The segregation of: (i) An amount equal; to the aggregate of all special funds required to be maintained by the project;

(ii) All tenant security deposits held. No distributions of any kind may be made from borrowed funds.

(c) *Rents and charges.* No charge shall be made by the mortgagor for the accommodations, facilities, or services offered by the project in excess of those approved by the lender, and subject to further review by the Commissioner, in writing prior to the opening of the project for rental. In approving such charges and in passing upon applications for changes, consideration will be given to the following and similar factors:

(1) Rental income necessary to maintain the economic soundness of the project.

(2) Rental income necessary to provide reasonable return on the investment consistent with providing reasonable rentals to tenants.

(d) *Methods of operation.* (1) The mortgagor shall maintain its project, the grounds, buildings, and equipment appurtenant thereto, in good repair and will promptly complete necessary repairs and maintenance as required by the lender.

(2) In all projects, a fund for replacement shall be established and maintained with the lender. The amount and type of such fund and the conditions under which it shall be accumulated, replenished, and used, shall be specified in the regulatory agreement.

(3) The mortgagor, its property, equipment, buildings, plans, offices, apparatus, and devices, books, contracts, records, documents, and papers shall be subject to inspection and examination by the commissioner and the lender, or their authorized agents at all reasonable times.

(4) The mortgagor shall execute and deliver to the Commissioner or the lender a certificate that the books and accounts of the mortgagor will be established and maintained in a manner satisfactory to the lender on the date the certificate is executed. Such certificate shall be to the effect that so long as the mortgage is coinsured the mortgagor's books and accounts will be kept in accordance with the requirements of the lender; will be in such form as to permit a speedy and effective audit and as may otherwise be prescribed by the lender; will be maintained for such periods of time as may be prescribed by the lender, and will be available to the Commissioner, the lender and to the Comptroller General of the United States for such examination and audits as they may desire to make. The mortgagor shall file with the Commissioner and the lender the following reports verified by the signature of such officers of the mortgagor as the lender may designate and in such form as prescribed by the lender:

(i) Monthly occupancy reports, when required by the lender;

(ii) Complete annual financial reports based upon examinations of the books and records of the mortgagor, prepared in accordance with the requirements of the lender, certified to by an officer of the mortgagor and, when required by the lender, prepared and certified by a Certified Public Accountant (or other person acceptable to the lender), such reports to be submitted within sixty (60) days after the end of each fiscal year.

(iii) Specific answers to questions upon which information is desired from time to time relative to the actual cost of repairs and improvements, the disposition of mortgage funds, the operation and condition of the property and the status of the insured mortgage;

(iv) Properly certified copies of minutes of meetings of the directors, officers, stockholders, shareholders, or beneficiaries.

§ 255.224 Nondiscrimination in housing.

The mortgagor shall certify in the regulatory agreement required by § 255.107 that so long as the mortgage is coinsured under this part the mortgagor will do the following:

(a) Agree to refrain from utilizing criteria or methods of selecting tenants which discriminate against any family by reason of the fact that there are children in the family, unless the project was designed specifically for occupancy by elderly people; or discriminate against any family by reason of the sex of household head.

(b) Comply with the provisions of title VIII of the Civil Rights Act of 1968, as amended, which prohibits discrimination because of race, color, creed, sex, or national origin, and administer the program and related activities in a manner to affirmatively further fair housing. The applicant shall also comply with similar State and local fair housing laws and ordinances.

(c) Comply with the provisions of Executive Order 11063 on Equal Opportunity in Housing which deals with preventing discrimination on the basis of race, color, creed or national origin in housing and related facilities provided through Federal financial assistance.

(d) Rent, permit the rental or permit the offering for rental of the housing, or any part thereof, covered by such mortgage, for transient or hotel purposes. For the duration of the regulatory agreement, the term rental for transient or hotel purposes shall mean (1) rental for any period less than 30 days, or (2) any rental, if the occupants of the housing accommodations are provided customary hotel services, such as room service for food and beverages, maid service, furnishing and laundering of linens, and bellboy service;

(e) Sell the project as long as the mortgage is coinsured under this part, unless the purchaser also certifies under oath as is required by this section.

§ 255.225 Discrimination in employment.

The mortgagor shall certify (on a form approved by the Department) that he (it) will not discriminate on the basis of race, color, creed, sex or national origin against any employee or applicant for employment. Any contract or subcontract executed for project repairs and improvements shall contain a provision to this effect. In addition, the provisions of Executive Order 11246 and title 24 CFR part 130 shall apply, when appropriate, to such contracts.

§ 255.226 Covenant regarding use of property.

The mortgagor shall contain a covenant prohibiting the use of the property covered thereby for any purpose other than that for which it was intended at date the mortgage was executed.

PROPERTY REQUIREMENTS

§ 255.227 Eligibility of property.

(a) A mortgage to be eligible for insurance shall be on real estate held:

(1) In fee simple; or

(2) On the interest of the lessee under a lease for not less than 99 years, which is renewable; or

(3) Under a lease having a period of not less than 75 years to run from the date the mortgage is executed; or

(4) Under a lease executed by a governmental agency, or such other lessor as the Commissioner may approve for the maximum term consistent with the legal authority for the execution of such lease, provided that the term of any such lease shall run for a period of not less than 50 years from the date the mortgage is executed.

(b) The property coinstituting security for the mortgage must be held by an eligible mortgagor as herein defined and must at the time the mortgage is insured be free and clear of other liens except those approved by the lender.

§ 255.228 Development of property.

(a) *Obligation of the mortgagor.* The mortgagor shall be obligated to either purchase or refinance existing housing and make such repairs and improvements as are deemed necessary by the lender. The property must not require substantial rehabilitation as hereinafter defined. The property, including improvements, shall comply with any material zoning or deed restrictions applicable to the project site and with all applicable building and other governmental regulations.

(b) *Properties requiring substantial rehabilitation.* Properties requiring substantial rehabilitation are those properties which do not provide safe and adequate shelter; and in their present condition endanger the health and well-being of the occupants. Such housing has: A critical defect or combination of criticial defects the cost of which would exceed the greater of:

(1) 15 percent of the property's value after repairs; or

(2) $3,000 per dwelling unit, or such higher amount that the Commissioner determines is justified when compared with amounts expended in the area for the majority of other rehabilitation projects assisted by the Department.

(c) *Costs of replacement items and fire safety equipment.* In determining whether a property exceeds the substantial rehabilitation threshold described in paragraph (b) (1) and (2) of this section, the Commissioner may exempt from the total which must not exceed the threshold, the purchase price but not the installation cost of the following specific items of replacement or fire safety equipment:

(1) Replacement of:
(i) Ranges/hoods,
(ii) Ovens,
(iii) Refrigerators,
(iv) Garbage disposals,
(v) Dishwashers, and
(vi) Carpets; and

(2) Fire safety equipment required by Federal, State or local law.

(d) *Critical defect.* As used herein, the term "critical defect" shall include, but is not limited to: Holes, open cracks, or loose or missing material over a large area of outside walls, roof, chimney, inside walls, floors or ceilings; insubstantial or sagging floors, walls or roof; extensive damage by storm, fire or flood; inadequate or potentially hazardous utility systems and equipment; a lack of hot running water, a usable flush toilet, a tub or shower.

(e) *Minimum number of units.* A project shall consist of not less than eight dwelling units.

(f) *Date of application.* In order to be eligible for mortgage insurance under this part, 3 years must have elapsed from the date of completion of the project or beginning of occupancy (whichever is later) to the date of application for mortgage insurance.

(g) *Financial viability.* The project shall have attained sustaining occupancy (occupancy that would produce rental income sufficient to pay operating expenses, annual debt service and reserve fund for replacement requirements) as determined by the lender, prior to endorsement of the project for insurance; or else the mortgagor shall provide an operating deficit fund at the time of endorsement for insurance, in an amount, and under an agreement, approved by the lender.

§ 255.229 Commercial facilities.

The project may include only such commercial and community facilities as the lender determines will be adequate and appropriate to serve the occupants. In no event shall net rentable commercial area exceed 10 percent of the total net rentable area, both commercial and residential. Notwithstanding the above, this limitation may be waived, for good cause, by the Commissioner.

TITLE

§ 255.230 Eligibility of title.

In order for the mortgaged property to be eligible for insurance, the lender must determine that marketable title thereto is vested in the mortgagor as of the date the mortgage is filed for record. The title evidence will be examined by the lender and the original endorsement of the credit instrument for insurance will be evidence of its acceptability.

§ 255.231 Title evidence.

Upon insurance of the mortgage, the mortgagor shall furnish to the lender a policy of title insurance covering such property, as provided in paragraph (a) of this section. If, for reasons the lender deems satisfactory, title insurance cannot be furnished, the mortgagor shall furnish such evidence of title in accordance with subparagraph (2), (3), or (4) of this paragraph, as the lender may require. Any policy of title insurance, or evidence of title required under this section shall be furnished without expense to the lender. The types of title evidence are:

(a) A policy of title insurance issued by a company and in a form satisfactory to the lender. The policy shall name as the insured the lender and the mortgagor as their interests may appear. The policy shall provide that upon acquisition of title by the lender, it will become an owner's policy running to the lender.

(b) An abstract of title satisfactory to the lender, prepared by an abstract company or individual engaged in the business of preparing abstracts of title, accompanied by the legal opinion satisfactory to the lender as to the quality of such title, signed by an attorney at law experienced in the examination of titles.

(c) A Torrens or similar title certificate.

(d) Evidence of title conforming to the standards of a supervising branch of the Government of the United States of America, or of any State or territory thereof.

COST CERTIFICATION REQUIREMENTS

§ 255.232 Agreement to certify cost requirements.

Prior to disbursement of any part of the loan, the lender shall enter into an agreement with the mortgagor in form and content satisfactory to the Commissioner for the purpose of precluding any excess of mortgage proceeds over statutory and regulatory limitations. Under this agreement, the mortgagor shall agree:

(a) To execute a certificate of actual costs, upon completion of all physical improvements on the mortgaged property, in accordance with § 225.235 of this part.

(b) To apply in reduction of the outstanding balance of the principal amount of the mortgage, mortgage proceeds which exceed the amounts set forth in § 255.239 of this report.

§ 225.235 Certificate of actual cost—contents in general.

(a) Submission of certificate. The mortgagor's certificate of actual cost, in a form approved by the Commissioner, shall be submitted prior to initial-final endorsement and upon completion of the improvements to the satisfaction of the lender, except those refinancing transactions where 70 percent of value is the controlling criterion.

(b) The certificate shall show the actual cost to the mortgagor of acquiring the property or refinancing property which secures an existing indebt-

edness. Items which shall be included if paid by the mortgagor in acquiring property are listed in § 255.211(d).

successors and such of its assigns as are approved by the Commissioner.

(g) "Mortgage insurance premium"

advance and no refund can be made of any portion thereof except as hereinafter provided in this subpart.

§ 255.413 Reinstatement of a defaulted mortgage.

If after default and prior to the completion of foreclosure proceedings the

lender notifies the Commissioner that no claim for insurance benefits will be made;

(b) The date the mortgage was pre-

any property acquired through a defaulted mortgage, the lender must establish that it has incurred a loss on the mortgage equal to at least 8 per-

V 43 / 187
SE 26 78

edness. Items which shall be included if paid by the mortgagor in acquiring property are listed in § 255.211(d). Items which shall be included if paid by the mortgagor in refinancing property are listed in § 255.211(c)(2) of this chapter.

§ 255.239 Reduction in mortgage amount.

If the principal obligation of the mortgage exceeds the applicable statutory percentage of the approved actual cost, as reflected in this part, the mortgage shall be reduced by the amount of such excess prior to initial-final endorsement for insurance.

§ 225.240 Requisites of certification of actual costs.

Any statement of certification required by § 255.232 shall specifically state that it has been made, presented, and delivered for the purpose of influencing an official action of the Commissioner and may be relied upon by the Commissioner and the lender as a true statement of the facts contained therein.

§ 255.241 Cost certification incontestable.

Upon the lender's approval of the mortgagor's certification, such certification shall be final and incontestable except for fraud or material misrepresentation on the part of the mortgagor.

Subpart D—Contract Rights and Obligations.

§ 255.401 Definitions.

As used in this subpart the following terms shall have the meaning indicated:

(a) "Commissioner" means the Federal Housing Commissioner.

(b) "Act" means the National Housing Act, as amended.

(c) "Mortgage" means such a first lien upon real estate and other property as is commonly given to secure advances on, or the unpaid purchase price of, real estate under the laws of the State, district, or territory in which the real estate is located, together with the credit instruments, if any, secured thereby.

(d) "Insured mortgage" means a mortgage which has been insured by the endorsement of the mortgage note pursuant to this part by the Commissioner, or his duly authorized representative.

(e) "Contract of coinsurance" means the agreement between the private lender and the Commissioner for the coinsurance of a mortgage evidenced by the endorsement of a mortgage note by the Commissioner and includes the terms, conditions and provisions of this part and of the National Housing Act.

(f) "Mortgagor" means the original borrower under a mortgage and its successors and such of its assigns as are approved by the Commissioner.

(g) "Mortgage insurance premium" means the mortgage insurance premium paid by the lender to the Commissioner in consideration of the contract of insurance.

§ 255.402 Insurance of mortgage.

Upon compliance with a commitment the Commissioner and the lender will insure the loan against losses resulting from nonpayment of the debt, evidencing the insurance by an appropriate endorsement by the Commissioner placed on the original credit instrument which will identify the regulations under which the loan is insured and the date of insurance. The mortgage shall be insured from the date of the endorsement of the credit instrument by the Commissioner. The Commissioner and the lender shall thereafter be bound by the regulations in this part with the same force and to the same extent as if a separate contract had been executed relating to the insured mortgage, including the provisions of the regulations in this subpart and of the Act.

MORTGAGE INSURANCE PREMIUMS

§ 255.403 Amount of MIP to be collected from the mortgagor.

The lender may collect from the mortgagor an MIP from the date of the contract of coinsurance which shall not exceed an initial MIP of 1 percent of the principal obligations for the first year of the mortgage and 0.5 percent per annum of the amount of the principal obligation of the mortgage outstanding at any time thereafter, without taking into account delinquent payments or prepayments.

§ 255.404 Method of payment of MIP.

The payment of any MIP under this subpart shall be made to the Commissioner by the lender in cash or debentures. The MIP will be paid annually on a level percentage of the declining principal balance.

§ 255.405 Annual payment of MIP on a level percentage of the declining principal balance.

The lender shall pay to the Commissioner on the effective date of the contract of coinsurance, a first year mortgage insurance premium, covering a period of 1 year, equal to 0.75 percent of the outstanding principal balance of the mortgage. Each year thereafter, the lender, on the anniversary date of the contract of coinsurance shall pay a premium for the following year, equal to 0.38 percent per annum of the average outstanding principal obligation of the mortgage, without taking into account delinquent payments or prepayments. All premiums are payable in advance and no refund can be made of any portion thereof except as hereinafter provided in this subpart.

§ 255.406 Duration of MIP.

The MIP under § 255.405 shall continue annually until the earliest date on which one of the following occurs:

(a) The mortgage is paid in full.

(b) A deed to the lender is filed for record, or

(c) The contract of coinsurance is otherwise terminated with the consent of the Commissioner.

§ 255.407 Pro rata payment of annual MIP.

(a) If the contract of coinsurance is terminated after the due date of the initial first year MIP due in accordance with § 255.405, the lender shall pay to the Commissioner that portion of the current annual MIP prorated from the due date of the last annual MIP through the end of the month in which the contract of coinsurance is terminated.

(b) For the purpose of computing the pro rata portion of the annual MIP, the date of termination of coinsurance shall be the last day of the month in which the mortgage was prepaid or a voluntary termination request is received by the Commissioner.

DEFAULT UNDER THE MORTGAGE

§ 255.410 Definition of default.

The following shall be considered a default under this subpart:

(a) Failure of the mortgagor to make any payment due under the mortgage;

(b) Failure of the mortgagor to perform any other covenant under the provisions of the mortgage, if the lender because of such failure has accelerated the debt.

§ 255.411 Date of default.

For the purposes of this subpart, the date of default shall be considered as 30 days after:

(a) The first uncorrected failure to perform any obligation under the mortgage; or

(b) The first failure to make a monthly payment which is not covered by subsequent payments made by the mortgagor when such subsequent payments are applied to the overdue monthly payments in the order in which they became due.

§ 255.412 Notice of default.

The lender shall, within 60 days after the date of default as defined in this part, give written notice thereof to the Commissioner on a form prescribed by him, unless such default has been cured or unless the Commissioner has been notifed of a previous default which remains uncured.

§ 255.413 Reinstatement of a defaulted mortgage.

If after default and prior to the completion of foreclosure proceedings the mortgagor shall cure the default, the insurance shall continue as if a default had not occurred. The mortgagor shall pay to the lender such expenses as the lender has incurred in connection with the foreclosure proceedings and the lender shall give written notice of reinstatement to the Commissioner.

§ 255.414 Forbearance relief.

A mortgagor and a lender may enter into an agreement for the reduction or suspension of regular mortgage payments according to standards set forth by the Commissioner: *Provided*, That during such periods of modification of terms or forbearance, all moneys received from rents or other sources must be applied toward the payment of operating costs, with any receipts in excess of operating costs applied during such period to payments required under the mortgage. During periods of modification in mortgage terms or forbearance in requiring payment-in-full of all payments when due under the mortgage, the mortgagor shall agree that no distribution or dividends shall be payable by the mortgagor to any shareholder, partner, or other investor in the mortgagor entity.

TERMINATION

§ 255.415 Termination of coinsurance contract.

The contract of coinsurance for each individual mortgage shall be terminated if:

(a) The mortgage is paid in full prior to its maturity;

(b) The lender acquires the mortgaged property and notifies the Commissioner that no claim for insurance benefits will be made;

(c) After foreclosure the property is redeemed;

(d) The property is acquired at a foreclosure sale by a party other than the lender;

(e) The mortgagor and lender jointly request termination; or

(f) The lender sells or otherwise conveys the mortgage to other than a lender approved to coinsure under this part by the Commissioner.

§ 255.416 Notice and date of termination by Commissioner.

The Commissioner shall notify the lender that the contract of coinsurance on a mortgage has been terminated and establish the effective termination date. The termination date shall be the last day of the month in which any one of the following events occur:

(a) The date foreclosure proceedings were instituted, or the property otherwise acquired by the lender, if the lender notifies the Commissioner that no claim for insurance benefits will be made;

(b) The date the mortgage was prepaid in full;

(c) The date a voluntary termination request was received by the Commissioner;

(d) The date the mortgage was sold or otherwise conveyed to other than a lender approved to coinsure under this part.

§ 225.417 Effect of termination.

Upon termination of the contract of insurance, the obligations to pay any subsequent MIP shall cease and all rights of the mortgagor and lender shall be terminated.

CLAIM PROCEDURE

§ 255.420 Acquisition of property.

At any time after the default of the mortgage and the determination by the lender to accelerate the total principal amount of the mortgage, the lender, at its election, shall (if no other eligible entity has assumed the obligations of the mortgagor) either (a) commence foreclosure of the mortgage; or (b) acquire possession of, and title to, the mortgage property by means other than foreclosure. The lender shall notify the Commissioner of its action at the time it makes its election either to commence foreclosure of the mortgage or acquire possession and title by other means.

§ 255.421 Deed in lieu of foreclosure.

In lieu of instituting or completing a foreclosure, the lender may acquire property by voluntary conveyance from the mortgagor. Conveyance of the property by deed in lieu of foreclosure is approved subject to the following requirements:

(a) The mortgage is in default at the time the deed is executed and delivered;

(b) The credit instrument is canceled and surrendered to the mortgagor;

(c) The mortgage is satisfied of record as a part of the consideration for such conveyance; and

(d) The deed from the mortgagor conveys marketable title and contains a covenant which warrants against the acts of the grantor and all claiming by, through, or under him and conveys good marketable title.

§ 255.422 Notice to Commissioner.

At the time the lender elects to acquire title, it shall give written notice to the Commissioner of its intention to file a claim for insurance benefits.

§ 255.423 Application for insurance benefits.

(a) *Deductible.* Before a lender can file a claim for insurance benefits on any property acquired through a defaulted mortgage, the lender must establish that it has incurred a loss on the mortgage equal to at least 8 percent of the outstanding principal balance of the mortgage. In order to satisfy the deductible, the lender must acquire the property securing the mortgage. The loss is determined by deducting the market value of the property acquired for use for the market originally intended, as determined by an independent appraiser, from the unpaid principal balance due on themortgage secured by the property plus the expenses of such acquisition as approved by the Commissioner.

(b) After the lender has acquired the property as provided in § 255.420, the lender may make a claim for insurance benefits. At the time that the claim is made, the Commissioner shall estimate the total amount of the insurance benefits which will be due the lender upon disposition of the property, and a partial payment will be made to the lender on its claim in accordance with § 255.426(a).

PAYMENT OF INSURANCE BENEFITS

§ 255.424 Method of payment.

Payment of the insurance claim shall be made in cash unless the lender files a written request for payment indebentures.

§ 255.425 Disposition of property.

(a) Upon the acquisition of marketable title to the property securing a defaulted mortgage in accordance with § 255.420, the lender shall obtain an appraisal of the property by an independent appraiser. The appraisal shall be based upon the market value of the property for use for the market originally intended.

(b) After the lender sells the property, or after the expiration of 12 months, whichever occurs first, the lender may make a claim for the balance of the insurance benefits to which it is entitled in accordance with § 255.426(b).

(c) Upon making a claim to the Commissioner for the balance of the insurance benefits, the lender shall notify the Commissioner, on an approved form, of the sale of the property, the purchase price, and income and expenses incurred in connection with the acquisition, repair, operation, and sale of the property, and shall assign to the Commissioner, without recourse of warranty, any and all claims (other than the mortgage financing such sale) which the lender has acquired in connection with the transaction.

(d) If the property has not been disposed of at the time of the lender's request for final payment, the lender shall utilize the appraised value of the property secured in accordance with

V 43 / 187 SEP 26 78 V4

paragraph (a) of this section in its notification to the Commissioner, in lieu of the sales price.

§ 255.426 Amount of payment.

(a) Upon the acquisition of marketable title to the property securing a defaulted mortgage in accordance with section 255.420, the lender shall be entitled to receive 60 percent of the difference between the unpaid principal balance on the date of the institution of foreclosure proceedings or on the date of acquisition of the property otherwise after default and the appraised value of the property secured in accordance with § 255.425(a).

(b) Upon disposition of the property or the expiration of 12 months from the date of acquisition of the property, whichever occurs earlier, the lender shall be entitled to the balance of the insurance benefits.

(c) The basis for the computation of insurance benefits shall be the sum of the unpaid principal balance on the date of the institution of foreclosure proceedings or on the date of acquisition of the property otherwise after default, plus the amount of all payments made by the lender and allowances for items as set forth in § 255.427 less all items as set forth in § 255.428.

(d) The amount of the total insurance benefits shall be 85 percent of the amount computed pursuant to paragraph (c) of this section.

(e) If the sum paid out in paragraph (a) of this section exceeds the amount of total insurance benefits determined pursuant to paragraph (d) of this section, the lender shall return such excess to the Commissioner.

§ 255.427 Items included in payment.

The insurance benefits paid shall include the following items:

(a) The amount of all payments made by the lender for taxes, special assessments, and water rates which are liens prior to the mortgage; for fire and hazard insurance on the property; and for any mortgage insurance premiums paid after default;

(b) An amount equivalent to debenture interest at the rate established pursuant to § 255.429 on the principal of the mortgage unpaid on the date of the institution of foreclosure proceedings or on the date of the acquisition of the property otherwise after default, from the date of default to the date of acquisition of title;

(c) An amount equivalent to mortgage interest on the principal of the mortgage unpaid on the date of institution of foreclosure proceedings or on the date of acquisition of the property after default, from the date of acquisition to the date of payment of the insurance benefits, as adjusted to reflect any partial or preliminary benefits payments;

(d) Costs, actually paid by the lender and approved by the Commissioner, of acquiring the property through foreclosure or otherwise, in an amount not in excess of two-thirds of such costs, such costs shall not include loss or damage resulting from the invalidity or unenforceability of the lien of the mortgage or the unmarketability of the title of the mortgagor;

(e) Reasonable payments made by the lender for:

(1) Preservation, operation, and maintenance of the property;

(2) Repairs necessary to meet the objectives of the HUD minimum property standards, those required by local law, and such additional repairs as may be specifically approved in advance by the Commissioner;

(3) Expenses in connection with the sale of property.

§ 255.428 Items deducted from payment.

There shall be deducted from the total of the added items in § 255.426(c) and 255.427 the following items:

(a) An amount equal to 8 percent of the outstanding principal balance of the mortgage on the date of institution of foreclosure proceedings or on the date of acquisition of the property otherwise after default.

(b) All amounts received by the lender on account of the mortgage after the institution of foreclosure proceedings or the acquisition of the property by direct conveyance or otherwise after default.

(c) All cash held by the lender or its agents or to which it is entitled, including deposits made for the account of the mortgagor.

(d) All funds held by the lender for the account of the mortgagor received pursuant to any other agreement.

(e) The amount of any undrawn balance under a letter of credit accepted by the lender in lieu of a cash deposit for an escrow agreement.

(f) Any net income received by the lender from the property securing the mortgage after the date of default.

(g) The net proceeds from the sale of the project, except that if the lender sells the project for an amount less than the appraised value of a negotiated sale the amount to be deducted will be the appraised value. If the property is sold on the basis of a competitive bidding procedure approved by the Commissioner, the sales price will be deducted notwithstanding that it is lower than the appraised value. If the property has not been disposed of within 12 months from the date of acquisition, the lender shall use the appraised value of the property as a substitute for the sales price.

(h) All amounts previously received by the lender as partial payment of insurance benefits made in accordance with § 255.426(a).

§ 255.429 Cash—Debentures.

All of the provisions of § 207.259(e) of this chapter shall apply to mortgages coinsured under this part.

AMENDMENTS

§ 255.430 Effect of amendments.

The regulations in this subpart may be amended by the Commissioner at any time and from time to time, in whole or in part, but such amendment shall not adversely affect the interests of a lender under the contract of coinsurance on any mortgage already coinsured and shall not adversely affect the interest of a lender on any mortgage to be coinsured on which the Commissioner has made a commitment to insure.

Issued at Washington, D.C., on September 19, 1978.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing—Federal Housing Commissioner.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Determination of Critical Habitat for the Leatherback Sea Turtle

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines critical habitat for the leatherback sea turtle (*dermochelys coriacea*) in a portion of its range. This action is being taken to insure the integrity of the only major nesting beach used by leatherbacks in the United States or its territories and makes all provisions of section 7 of the Endangered Species Act of 1973 available to this species. In accordance with section 7, all Federal agencies will be required to insure that actions authorized, funded, or carried out by them do not adversely affect this critical habitat. The areas determined as critical habitat are located on Sandy Point at the western edge of St. Croix, U.S. Virgin Islands.

DATE: This rule becomes effective on October 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director—Federal Assistance, Fish and wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, 202-343-4646.

SUPPLEMENTARY INFORMATION:

Background

In the FEDERAL REGISTER of March 23, 1978 (43 FR 12050-12051), the Fish and Wildlife Service published a proposed determination of critical habitat for the leatherback sea turtle (*Dermochelys coriacea*). This critical habitat was described as:

U.S. Virgin Islands—A strip of land 0.1 mile wide (from mean high tide inland) at Sandy Point Beach on the western end of the island of St. Croix beginning at the southwest cape to the south and running 0.8 mile northwest and then northeast along the shoreline.

In the March 23, 1978, FEDERAL REGISTER proposed rulemaking (43 FR 12050-12051) and associated March 28, 1978, press release, all interested parties were invited to submit factual reports or information which might contribute to the formulation of a final rulemaking.

All public comments received during the period March 23, 1978, to July 20, 1978, were considered.

Summary of Comments and Recommendations

A total of 14 comments were received in response to the proposal for critical habitat for this species; no comments were received which opposed designating Sandy Point Beach as critical habitat for the endangered leatherback. Comments were received from Gov. Juan Luis of the U.S. Virgin Islands, John Yntema and Otto Tranberg (Virgin Islands Department of Conservation and Cultural Affairs), Capt. F. P. Schubert (U.S. Coast Guard), Christina Palacio (New York Zoological Society), Craig Van Note (monitor), Omar Munoz-Roure (Caribbean Fishery Management Council), and seven private individuals. Only Governor Luis, Mr. Yntema, and Mr. Tranberg added information to that contained in the original proposal.

Both Governor Luis and John Yntema expressed concern that the width of the proposed critical habitat, 0.1 mile, might be too narrow to include all areas of suitable nesting habitat for the leatherback. Both recommended widening the area to 0.2 mile. In addition, Governor Luis noted past cooperation between Federal agencies and Virgin Islands personnel and expressed support for continued cooperation. Governor Luis also noted that it is the desire of the Virgin Islands to eventually acquire a major portion of the holdings.

Mr. Tranberg noted that records of the Virgin Islands Department of Conservation and Cultural Affairs indicate that a total of 86 leatherbacks actually nested on Sandy Point in 1977 and that as of the date of his letter May 18, 1978), 17 leatherbacks had nested. He noted that as much as 10 percent of nesting activity is actually occurring adjacent to the area proposed as critical habitat. Mr. Tranberg therefore recommended that the area be enlarged 0.7 mile on the south shore and 0.4 mile on the north shore. He also stated that 15 leatherback nests have been found to date in 1978 in the Shoys Beach area near Christiansted, St. Croix.

Conclusion

All information received by the Service indicates that the area proposed as critical habitat on Sandy Point for the leatherback does indeed qualify as critical habitat under that definition (see the FEDERAL REGISTER of January 4, 1978 (43 FR 870-876)). In addition, information received during the comment period suggests that the critical habitat should be expanded somewhat to include areas of additional nesting activity on Sandy Point Beach. Accordingly, the Director hereby determines final critical habitat for the leatherback sea turtle to be as follows (exclusive of those existing manmade structures or settlements which are not necessary to the normal needs or survival of the species):

U.S. Virgin Islands—A strip of land 0.2 mile wide (from mean high tide inland) at Sandy Point Beach on the western end of the island of St. Croix beginning at the southwest cape to the south and running 1.2 miles northwest and then northeast along the western and northern shoreline, and from the southwest cape 0.7 mile east along the southern shoreline.

Effect of the Rulemaking

The effects of this determination are involved primarily with section 7 of the Act, which states:

The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

A definition of the term "critical habitat" was published jointly by the Fish and Wildlife Service and the National Marine Fisheries Service in the FEDERAL REGISTER of January 4, 1978 (43 FR 870-876) and is reprinted below:

"Critical habitat" means any air, land, or water area (exclusive of those existing manmade structures or settlements which are not necessary to the survival and recovery of a listed species) and constituent elements thereof, the loss of which would appreciably decrease the likelihood of the survival and recovery of a listed species or a distinct segment of its population. The constituent elements of critical habitat include, but are not limited to: Physical structures and topography, biota, climate, human activity, and the quality and chemical content of land, water, and air. Critical habitat may represent any portion of the present habitat of a listed species and may include additional areas for reasonable population expansion.

As specified in the regulations for interagency cooperation as published in the January 4, 1978, FEDERAL REGISTER (43 FR 870-876), the Director will consider the physiological, behavioral, ecological, and evolutionary requirements for survival and recovery of listed species in determining what areas or parts of habitat are critical. These requirements include, but are not limited to:

(1) Space for individual and population growth and for normal behavior:

(2) Food, water, air, light, minerals, or other nutritional or physiological requirements;

(3) Cover or shelter;

(4) Sites for breeding, reproduction, or rearing of offspring; and generally,

(5) Habitats that are protected from disturbances or are representative of the geographical distribution of listed species.

In accordance with the July 18, 1977, memorandum of understanding between the Fish and Wildlife Service and National Marine Fisheries Service, the Fish and Wildlife Service was given the responsibility for sea turtles while on land. Such responsibility includes the determination of critical habitat. Since the only time leatherback sea turtles leave the water to come onto beaches in the U.S. Virgin Islands is to lay eggs, the areas included in this determination are areas where leatherback sea turtles nest. All the beaches in this rulemaking provide sites for the incubation of eggs and are known to provide proper sand size, moisture, and temperature conditions for successful development and hatching. There may be many kinds of actions which can be carried out within the critical habitat of a species which would not be expected to adversely affect that species. This point has not been well understood by some persons. There has been widespread and erroneous belief that a critical habitat designation is something akin to establishment of a wilderness area of wildlife refuge, and automatically closes an area to most human uses. Actually, a critical habitat designation applies to Federal agencies, and essentially is an official notification to these agencies that their responsibilities pursuant to section 7 of the Act are applicable in a certain area.

A critical habitat designation must be based solely on biological factors. There may be questions of whether and how much habitat is critical, in accordance with the above interpretation, or how to best legally delineate this habitat, but any resultant designation must correspond with the best available biological data. It would not be in accordance with the law to involve other motives; for example, to enlarge a critical habitat delineation so as to cover additional habitat under section 7 provisions, or to reduce a delineation so that actions in the omitted area would not be subject to evaluation.

There may indeed be legitimate questions of whether, and to what extent, certain kinds of actions would adversely affect listed species. These questions, however, are not relevant to the biological basis of critical habitat delineations. Such questions should, and can more conveniently, be dealt with after critical habitat has been designated. In this respect, the Service in cooperation with other Federal agencies had drawn up a set of regulations which, in part, establish a consultation process for helping to evaluate the possible effects of actions on critical habitat. Regulations for interagency cooperation were published on January 4, 1978, in the FEDERAL REGISTER (43 FR 870-876) to assist Federal agencies in complying with section 7 of the Endangered Species Act of 1973.

National Environmental Policy Act

An environmental assessment has been prepared in conjunction with this rulemaking. It is on file in the Service's Office of Endangered Species, 1612 K Street NW., Washington, D.C. 20240, and may be examined during regular business hours or obtained by mail. The assessment is the basis for a decision that the determinations of this rulemaking are not major Federal actions which would significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969.

The primary author of this rulemaking is Dr. C. Kenneth Dodd, Jr., Office of Endangered Species, U.S. Fish and Wildlife Service, 202-343-7814.

Regulation Promulgation

§ 17.95 [Amended]

Accordingly, 50 CFR 17.95(c) is amended by adding critical habitat of the leatherback sea turtle after that of the giant anole as follows:

* * * * *

(c) *Reptiles.* * * *

LEATHERBACK SEA TURTLE

(*Dermochelys coriacea*)

U.S. Virgin Islands—A strip of land 0.2 mile wide (from mean high tide inland) at Sandy Point Beach on the western end of the island of St. Croix beginning at the southwest cape to the south and running 1.2 miles northwest and then northeast along the western and northern shoreline, and from the southwest cape 0.7 mile east along the southern shoreline.

NOTE.—The Service has determined that this document does not contain a major action requiring preparation of an economic impact statement under Executive Order 11949 and OMD Circular A-107.

Dated: September 18, 1978.

LYNN A. GREENWALT,
Director, Fish and Wildlife Service.

ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Proposed Endangered Status for the Bolson Tortoise

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine the Bolson tortoise (*Gopherus flavomarginatus*) to be an endangered species. This action is being taken because the tortoise is under heavy pressure from human predation, habitat modification, competition from grazing stock, and collection of individuals. The proposed action, if completed, would provide additional protection to this species, listed now as an appendix II species on the Convention on International Trade in Endangered Species of Wild Fauna and Flora. The Bolson tortoise is known from the States of Chihuahua, Coahuila, and Durango in Mexico.

DATES: Comments from the public and the Government of Mexico must be received by December 25, 1978.

ADDRESSES: Submit comments to Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments and materials received will be available for public inspection during normal business hours at the Service's Office of Endangered Species, Suite 1100, 1612 K Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director, Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, 202-343-4646.

SUPPLEMENTARY INFORMATION:

Background

On June 15, 1978, the Fish and Wildlife Service was petitioned by Dr. David Morafka of California State University—Dominguez Hills to list the Bolson tortoise, *Gopherus flavomarginatus*, as an endangered species under provisions of the Endangered Species Act of 1973. Included with the petition was a report entitled "The Ecology and Conservation of the Bolson Tortoise, *Gopherus flavomarginatus*" in which Dr. Morafka reviewed the biology and status of the species throughout its range. On June 29, 1978, the Director of the Service notified Dr. Morafka that he had supplied sufficient information to warrant serious consideration for listing under provisions of the Act.

The Bolson tortoise is the largest terrestrial ectothermic vertebrate in North America and one of four species of the genus *Gopherus*, a genus confined to North America. This species was only described in 1959 and remains one of the least known reptiles in the northern hemisphere in spite of its size. Adults may measure in excess of 1 meter shell length, with a flat-topped, posteriorly flared carapace with laminae that are pale in contrast to dark centers. The plastron is horn yellow. In addition, there are various bone features (osteological characters) which distinguish this species from its close relatives. The Bolson tortoise is associated with grasslands and may have at one time been much more wide-ranging than at present. It is now confined to southeast Chihuahua, southwest Coahuila, and northeast Durango in northern Mexico. At present there are still a few remaining viable populations, although nearly all populations have been impacted directly by man.

Section 4(a) of the Act (16 U.S.C. 1531 et seq.) states:

> General.—(1) The Secretary shall by regulation determine whether any species is an endangered species or a threatened species because of any of the following factors:
> (1) The present or threatened destruction, modification, or curtailment of its habitat or range;
> (2) Overutilization for commercial, sporting, scientific, or educational purposes;
> (3) Disease or predation;
> (4) The inadequacy of existing regulatory mechanisms; or
> (5) Other natural or manmade factors affecting its continued existence.

This authority has been delegated to the Director.

Summary of Factors Affecting the Species

These findings are summarized herein under each of the five criteria of section 4(a) of the Act. These factors, and their application to the Bolson tortoise are as follows:

1. *The present or threatened destruction, modification, of curtailment of its habitat or range.*—Habitat destruction is accelerating throughout the range of the Bolson tortoise. Plowing and irrigation of fields for cotton, beans, corn, and melons have apparently contributed to the extirpation of the species in certain areas, such as the region west of Mexican Highway 49 and around Tlahualilo in Durango. As Mexico's resettlement program continues, more and more of the tortoise's habitat will likely be converted to agricultural and grazing uses. The continued existence of the tortoise in the vicinity of such practices is highly unlikely.

Habitat destruction also occurs through overgrazing by cattle and goats. Goat herds have long grazed the foothills of the tortoise country. Water supplies have been increased by underground drilling and as a result cattle are rapidly increasing in density in these arid grasslands. Some areas are now beginning to show the marked effects of overgrazing, usually indicated in this type of habitat by the erosion of topsoil and invasion of mesquite and creosote scrub. Cattle and goats destroy browse needed by the tortoises as well as burrows and cover sites by trampling.

2. *Overutilization for commercial, sporting, or educational purposes.*—In the pest, Bolson tortoises have been in demand for private collections, zoos, and museums in the United States and elsewhere; occasional shipments have reached dealers in El Paso. The extent of this collection is presently unknown in light of the tortoise's status as an appendix II species on the Convention on International Trade in Endangered Species of Wild Fauna and Flora. However, Mexico is not a party to the convention and it is likely that some trade is continuing. As recently as January 1978, Americans have been reported in Ceballos, Durango buying specimens.

3. *Disease or predation.*—Natural predation is probably only a minor factor contributing to the status of the Bolson tortoise. However, human predation may be the main cause for the extirpation or reduction in numbers of this tortoise over large areas of its range. This species is used extensively for food by the local population and although much of the area inhabited by tortoises is only sparsely settled, the tortoise populations are often eliminated as far away as 10 kilometers from the nearest habitation. As settlement increases, predation on the tortoises will accelerate.

4. *The inadequacy of existing regulatory mechanisms.*—Although permits are required by Mexico for the scientific collection of this species, no active resident personnel are present to enforce whatever legal protection may exist. There is no legal protection for the tortoise from local consumption. According Dr. Morafka's report, the enforcement of existing trade restrictions is also lacking.

5. *Other natural or manmade factors affecting its continues existence.*—Not applicable.

Effects of the Rulemaking

Endangered species regulations already published in title 50 of the Code of Federal Regulations set forth a series of general prohibitions and exceptions which apply to all endangered species. The regulations referred to above, which pertain to endangered species, are found at § 17.21 of title 50, and are summarized below.

With respect to the Bolson tortoise, all prohibitions of section 9(a)(1) of the Act, as implemented by 50 CFR 17.21, would apply. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. It also would be illegal to possess, sell, deliver, carry, transport, or ship any such wildlife which was illegally taken. Certain exceptions would apply to agents of the Service and State conservation agencies.

Regulations published in 50 CFR Part 17 (1977) provide for the issuance of permits to carry out otherwise prohibited activities involving endangered or threatened species under certain circumstances. Such permits involving endangered species are available for scientific purposes or to enhance the propagation or survival of the species. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship which would be suffered if such relief were not available.

Public Comments Solicited

The Director intends that the rules finally adopted will be as accurate and effective as possible in the conservation of any endangered or threatened species. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, private interests, or any other interested party concerning any aspect of these proposed rules are hereby solicited. Comments particularly are sought concerning:

(1) Biological or other relevant data concerning any threat (or the lack thereof) to the Bolson tortoise;

(2) Additional information concerning the range and distribution of this species.

Final promulgation of the regulations on the Bolson tortoise will take into consideration the comments and any additional information received by the Director, and such communications may lead him to adopt final regulations that differ from this porposal.

An environmental assessment has been prepared in conjunction with this proposal. It is on file in the Service's Office of Endangered Species, 1612 K Street NW., Washington, D.C., and may be examined during regular business hours or obtained by mail. A determination will be made at the time of final rulemaking as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environment Policy Act of 1969.

The primary author of this proposed rulemaking is Dr. C. Kenneth Dodd, Jr., Office of Endangered Species, 202-343-7814.

Regulations Promulgation

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

1. It is proposed to amend § 17.11(i) by adding, in alphabetical order under "Reptiles," the following to the list of animals:

§ 17.11 Endangered and threatened wildlife.

SPECIES			RANGE				
Common name	Scientific name	Population	Known distribution	Portion of range where endangered or threatened	Status	When listed	Special rules
REPTILES							
Tortoise, Bolson	*Gopherus flavomarginatus*	NA	Mexico	Entire	E		N/A

NOTE.—The Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 18, 1978.

ROBERT S. COOK,
Acting Director,
Fish and Wildlife Service.

DEPARTMENT OF LABOR

Office of Pension and Welfare Benefit Programs

EMPLOYEE BENEFIT PLANS

Proposed Revision of Schedule B (Actuarial Information)

AGENCY: Department of Labor.

ACTION: Notice of proposed revision of form.

SUMMARY: This document contains a proposed revision of schedule B (actuarial information) which is attached by certain employee benefit plans to the annual return/report filed on forms of the 5500 series. All employee benefit pension plans which are subject to the minimum funding standards of the Employee Retirement Income Security Act of 1974 (ERISA) must file a completed schedule B as an attachment to their annual return/report.

DATE: Written comments must be received by the Department of Labor (the Department) on or before November 6, 1978.

ADDRESSES: Written comments (preferably six copies) should be addressed to: "Schedule B Comments," Office of Regulatory Standards and Exceptions, Pension and Welfare Benefit Programs, Labor Management Services Administration, U.S. Department of Labor, Room C4526, Washington, D.C. 20216.

All written comments will be available for public inspection at the Public Documents Room, Pension and Welfare Benefit Programs, Department of Labor, Room N4077, 200 Constitution Avenue NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT:

Lottie Lisle, Office of Regulatory Standards and Exceptions, Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4461, Washington, D.C. 20216, 202-523-9211. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Department has under consideration proposed revisions to schedule B (actuarial information) which must be filed as an attachment to the annual return/report (5500 series) by all defined benefit pension plans that are subject to the minimum funding standards of part 3 of title I of ERISA and section 412 of the Internal Revenue Code of 1954, as amended.

Section 103(d) of ERISA generally requires that the annual report filed by a plan subject to the minimum funding standards of ERISA shall include an actuarial statement. The Department has implemented this statutory provision by adopting Schedule B to the annual return/report. The schedule requires the disclosure of, among other things, accumulated funding deficiency, value of plan assets, accrued liabilities, unfunded accrued liabilities, vested benefits (if calculated), and charges and credits to the funding standard account.

Section 103 (d)(6) of ERISA requires that the actuarial statement include the present value of the plan's liabilities for nonforfeitable pension benefits allocated by the termination priority categories set forth in section 4044. Under the authority of section 104(a)(2)(A) of ERISA the Department has waived the requirements of section 103(d)(6) for plan years beginning in 1975, 1976, and 1977. In order to waive this requirement the Secretary must find that the interests of plan participants are not harmed thereby and the expense of compliance with the requirements of section 103(d)(6) is not justified by the needs of the participants, the Pension Benefit Guaranty Corporation and the Department. The Department has tentatively determined that the information which would be submitted in response to questions 5 (d), (e), and (f) of the proposed schedule B would provide sufficient information with respect to plan liabilities. Therefore, if questions 5 (d), (e), and (f) are adopted, the Department contemplates issuing a permanent waiver from the requirements of section 103(d)(6).

Part 3 of ERISA and section 412 of the Code contain minimum funding standards for certain pension plans. In order to satisfy these standards, contributions must generally be made to such plans for each plan year. The amount of these contributions must be determined by using an "actuarial cost method," defined in section 3(31) of ERISA to mean a recognized actuarial technique utilized for establishing the amount and incidence of the annual actuarial cost of pension plan benefits and expenses. Section 3(31) lists several acceptable actuarial costs methods that may be used in determining the annual contributions to be made to a plan, but does not require the plan to use any particular one of these actuarial cost methods in determining annual contributions.

Under the present schedule B, the "accrued liabilities" disclosed on the form generally are calculated using the same actuarial cost method that is used in determining the annual contributions that must be made to the plan under the minimum funding standards. The "value of vested benefits" that is currently disclosed may also be calculated using this same method, or it may be calculated using one of the other acceptable actuarial methods. Both of these figures are usually current to the last actuarial valuation date. Other financial data on the form 5500, however, including the current value of plan assets, are reported current to the end of the plan year.

Because of the lack of a uniform basis for calculations and the difference in timing of certain actuarial and plan financial data, the information provided in schedule B is less useful to interested persons as a measure of the adequacy of the assets of any particular pension plan to meet its benefit obligations. In addition, certain methods have been used to calculate the present value of accrued benefits which are appropriate for funding calculations but may be less appropriate for determining the present value of accrued benefits. Accordingly, in order to achieve uniformity and to provide what the Department tentatively believes is the most appropriate method for calculating the present value of accrued benefits, the revised instructions to the schedule B, if adopted as herein proposed, would require plan actuaries, in calculating the present value of accrued benefits, to use a single method and to have the calculations reflect the condition of the plan as of the end of the plan year.

Other changes are also designed to aid interested persons in determining the benefit obligation of an ongoing pension plan. For example, the revised schedule would require that information with respect to the present value of vested benefits be provided separately for (1) retired participants and beneficiaries receiving payments, and (2) other participants. A further revision would require that the present value of nonvested accrued benefits be disclosed on a historical basis (i.e., based on service performed by, and compensation earned by, employees prior to the end of plan year). The present value of additional accrued benefits due to certain projections would also be disclosed.

It should be noted that under the proposal, the figures that would be required by questions 5 (d), (e), and (f) would be provided for plan years beginning in 1978 only if calculated by the plan actuary. For plan years beginning in 1979, it is proposed that responses to questions 5 (d), (e), and (f) be mandatory for all plans with 100 or more participants. The schedule would be further revised to require the disclosure of actuarial methods and assumptions on the schedule itself. Presently that information is provided as an attachment to the schedule. This revision should not impose any additional cost to plans but should aid the Department in computerizing and analyzing schedule B data.

Proposed Form

Accordingly, it is proposed that pursuant to the authority in sections 103(d) and 109(a), of the Act, schedule B to the annual return/report (5500 series) and the instructions thereto be amended as follows:

SCHEDULE B (Form 5500)
Department of the Treasury
Internal Revenue Service
Department of Labor
Pension and Welfare Benefit Programs
Pension Benefit Guaranty Corporation

Actuarial Information

This schedule is required to be filed under section 104 of the Employee Retirement Income Security Act of 1974, referred to as ERISA, and section 6059(a) of the Internal Revenue Code, referred to as the Code.

▶ Attach to Forms 5500, 5500-C and 5500-K if applicable.

1978
This Form is Open to Public Inspection

For plan year beginning , 1978 and ending , 19

▶ Please complete every applicable item on this form: If an item does not apply, enter "N/A."
▶ Round off amounts to nearest dollar.

Name of plan sponsor as shown on line 1(a) of Form 5500, 5500-C or 5500-K | Employer identification number

Name of plan | Enter three digit plan number ▶ | Yes | No

1 Has a waiver of a funding deficiency for the current plan year been approved by the IRS? . . . . . | | |
If "Yes," attach a copy of the IRS approval letter.
2 Is a waived funding deficiency of a prior plan year being amortized in the current year? . . . . . | | |
3 Have any of the periods of amortization for charges described in section 412(b)(2)(B) of the Code been extended by DOL? . . . . . | | |
If "Yes," attach a copy of the DOL approval of extension letter.
4 (a) Has the shortfall funding method been used? . . . . . | | |
(b) (i) If (a) is "Yes," has the deferral of the amortization of the shortfall gain (loss), beyond the plan year following the year in which the shortfall gain (loss) arose, been elected? . . . . . | | |
(ii) If (a) is "Yes," has the deferral of the amortization of the actuarial gain (loss), beyond the first plan year after valuation, been elected? . . . . . | | |

5 Operational information: (a) Enter most recent actuarial valuation date ▶
(b) Enter date(s) and amount of contributions received this plan year for prior plan years and not previously reported:
Date(s) ▶ , Amount ▶
(c) Current value of the assets accumulated in the plan as of the end of the plan year . . . . . |
(d) Present value of vested benefits as of the end of plan year: [1]
(i) For retired participants and beneficiaries receiving payments . . . . . |
(ii) For other participants . . . . . |
(iii) Total . . . . . |
(e) Present value of nonvested accrued benefits (historical) as of end of plan year [1] . . . . . |
(f) Present value of additional accrued benefits (projected) as of end of plan year [1] . . . . . |
(g) Number of persons covered (included in the most recent actuarial valuation): (i) Active participants |
(ii) Terminated participants with vested benefits . . . . . |
(iii) Retired participants and beneficiaries of deceased participants . . . . . |

6 Contributions made to the plan for the plan year by employer(s) and employees:

(a) Month	Year	(b) Amount paid by employer	(c) Amount paid by employees	(a) Month	Year	(b) Amount paid by employer	(c) Amount paid by employees
				Total			

7 Funding standard account and other information:
(a) Accrued liabilities as determined for funding standard account as of (enter date) ▶ |
(b) Value of assets as determined for funding standard account as of (enter date) ▶ |
(c) (i) Actuarial gains or (losses) for period ending ▶ |
(ii) Shortfall gains or (losses) for period ending ▶ |
(d) Accumulated funding deficiency at end of plan year (amount of contribution certified by the actuary as necessary to reduce the funding deficiency to zero), from 8(m) or 9(g) . . . . . |

Statement by Enrolled Actuary (see instructions before signing):

To the best of my knowledge, the information supplied in this schedule and on the accompanying statement, if any, is complete and accurate, and in my opinion the assumptions used in the aggregate (a) are reasonably related to the experience of the plan and to reasonable expectations, and (b) represent my best estimate of anticipated experience under the plan.

Pension Benefit Guaranty Corporation

1978 Instructions for Schedule B (Form 5500)

Actuarial Information

(Code references are to the Internal Revenue Code. ERISA refers to the Employee Retirement Income Security Act of 1974.)

General Intructions

Who Must File.—The employer or plan administrator of a defined benefit plan that is subject to the minimum funding standards (see section 412 of the Code and Part 3 of Title I of ERISA) must file this schedule as an attachment to the annual return/report filed for plan years beginning on or after January 1, 1976. Plans maintained on January 1, 1974, pursuant to one or more collective bargaining agreements entered into before September 2, 1974, are not subject to the minimum funding standards for plan years beginning before the earlier of the termination of the collective bargaining agreement(s) or January 1, 1981.

For split-funded plans, the costs and contributions reported on Schedule B should include those relating to both trust funds and insurance carriers.

Specific Instructions

(References are to line items on the form.)

4(a). A collectively bargained plan only may elect the shortfall funding method (see regulations under section 412 of the Code). Advance approval from the IRS of the election of the shortfall method of funding is NOT required if it is first adopted on or before the later of (i) the first plan year to which section 412 of the Code applies or (ii) the last plan year commencing before December 31, 1980. However, advance approval from IRS is required, if adopted at a later time or if discontinued.

4(b). Advance approval from IRS of the election to defer the amortization of the shortfall gain (loss) and/or the amortization of the actuarial gain (loss) is required for a plan year, subsequent to the first plan year to which the shortfall method applies. Advance approval from IRS is required for discontinuance.

5(a). The valuation for a plan year may be as of any date in the year, including the first and last. Valuations must be performed within the period specified by section 103(d) of ERISA and section 6059(a) of the Code.

5(b). Not applicable to the first plan year to which the minimum funding standards apply.

5(c). Enter current value of total assets as of the end of the plan year, as shown in item 13 on Form 5500, 5500–C or 5500–K.

5(d) through (f). Schedule B for plan years beginning in 1979 will require that the information indicated in 5(d), (e) and (f) be completed for all plans with 100 or more participants, in accordance with these instructions. Plans with fewer than 100 participants are to supply these figures if calculated. For plan years beginning in 1978, the information is required only to the extent it has been calculated. If the value indicated in item (d) has been calculated as of the end of the plan year beginning in 1978, it should be entered regardless of whether it has been determined according to these instructions.

Each separate actuarial assumption used in calculating the value of accrued benefits should explicitly reflect the expectations applicable to the organization or industry involved, on the basis of an ongoing—rather than terminating—plan. For example, the interest rate assumption should reflect the expected investment return on plan assets over the expected benefit payout period. The actuary shall take into account rates of early retirement and the plan's early retirement provisions as they relate to the accrued benefits, where these would significantly affect the results. See instructions for item 11 for further requirements concerning actuarial assumptions.

Where significant, the value of accrued benefits shall be increased by the value of any subsidized early retirement benefits, disability benefits, and death benefits which are related to the accrued benefit. The value of accrued benefits should also be increased by the value of a cost-of-living clause if such a clause is currently part of the benefit formula.

The values should be determined as of the end of the plan year; projected estimates as of the end of the plan year based upon the most recent actuarial valuation may be used, if the actuary believes this provides a reasonable estimate of values as of the end of the plan year. If a projection is used, no withdrawals and no new entrants to the workforce should be assumed without supporting data for the projection period. Values should reflect all amendments adopted or finally agreed to during the plan year.

In determining whether estimates from the last valuation date to the end of the plan year are reasonable the actuary should consider:

(i) any indication of a need to make significant changes in the actuarial assumptions (e.g. change in the demographic composition of the group);
(ii) any plan amendment since the last valuation;
(iii) a full or partial termination of the plan;
(iv) a merger with another plan;
(v) a spin-off.

Omit from items 5(d), 5(e) and 5(f) liabilities fully funded by annuity and insurance contracts other than any contract funds not allocated to individuals.

5(d). Include the value of all vested accrued benefits. 5(d)(i) should include the value of vested benefits for all retired participants. 5(d)(ii) should include all value of vested benefits for other participants. 5(d)(iii) is the sum of 5(d)(i) and (ii). Withdrawal rates should not be incorporated in these calculations.

5(e). Include the value of the excess, for all participants, of the value of all accrued benefits over the value of their vested benefits included in (d). The term "accrued benefit" means the individual's accrued benefit determined under the plan as required by section 204 of ERISA. Withdrawal rates should normally be incorporated in these calculations.

5(f). This line may be omitted if benefits attributable to service accrued to date will not vary if pay or service changes, and if the plan does not provide (i) uninsured benefits related to death or disability, or (ii) early retirement benefits substantially greater than actuarially equivalent benefits.

Include the value of the excess, for all active participants, of the increased value of all accrued benefits as defined in (d) and (e) due to certain projections. The calculation is identical to that shown in items 5(d) and (e), modified to incorporate a projection of salary increases and increases in Social Security covered earnings or benefits (but not future amendments to Social Security law) where the accrued normal retirement benefit is contingent upon an unknown level of (i) future compensation and/or (ii) Social Security covered earnings or benefits, and further modified to reflect any increased value of subsidized early retirement, death and disability benefits over the figures included in 5(d) and (e) calculations.

6. Show all employer and employee contributions for the plan year, and em-

9(a). If the entry age normal cost method was not used to determine the entries in item 8, the alternative mini-

11(c). Enter assumption as to expected interest rate (investment return). If the assumed rate varies with the year,

Signed at Washington, D.C., this 20th day of September 1978.

J. VERNON BALLARD,

6. Show all employer and employee contributions for the plan year, and employer contributions made not later than 2½ months (or such later date allowed under section 412(c)(10) of the Code and section 302(c)(10) of ERISA) after the end of the plan year.

7(a). If the aggregate cost or frozen initial liability method is used, enter "N/A".

7(b). Enter the value of assets determined in accordance with section 412(c)(2) of the Code or 302(c)(2) of ERISA.

7(c)(i). If the aggregate cost or frozen initial liability method is used, enter "N/A".

7(c)(ii). For the methods to be used to determine the shortfall gain (loss) see the regulations under section 412 of the Code.

7(d). Insert amount from item 8(m). However, if the alternative method is elected, and item 9(g) is smaller than item 8(m), enter the amount from item 9(g). File Form 5330 with the Internal Revenue Service to pay the 5% excise tax on the funding deficiency.

Statement by Enrolled Actuary

In lieu of signing the statement, an enrolled actuary may attach a signed statement containing the name, address, enrollment number, telephone number and the actuary's opinion that the assumptions used in preparing Schedule B are in the aggregate reasonably related to the experience of the plan and to reasonable expectations, and represent his or her best estimate of anticipated experience under the plan and to the best of his or her knowledge the report is complete and accurate. In addition, the actuary may offer any other comments related to the information contained in Schedule B.

8. Under the shortfall method of funding, the Normal Cost in the funding standard account, is the charge per unit of production (or per unit of service) multiplied by the actual number of units of production (or units of service) which occurred during the plan year. Each amortization installment in the funding standard account is similarly calculated. For a plan maintained by more than one employer, the amortization of the shortfall gain (loss) and the actuarial gain (loss) may be deferred. See regulations under section 412 of the Code.

8(b). If no valuation was made for the current year, enter the normal cost calculated in the most recent actuarial valuation, or the estimated cost for the current year based on such valuation. If amounts are not as of the date of the most recent actuarial valuation, indicate in the Statement of Actuarial Assumptions and Methods how the amounts shown were determined.

9(a). If the entry age normal cost method was not used to determine the entries in item 8, the alternative minimum funding standard account may not be used.

9(c). The value of accrued benefits should exclude benefits accrued for the current plan year. The market value of assets should be reduced by the amount of any contributions for the current plan year.

10. Enter only the primary method used. If the plan uses one actuarial cost method in one year as the basis of establishing an accrued liability for use under the frozen initial liability method in subsequent years, answer as if the frozen initial liability method were used in all years.

11. Complete all blanks. Enter N/A if not applicable. For the assumptions used for calculating the figures in 5(d) through (f), each assumption must be individually reasonable. If the assumptions for the calculation of these figures differ from those used for calculating the figures in questions 7, 8, and 9, explain, in the attached Statement of Actuarial Assumptions, the reasons for the differences and an estimate of the approximate effect.

11(a). Check "Yes" if rates in contract were used (e.g. purchase rates at retirement).

11(b). Enter Code as follows:

Table	Code
1937 Standard Annuity	1
a–1949 Table	2
Progressive Annuity Table	3
1951 Group Annuity	4
1971 Group Annuity Mortality	5
1971 Individual Annuity Mortality	6
UP–1984	7
Other	8
None	9

Where an indicated table consists of separate tables for males and females, add F to the female table (e.g. 4F). When a projection is used with a table, follow the code with "P" and the year of projection (omit year if projection unrelated to a single calendar year); the identity of the projection scale should be omitted. When an age set-back or set-forward is used, indicate with "–" or "+" and the years. For example, if for females the 1951 Group Annuity Table with Projection C to 1971 is used with a 5-year set-back, enter "4P71–5." If the table is not one of those listed, enter "8" with no further notation. If the valuation assumes a maturity value to provide the post-retirement income without separately identifying the mortality, interest and expense elements, under "post-retirement" enter on 11(b) the value of $1.00 of monthly pension beginning at the age shown on 11(d) assuming the normal form of annuity for an unmarried person; in this case enter "N/A" on 11(c) and 11(e).

11(c). Enter assumption as to expected interest rate (investment return). If the assumed rate varies with the year, enter the weighted average of the assumed rate for 20 years following the valuation date.

11(d). If each participant is assumed to retire at his normal retirement age, enter "NRA"; otherwise enter the assumed retirement age. If the valuation uses rates of retirement at various ages, enter the estimated average whole age at which participants are assumed to retire.

11(e). If there is no expense loading, enter 0. If there is a single expense loading not separately identified as pre-retirement or post-retirement, enter it under pre-retirement and enter "N/A" under post-retirement. Where expenses are assumed other than as a percent of plan costs or liabilities, enter the assumed expense as a percent of the calculated normal cost.

11(f). Enter rates to nearest 0.1%. For value of accrued benefits, withdrawal rates should not be used for vested benefits and nonvested benefits (historical); rate shown will be that used for nonvested benefits (projected). If select and ultimate rates which vary with both age and years of service are used, enter rates for a new participant at the age shown and enter "S" before the rate.

11(g). Enter salary increase rate for the age indicated to the nearest 0.1%. For value of accrued benefits, salary increase assumption is only to be used for projected total accrued benefits, and the assumption used for that purpose should be indicated.

11(h). For plans with social security offset provisions, indicate whether an assumption has been made concerning projected increases in social security benefits related to increases in the taxable wage base and/or the Consumer Price Index.

Statement of Actuarial Assumptions and Methods

Attach a statement of actuarial assumptions used (if not fully described by item 11), actuarial methods used to determine (i) the normal cost and liabilities shown in items 5, 7, 8 and 9 (if not fully described by item 10) and (ii) the value of assets shown on line 7(b). The statement is to include a summary of the principal eligibility and benefit provisions upon which the valuation was based, an identification of benefits not included in the calculation, and other facts, such as any change in actuarial assumptions or cost methods and justifications for any such change. Include also such other information, if any, needed to fully and fairly disclose the actuarial position of the plan.

☆ U.S. GOVERNMENT PRINTING OFFICE : 1978—O-263-518

Signed at Washington, D.C., this 20th day of September 1978.

J. VERNON BALLARD,
Deputy Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration.
